Hong Kong Exchanges and Clearing Limited, The Stock Exchange of Hong Kong Limited and Hong Kong Securities Clearing Company Limited take no responsibility for the contents of this prospectus, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this prospectus.

A copy of this prospectus, having attached thereto the documents specified in "Appendix V — Documents Delivered to the Registrar of Companies and Available on Display", has been registered by the Registrar of Companies in Hong Kong as required by Section 342C of the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong). The Securities and Futures Commission and the Registrar of Companies in Hong Kong take no responsibility as to the contents of this prospectus or any other documents referred to above.

The Offer Price is expected to be determined by agreement between the Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters), and the Company on the Price Determination Date, which is expected to be on or before Monday, October 26, 2026 (Hong Kong time) and, in any event, not later than 12:00 noon on Monday, October 26, 2026 (Hong Kong time). The Offer Price will not be more than HK$93.80 per Offer Share. If, for any reason, the Offer Price is not agreed by 12:00 noon on Monday, October 26, 2026 (Hong Kong time) between the Sponsor-Overall Coordinators (for itself and on behalf of the Underwriters) and the Company, the Global Offering will not proceed and will lapse.

Applicants for Hong Kong Offer Shares may be required to pay, on application (subject to application channels), the maximum Offer Price of HK$93.80 for each Hong Kong Offer Share together with a brokerage fee of 1.0%, a SFC transaction levy of 0.0027%, a Stock Exchange trading fee of 0.00565% and an AFRC transaction levy of 0.00015%, subject to refund if the Offer Price as finally determined is less than HK$93.80.

The Sponsor-Overall Coordinators, for themselves and on behalf of the Underwriters, may, where considered appropriate and with the Company's consent, reduce the number of Offer Shares being offered under the Global Offering at any time prior to the morning of the last day for lodging applications under the Hong Kong Public Offering. In such case, notices of the reduction in the number of Offer Shares being offered under the Global Offering will be published on the website of the Stock Exchange at www.hkexnews.hk and on the website of the Company at www.dsbj.com as soon as practicable following the decision to make such reduction, and in any event not later than the morning of the last day for lodging applications under the Hong Kong Public Offering. See "Structure of the Global Offering" and "How to Apply for Hong Kong Offer Shares" sections for further details.

Prospective investors of the Hong Kong Offer Shares should note that the obligations of the Hong Kong Underwriters under the Hong Kong Underwriting Agreement are subject to termination by Sponsor-Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) if certain grounds arise prior to 8:00 a.m. on the Listing Date. See "Underwriting" section for further details.

The Offer Shares have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States and may not be offered, sold, pledged or otherwise transferred within the United States, except pursuant to an available exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and in accordance with any applicable state securities laws in the United States. The Offer Shares may only be offered and sold (a) in the United States to QIBs in reliance on Rule 144A or another available exemption from registration requirements under the U.S. Securities Act, and (b) outside the United States in offshore transactions in reliance on Regulation S. No public offering of the Offer Shares will be made in the United States.

ATTENTION

The Company has adopted a fully electronic application process for the Hong Kong Public Offering. The Company will not provide printed copies of this prospectus to the public in relation to the Hong Kong Public Offering.

This prospectus is available at the website of the Stock Exchange at **www.hkexnews.hk** and the Company's website at **www.dsbj.com**. If you require a printed copy of this prospectus, you may download and print from the website addresses above.

October 20, 2026

IMPORTANT

IMPORTANT NOTICE TO INVESTORS:

FULLY ELECTRONIC APPLICATION PROCESS

We have adopted a fully electronic application process for the Hong Kong Public Offering. We will not provide printed copies of this prospectus to the public in relation to the Hong Kong Public Offering.

This prospectus is available at the website of the Hong Kong Stock Exchange at www.hkexnews.hk under the "*HKEXnews* > *New Listings* > *New Listing Information*" section, and our website at www.dsbj.com/. If you require a printed copy of this prospectus, you may download and print from the website addresses above.

To apply for the Hong Kong Offer Shares, you may:

(1) apply online through the **HK eIPO White Form** service at **www.hkeipo.hk**; or

(2) apply electronically through the **HKSCC EIPO** channel and cause HKSCC Nominees to apply on your behalf by instructing your broker or custodian who is a HKSCC Participant to give electronic application instructions via HKSCC's FINI system to apply for the Hong Kong Offer Shares on your behalf.

We will not provide any physical channels to accept any application for the Hong Kong Offer Shares by the public. The contents of the electronic version of this prospectus are identical to the printed prospectus as registered with the Registrar of Companies in Hong Kong pursuant to Section 342C of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

If you are an **intermediary**, **broker** or **agent**, please remind your customers, clients or principals, as applicable, that this prospectus is available online at the website addresses above.

Please refer to the section headed "How to Apply for Hong Kong Offer Shares" for further details of the procedures through which you can apply for the Hong Kong Offer Shares electronically.

Your application through the **HK eIPO White Form** service or the HKSCC EIPO channel must be for a minimum of 100 Hong Kong Offer Shares and in one of the numbers set out in the table.

If you are applying through the **HK eIPO White Form** service, you may refer to the table below for the amount payable for the number of Hong Kong Offer Shares you have selected. You must pay the respective maximum amount payable on application in full upon application for Hong Kong Offer Shares.

If you are applying through the HKSCC EIPO channel, you are required to pre-fund your application based on the amount specified by your **broker** or **custodian**, as determined based on the applicable laws and regulations in Hong Kong.

(1) Maximum number of Hong Kong Offer Shares you may apply for and this is 50% of the Hong Kong Offer Shares initially offered.

(2) The amount payable is inclusive of brokerage, SFC transaction levy, the Stock Exchange trading fee and AFRC transaction levy. If your application is successful, brokerage will be paid to the Exchange Participants (as defined in the Listing Rules) or to the **HK eIPO White Form** Service Provider (for applications made through the application channel of the **HK eIPO White Form** service) while the SFC transaction levy, the Stock Exchange trading fee and the AFRC transaction levy will be paid to the SFC, the Stock Exchange and the AFRC, respectively.

EXPECTED TIMETABLE

*If there is any change to the expected timetable of the Hong Kong Public Offering, we will issue an announcement to be published on the website of the Hong Kong Stock Exchange at **www.hkexnews.hk** and our website at **www.dsbj.com**.*

Hong Kong Public Offering commences	9:00 a.m. on Tuesday, October 20, 2026
Latest time to complete applications under the **HK eIPO White Form** service through the designated website at **www.hkeipo.hk**(2)	11:30 a.m. on Friday, October 23, 2026
Application lists open(3)	11:45 a.m. on Friday, October 23, 2026
Latest time (a) to complete payment of **HK eIPO White Form** applications by effecting internet banking transfer(s) or PPS payment transfer(s) and (b) give **electronic application instructions** to HKSCC(4)	12:00 noon on Friday, October 23, 2026
If you are instructing your **broker** or **custodian** who is a HKSCC Participant will submit **electronic application instructions** on your behalf through HKSCC's FINI system in accordance with your instruction, you are advised to contact your broker or custodian for the earliest and latest time for giving such instructions, as this may vary by broker or custodian.	
Application lists close(3)	12:00 noon on Friday, October 23, 2026
Expected Price Determination Date (5)	at or before 12:00 noon on Monday, October 26, 2026
Announcement of:	
• the final Offer Price;	
• the level of applications of the Hong Kong Public Offering;	
• the level of indications of interest in the International Offering; and	
• the basis of allocation of the Hong Kong Offer Shares to be published on the website of the Hong Kong Stock Exchange at **www.hkexnews.hk** and our website at **www.dsbj.com** (6)	at or before 11:00 p.m. on Tuesday, October 27, 2026

The results of allocations in the Hong Kong Public Offering (with successful applicants' identification document numbers, where appropriate) to be made available through a variety of channels as described in the section headed "How to Apply for Hong Kong Offer Shares — Publication of Results," including:

• on the website of the Hong Kong Stock Exchange at **www.hkexnews.hk** and our website at **www.dsbj.com**(6) respectively	at or before 11:00 p.m. on Tuesday, October 27, 2026

• on the designated results of allocation website at **www.hkeipo.hk/IPOResult** (alternatively: **www.tricor.com.hk/ipo/result**) with a "search by ID" function	from 11:00 p.m. on Tuesday, October 27, 2026 to 12:00 midnight on Monday, November 2, 2026
• from the allocation results telephone enquiry line by calling +852 3691 8488 between 9:00 a.m. and 6:00 p.m.	from Wednesday, October 28, 2026 to Monday, November 2, 2026 (on a Business Day) (excluding Saturday, Sunday and public holidays in Hong Kong)
Despatch of H Share certificates in respect of wholly or partially successful applications, or deposit of H Share certificate into CCASS, on or before[7]	Tuesday, October 27, 2026
Despatch of **HK eIPO White Form** e-Auto Refund payment instructions and refund cheques (if applicable) in respect of wholly or partially successful applications if the final Offer Price is less than the maximum Offer Price per Offer Share initially paid on application (if applicable) or wholly or partially unsuccessful applications on or before[8]	Wednesday, October 28, 2026
Dealings in our H Shares on the Hong Kong Stock Exchange expected to commence at	9:00 a.m. on Wednesday, October 28, 2026

Notes:

(1) All dates and times refer to Hong Kong local time and dates unless otherwise stated.

(2) You will not be permitted to submit your application through the designated website at **www.hkeipo.hk** after 11:30 a.m. on the last day for making applications. If you have already submitted your application and obtained an application reference number from the designated website before 11:30 a.m., you will be permitted to continue the application process (by completing payment of application monies) until 12:00 noon on the last day for making applications, when the application lists close.

(3) If there is a "black" rainstorm warning, a tropical cyclone warning signal number 8 or above and/or Extreme Conditions in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon on Friday, October 23, 2026 the application lists will not open or close on that day. See the section headed "How to Apply for Hong Kong Offer Shares — Severe Weather Arrangements" for further details.

(4) If you instruct your broker or custodian who is an HKSCC Participant to give **electronic application instructions** via FINI to apply for the Hong Kong Offer Shares on your behalf, you should contact your broker or custodian for the latest time for giving such instructions which may be different from the latest time as stated above.

(5) The Price Determination Date is expected to be on or before Monday, October 26, 2026 (Hong Kong time) and, in any event, not later than 12:00 noon on Monday, October 26, 2026 (Hong Kong time). If, for any reason, the Offer Price is not agreed by 12:00 noon on Monday, October 26, 2026 (Hong Kong time), the Global Offering will not proceed and will lapse.

(6) None of the websites or any of the information contained on the websites forms part of this prospectus.

(7) The H Share certificates will only become valid evidence of title at 8:00 a.m. on the Listing Date, which is expected to be on or around Wednesday, October 28, 2026 provided that the Global Offering has become unconditional in all respects. Investors who trade our H Shares on the basis of publicly available allocation details before the receipt of H Share certificates or before the H Share certificates become valid evidence of title do so entirely at their own risk.

(8) Applicants being individuals who are eligible for personal collection may not authorize any other person to collect on their behalf. If you are a corporate applicant which is eligible for personal collection, your authorized representative must bear a letter of authorization from your corporation stamped with your corporation's chop. Both individuals and authorized representatives must produce evidence of identity acceptable to our H Share Registrar at the time of collection.

(9) Applicants who apply for Hong Kong Offer Shares by giving electronic application instructions to HKSCC via HKSCC's FINI system should refer to "How to Apply for Hong Kong Offer Shares - A. Application for Hong Kong Offer Shares" in this prospectus.

Any uncollected H Share certificates will be dispatched by ordinary post, at the applicants' risk, to the addresses specified in the relevant applications.

HK eIPO White Form e-Auto Refund payment instructions/refund checks will be issued for the applicants who have applied through **HK eIPO White Form** service in respect of wholly or partially unsuccessful applications and in respect of wholly or partially successful applications pursuant to the Hong Kong Public Offering if the final Offer Price is less than the maximum Offer Price payable per Offer Share on application. Part of the applicant's identification document number, or, if the application is made by joint applicants, part of the identification document number of the first-named applicant, provided by the applicant(s) may be printed on the refund check, if any. Such data would also be transferred to a third party for refund purposes. Banks may require verification of an applicant's identification document number before encashment of the refund checks. Inaccurate completion of an applicant's identification document number may invalidate or delay encashment of the refund checks.

Applicants who have applied through **HK eIPO White Form** service and paid their applications monies through single bank accounts may have refund monies (if any) dispatched to the bank account in the form of **HK eIPO White Form** e-Auto Refund payment instructions. Applicants who have applied through **HK eIPO White Form** service and paid their application monies through multiple bank accounts may have refund monies (if any) despatched to the address as specified in their application instructions in the form of refund check(s) in favor of the applicant (or, in the case of joint applications, the first-named applicant) by ordinary post at their own risk.

For applicants who have applied for Hong Kong Offer Shares through the HKSCC EIPO channel, H Share certificate(s) will be issued in the name of HKSCC Nominees, deposited into CCASS and credited to their designated HKSCC Participant's stock account.

For applicants who have applied through HKSCC EIPO channel, their broker or custodian will arrange refund to their designated bank account subject to the arrangement between them and their broker or custodian.

Further information is set out in the sections headed "How to Apply for Hong Kong Offer Shares — Despatch/Collection of H Share Certificates and Refund of Application Monies".

The above expected timetable is a summary only. You should read carefully the sections headed "Underwriting", "Structure of the Global Offering" and "How to Apply for Hong Kong Offer Shares" for details relating to the structure of the Global Offering and the conditions and procedures for application for the Hong Kong Offer Shares.

This summary aims to give you an overview of the information contained in this prospectus. As this is a summary, it does not contain all the information that may be important to you. You should read this prospectus in its entirety before you decide to invest in the Offer Shares.

There are risks associated with any investment. Some of the particular risks in investing in the Offer Shares are set out in "Risk Factors" in this prospectus. You should read that section carefully before you decide to invest in the Offer Shares.

OVERVIEW

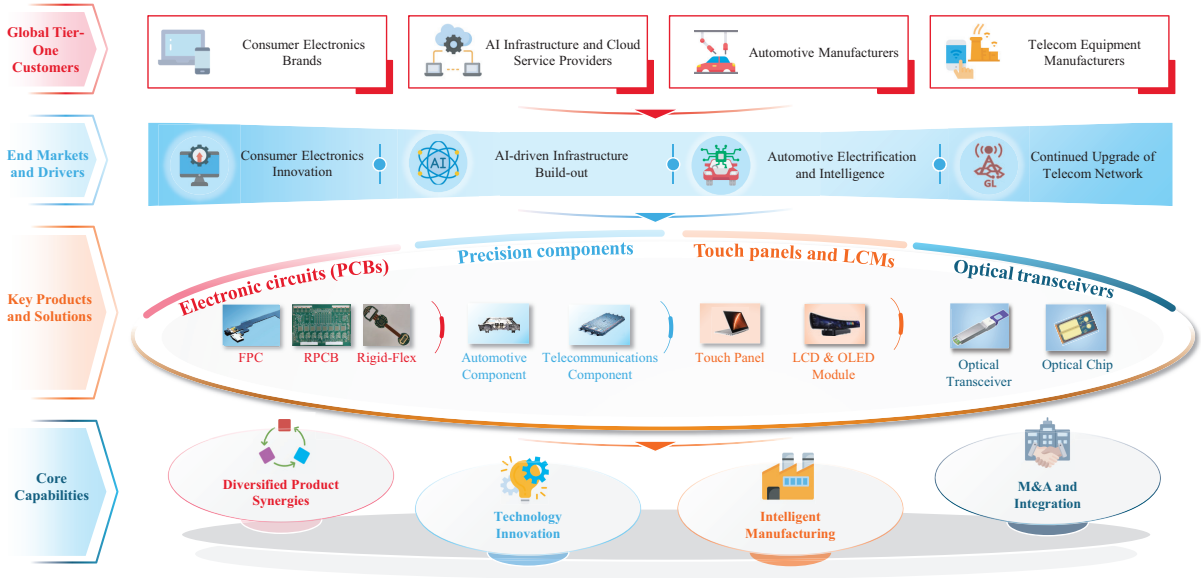

We are a manufacturer primarily focused on printed circuit board ("**PCBs**"), precision components, touch panels and liquid crystal modules ("**LCMs**") and optical transceivers, with a global presence and operating footprint. Our products are widely used in consumer electronics, automobiles, data centers, telecommunications equipment and industrial control devices, ultimately enabling the connection of people, devices and infrastructure. In September 2025, we entered the optical transceiver business through our acquisition of Source Photonics, thereby expanding our product portfolio to include optical transceivers.

According to China Insights Consultancy ("**CIC**") and by revenue in 2025, we are ranked as the third-largest PCB supplier in the US$85.2 billion global PCB market, and we ranked seventh amongst global optical transceiver suppliers with a market share of 2.9% of the US$24.5 billion global optical transceiver market based on the revenue of Source Photonics in 2025. Our PCB, precision component, touch panel and LCM products serve the consumer electronics, automotive and telecommunications end markets. In parallel, our optical transceiver and AI PCB products targeting the data center end market represent our primary growth drivers, with the demand driven by the accelerating global build-out of AI-related infrastructure.

We are a long-standing partner to four of the world's top five consumer electronics brands, as well as the top five electric vehicle ("**EV**") manufacturers and the top five cloud service providers. Our close customer collaboration, intelligent manufacturing capabilities and global footprint have proven critical to meeting our customers' stringent requirements to ensure product quality, delivery efficiency and supply chain resilience.

Our Products

Our products include PCBs, precision components, touch panels and LCMs and optical transceivers. We provide distinctive and comprehensive solutions by leveraging technological innovation and advanced manufacturing and creating synergies across product, R&D, technology, supply chain and sales. The following highlights our main products and solutions and their respective applications.

- *PCBs*: Our PCB products include flexible printed circuit ("**FPC**"), rigid printed circuit board ("**RPCB**") and Rigid-Flex for consumer electronics, automotive, data centers and AI servers and telecommunications equipment. We serve leading global consumer electronics manufacturers, automakers and cloud service providers. Through these partnerships, we have built deep technical and process capabilities that reinforce our competitive advantage.
- *Precision Components*: Our precision components primarily include automotive components and telecommunications equipment components. We have strong capabilities in precision components for the automotive and telecommunications industries. Over the past decade, we have extended our R&D and manufacturing capabilities developed in telecommunications components into automotive, broadening downstream applications and establishing long-term partnerships with major automakers worldwide and laying a solid foundation for further growth.
- *Touch Panels and LCMs*: We offer touch panels and liquid crystal display ("**LCD**") and organic lightemitting diode ("**OLED**") modules used in automobiles, smartphones, tablets, laptops, industrial control devices and smart home applications. Building on years of experience in consumer touch displays, we expanded into in-vehicle displays in 2023, where our proven technology and commercial execution continue to provide a strong platform for growth.
- *Optical Transceivers*: In September 2025, we entered the optical transceiver business through our acquisition of Source Photonics, a global provider of optical transceivers. Through the acquisition, we have gained in-house optical chip capabilities centered on high-speed electro-absorption modulated laser ("**EML**") chips with transmission rates from 2.5G to 200G. We currently focus on commercializing high-end 100G and 200G PAM4 EML chips, while advancing the development of next-generation technologies such as 400G EML chips and continuous wave-based ("**CW-based**") silicon photonics solution. In addition, we offer optical transceivers from 10G to 1.6T and are developing next-generation transceivers of 3.2T or higher.

Our Strategic M&A

In parallel with our organic growth, we pursue strategic investments and acquisitions from time to time to broaden our product portfolio, enhance our core technologies and expand our global reach. In particular, we completed the following acquisitions in the second half of 2025:

- *Source Photonics.* Source Photonics is an optical transceiver supplier that operates principally through its key R&D base in China and its manufacturing facilities in China and Thailand. Following the completion of our acquisition of a 97.48% equity interest in Source Photonics in September 2025, optical transceivers became a new business segment of our Group. This segment accounted for 3.6% and 19.2% of our revenue in 2025 and the six months ended June 30, 2026, respectively. It recorded gross profit margins of 36.8% and 39.2% for the same periods, supporting our overall profitability. The acquisition strengthened our capabilities in optical transceivers as well as the broader AI infrastructure markets.
- *Groupe Mécanique Découpage ("**GMD**").* GMD is a precision component supplier principally engaged in the manufacture and sale of automotive components in Europe. We acquired 100% of GMD in October 2025. Following the acquisition, the sales volume of our automotive components increased from 79.4 million units in the six months ended June 30, 2025 to 161.3 million units in the six months ended June 30, 2026. Over the same periods, their average selling price increased from RMB25.7 to RMB38.6 per unit. These increases drove the revenue contribution of our automotive components from 12.0% to 22.4% of our total revenue over the same periods. The acquisition enhanced our precision component capabilities and extended our operating footprint into Europe, enabling us to better serve international automotive and industrial customers.

These transactions demonstrate our track record of executing strategic investments, integrating operations and supply chains, and realizing commercial and technological synergies across our global platform.

RESEARCH AND DEVELOPMENT

We consistently invest in research and development to expand our product portfolio, seize new market opportunities and strengthen our competitive edge in meeting the demands of leading global brands.

Due to the customized nature of our products, our R&D is often carried out in close collaboration with customers based on their customization requirements and end product designs. We have enhanced our R&D efforts by advancing new materials, design innovations and process technologies. These advancements have resulted in a series of significant breakthroughs, earning us the trust of leading global companies as a reliable and innovative supplier.

As of June 30, 2026, our R&D personnel accounted for approximately 11.3% of our total workforce, placing us in a competitive position in the global PCB industry and reflecting our strong focus on innovation. We continuously digitalize and automate our facilities to push the limits of advanced processes in intelligent manufacturing and achieve organic growth.

Our Customers

Our customers are mainly global brands in the consumer electronics, telecommunications and automotive industries. In 2023, 2024, 2025, and the six months ended June 30, 2026, sales to our five largest customers in each year/period amounted to RMB24,734.5 million, RMB26,122.3 million, RMB25,814.1 million and RMB15,031.7 million, accounting for 73.5%, 71.0%, 64.4% and 54.1% of our total revenue in the respective years/periods, and sales to Customer A, our largest customer in each year/period, amounted to RMB18,781.2 million, RMB18,857.6 million, RMB18,642.8 million and RMB8,360.2 million, accounting for 55.8%, 51.3%, 46.5% and 30.1% of our total revenue in the respective years/periods. See "Business — Sales and Marketing — Our Customers" for details.

Relationship with Customer A

Our strategic relationship with Customer A began over 10 years ago and has grown significantly since our acquisition of MFLEX in 2016, which established us as a leading global supplier of FPCs. Customer A, a global leader in consumer electronics, uses our FPC products to support the development of their high-performance devices, such as smartphones, tablets and wearables. During the Track Record Period and up to the Latest Practicable Date, there were no material incidents of failure to renew the relevant sales agreements with Customer A, or any material reduction, delay or cancellation of orders from Customer A. Going forward, we believe the likelihood of any material adverse change in or termination of our business relationship with Customer A is low because of the long-term, stable nature of our relationship and the extensive and rigorous supplier approval and qualification process that Customer A requires.

According to CIC, the consumer electronics market is highly concentrated, particularly among top-tier brands. As a result, suppliers to premium consumer electronics brands often have a concentrated customer base. Over the years, we have been actively involved in the product development of Customer A's signature products, providing critical technological solutions that align with their innovation and functionality requirements. Our proven ability to consistently meet Customer A's stringent standards for quality, performance and timely delivery has established us as a trusted partner in their supply chain.

In the meantime, to mitigate concentration risk and reduce reliance on any single customer, we have been focusing on expanding our customer base and our product portfolio and expanding vertically along the value chain. As a result of such measures, while the absolute amount of our sales to Customer A remained stable across years/periods during the Track Record Period, showing the stability of our relationship with Customer A, the revenue from customers other than Customer A amounted to RMB14,870.0 million, RMB17,912.8 million, RMB 21,482.0 million and RMB19,437.5 million in the respective years/periods, accounting for 44.2%, 48.7%, 53.5% and 69.9% of our total revenue in the respective years/periods. See "Business — Sales and Marketing — Customer Diversification" for details.

Going forward, we believe the likelihood of any material adverse change in or termination of our business relationship with Customer A is low notwithstanding reports that Customer A would shift the

production of certain products from the Chinese mainland to other countries. We believe this trend is unlikely to result in a material adverse change to our relationship with Customer A, primarily because our sales are driven by Customer A's product demand and our ability to meet its specifications and delivery requirements, rather than the geographical location of final assembly.

During the Track Record Period, the proportion of our shipments to Customer A by revenue delivered to manufacturing locations outside the Chinese mainland has increased steadily, demonstrating our ability to support Customer A's evolving supply chain footprint, and we have not incurred material additional costs or experienced material disruption in fulfilling Customer A's orders as a result of changes in production location. See "Business — Sales and Marketing — Our Customers — Relationship with Certain Top Customers" for further detail.

Our Suppliers

Our suppliers are mainly suppliers of raw materials and equipment. We have established and maintain stable and long-term relationships with these major suppliers. In 2023, 2024, 2025 and the six months ended June 30, 2026, purchases from our five largest suppliers in each year/period amounted to RMB5,975.4 million, RMB6,214.4 million, RMB5,737.5 million and RMB3,567.7 million, accounting for 25.8%, 26.1%, 21.9% and 18.5% of our total purchases in the respective years/periods. In 2023, 2024, 2025 and the six months ended June 30, 2026, purchases from our largest supplier amounted to RMB2,034.5 million, RMB1,674.4 million, RMB1,463.8 million and RMB1,398.6 million, accounting for 8.8%, 7.0%, 5.6% and 7.3% of our total purchases in the respective years/periods. See "Business — Supply Chain — Major Suppliers" for further details.

PRODUCTION AND MANUFACTURING

We have been focusing on expanding our global manufacturing presence whilst enhancing regionalized operations and service capabilities that address our customers' evolving needs. Our recent acquisition of GMD, a European automotive components supplier, further exemplifies this strategy. As of the Latest Practicable Date, we operate production facilities across 14 countries and regions in Asia, North America, Europe and Africa with overseas employees representing approximately 19.1% of our total headcount and 83.2% of our revenue coming from outside the Chinese mainland in the six months ended June 30, 2026. We are actively expanding new production lines and facilities globally. Source Photonics has production facilities in Taiwan, Changzhou and Chengdu. We have successfully integrated intelligent manufacturing across multiple aspects of our production processes for different products, leading to significant improvements in efficiency, product yields and overall operational performance.

COMPETITIVE STRENGTHS

We believe the following competitive strengths have contributed to our success and will continue to drive our future growth including (i) our integrated technology capabilities which underpin our strategic focus on comprehensive AI from the edge to data center, (ii) our partnerships with tier-one customers that enable broader coverage and greater value creation, (iii) our globalization strategy combining global scale with local execution, (iv) our market-driven technology and R&D capabilities with a proven track record, (v) our AI-powered and data-driven intelligent manufacturing processes, (vi) our strategic M&A and step-change growth, and (vii) our experienced management team with a global perspective.

OUR GROWTH STRATEGIES

We will pursue the following strategies to drive further growth, including (i) staying close to customer demand and accelerating time to market, (ii) expanding regionalized capacity to serve a dynamic global market, (iii) pursuing strategic M&A supported by integration capabilities and industry insight, (iv) continuing to invest in technology R&D and intelligent manufacturing to scale AI-driven operations, and (v) strengthening our global talent pipeline through the attraction, development and integration of talent.

COMPETITION

According to CIC, the markets in which we operate are highly competitive, and the competitive landscape differs across our key product lines: (i) PCBs: the global PCB market was US$85.2 billion in 2025 and is fragmented, with the top 10 players accounting for 37.4% of total market share, and we ranked third with sales revenue of US$3,615.3 million, or 4.2%; (ii) precision components and optoelectronic displays: the global precision component and optoelectronic display markets were US$538.1 billion and US$200.3 billion, respectively, in 2025; (iii) optical transceivers: the global optical transceiver market was US$24.5 billion in 2025 and is highly concentrated, with the top 10 suppliers accounting for 68.1%, and, following our acquisition of Source Photonics in September 2025, we ranked seventh based on Source Photonics' revenue of US$714.5 million, representing a market share of 2.9%. See "Industry Overview" for further details of the competitive landscape of each of our key markets. To maintain and grow our business, we must continue to meet our customers' requirements and deliver differentiated, high-performance products that meet their evolving needs.

SUMMARY OF HISTORICAL FINANCIAL INFORMATION

The following tables set forth a summary of financial data from our consolidated financial information during the Track Record Period. The summary financial data set forth below should be read together with, and is qualified in its entirety by reference to, the consolidated financial statements as set out in the Accountants' Report in Appendix IA and IB to this Prospectus, including the related notes. Our consolidated financial information was prepared in accordance with the IFRS Accounting Standards.

Revenue

During the Track Record Period, we generated revenue from the following operating segments: (i) electronic circuits (PCBs), including FPCs, RPCBs and Rigid-Flexes; (ii) precision components, including automotive components and telecommunications equipment components; (iii) touch panels and LCMs, including touch panels and LCD and OLED modules; (iv) optical transceivers, including data center transceiver and telecommunications transceiver and (v) others, which primarily include the sales of light-emitting diode ("**LED**") display products, raw and scrap materials and other ancillary businesses.

Note:

(1) Revenue in 2025 represents the revenue for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

During the Track Record Period, electronic circuits were our largest revenue contributor. As we continue to capitalize on our unique capability in providing PCBs for end-to-cloud AI applications from data centers to the edge, we expect the sales of PCBs will continue to grow and remain a key revenue contributor. We also provide precision components, touch panels and LCMs and optical transceivers to address customers' diverse needs and have maintained strong relationships with our key customers.

Notes:

* Information about our revenue from customers is presented based on customers' place of incorporation. The shipping destination of the relevant downstream end-customers mainly included the Chinese mainland, Special supervision territory in China, the United States, and Europe.

(1) Special supervision territory in China refers to a specific geographical area in China, including geographically enclosed areas such as bonded zones and free trade zones. Sales conducted in the Special Supervision Territory are subject to preferential customs and tax treatment. Such sales are presented separately from sales in the Chinese mainland due to its distinct regulatory framework and customs clearance rules that differ from those applicable to other regions of China. Sales to the special supervision territory are treated as exports under applicable laws and regulations.

During the Track Record Period, a majority of our revenue was from customers outside the Chinese mainland. As we continue to serve a global customer base, we expect sales to customers outside the Chinese mainland to remain a key revenue contributor going forward.

Notes:

(1) Sales volume is measured using the following units for each product category: electronic circuit products are measured by the aggregate area of specific product types in square meters (m^2), representing the total area of PCBs sold; precision component, touch panel and LCM and optical transceiver products are measured in units, representing the total number of finished components or assemblies.

(2) Average selling price is calculated by dividing the revenue in a given product category by the corresponding sales volume.

(3) Sales volume and average selling price in 2025 represent those for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

The sales volume of electronic circuits increased throughout the Track Record Period, mainly driven by the strong downstream demand in consumer and automotive electronics. The sales volume of precision components increased throughout the Track Record Period, mainly attributable to increased orders and capacity expansion and a broader product portfolio for automotive components, together with the contribution from GMD following its acquisition in October 2025.

During the Track Record Period, the average selling prices of our products fluctuated primarily in response to product mix adjustments, market demand dynamics and customer specification requirements.

Our average selling prices for electronic circuits (PCBs) were RMB5,846.1, RMB4,473.2, RMB3,827.6 and RMB4,006.9 per square meter in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. The decrease in our average selling price from 2023 to 2025, as well as the year-on-year decrease for the six months ended June 30, 2026 was primarily driven by a decrease in the average selling price of FPCs, reflecting a product mix shift toward automotive applications. In 2023, 2024, 2025 and the six months ended June 30, 2026, the average selling prices of FPCs for automotive applications represented approximately one-sixth of those for consumer electronics applications, primarily because automotive FPCs generally contain fewer components per unit and have lower circuit density per unit area. According to CIC, the average selling prices of automotive FPCs are generally significantly lower than those of consumer electronics FPCs, which is consistent with the broader industry.

Our average selling prices for precision components were RMB39.1, RMB31.8, RMB32.3 and RMB40.4 per unit for the corresponding years/periods. The average selling price of precision components

decreased from 2023 to 2024, primarily reflecting a shift in product mix with lower unit prices, as well as pricing pressure from a slowdown in global 5G infrastructure spending, and the average selling price remained relatively stable from 2024 to 2025. It increased in the six months ended June 30, 2026 compared to the prior-year period, mainly attributable to the acquisition of GMD, whose automotive components generally commanded higher average selling prices, as well as our expansion into the European market following the acquisition.

Our average selling prices for touch panel and LCM products were RMB182.3, RMB200.4, RMB218.1 and RMB204.4 per unit for the corresponding years/periods. The average selling price of touch panels and LCMs increased from 2023 to 2025, mainly due to robust downstream demand in consumer electronics and automotive applications, as well as our strategic shift away from small-form-factor display modules, which were primarily used in smartphones toward large-form-factor OLED modules, as we gradually shifted our product focus toward tablet applications. It decreased in the six months ended June 30, 2026 compared to the prior-year period, mainly attributable to the weakened demand from certain of our downstream customers.

For detailed analysis on our results of operations, please see "Financial Information — Period-to-Period Comparison of Results of Operations."

Cost of Sales

Our cost of sales primarily consists of (i) raw materials costs, (ii) labor costs and (iii) depreciation and amortization. During the Track Record Period, our cost structure remained stable, with raw material costs constituting the largest component.

Notes:

(1) The overall gross margin is calculated as gross profit for the year/period divided by revenue for the corresponding year/period and multiplied by 100%.

(2) Gross profit and gross profit margin in 2025 represents those for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

Our gross profit and gross profit margin increased period over period for the six months ended June 30, 2026, primarily due to increases in revenue from acquisition of Source Photonics, which carries higher gross margins, increase in sales of electronic circuits and precision components with margin improvement as well as margin improvement in touch panels and LCMs. Our gross profit and gross profit margin increased from 2024 to 2025, primarily due to increases in revenue from acquisition of Source Photonics and sales of RPCBs and Rigid-Flexes and margin improvement in touch panels and LCMs. Our gross profit and gross profit margin decreased from 2023 to 2024, primarily due to lower gross profit in telecommunications equipment components and higher losses in others that were mainly attributable to LED display products.

For certain years during the Track Record Period, we experienced a decrease in gross profit and gross profit margin, in our FPC products and incurred a gross loss in the touch panels and LCMs segments. Our gross profit and gross profit margin from the sale of FPCs declined from 2023 to 2024, mainly attributable to yield variability and increased manufacturing costs associated with the ramp-up of new consumer electronics products. Our gross losses recorded in 2023 in the touch panels and LCMs segment were mainly driven by the gross losses in touch panels in 2023 due to significant price declines amid industry-wide destocking driven by weaker demand in consumer electronics and lower capacity utilization, which increased fixed costs per unit.

As a result of the cumulative effects of the changes in our revenue, cost of sales and various expenses, our profit for the year decreased by 44.8% from RMB1,965.1 million in 2023 to RMB1,085.1 million in 2024. Our profit for the year increased by 28.4% from RMB1,085.1 million in 2024 to RMB1,393.0 million in 2025. Our profit for the period increased by 293.5% from RMB758.6 million in the six months ended June 30, 2025 to RMB2,984.6 million in the six months ended June 30, 2026. For detailed analysis on our results of operations, please see "Financial Information — Period-to-Period Comparison of Results of Operations."

Other reserves	7,533,971	7,907,421	9,266,211	9,262,364	9,168,417
Retained earnings	9,025,096	9,288,044	10,538,406	13,397,898	14,454,084
Non-controlling interests	47,330	59,716	240,690	182,288	121,527
Total equity	**18,190,357**	**18,886,103**	**21,701,839**	**24,549,073**	**25,400,548**

Our net current assets decreased from RMB4,418.5 million as of December 31, 2023 to RMB3,559.7 million as of December 31, 2024, primarily due to an increase in trade and notes payables, partially offset by a decrease in borrowings and an increase in other current assets. Our net current assets decreased from RMB3,559.7 million as of December 31, 2024 to RMB174.8 million as of December 31, 2025, primarily due to an increase in trade and an increase in notes payables and accruals and other payables, partially offset by an increase in inventories and an increase in trade and notes receivables, arising from the acquisition of Source Photonics and GMD. Our net current assets increased from RMB174.8 million as of December 31, 2025 to RMB3,162.2 million as of June 30, 2026, primarily due to an increase in inventories, an increase in financial assets at fair value through profit or loss and an increase in cash and cash equivalents, partially offset by an increase in borrowings. Our net current assets increased from RMB3,162.2 million as of June 30, 2026 to RMB3,320.8 million as of August 31, 2026, primarily due to an increase in inventories, an increase in trade and notes receivables and an increase in restricted cash and term deposits, partially offset by an increase in trade and notes payables. See "Financial Information — Liquidity and Capital Resources — Indebtedness" for further details.

Our net assets increased to RMB18,190.4 million as of December 31, 2023, primarily due to our profit for the year of RMB1,965.1 million in 2023, partially offset by our dividends paid of RMB187.4 million. Our net assets further increased to RMB18,886.1 million as of December 31, 2024, primarily due to our profit for the year of RMB1,085.1 million in 2024, partially offset by our dividends paid of RMB425.3 million and repurchase of shares of RMB25.0 million. Our net assets further increased to RMB21,701.8 million as of December 31, 2025, primarily due to our net profit for the year of RMB1,393.0 million in 2025, partially offset by our dividend paid of RMB118.8 million and repurchase of shares of RMB100.1 million. As of June 30, 2026, our net assets increased to RMB24,549.1 million, primarily due to our profit for the period of RMB2,984.6 million in the six months ended June 30, 2026, partially offset by transaction with non-controlling interests of RMB183.5 million, relating to our acquisitions of additional equity interests in certain subsidiaries. For further details, see "Consolidated Statements of Changes in Equity" in "Appendix IA — Accountants' Report of the Group."

Effects of exchange rate changes on cash and cash equivalents	96,491	126,148	(12,222)	35,784	(198,223)
Cash and cash equivalents at end of the year/ period	**5,644,487**	**5,343,600**	**6,104,723**	**7,416,578**	**6,947,526**

In 2023, 2024, 2025 and the six months ended June 30, 2026, we recorded net cash from operating activities of RMB5,040.7 million, RMB4,978.6 million, RMB4,902.3 million and RMB2,268.5 million, respectively, primarily due to the profits we generated in each of the respective years/periods.

In the six months ended June 30, 2026, we had net cash generated from operating activities of RMB2,268.5 million. This was primarily attributable to our profit before income tax of RMB3,488.5 million, adjusted from items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB1,605.2 million, (b) finance cost of RMB296.1 million and (c) impairment provision for inventories of RMB198.1 million and (ii) changes in working capital, primarily comprising (a) an increase in inventories of RMB2,522.8 million, (b) an increase in receivables of RMB1,567.0 million and (c) an increase in payables of RMB1,193.1 million.

In 2025, we had net cash generated from operating activities of RMB4,902.3 million. This was primarily attributable to our profit before income tax of RMB1,690.4 million, adjusted for items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB2,519.4 million, (b) impairment provision for inventories of RMB580.7 million and (c) net foreign exchange losses of RMB27.4 million, and (ii) changes in working capital, primarily comprising (a) an increase in receivables of RMB3,142.8 million, (b) an increase in payables of RMB3,540.7 million and (c) an increase in inventories of RMB504.5 million.

In 2024, we had net cash generated from operating activities of RMB4,978.6 million. This was primarily attributable to our profit before income tax of RMB1,467.7 million, adjusted for items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB2,558.7 million, (b) impairment provision for inventories of RMB454.7 million and (c) net foreign exchange gains of RMB294.7 million, and (ii) changes in working capital, primarily comprising (a) an increase in receivables of RMB446.0 million, (b) an increase in inventories of RMB463.4 million and (c) an increase in payables of RMB706.3 million.

In 2023, we had net cash generated from operating activities of RMB5,040.7 million. This was primarily attributable to our profit before income tax of RMB2,191.1 million, adjusted for items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB2,249.4 million, (b) finance cost of RMB464.9 million and (c) net foreign

exchange gains of RMB129.9 million and (ii) changes in working capital, primarily comprising (a) an increase in payables of RMB401.5 million, (b) a decrease in receivables of RMB268.3 million and (c) an increase in inventories of RMB528.2 million.

See "Financial Information — Liquidity and Capital Resources — Cash Flows."

Summary of Financial Information of Source Photonics

This historical financial information contained and discussed in "Financial Information" presents the historical information of Source Photonics for the years ended December 31, 2023 and 2024 and the nine months ended September 30, 2025.

Selected Results of Operations

	Year ended December 31,		Nine months ended September 30,	
	2023	2024	2024	2025
	(*in RMB thousands*)		(*unaudited*)	
Revenue	1,305,145	2,945,332	1,890,076	3,627,515
Gross profit	248,399	879,083	489,090	1,009,834
Profit/(loss) before income tax	(85,951)	1,133,222	914,301	560,795
Profit/(loss) for the year/period	(90,369)	1,050,454	880,309	475,256

For detailed analysis on Source Photonics' results of operations, please see "Financial Information of Source Photonics — Period-to-Period Comparison of Results of Operations."

Certain consolidated statement of financial position

	As of December 31,		As of September 30,
	2023	2024	2025
	(*in RMB thousands*)		
Total non-current assets	861,206	985,918	1,306,706
Total current assets	1,420,964	2,115,063	3,062,902
Total assets	**2,282,170**	**3,100,981**	**4,369,608**
Total current liabilities	4,137,541	1,979,412	2,317,532
Total non-current liabilities	166,234	138,322	571,615
Total liabilities	**4,303,775**	**2,117,734**	**2,889,147**
Net current (liabilities)/assets	**(2,716,577)**	**135,651**	**745,370**
Total equity	**(2,021,605)**	**983,247**	**1,480,461**

Source Photonics recorded net current liabilities of RMB2,716.6 million as of December 31, 2023 and net current assets of RMB135.7 million as of December 31, 2024, primarily due to a decrease in financial liabilities at fair value through profit or loss. Source Photonics' net current assets increased from RMB135.7 million as of December 31, 2024 to RMB745.4 million as of September 30, 2025, primarily due to an increase in inventories and trade receivables and a decrease in convertible bond, partially offset by an increase in trade payables and borrowings.

Source Photonics' net assets decreased to RMB(2,021.6) million as of December 31, 2023, primarily due to the loss for the year of RMB90.4 million in 2023, partially offset by share-based compensation expenses of RMB26.5 million. Source Photonics' net assets increased to RMB983.2 million as of December 31, 2024, primarily due to the profit for the year of RMB1,050.5 million in 2024, partially offset by other comprehensive loss of RMB50.5 million. Source Photonics' net assets increased to RMB1,480.5 million as of September 30, 2025, primarily due to the profit for the period of RMB475.3 million and other comprehensive income of RMB40.1 million in the nine months ended September 30, 2025.

See "Consolidated Statements of Financial Position" in "Appendix IB — Accountants' Report of the Source Photonics Group."

Summary of consolidated statements of cash flows

	Year Ended December 31,		Nine Months Ended September 30,	
	2023	**2024**	**2024**	**2025**
	(*in RMB thousands*)		(*unaudited*)	
Net cash generated from operating activities	77,784	318,836	189,723	409,154
Net cash used in investing activities	(186,335)	(195,376)	(110,182)	(400,188)
Net cash generated from/(used in) financing activities	195,015	(111,579)	(145,057)	43,847
Net increase in cash and cash equivalents	86,464	11,881	(65,516)	52,813
Cash and cash equivalents at beginning of year	186,812	213,914	213,914	252,047
Effect of foreign exchange rate changes	(59,362)	26,252	(6,747)	(29,129)
Cash and cash equivalents at the end of year/period	213,914	252,047	141,651	275,731

In 2023, 2024 and the nine months ended September 30, 2025, Source Photonics recorded net cash from operating activities of RMB77.8 million, RMB318.8 million and RMB409.2 million, respectively.

For the nine months ended September 30, 2025, Source Photonics had net cash generated from operating activities of RMB409.2 million, primarily comprising Source Photonics' profit before income tax of RMB560.8 million, adjusted for non-operating and non-cash items mainly including (i) depreciation and amortization of non-current assets of RMB119.4 million, (ii) finance costs of RMB26.9 million, and (iii) net foreign exchange losses of RMB9.9 million. This amount was further affected by changes in working capital, including (i) an increase in inventories of RMB397.1 million and (ii) an increase in receivables of RMB557.6 million, partially offset by an increase in payables of RMB598.9 million.

In 2024, Source Photonics had net cash generated from operating activities of RMB318.8 million, primarily comprising Source Photonics' profit before income tax of RMB1,133.2 million, adjusted for non-operating and non-cash items mainly including (i) depreciation and amortization of non-current assets of RMB115.1 million, (ii) finance costs of RMB28.4 million, partially offset by (iii) net foreign exchange gains of RMB20.6 million. This amount was further affected by changes in working capital, including (i) an increase in payables of RMB431.1 million, partially offset by (ii) an increase in receivables of RMB414.2 million and (iii) an increase in inventories of RMB329.1 million.

In 2023, Source Photonics had net cash generated from operating activities of RMB77.8 million, primarily comprising Source Photonics' loss before income tax of RMB86.0 million, adjusted for non-operating and non-cash items mainly including (i) depreciation and amortization of non-current assets of RMB106.3 million, (ii) finance costs of RMB52.9 million, partially offset by (iii) net foreign exchange gains of RMB18.8 million. The amount was further affected by changes in working capital, including (i) an increase in payables of RMB142.6 million, partially offset by (ii) an increase in receivables of RMB94.1 million and (iii) an increase in inventories of RMB114.1 million.

See "Financial Information of Source Photonics — Cash Flows."

KEY FINANCIAL RATIOS

	Year Ended/As of December 31,			Six months ended/As of June 30,
	2023	2024	2025	2026
	%	%	%	
Gross margin[(1)]	13.9	11.5	12.4	19.4
Net profit margin[(2)]	5.8	3.0	3.5	10.7
Debt ratio[(3)]	58.5	58.6	64.0	64.5

Notes:

(1) Gross margin was calculated as gross profit for the year/period divided by revenue for the corresponding year/period and multiplied by 100%.

(2) Net profit margin was calculated as net profit for the year/period divided by revenue for the corresponding year/period and multiplied by 100%.

(3) Debt ratio was total liabilities divided by total assets as of the relevant date and multiplied by 100%.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

As of the Latest Practicable Date, the voting rights (excluding treasury shares with no voting rights) of the Company were controlled directly as to approximately 16.59% by Mr. Yuan Yonggang (袁永剛), approximately 13.56% by Mr. Yuan Yongfeng (袁永峰, the elder brother of Mr. Yuan Yonggang) and approximately 3.22% by Mr. Yuan Fugen (袁富根, the father of Mr. Yuan Yonggang and Mr. Yuan Yongfeng), who were collectively entitled to exercise approximately 33.37% of the voting rights at general meetings of the Company (excluding treasury shares with no voting rights).

Accordingly, immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised), Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen will in aggregate control approximately 31.41% of the voting rights at general meetings of the Company (excluding treasury shares with no voting rights). As such, in light of the familial relationship, the Company considers that Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen will together constitute the Controlling Shareholders upon Listing under the Listing Rules. For more details, see "Relationship with Our Controlling Shareholders."

RISK FACTORS

We face risks including those set out in the section headed "Risk Factors." As different investors may have different interpretations and criteria when determining the significance of risks, you should read the "Risk Factors" section in its entirety before you decide to invest in our H Shares. Some of the major risks that we face include: (i) our future growth depends on maintaining and building relationships with customers and developing products that meet their evolving needs; (ii) if we fail to develop new or enhanced products on a timely basis, our ability to attract and retain customers could be impaired, and our competitive position could be harmed; (iii) if our production capacity fails to meet customer demand, or if our capacity expansion plans are delayed or unsuccessful, our business, financial condition and results of operations could be materially and adversely affected; (iv) we generate the majority of our revenue from a limited number of key customers, in particular Customer A; (v) we are exposed to risks associated with our global operations and will continue to be subject to such risks as we continue to expand our business overseas; and (vi) we may fail to effectively integrate acquisition targets into our operation and culture and realize expected benefits from our acquisitions, which could have an adverse effect on our financial condition and results of operations.

LISTING ON THE MAIN BOARD OF THE SHENZHEN STOCK EXCHANGE

In April 2010, the A Shares of the Company were listed on the main board of the Shenzhen Stock Exchange (stock code: 002384.SZ) (the "**A-Share Listing**"). The Company offered a total of 40,000,000 A Shares under the A-Share Listing, representing 25% of the Company's enlarged share capital immediately following the completion of the A-Share Listing.

FUTURE PLANS AND USE OF PROCEEDS

Assuming a maximum Offer Price of HK$93.80 per H Share, we estimate that we will receive net proceeds of approximately HK$10,516.9 million from the Global Offering after deducting the underwriting commissions and other estimated expense paid and payable by us in connection with the Global Offering (assuming that the Offer Size Adjustment Option and the Over-allotment Option are not exercised). In line with our strategies, we intend to use our net proceeds for the purposes and in the amounts set forth below.

- Approximately 64.5%, or approximately HK$6,783.4 million, is expected to be used to construct new facilities and upgrade our existing production facilities and line, including capacity expansion across both high-speed EML chips and optical modules for our production facilities in the Chinese mainland, new production facility construction for Multek in Zhuhai focusing on high-end PCBs, and production facility upgrade and enhancement in the Chinese mainland.
- Approximately 20.0%, or approximately HK$2,103.4 million, is expected to be used for potential strategic investments or acquisitions to strengthen our technological leadership and leading market position in our core businesses. We may selectively pursue equity investments or acquisitions across the value chain in the PCB, precision component and optical transceiver industries, focusing on targets with strong technical moats, clear product-market fit and demonstrable customer demand that supports cross-selling.
- Approximately 5.5%, or approximately HK$578.4 million, is expected to be used for repayment of a portion of our existing indebtedness.
- Approximately 10.0%, or approximately HK$1,051.7 million, is expected to be used for working capital and general corporate purposes.

GLOBAL OFFERING STATISTICS

	Based on the maximum Offer Price of HK$93.80 per H Share
Market capitalization of our H Shares[(1)(2)]	HK$10,672.9 million
Market capitalization of our Shares upon the completion of the Global Offering[(1)(3)]	HK$338,798.3 million
Unaudited pro forma adjusted consolidated net tangible assets per Share[(4)(5)]	HK$16.79

Notes:

(1) All statistics in the table are based on the assumption that the Offer Size Adjustment Option and the Over-allotment Option are not exercised.

(2) The calculation of market capitalization is based on the assumption that 113,783,200 H Shares are expected to be in issue immediately after completion of the Global Offering.

(3) The calculation of market capitalization is based on the assumption that 113,783,200 H Shares will be in issue immediately after completion of the Global Offering and 1,825,561,332 A Shares (excluding 6,046,200 treasury shares) will be in issue immediately after completion of the Global Offering with an average closing price of RMB154.13 for the five business days immediately preceding the Latest Practicable Date (assuming that the Offer Size Adjustment Option and the Over-allotment Option are not exercised).

(4) The unaudited pro forma adjusted consolidated net tangible assets per Share is arrived at after the adjustments referred to in "Appendix II — Unaudited Pro Forma Financial Information" to this prospectus and on the basis that 1,963,010,632 Shares (excluding 5,791,000 treasury shares) were in issue assuming that the Global Offering has been completed on June 30, 2026 but takes no account of any Shares which may be allotted and issued by the Company pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option, any Shares that may be issued by the Company pursuant to the exercise of options or the vesting of restricted shares or other awards that have been or may be granted or any Shares which may be issued or repurchased by the Company after the Latest Practicable Date.

(5) No adjustment has been made to the unaudited pro forma adjusted net tangible assets of the Group to reflect any trading results or other transactions of the Group entered into subsequent to June 30, 2026. In particular, the unaudited pro forma adjusted consolidated net tangible assets of the Group attributable to owners of the Company have not been adjusted to illustrate the effect of the following: In July 2026, the Company repurchased 255,200 shares for a consideration of RMB49,995,000. The repurchase is not recorded in the financial statements of the Company for the period ended June 30, 2026 or the unaudited pro forma financial information as set out in Appendix II to this prospectus. Had the repurchase been adjusted in the unaudited pro forma financial information, the adjusted net tangible assets of the Group would decrease by RMB49,995,000 and the adjusted net tangible assets per share would decrease by RMB0.02 (equivalent to HK$0.02).

LISTING EXPENSES

Our listing expenses are estimated to be approximately HK$156.0 million (including underwriting commission), accounting for 1.5% of the gross proceeds of the Global Offering (assuming a maximum Offer Price of HK$93.80 per H Share, and no exercise of the Over-allotment Option and the Offer Size Adjustment Option). Among our listing expenses, approximately HK$144.2 million is directly attributable to the issuance of H Shares and will be charged to equity upon completion of the Listing, and approximately HK$11.8 million has been or will be charged to our consolidated statements of profit or loss and other comprehensive income, of which HK$1.6 million has been charged during the Track Record Period and approximately HK$10.2 million is expected to be charged after the Track Record Period. The listing expenses we expect to incur would consist of approximately HK$79.5 million underwriting related expenses and fees (including but not limited to commissions and fees), approximately HK$57.8 million non-underwriting-related expenses and fees of the Joint Sponsors, legal advisors and reporting accountant and approximately HK$18.7 million for other non-underwriting-related fees and expenses.

DIVIDEND POLICY

Subject to PRC laws and regulations, including the PRC Company Law (《中華人民共和國公司法》) and the No. 3 Guideline for the Supervision of Listed Companies – Cash Dividend Distribution of Listed Companies (2025 Revision) (《上市公司監管指引第3號－上市公司現金分紅(2025年修訂)》), and the Articles of Association, we are required to pay cash dividends of no less than 10% of the distributable profits recorded in the fiscal year. We have adopted a Three-Year Shareholder Return Plan (2024–2026) setting out our dividend policy for this period. Under the plan, we shall distribute profits annually in any year in which we have both reported a net profit and have a positive balance of distributable profits. The proportion of cash dividends in the distribution shall be no less than 20%, subject to adjustment by the Board. The specific payout ratio for each year will be determined by the Board considering our annual earnings and future capital requirements, and the resulting profit distribution plan will be submitted to shareholders for approval by way of special resolution at a general meeting.

During the Track Record Period, we declared dividends as follows:

	For the Year Ended December 31,			For the six months ended June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Final cash dividends in respect of the previous year, declared and paid during the year/period	187,313	425,319	118,795	—

Future profit distributions may be carried out in the form of cash dividends or stock dividends or a combination of cash dividends and stock dividends. Any proposed distribution of dividends is subject to the discretion of our Board and the approval at our Shareholders' meetings. Our Board may recommend a distribution of dividends in the future after taking into account our results of operations, financial condition, operating requirements, capital requirements, shareholders' interests and any other conditions that our Board may deem relevant.

NO MATERIAL ADVERSE CHANGE AND RECENT DEVELOPMENTS

Our Directors confirmed that, as of the date of this prospectus, there has been no material adverse change in our financial position since June 30, 2026, and there has been no event since June 30, 2026 that would materially affect the information as set out in the Accountants' Report in Appendices IA and IB to this prospectus. For the nine months ended September 30, 2026, our revenue and net profit for the nine months ended September 30, 2026 increased compared with the same period in 2025, primarily due to the increase in revenue from sales of PCBs, precision components and optical transceivers. This was mainly attributable to the consolidation of Source Photonics and GMD, as well as strong market demand and increased customer orders for our products.

On June 16, 2026, the Company announced that its Board had approved an investment by Source Photonics in an optical chip and optical module expansion project, with a total investment amount of approximately US$1.2 billion, primarily for expanding production capacity in Changzhou and other locations. Subsequently, in August 2026, taking into account the updated production capacity plan, the Board approved a proposal to increase the estimated total investment in the project by approximately US$0.5 billion, from approximately US$1.2 billion to approximately US$1.7 billion. The entire investment is expected to be funded by our Group using our own resources. The project aims to enhance Source Photonics' overall production capacity and meet strong downstream demand and optimize Source Photonics' product portfolio. The proposed increase remains subject to shareholders' approval. The project remains subject to required regulatory approvals, and the Company will actively work with the relevant authorities to advance the required approval procedures.

It has recently been reported that the U.S. government is considering measures to prohibit the importation of new models of Chinese-manufactured optical transceivers for use in data centers in the United States. To date, the U.S. Federal Communications Commission (the "**FCC**") has not enacted, formally proposed or published in draft form any prohibition or restriction on optical modules originating from China (the "**Potential FCC Restriction**"). There is currently no information available regarding the legal basis or scope of the Potential FCC Restriction, the optical module products that may be affected or its potential implementation timeline. Accordingly, we are not currently in a position to assess or quantify the potential impact of such a measure, the details of which remain unclear. Based on the reports available to date, we understand that any Potential FCC Restriction would likely operate as a restriction on the importation and/or marketing of affected optical modules in the United States, rather than as an export control measure.

In terms of potential exposure, revenue from optical transceivers amounted to RMB1,435.5 million, representing 3.6% of the Company's total revenue, in 2025, and RMB5,351.0 million, representing 19.2% of its total revenue, in the six months ended June 30, 2026. Source Photonics also has manufacturing capacity outside Chinese mainland, in addition to its facilities in Changzhou and Chengdu, which may provide our Group with some flexibility in serving non-PRC delivery destinations if necessary. We will continue to monitor developments relating to the Potential FCC Restriction and make further disclosures in accordance with the Listing Rules if any material development occurs.

In this prospectus, unless the context otherwise requires, the following terms and expressions shall have the meanings set out below. Certain other terms are explained in "Glossary of Technical Terms" in this prospectus.

"2021 Employee Stock Ownership Plan"	the employee stock ownership plan adopted in February 2021, the principal terms of which are set out in "Statutory and General Information — Employee Stock Ownership Plans — 2021 Employee Stock Ownership Plan" in Appendix IV to this Prospectus
"2022 Employee Stock Ownership Plan"	the employee stock ownership plan adopted in November 2022, the principal terms of which are set out in "Statutory and General Information — Employee Stock Ownership Plans — 2022 Employee Stock Ownership Plan" in Appendix IV to this Prospectus
"2022 Restricted Share Incentive Plan"	the restricted share incentive plan adopted in March 2022, the principal terms of which are set out in "Statutory and General Information — 2022 Restricted Share Incentive Plan" in Appendix IV to this Prospectus
"A Share(s)"	ordinary shares issued by the Company, with a nominal value of RMB1.00 each, which are listed on the main board of the Shenzhen Stock Exchange and traded in Renminbi
"Accountants' Report"	the accountants' report of the Group, the text of which is set out in Appendix IA to this prospectus and the accountants' report of the Source Photonics Holdings (Cayman) Limited, the text of which is set out in Appendix IB to this prospectus
"affiliate(s)"	with respect to any specified person, any other person, directly or indirectly, controlling or controlled by or under direct or indirect common control with such specified person
"AFRC"	Accounting and Financial Reporting Council
"Articles" or "Articles of Association"	the articles of association of the Company with effect upon the Listing Date (as amended from time to time), a summary of which is set out in Appendix III to this prospectus
"associate(s)"	has the meaning ascribed thereto under the Listing Rules
"Audit Committee"	the audit committee of the Board
"BIS"	Bureau of Industry and Security of the U.S. Department of Commerce
"Board" or "Board of Directors"	the board of Directors of the Company
"Business Day"	a day on which banks in Hong Kong are generally open for normal business to the public and which is not a Saturday, Sunday or public holiday in Hong Kong
"CAC"	Cyberspace Administration of China (中華人民共和國國家互聯網信息辦公室)
"CAGR"	compound annual growth rate
"Capital Market Intermediary(ies)" or "CMI(s)"	the capital market intermediaries participating in the Global Offering and has the meaning ascribed thereto under the Listing Rules

"CCASS"	the Central Clearing and Settlement System established and operated by HKSCC
"China", "Chinese mainland" or "the PRC"	the People's Republic of China, unless the context requires otherwise, excluding, for the purposes of this prospectus only, the regions of Hong Kong, Macau and Taiwan of the People's Republic of China
"CIC" or "China Insights Consultancy"	China Insights Industry Consultancy Limited, our industry consultant, which is an Independent Third Party
"CIC Report"	an independent market research report commissioned by our Company and prepared by CIC for the purpose of this prospectus
"close associate(s)"	has the meaning ascribed thereto under the Listing Rules
"Companies Ordinance"	the Companies Ordinance (Chapter 622 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time
"Companies (Winding Up and Miscellaneous Provisions) Ordinance" or "CWUMPO"	the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time
"Company"	Suzhou Dongshan Precision Manufacturing Co., Ltd. (蘇州東山精密製造股份有限公司), a joint stock limited company established in the PRC on October 28, 1998 and listed on the main board of the Shenzhen Stock Exchange (Stock code: 002384.SZ)
"Compliance Advisor"	Somerley Capital Limited
"connected person(s)"	has the meaning ascribed thereto under the Listing Rules
"connected transaction(s)"	has the meaning ascribed thereto under the Listing Rules
"Controlling Shareholder(s)"	Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen collectively considered as the controlling shareholders of our Company in light of the familial relationship; prior to the Listing and as at the date of this prospectus, Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen controlled more than 30% of the total voting rights in our Company (excluding treasury shares with no voting rights), and upon Listing, Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen will continue to remain as our Company's controlling shareholders
"core connected person(s)"	has the meaning ascribed thereto under the Listing Rules
"Corporate Governance Code"	the Corporate Governance Code set out in Appendix C1 to the Listing Rules
"CSRC"	China Securities Regulatory Commission (中國證券監督管理委員會)
"Director(s)"	the director(s) of the Company
"DSBJ Singapore"	DSBJ PTE. LTD., a limited liability company incorporated under the laws of Singapore on March 8, 2019, and a wholly-owned subsidiary of the Company
"EAR"	the U.S. Export Administration Regulations
"EIT"	enterprise income tax

"EIT Law"	the PRC Enterprise Income Tax Law (《中華人民共和國企業所得税法》)
"Employee Stock Ownership Plans"	the 2021 Employee Stock Ownership Plan, 2022 Employee Stock Ownership Plan and 2026 Employee Stock Ownership Plan
"Exchange Participant"	a person (a) who, in accordance with the Listing Rules, may trade on or through the Stock Exchange; and (b) whose name is entered in a list, register or roll kept by the Stock Exchange as a person who may trade on or through the Stock Exchange
"Extreme Conditions"	extreme conditions as announced by the government of Hong Kong in the case where a super typhoon or other natural disaster of a substantial scale seriously affects the working public's ability to resume work or brings safety concern for a prolonged period
"FDPR"	the Foreign-Produced Direct Product Rule
"FINI"	"Fast Interface for New Issuance," the online platform operated by HKSCC that is mandatory for admission to trading and, where applicable, the collection and processing of specified information on subscription in and settlement for the Listing
"General Rules of HKSCC"	General Rules of HKSCC published by the Stock Exchange and as amended from time to time
"Global Offering"	the Hong Kong Public Offering and the International Offering
"GMD"	Groupe Mécanique Découpage, a limited liability company incorporated under the laws of France in 1986
"Group," "we," "our" or "us"	the Company and its subsidiaries, or any one of them as the context may require, and where the context requires, the businesses operated by the Company and/or its subsidiaries and their predecessors (if any)
"Guide" or "Guide for New Listing Applicants"	the Guide for New Listing Applicants issued by the Stock Exchange effective from January 1, 2024, as amended, supplemented or otherwise modified from time to time
"H Share(s)"	listed ordinary share(s) in the share capital of the Company with a nominal value of RMB1.00 each, which are to be subscribed for and traded in Hong Kong dollars and to be listed on the Stock Exchange
"H Share Registrar"	Tricor Investor Services Limited
"HK eIPO White Form"	the application for Hong Kong Offer Shares to be issued in the applicant's own name, submitted online through the designated website at **www.hkeipo.hk**
"HK eIPO White Form Service Provider"	the **HK eIPO White Form** service provider designated by our Company, as specified on the designated website at **www.hkeipo.hk**
"HKSCC"	Hong Kong Securities Clearing Company Limited, a wholly-owned subsidiary of Hong Kong Exchanges and Clearing Limited
"HKSCC EIPO"	the application for Hong Kong Offer Shares to be issued in the name of HKSCC Nominees and deposited directly into CCASS to be credited to your designated HKSCC Participant's stock account

	through causing HKSCC Nominees to apply on your behalf, including by instructing your broker or custodian who is a HKSCC Participant to give electronic application instructions via HKSCC's FINI system to apply for Hong Kong Offer Shares on your behalf
"HKSCC Nominees"	HKSCC Nominees Limited, a wholly-owned subsidiary of HKSCC
"HKSCC Operational Procedures"	the operational procedures of HKSCC, containing the practices, procedures and administrative or other requirements relating to HKSCC's services and the operation and functions of the CCASS, FINI or any other platform, facility or system established, operated and/or otherwise provided by or through HKSCC, as from time to time in force
"HKSCC Participant"	a participant admitted to participate in CCASS as a direct clearing participant, a general clearing participant or a custodian participant
"Hong Kong" or "HK"	the Hong Kong Special Administrative Region of the PRC
"Hong Kong dollars" or "HK$"	Hong Kong dollars and cents respectively, the lawful currency of Hong Kong
"Hong Kong Offer Shares"	11,378,400 H Shares (subject to reallocation as described in the section headed "Structure of the Global Offering") initially offered by the Company for subscription at the Offer Price pursuant to the Hong Kong Public Offering
"Hong Kong Public Offering"	the offering of the Hong Kong Offer Shares for subscription by the public in Hong Kong at the Offer Price (plus brokerage, SFC transaction levy, AFRC transaction levy and Stock Exchange trading fee), on and subject to the terms and conditions described in "Structure of the Global Offering — The Hong Kong Public Offering"
"Hong Kong Stock Exchange", "HKSE" or "Stock Exchange"	The Stock Exchange of Hong Kong Limited, a wholly-owned subsidiary of Hong Kong Exchanges and Clearing Limited
"Hong Kong Underwriters"	the underwriters of the Hong Kong Public Offering listed in the section headed "Underwriting — Hong Kong Underwriters"
"Hong Kong Underwriting Agreement"	the underwriting agreement dated October 16, 2026 relating to the Hong Kong Public Offering entered into by the Company, the Joint Sponsors, the Sponsor-Overall Coordinators and the Hong Kong Underwriters
"IFRSs"	the International Financial Reporting Standards, which include standards, amendments and interpretations promulgated by IASB and the International Accounting Standards (IAS) and interpretations issued by the International Accounting Standards Committee (IASC)
"Independent Third Party(ies)"	any person(s) or entity(ies) who is not a connected person of the Company within the meaning of the Listing Rules
"International Offer Shares"	the 102,404,800 H Shares offered by the Company pursuant to the International Offering (subject to reallocation as described in the section headed "Structure of the Global Offering") together

	with any additional H Shares which may be allotted and issued by the Company pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option
"International Offering"	the conditional placing of the International Offer Shares by the International Underwriters at the Offer Price outside the United States in offshore transactions in reliance on Regulation S and in the United States to QIBs only in reliance on Rule 144A or any other available exemption from the registration requirements under the U.S. Securities Act, as further described in "Structure of the Global Offering"
"International Underwriters"	the international underwriters expected to enter into the International Underwriting Agreement relating to the International Offering
"International Underwriting Agreement"	the underwriting agreement relating to the International Offering expected to be entered into on or about October 26, 2026 by, the Company, the Joint Sponsors, the Sponsor-Overall Coordinators and the International Underwriters, as further described in "Underwriting — International Offering"
"Joint Bookrunners"	the joint bookrunners as named in the section headed "Directors and Parties Involved in the Global Offering"
"Joint Global Coordinators"	the joint global coordinators as named in the section headed "Directors and Parties Involved in the Global Offering"
"Joint Lead Managers"	the joint lead managers as named in the section headed "Directors and Parties Involved in the Global Offering"
"Joint Sponsors"	the joint sponsors as named in "Directors and Parties Involved in the Global Offering"
"Latest Practicable Date"	October 13, 2026, being the latest practicable date for the purpose of ascertaining certain information contained in this prospectus prior to its publication
"Listing"	listing of the H Shares on the Main Board of the Stock Exchange
"Listing Date"	the date, expected to be on or about Wednesday, October 28, 2026, on which the H Shares are listed and from which dealings therein are permitted to take place on the Stock Exchange
"Listing Rules" or "Hong Kong Listing Rules"	the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, as amended, supplemented or otherwise modified from time to time
"M&A"	mergers and acquisitions
"Macau"	the Macau Special Administrative Region of the PRC
"Main Board"	the stock exchange (excluding the option market) operated by the Stock Exchange which is independent from and operates in parallel with GEM of the Stock Exchange
"Main Board of the Shenzhen Stock Exchange"	one of the main components of the SZSE
"MFLEX"	Multi-Fineline Electronix, Inc., a limited liability company incorporated under the laws of the United States on February 27, 2004, and its subsidiaries and related business

"MFLEX Singapore"	Multi-Fineline Electronix Singapore Pte. Ltd., a limited liability company incorporated under the laws of Singapore on September 3, 2007, and a wholly-owned subsidiary of the Company
"MFLEX Suzhou"	MFLEX Suzhou Co., Ltd. (蘇州維信電子有限公司), a limited liability company incorporated under the laws of the PRC on June 20, 2002, and a wholly-owned subsidiary of the Company
"MFLEX Thailand"	Multi-Fineline Electronics (Thailand) Co., Ltd., a limited liability company incorporated under the laws of Thailand on June 30, 2023, and a wholly-owned subsidiary of the Company
"MFLEX Yancheng"	MFLEX Yancheng Co., Ltd. (鹽城維信電子有限公司), a limited liability company incorporated under the laws of the PRC on June 19, 2017, and a wholly-owned subsidiary of the Company
"MOF"	Ministry of Finance of the PRC (中華人民共和國財政部)
"MIIT"	Ministry of Industry and Information Technology (中華人民共和國工業和信息化部)
"Multek China"	Multek China Limited (德麗科技(珠海)有限公司), a limited liability company incorporated under the laws of the PRC on July 19, 1995, and a wholly-owned subsidiary of the Company
"Multek Group"	Multek Group (Hong Kong) Limited (超毅集團(香港)有限公司) a limited liability company incorporated under the laws of Hong Kong on April 25, 2018
"Multek Industries"	Multek Industries Limited (珠海鬥門超毅實業有限公司), a limited liability company incorporated under the laws of the PRC on April 4, 2000, and a wholly-owned subsidiary of the Company
"Mutto Optronics"	Mutto Optronics Technology Co., Ltd. (牧東光電科技有限公司), a limited liability company incorporated under the laws of the PRC on June 6, 2008, and a wholly-owned subsidiary of the Company
"Nomination Committee"	the nomination committee of the Board
"NPC"	the National People's Congress of the PRC (中華人民共和國全國人民代表大會)
"OFAC"	the U.S. Department of the Treasury's Office of Foreign Assets Control
"Offer Price"	the final offer price per Offer Share (exclusive of brokerage of 1%, SFC transaction levy of 0.0027%, Stock Exchange trading fee of 0.00565% and AFRC transaction levy of 0.00015%) at which the Offer Shares are to be subscribed for and issued pursuant to the Global Offering as described in the section headed "Structure of the Global Offering"
"Offer Share(s)"	the Hong Kong Offer Share(s) and the International Offer Share(s), together with any additional H Shares which may be allotted and issued pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option
"**Offer Size Adjustment Option**"	the option under the International Underwriting Agreement, exercisable by the Sponsor-Overall Coordinators (for themselves

	and on behalf of the International Underwriters) on or before the second Business Day prior to the Listing Date, to require the Company to allot and issue up to an aggregate of 17,067,400 additional H Shares, representing approximately 15.0% of the Offer Shares initially being offered under the Global Offering, at the Offer Price, to cover additional market demand in the International Offering, as described in "Structure of the Global Offering — Offer Size Adjustment Option"
"Overall Coordinators"	the overall coordinators as named in the section headed "Directors and Parties Involved in the Global Offering"
"Over-allotment Option"	the option granted by the Company to the International Underwriters, exercisable by the Sponsor-Overall Coordinators (for themselves and on behalf of the International Underwriters) pursuant to the International Underwriting Agreement, to require the Company to allot and issue up to an aggregate of 17,067,400 additional H Shares at the Offer Price, representing approximately 15.0% of the Offer Shares initially available under the Global Offering, assuming the Offer Size Adjustment Option is not exercised, or up to an aggregate of 19,627,500 additional H Shares (representing in aggregate approximately 15.0% of the Offer Shares being offered under the Global Offering, assuming the Offer Size Adjustment Option is exercised in full) to cover over-allocations in the International Offering, if any, exercisable at any time from the date of the International Underwriting Agreement up to (and including) the date which is the 30th day from the last day for lodging of applications under the Hong Kong Public Offering
"Overseas Listing Trial Measures"	The Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies (境內企業境外發行證券和上市管理試行辦法) promulgated by the CSRC on February 17, 2023 and became effective on March 31, 2023
"PRC Company Law"	the Company Law of the People's Republic of China (中華人民共和國公司法), as amended, supplemented or otherwise modified from time to time
"PRC GAAP"	generally accepted accounting principles of the PRC
"PRC Legal Advisor"	Haiwen & Partners, the PRC legal advisor to the Company
"PRC Securities Law"	the Securities Law of the PRC (中華人民共和國證券法), as amended, supplemented or otherwise modified from time to time
"Price Determination Date"	the date, expected to be on or before Monday, October 26, 2026 (Hong Kong time) on which the Offer Price is determined, or such later time as the Company and the Overall Coordinators (for themselves and on behalf of the Underwriters) may agree, but in any event not later than 12:00 noon on Monday, October 26, 2026
"QIBs"	a qualified institutional buyer within the meaning of Rule 144A
"Regulation S"	Regulation S under the U.S. Securities Act
"RMB" or "Renminbi"	Renminbi, the lawful currency of the PRC

"ROI"	return on investment
"Rule 144A"	Rule 144A under the U.S. Securities Act
"S$"	Singapore dollar, the lawful currency of the Republic of Singapore
"SAFE"	the State Administration of Foreign Exchange of the PRC (中華人民共和國國家外匯管理局)
"Securities and Futures Commission" or "SFC"	the Securities and Futures Commission of Hong Kong
"SFO"	the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time
"Share(s)"	ordinary share(s) in the capital of the Company with a nominal value of RMB1.00 each, including A Shares and H Shares
"Shareholder(s)"	holder(s) of the Share(s)
"Singapore"	the Republic of Singapore
"Source Photonics"	Source Photonics Holdings (Cayman) Limited, a limited liability company incorporated under the laws of Cayman on November 11, 2010
"Source Photonics Chengdu"	Source Photonics (Chengdu) Co., Ltd. (索爾思光電（成都）有限公司), a limited liability company incorporated under the laws of the PRC on March 12, 2001
"Source Photonics Macau"	Source Photonics (Macau Commercial Offshore) Limited (索爾思光電（澳門離岸商業服務）一人有限公司), a limited liability company incorporated under the laws of Macau on May 29, 2006
"Sponsor-Overall Coordinators"	the sponsor-overall coordinators as named in the section headed "Directors and Parties Involved in the Global Offering"
"STA"	the State Taxation Administration of the PRC (中華人民共和國國家税務總局)
"Stabilizing Manager"	UBS AG Hong Kong Branch
"State Council"	the State Council of the PRC (中華人民共和國國務院)
"Strategy and ESG Committee"	the strategy and ESG committee of the Board
"subsidiary(ies)"	has the meaning ascribed thereto under the Listing Rules
"substantial shareholder(s)"	has the meaning ascribed thereto under the Listing Rules
"Suzhou Display"	Suzhou Dongshan Display Inc. (晶端顯示精密電子（蘇州）有限公司), a limited liability company incorporated under the laws of the PRC on February 17, 1996, and a wholly-owned subsidiary of the Company
"Suzhou Dongyue"	Suzhou Dongyue New Energy Technology Co., Ltd.(蘇州東越新能源科技有限公司), a limited liability company incorporated under the laws of the PRC on September 6, 2022, and a subsidiary of the Company
"Taiwan"	Taiwan Region of the PRC

"Takeovers Code"	the Codes on Takeovers and Mergers and Share Buy-backs issued by the SFC, as amended, supplemented or otherwise modified from time to time
"Thailand"	the Kingdom of Thailand
"treasury shares"	has the meaning ascribed thereto under the Hong Kong Listing Rules
"Track Record Period"	the financial years ended December 31, 2023, 2024 and 2025, and the six months ended June 30, 2026
"UK"	the United Kingdom of Great Britain and Northern Ireland
"Underwriters"	the Hong Kong Underwriters and the International Underwriters
"Underwriting Agreements"	the Hong Kong Underwriting Agreement and/or the International Underwriting Agreement, as the context may require
"United States" or "U.S."	the United States of America, its territories and possessions, any State of the United States, and the District of Columbia
"U.S. dollar(s)", "US$" or "USD"	United States dollar, the lawful currency of the United States
"U.S. Securities Act"	The U.S. Securities Act of 1933, as amended, supplemented or otherwise modified from time to time, and the rules and regulations promulgated thereunder
"VAT"	value-added tax
"Yancheng Dongchuang"	Yancheng Dongchuang Precision Manufacturing Co., Ltd. (鹽城東創精密製造有限公司), a limited liability company incorporated under the laws of the PRC on November 2, 2020, and a wholly-owned subsidiary of the Company
"Yancheng Dongshan"	Yancheng Dongshan Precision Manufacturing Co., Ltd.(鹽城東山精密製造有限公司), a limited liability company incorporated under the laws of the PRC on June 19, 2017, and a wholly-owned subsidiary of the Company
"***%***"	percent

For ease of reference, the names of PRC laws and regulations, governmental authorities, institutions, natural persons or other entities (including the Company's subsidiaries) have been included in this prospectus in both the Chinese and English languages and in the event of any inconsistency, the Chinese versions shall prevail.

Unless otherwise stated, 6,046,200 repurchased A Shares which are held as treasury shares by the Company as of the Latest Practicable Date have been included in the total number of issued shares of the Company as of the Latest Practicable Date and immediately after completion of the Global Offering. For details of the repurchased A Shares, see "History, Development and Corporate Structure — Our Corporate Structure Immediately prior to the Completion of the Global Offering" and "Substantial Shareholders."

"AAU"	active antenna unit	An active antenna unit is a wireless base-station component that integrates antenna elements with radio-frequency functions to transmit and receive mobile communication signals.
"ACF"	anisotropic conductive film	An anisotropic conductive film is an adhesive film containing conductive particles that provides electrical connections in one direction while maintaining insulation in other directions.
"AES"	active electrostatic solution	An active electrostatic solution is a system designed to actively monitor, control or neutralize electrostatic charges during manufacturing or equipment operation.
"AOFT"	all-on-film touch	All-on-film touch is a touch-sensor architecture in which the principal conductive and sensing layers are integrated onto film substrates.
"AOI"	automated optical inspection	Automated optical inspection is a machine-vision-based inspection technology used to automatically identify defects or abnormalities in manufactured components.
"AI"	Artificial Intelligence	Artificial intelligence refers to technologies that enable computer systems to perform functions such as learning, reasoning, pattern recognition and decision-making.
"BBU"	baseband unit	A baseband unit is a telecommunications network component that processes baseband signals and controls communication between the core network and radio units.
"BGA"	ball grid array	A ball grid array is a surface-mount integrated-circuit package that uses a grid of solder balls on its underside to provide electrical and mechanical connections to a circuit board.
"BMS"	battery management system	A battery management system is an electronic system that monitors and manages the charging, discharging, temperature, safety and performance of a battery pack.
"CAF"	conductive anodic filament	Conductive anodic filament is a printed circuit board failure mechanism involving the growth of a conductive path through insulating material under electrical bias and moisture.
"CCD"	charge-coupled device	A charge-coupled device is an electronic image sensor that converts incident light into electrical signals for image capture and machine-vision applications.
"CNC"	computer numerical control	Computer numerical control is a manufacturing technology that uses programmed computer instructions to control the movement and operation of machine tools.
"COB"	chip-on-board	Chip-on-board is an electronic packaging method in which a bare semiconductor die is mounted directly onto a printed circuit board or other substrate and electrically connected and encapsulated.
"COG"	chip-on-glass	Chip-on-glass is an electronic packaging method in which an integrated circuit is mounted directly onto a glass substrate, commonly for display and touch-panel applications.
"CPO"	Co-Packaged Optics	Co-packaged optics is an integration architecture that places optical engines close to, or within the same package as, electronic switching or processing chips to increase bandwidth and reduce power consumption.

"DR/FR"	direct reach/far reach	DR and FR refer to optical transceiver reach categories designed for shorter- and longer-distance data transmission applications, respectively.
"DSP"	digital signal processor	A digital signal processor is a specialized processor that performs high-speed mathematical operations to process, correct and optimize digital signals.
"DU"	distributed unit	A distributed unit is a radio access network component that performs real-time baseband processing and connects radio units with the centralized unit.
"EAM"	enterprise asset management	Enterprise asset management is a software-based approach to managing the lifecycle, maintenance, utilization and performance of an organization's physical assets.
"ECU"	electronic control unit	An electronic control unit is an embedded electronic system that controls one or more electrical or mechanical functions, particularly in a vehicle.
"EHS"	environmental, health, and safety	Environmental, health and safety refers to the policies, systems and practices used to manage environmental impacts, occupational health and workplace safety risks.
"ELIC"	every layer interconnect	Every layer interconnect is a high-density printed circuit board technology that enables electrical interconnections between any layers of a multilayer board.
"EMI"	electromagnetic interference	Electromagnetic interference is unwanted electromagnetic energy that disrupts or degrades the operation of electronic equipment or signal transmission.
"EML"	electro-absorption modulated laser	An electro-absorption modulated laser is a semiconductor light source that integrates a laser with an electro-absorption modulator for high-speed optical signal transmission.
"ERP"	enterprise resource planning	Enterprise resource planning is an integrated software system used to manage and coordinate core business processes, including finance, procurement, inventory, production and supply chain operations.
"ESG"	Environmental, Social and Governance	Environmental, social and governance refers to the framework used to assess and manage a company's environmental impact, social responsibilities and corporate governance practices.
"EV"	electric vehicle	An electric vehicle is a vehicle powered wholly or partly by electrical energy stored in rechargeable batteries or other electrical energy-storage systems.
"FPC"	flexible printed circuit	A flexible printed circuit is a thin and bendable circuit substrate used to provide electrical connections in compact or movable electronic products.
"FPCA"	flexible printed circuit assembly	A flexible printed circuit assembly is an assembled flexible circuit incorporating electronic components, connectors or other functional parts.
"FTTH"	fiber-to-the-home	Fiber-to-the-home is a broadband network architecture that delivers optical fiber connectivity directly to residential premises.

"F5G"	fifth generation fixed network	The fifth-generation fixed network is a standards-based fixed-network architecture designed to provide high- bandwidth, low-latency and reliable fiber connectivity.
"F5G-A"	fifth generation fixed network advanced	Fifth-generation fixed network advanced is an evolution of F5G designed to provide enhanced bandwidth, connectivity, latency and network-intelligence capabilities.
"GF2"	glass-one film with double side conductive layers	Glass-one film with double side conductive layers is a touch-panel structure comprising a glass layer and a double-sided sensing film used to detect touch input.
"GPU"	graphics processing unit	A graphics processing unit is a specialized processor designed for highly parallel computations and is widely used in graphics rendering, artificial intelligence and high-performance computing.
"HDI"	high density interconnect	High-density interconnect is a printed circuit board technology that uses fine lines, microvias and densely arranged connections to support compact and complex electronic products.
"IIoT"	industrial Internet of things	The industrial Internet of things is a network of connected industrial equipment, sensors and software systems that collects and exchanges operational data for monitoring, automation and process optimization.
"InP PIC"	indium phosphide photonic integrated circuit	An indium phosphide photonic integrated circuit is a semiconductor device that integrates multiple optical functions, such as light generation, modulation and detection, on a single indium phosphide chip.
"IoT"	Internet of things	The Internet of things is a network of physical devices embedded with sensors, software and connectivity that enables them to collect, exchange and act on data.
"LCD"	liquid crystal display	A liquid crystal display is a flat-panel display that uses liquid crystals to control the transmission of light and produce images.
"LCM"	liquid crystal module	A liquid crystal module is an integrated display assembly comprising an LCD panel and related components such as backlights, driver circuits and connectors.
"LED"	light-emitting diode	A light-emitting diode is a semiconductor device that emits light when an electric current passes through it, commonly used as a light source in displays, backlighting and indicator applications.
"LPO"	linear pluggable optics	Linear pluggable optics is an optical transceiver architecture that removes the digital signal processor from a pluggable optical module and uses linear electrical interfaces to reduce power consumption and latency.
"LRO"	linear-receiver optics	Linear receiver optics is an optical receiver architecture that uses a linear electrical interface to transmit received optical signals without digital signal processing within the optical module.
"MES"	manufacturing execution system	A manufacturing execution system is a software platform that monitors, manages and controls production activities and workflows on the factory floor in real time.
"MLPCB"	multi-layer printed circuit board	A multi-layer printed circuit board is a circuit board comprising multiple conductive layers separated by insulating materials to support complex and high-density electronic connections.

"MSA"	multi-source agreement	A multi-source agreement is an industry agreement under which multiple suppliers adopt common specifications to ensure the interoperability and interchangeability of products such as optical transceivers.
"mSAP"	modified semi-additive process	The modified semi-additive process is a printed circuit board manufacturing method that forms fine conductive lines by selectively plating copper onto a thin base copper layer.
"MPP"	Microsoft pen protocol	Microsoft Pen Protocol is a communication standard developed by Microsoft that enables compatible digital pens to interact with touch-enabled displays and devices.
"NRZ"	non-return-to-zero	Non-return-to-zero is a binary signal-encoding format that represents data using two signal levels without returning to a neutral level between successive bits.
"NTSC"	National Television System Committee	National Television System Committee standard is an analogue television and colour-encoding standard that is also commonly used as a reference for measuring display colour gamut.
"OECD"	Organisation for Economic Co-operation and Development	The Organisation for Economic Co-operation and Development is an international organization that promotes policies intended to improve economic development, trade and social well-being.
"OSFP"	octal small form factor pluggable	Octal small form factor pluggable is a high-density, hot-pluggable optical transceiver form factor that supports eight electrical lanes for high-speed data transmission.
"OCA"	optically clear adhesive	Optically clear adhesive is a transparent adhesive film used to bond display, touch-panel and cover-glass components while maintaining optical clarity.
"OCR"	optically clear resin	Optically clear resin is a transparent liquid resin used to bond optical and display components and reduce reflection and visual distortion between layers.
"OEM"	original equipment manufacturer	An original equipment manufacturer is a company that manufactures products or components that are marketed or incorporated into products under another company's brand.
"OLED"	organic light-emitting diode	An organic light-emitting diode is a display technology in which organic electroluminescent materials emit light in response to an electric current, eliminating the need for a separate backlight.
"OLT"	optical line terminal	An optical line terminal is equipment located at the service provider's end of a passive optical network that manages communications with subscriber-side optical network devices.
"ONT"	optical network terminal	An optical network terminal is a subscriber-side device that terminates an optical access network and converts optical signals into electronic signals for use at the customer's premises.
"ONU"	optical network unit	An optical network unit is a device on the subscriber side of a passive optical network that converts optical signals into electronic signals for distribution to end users.
"OTN"	optical transport network	An optical transport network is a telecommunications network architecture that carries, multiplexes and manages high-capacity data traffic over optical fiber.

"OTU"	optical channel transport unit	An optical channel transport unit is an OTN data-frame structure used to encapsulate and transport client signals with monitoring and error-correction information.
"PAM4"	four-level pulse amplitude modulation	Four-level pulse amplitude modulation is a signal-encoding technique that transmits two bits per symbol using four distinct amplitude levels to increase data transmission capacity.
"PC"	personal computer	A personal computer is a general-purpose computing device designed for individual use, including desktop and laptop computers.
"PCB"	printed circuit board	A printed circuit board is a substrate containing conductive pathways that mechanically supports and electrically connects electronic components.
"PLM"	product lifecycle management	Product lifecycle management is a system for managing product information and related processes throughout the product lifecycle, from design and development to manufacturing, service and retirement.
"PON"	passive optical network	A passive optical network is a fiber-optic access network that uses passive optical splitters to connect a single provider-side optical line terminal to multiple subscriber-side devices.
"QMS"	quality management system	A quality management system is a structured framework of policies, processes and controls used to ensure that products and services consistently meet quality and regulatory requirements.
"QSFP-DD"	quad small form-factor pluggable double density	Quad small form-factor pluggable double density is a high-density, hot-pluggable transceiver form factor that supports eight electrical lanes for high-speed network connections.
"RAN"	radio access network	A radio access network is the portion of a mobile telecommunications network that connects user devices to the core network through radio base stations and related equipment.
"RF"	radio frequency	Radio frequency refers to electromagnetic frequencies used for wireless communication, signal transmission and related electronic applications.
"RPCB"	rigid printed circuit board	A rigid printed circuit board is a non-flexible circuit board that mechanically supports and electrically connects electronic components.
"SDH"	synchronous digital hierarchy	Synchronous digital hierarchy is a standardized optical transmission technology used to multiplex and transport multiple digital data streams over telecommunications networks.
"SFP"	small form-factor pluggable	Small form-factor pluggable is a compact, hot-pluggable transceiver form factor used for data transmission over optical fiber or copper cables.
"SiPh"	silicon photonics	Silicon photonics is a technology that uses silicon-based materials and semiconductor manufacturing processes to generate, guide, modulate or detect optical signals on integrated chips.
"SMT"	surface mount technology	Surface mount technology is an electronic assembly method in which components are mounted directly onto the surface of a printed circuit board.

"SONET"	synchronous optical network	Synchronous optical network is a standardized optical transmission technology used to multiplex and transport multiple digital data streams over fiber-optic networks.
"SRM"	supplier relationship management	Supplier relationship management is a structured approach, often supported by software, for managing supplier information, performance, risks and procurement collaboration.
"SR/VR"	short reach/very short reach	Short reach and very short reach are optical communication categories for connections over relatively short transmission distances, typically within data centers or high-performance computing systems.
"STM-N"	synchronous transport module, level N	Synchronous transport module, level N, is the standardized transmission frame and data-rate hierarchy used to carry digital traffic in an SDH network, with "N" indicating the relevant capacity level.
"TFT"	thin-film transistor	A thin-film transistor is a transistor formed as a thin layer on a substrate and commonly used to control individual pixels in flat-panel displays.
"USI"	universal stylus initiative	The Universal Stylus Initiative is an industry standard that enables interoperable communication between compatible active styluses and touch-enabled devices produced by different manufacturers.
"WCS"	warehouse control system	A warehouse control system is a software platform that coordinates and controls the real-time operation of automated warehouse equipment, such as conveyors, robots and sorting systems.
"WMS"	warehouse management system	A warehouse management system is a software platform used to manage warehouse operations, including inventory, storage locations, order fulfilment and the movement of goods.
"XGS-PON"	10G symmetric passive optical network	A 10-gigabit-capable symmetric passive optical network is a fiber-optic access network that provides data transmission speeds of up to 10 Gbps in both downstream and upstream directions.

This prospectus contains, and the documents incorporated by reference herein may contain, forward-looking statements representing our goals, beliefs, expectations, intentions or predictions for the future, which are not historical facts. These forward-looking statements are contained principally in "Summary", "Risk Factors", "Industry Overview", "Business", "Financial Information" and "Future Plans and Use of Proceeds". When used in this prospectus, the words "aim," "anticipate," "believe," "broaden," "commit," "consider," "continue," "could," "drive," "estimate," "evolve," "expect," "forecast," "goal," "going forward," "grow," "in development," "intend," "likely," "maintained," "may," "objective," "ongoing," "opportunity," "plan," "possible," "potential," "predict," "project," "pursue," "schedule," "seek," "shall," "should," "target," "will," "would" and the negative of these words and other similar expressions, as they relate to the Group or its management, are intended to identify forward-looking statements. Forward-looking statements reflect the current views of the Directors with respect to future events, operations, liquidity and capital resources, some of which may not materialize or may change. These statements are based on assumptions and are subject to certain risks and uncertainties, including those listed in "Risk Factors", which are beyond our control and may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. The risks and uncertainties which could affect the accuracy of forward-looking statements include, but are not limited to: (i) our operations, business prospects and development of our products; (ii) our ability to maintain relationship with, and the actions and developments affecting, our customers and suppliers; (iii) future developments, trends, competitive landscape and conditions in the industries and markets in which we operate or plan to operate; (iv) general economic, political and business conditions in the markets in which we operate; (v) changes to the regulatory environment in the industries and markets in which we operate; (vi) our ability to maintain our market position; (vii) the actions and developments of our competitors; (viii) our ability to effectively contain costs and optimize pricing; (ix) the ability of third parties to perform in accordance with contractual terms and specifications; (x) our ability to retain senior management and key personnel and recruit qualified staff; (xi) our business strategies and goals, as well as our plans to achieve these goals, including our continued expansion into certain sectors and markets; (xii) our ability to complete acquisitions, including obtaining any required regulatory approvals and satisfying other conditions to completion, and to successfully integrate acquired businesses and realize the anticipated synergies and benefits; (xiii) the effectiveness of our quality control systems; (xiv) our planned use of proceeds; (xv) change or volatility in interest rates, foreign exchange rates, equity prices, trading volumes, commodity prices and overall market trends, including those pertaining to the PRC and the industry and markets in which we operate; (xvi) capital market developments; and (xvii) various business opportunities that we may pursue.

By their nature, certain disclosures relating to these and other risks are only estimates and should one or more of these uncertainties or risks, among others, materialize, actual results may vary materially from those estimated, anticipated or projected, as well as from historical results. Accordingly, you should not place undue reliance on any forward-looking statements.

Any forward-looking statement speaks only as of the date on which such statement is made. Except as required by applicable laws, rules and regulations, including the Listing Rules, we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. Statements of, or references to, our intentions or those of any of the Directors are made as of the date of this prospectus. Any such intentions are subject to change in light of future developments.

All forward-looking statements in this prospectus are expressly qualified by reference to this cautionary statement.

An investment in the H Shares involves various risks. You should consider carefully all the information set out in this prospectus and, in particular, the risks described below before making an investment in the H Shares.

The occurrence of any of the following events could materially and adversely affect our business, financial position, results of operations or prospects. If any of these events occurs, the trading price of the H Shares could decline and you may lose all or part of your investment. This prospectus also contains forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the risks described below. You should seek professional advice from your relevant advisors regarding your prospective investment in the context of your particular circumstances.

RISKS RELATING TO OUR BUSINESS AND INDUSTRY

Our future growth depends on maintaining and building relationships with customers and developing products that meet their evolving needs.

Many of our products are highly customized to meet the specific technical and performance requirements of individual customers. To maintain our relationships with these customers, we may be required to design, develop and deliver new or improved products that align with customers' product roadmaps and evolving technologies. Developing such products may involve significant technological challenges, increased design flexibility and extensive qualification procedures, which require close coordination with customers. We cannot assure you that these efforts will result in products that satisfy customers' needs or commercial expectations, or that these efforts will lead to future orders or long-term business relationships.

In addition, our customers often impose tight development schedules and extensive technical support requirements, which may require us to allocate substantial resources and management attention. This may divert resources from other development projects and impact operational efficiency. Any delays, or a failure to meet customer expectations in a timely and cost-effective manner, could impair our relationships with customers, limit sales of products under development and materially and adversely affect our growth prospects, business, financial condition and results of operations.

If we fail to develop new or enhanced products on a timely basis, our ability to attract and retain customers could be impaired, and our competitive position could be harmed.

Our future success depends on our ability to design, develop, market and sell new or enhanced products that provide higher levels of performance and reliability and integrate new functionalities to meet the expectations and needs of our customers. For certain of our products, rapid technological advancements and continuous upgrades are critical to remaining competitive. Intense competition, the continuous launch of new and upgraded products or faster product iteration by our competitors, market acceptance of products based on new or alternative technologies and the emergence of new industry standards or new trends in consumer preferences could render our existing or future products less competitive or outdated, leading to decreased revenue and profitability.

At the same time, we may face challenges in development or certification that delay or prevent the launch of new products or extend our time-to-market cycle. Such delays could increase our research and development and marketing expenses and expose us to the risk of losing key customers or our status as their preferred supplier. If we fail to introduce products that adequately meet customer requirements or adapt to technological changes in the industry, we could lose market share, and our business, financial condition and results of operations will be materially and adversely affected.

If our production capacity fails to meet customer demand, our business, financial condition and results of operations could be materially and adversely affected.

Our ability to satisfy customer demand depends on adequate production capacity. In 2023, 2024, 2025 and the six months ended June 30, 2026, our capacity utilization rates were 71.9%, 78.0%, 82.2% and 87.2%, respectively, for PCBs; 71.2%, 71.8%, 57.0% and 65.2%, respectively, for precision components; and 44.2%, 58.7%, 51.8% and 48.6%, respectively, for touch panels and LCMs. For optical transceivers, our capacity utilization rates were 85.7% in 2025 and 85.8% for the six months ended June 30, 2026. If our existing capacity cannot meet market demand, especially if we experience increased demand for our products as we grow our customer base, we may not be able to deliver products on a timely basis, which could harm customer relationships and result in the loss of business opportunities.

Moreover, our ability to maintain or improve our gross margins depends, in part, on sustaining high capacity utilization rates and production yields. We cannot assure you that these rates will not be negatively impacted by factors such as a drop in client demand, equipment malfunction, interruptions in utilities, natural disasters, deficiencies in quality control, inadequate sample testing and labor shortages. If actual market demand for our products falls short of our expectations, our capacity utilization and gross margins could be adversely affected.

At the same time, as our business grows, we may need to expand our production capacity through various measures, including the construction of new production facilities and upgrading existing production lines. We cannot assure you that our new premises will be ready in time or our production capacity will otherwise be successfully expanded. Even after new facilities commence commercial production, we may not achieve the expected ramp-up, yields, product mix, utilization or pricing, and the returns on these investments may fall short of expectations.

Failure to expand our production capacity could hinder our capability to satisfy customer demand and growth prospects. Furthermore, if market demand declines in the future, we may not be able to recoup the costs incurred for the construction of new premises and the maintenance of expanded production capacity. A delay in or cancelation of our expansion plans could also subject us to disputes with various counterparties.

We generate the majority of our revenue from a limited number of key customers, in particular Customer A, and any reduction in orders or deterioration in our relationships with these customers could materially and adversely affect our business and financial condition.

We generate a substantial portion of our revenue from a limited number of key customers. In 2023, 2024, 2025 and the six months ended June 30, 2026, sales to our five largest customers in each year/period amounted to RMB24,734.5 million, RMB26,122.3 million, RMB25,814.1 million and RMB15,031.7 million, accounting for 73.5%, 71.0%, 64.4% and 54.1% of our total revenue in the respective years/periods. In particular, sales to our largest customer in each year/period, Customer A, a leading global consumer electronics company, amounted to RMB18,781.2 million, RMB18,857.6 million, RMB18,642.8 million and RMB8,360.2 million, accounting for 55.8%, 51.3%, 46.5% and 30.1% of our revenue in the respective years/periods.

There can be no assurance that our key customers will continue to purchase our products at volumes, prices or on terms comparable to historical levels. The end products into which our products are integrated are subject to rapid technological change, frequent model refreshes, adoption of new or alternative technologies and shifting consumer preferences. In particular, Customer A's products are characterized by rapidly evolving technologies, and Customer A frequently introduces new product features or adopts new or alternative technologies when launching new products or upgrading existing products. Customer A and other key customers may change product specifications, performance requirements, qualification standards or supplier selection criteria from time to time. If we fail to meet evolving specifications, qualify new products on time, or if we are excluded from a key product development cycle, we could lose programs or experience a significant reduction in orders.

Customers may also reduce, delay or cancel procurement plans, change vendor qualification requirements, require price adjustments, extend payment terms or delay payments. For example, our sales to

Customer A are typically conducted based on a framework agreement, which generally does not specify the number of products that Customer A will purchase from us in any given period and may not contain minimum purchase requirements. Accordingly, there can be no assurance as to the timing or volume of orders that Customer A will place with us. Customer A may also adjust, delay, reduce or cancel procurement plans, or request changes to commercial terms in response to factors beyond our control, including changes in end-market demand, product cycles, inventory levels, pricing considerations, supply chain strategies and macroeconomic or geopolitical developments. If (i) there is any reduction, delay or cancelation of orders from one or more of our key customers due to a reduction in their product sales or for any other reason, (ii) one or more of our key customers select our competitors' products, (iii) we lose one or more of our key customers and are not able to obtain additional or alternative customers that can replace the lost sales volume and profit or (iv) any of our key customers fails to make timely payment for our products, our sales may decline and our financial condition and results of operations may experience material fluctuations. Given the significant order volume of our key customers, we anticipate that we may continue to generate a substantial part of our revenue from a limited number of key customers in the foreseeable future. If our relationships with these customers are not sustained or do not develop, we may not be able to continue to generate revenue and profit from these customers on scales that are comparable to historical levels, or at all.

In addition, against the backdrop of geopolitical tensions and uncertainties surrounding international trade, many companies are diversifying their supply chains away from China. It is reported that Customer A would shift the production of certain products from the Chinese mainland to other countries, such as India and Vietnam. See "Business — Sales and Marketing — Our Customers — Relationship with Certain Top Customers." There can be no assurance that Customer A will not reduce, reallocate or restructure its orders from us in connection with changes in its supply chain footprint, logistics arrangements, transportation costs, localization requirements, geopolitical developments, trade restrictions or other considerations. Any requirement for us to make additional capital investments or operational adjustments to support Customer A's evolving supply chain footprint could increase our costs and expose us to additional operational and regulatory risks.

We are exposed to risks associated with our global operations and will continue to be subject to such risks as we continue to expand our business overseas.

We generate revenue from overseas markets. In 2023, 2024, 2025 and the six months ended June 30, 2026, our revenue from outside the Chinese mainland totaled RMB28,001.9 million, RMB30,583.1 million, RMB32,665.2 million and RMB23,128.5 million, representing 83.2%, 83.2%, 81.4% and 83.2% of total revenue in each year/period, respectively. We are expanding our international presence to serve a broader client base and penetrate new markets. To effectively serve our current and prospective clients, it is imperative that we successfully initiate and execute suitable strategies for each local market. These strategies must be informed by comprehensive feasibility studies, prevailing market conditions, the regulatory landscape and the competitive environment in the targeted regions.

Operating and expanding overseas may subject us to a variety of risks, including but not limited to: (i) changes in prevailing economic conditions and regulatory requirements; (ii) challenges in recruiting and retaining qualified personnel in overseas markets; (iii) adapting products and services to local preferences and cultural norms; (iv) increased costs of maintaining overseas manufacturing facilities; (v) inflation and/or deflation, and changes in interest rates; (vi) increased costs associated with maintaining the ability to understand local markets and follow their trends; (vii) higher-than-anticipated marketing and promotional costs; (viii) increased customer services and support costs; (ix) competition from local and international players in overseas markets; (x) political and social instability, including geopolitical events or civil unrest; (xi) supply chain disruptions and logistical challenges in international operations; (xii) differences in local labor laws and labor union practices; (xiii) obtaining, maintaining or enforcing intellectual property rights; (xiv) fluctuations in foreign exchange rate; and (xv) other various risks that are beyond our control.

We may fail to effectively integrate acquisition targets into our operation and culture or realize expected benefits from our acquisitions, and we may become subject to liabilities and legal claims in connection with such transactions, which could have an adverse effect on our financial condition and results of operations.

We continually evaluate potential acquisitions and strategic investments that are significant to our business both in China and internationally. See "Business — Our Growth Strategies" and "Future Plans and Use of Proceeds." We have invested a substantial amount of capital in acquisitions, joint ventures and strategic investments, including Source Photonics and GMD, and we expect that we will continue to evaluate potential acquisitions, joint ventures and strategic investments in the future. Acquisitions, joint ventures and strategic investments involve numerous risks. Acquired businesses may not achieve the expected levels of revenue, profitability or productivity, or otherwise perform as expected, and acquisitions may involve significant cash expenditures, debt incurrence, operating losses and expenses that could have a material and adverse effect on our financial condition and results of operations. In particular, we entered the optical transceiver business through our acquisition of Source Photonics in September 2025. We expect the acquisition to generate synergies, including cross-selling our PCBs and Source Photonics' optical transceivers to a broader customer base and applying our intelligent manufacturing capabilities to improve Source Photonics' production efficiency and yields. However, the optical transceiver business differs from our existing businesses in its technological, operational and commercial characteristics. For example, Source Photonics' business relies on the in-house design and manufacturing of optical chips, which requires specialized technical expertise that differs from that of our existing businesses. If we are unable to integrate Source Photonics' technologies, R&D activities and production processes with those of ours, or to retain and motivate its key technical and management personnel, Source Photonics' R&D progress, production efficiency and competitiveness could be adversely affected. In addition, aligning Source Photonics' internal controls, information systems, logistics arrangements and compliance procedures with those of ours may take time and incur additional costs. The realization of the expected synergies also depends on factors beyond our control, such as customer qualification and market demand. As a result, if we are unable to effectively manage such differences, retain key personnel and customers or successfully integrate Source Photonics, its business and operations may be disrupted and we may not realize the anticipated synergies and benefits of the acquisition within the expected timeframe, or at all. Further, in connection with our acquisition of Source Photonics, we indirectly hold Source Photonics Taiwan, Inc. (索爾思光電股份有限公司) ("**Source Photonics Taiwan**"), a wholly-owned subsidiary of Source Photonics. According to our Taiwan legal advisor, there is no explicit provision under Taiwan laws requiring prior approval from the Department of Investment Review of the Ministry of Economic Affairs of Taiwan (the "**Investment Commission**") for the acquisition. Nevertheless, in response to a discretionary review by the Investment Commission, Source Photonics Taiwan has submitted relevant documents to the Investment Commission for its review, which was in progress as of the Latest Practicable Date. However, in the event that the Investment Commission takes a negative view, (i) the Investment Commission may impose a fine in Taiwan of not more than NT$25,000,000 if the relevant investment is determined to have been made in violation of the applicable requirements; (ii) it may also order us to cease or withdraw our indirect investment in Source Photonics Taiwan (which may require us to divest or restructure our interest in Source Photonics Taiwan), or to rectify the non-compliance within a specified period, and, where necessary, suspend our shareholder's rights in Source Photonics Taiwan, which may make it difficult for us to maintain de facto control over Source Photonics Taiwan; and (iii) if the investment is not ceased, withdrawn or rectified by the deadline, fines may be imposed repeatedly until it is ceased, withdrawn or rectified. See "History, Development and Corporate Structure — Acquisitions — Source Photonics" for further details of the acquisition and the views of our Taiwan legal advisor, including on the likelihood of the Investment Commission rejecting our indirect investment in, and control of, Source Photonics Taiwan. Other risks and challenges associated with acquisitions include, without limitation: (i) substantial costs and indebtedness associated with negotiating and completing acquisitions, including interest expense, leverage and debt service requirements if additional debt is used to finance an acquisition or investment; (ii) demands on management related to an increase in size of our businesses and additional responsibilities of management; (iii) diversion of management's attention; (iv) disruptions to our ongoing businesses; (v) inaccurate estimates of fair value in accounting for

acquisitions and amortization of acquired intangible assets, which could reduce future reported earnings; (vi) asset write-offs, restructuring costs and other related expenses; (vii) dilution of our current shareholders' ownership; (viii) difficulties in assimilation and retention of employees; (ix) difficulties in integration of departments, systems, technologies, books and records, controls (including internal financial and disclosure controls), procedures and policies; (x) potential loss of major customers and suppliers; (xi) challenges associated with operating in new geographic regions; (xii) challenges associated with new, different or more complex operations; (xiii) challenges associated with integrating legacy compliance programs; (xiv) challenges associated with navigating and complying with new regulatory requirements; (xv) difficulties in maintaining uniform standards, controls, procedures and policies; (xvi) difficulties in servicing and repaying indebtedness and limitations on flexibility from the financing of acquisitions; (xvii) potential failure to anticipate delays or restrictions resulting from regulatory review or required approvals; (xviii) challenges associated with customer insolvency and the inability to collect accounts receivable; (xix) potential failure to consummate an acquisition; (xx) potential failure to identify material problems and liabilities during due diligence review of acquisition targets; and (xxi) potential failure to obtain sufficient indemnification rights to fully offset possible liabilities associated with acquired businesses.

In connection with such transactions, we have in the past, and may in the future, become subject to liabilities or legal claims, including but not limited to: third party liability and other tort claims; claims for breach of contract; employment-related claims; environmental, health and safety liabilities, conditions or damage; regulatory or other legal compliance issues (such as potential liabilities arising from anti-corruption laws and sanctions regulations); claims for contractual indemnification; or tax liabilities. We may also assume risks and liabilities that our due diligence investigations fail to identify, including issues relating to inadequate internal controls and procedures relating to accounting, finance, cybersecurity and data protection controls. If we become subject to any of these liabilities or claims and they are not adequately covered by insurance or an enforceable indemnity or similar agreement from a creditworthy counterparty, we may be responsible for significant out-of-pocket expenditures. Furthermore, potential divestitures or restructuring may entail additional costs, including the potential termination of local operations, severance payments and other employee-related expenses, as well as costs associated with unwinding or reorganizing existing contractual, operational or supply-chain arrangements. These expenses, together with possible business disruptions associated with such restructurings, could increase our overall transaction costs or offset expected benefits.

Even if we are successful in integrating our acquisitions, or completing other strategic transactions, such transactions may not ultimately be successful or accretive to earnings, and we may not realize the expected benefits from such transactions within the anticipated time frame, or at all. If actual performance falls short of the projected results, or the assessment of the relevant facts and circumstances was inaccurate or changes, it is possible that a non-cash impairment charge of related goodwill would be required, and thus our results of operations and financial condition could be adversely affected.

We face intense competition in the global PCB, precision component, optoelectronic display and optical transceiver industries.

The global PCB, precision component, optoelectronic display and optical transceiver industries in which we operate are highly competitive and include thousands of companies with widely varying levels of engineering expertise and sophistication, some of which have achieved substantial market shares. According to CIC, in 2025, the top five players in the global PCB industry collectively accounted for 23.0% of the market and we ranked third with a market share of 4.2%, while the top five optical transceiver suppliers collectively accounted for 55.3% of the global optical transceiver market. The global precision component and optoelectronic display industries had market sizes of approximately US$538.1 billion and US$200.3 billion, respectively, in 2025. According to CIC, general competition in our industries is characterized by price competition and rapid technological changes, and being a responsive, high-quality and low-cost producer is a key factor of competing effectively.

As a result, we may experience downward pressure on our gross margin due to (i) customers seeking lower prices through competitive bidding, (ii) competitors offering aggressive pricing or more favorable commercial terms, and (iii) continued industry capacity expansion in certain product categories, which may intensify price competition. Margin pressure may be more pronounced for products with greater standardization, as well as during product ramp-up periods or weaker demand cycles, when competitors may reduce prices to increase utilization and maintain market share.

Some of our competitors may have longer operating histories, stronger brand recognition in the industry, larger customer bases and greater financial and technical resources than we do. They may also adapt more quickly to new technologies and developments in customer demand and requirements. Our competitors may also possess stronger strategic foresight, enabling them to anticipate technological trends, industry developments and shifts in customer demand earlier than we do. These competitive advantages may enable our competitors to adapt more quickly to changing customer or consumer preferences. Our failure to maintain our competitive position with respect to technological advances, to adapt to changing market conditions and customer preference or to otherwise compete successfully with existing or new competitors may have a material and adverse effect on our business, financial condition and results of operations.

Our research and development efforts are not guaranteed to yield the results we anticipate.

In order to maintain our competitive position and continue to grow our business, we need to continuously develop, rapidly update and introduce innovative products for our existing and potential customers. Accordingly, we dedicate considerable human resources and capital investment to R&D activities. In 2023, 2024, 2025 and the six months ended June 30, 2026, our research and development expenses amounted to RMB1,161.2 million, RMB1,266.8 million, RMB1,417.2 million and RMB784.3 million, respectively, accounting for 3.5%, 3.4%, 3.5% and 2.8% of our revenue in the respective years/periods. However, we cannot assure you that these efforts will be successful or produce our anticipated results.

Moreover, our R&D includes engaging in joint development projects with key customers to ensure our products align with their technical requirements. These projects may require significant investment of time, technical and financial resources without any assurance of commercial success or subsequent volume orders. The development process may be delayed or terminated if a customer changes its technical specifications, priorities or budget, or if the end product fails to achieve market acceptance. Any of these circumstances could result in increased development costs, delayed product launches or loss of expected business opportunities and could materially and adversely affect our business, financial condition and results of operations.

Even if our research and development efforts are successful, we may not be able to apply the technologies we developed to introduce new products in time to fully capitalize on our first-mover advantage, or at all. A failure to maintain technological leadership in the market where we do business could adversely affect our business and financial performance.

Fluctuations in raw material prices, including commodity prices or shortages in the supply of raw materials, could materially and adversely affect our profitability.

The cost of raw materials constitutes the majority of our cost of goods sold. We must obtain sufficient quantities of high-quality raw materials at acceptable prices and in a timely manner in order to manufacture our products. The main raw materials used in the manufacture of our products include copper foil, copper-clad laminates, high-grade aluminum alloys, cover glass, touch sensor, optical fibers, laser diodes and photodiodes. See "Business — Supply Chain — Raw Materials" for further details. The pricing of raw materials can be volatile and difficult to predict due to factors beyond our control, including changes in general economic conditions, currency exchange rates, industry cycles and production levels, commodities markets, transportation costs, government regulations and tariffs, geopolitical events, price controls and other unforeseen circumstances. For example, the average tax-inclusive purchase prices of gold salt, one of our key raw materials by purchase volume, were RMB309 per gram, RMB379 per gram, RMB540 per gram and RMB771 per gram in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. These movements broadly reflected increases in gold prices driven by commodity market conditions and

geopolitical developments. Similarly, the average tax-inclusive purchase prices of copper-clad laminate were RMB14.7 per piece, RMB14.2 per piece, RMB15.5 per piece and RMB19.1 per piece in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. Such price movements were primarily attributable to increases in copper prices and tighter copper-clad laminate supply resulting from rapid growth in demand from the AI industry. At the same time, the selling prices for certain of our products are established on a relatively long-term basis, which could make it more difficult for us to fully or promptly pass on increases in raw material costs to our customers. During the Track Record Period, we did not experience any material adverse impact on our product gross margins as a result of any inability to pass on increases in raw material costs. We may not be able to adjust selling prices immediately when raw material costs increase for those products. Any price adjustment is typically subject to the pricing review cycle agreed with the customer, such as quarterly, yearly or specified trigger events under the relevant agreement. As a result, we may have to absorb all or part of the raw material cost increases during the interim period between a cost increase and the next agreed pricing review or the completion of the adjustment process, and may not be able to pass on the full amount of the increase if the customer does not accept the proposed adjustment or if market conditions limit our pricing power. Accordingly, if the price of raw materials increases and we are not able to compensate for or pass on such increased costs to customers, our profitability and financial results may be adversely affected.

We generally do not enter into long-term supply contracts with our suppliers. We rely on the timely supply of raw materials in order to carry out our production plans as scheduled, and a shortage of any key raw materials could limit the number of products we are able to produce and increase the production costs of our products, thereby depressing the margins for our products to the extent that we are not able to pass on the increased costs to our customers. Moreover, we currently source our main raw materials and key components from a number of third-party suppliers. During the Track Record Period, we did not source any principal raw material or key component exclusively from only a single supplier. Our supply agreements for raw materials may allow pricing adjustments depending on the contract. Our results of operations could be adversely affected if we are unable to obtain adequate supplies of high-quality raw materials in a timely manner at reasonable prices, or if there are significant increases in the costs of raw materials that we could not pass on in full to our customers. Deterioration in business relationships with these suppliers may result in our failure to source sufficient quantities of raw materials and components of satisfactory quality at acceptable costs. There can be no assurance that a significant shortage in the supply of raw materials will not take place in the future.

Moreover, certain of our customers also act as our suppliers under the buy-and-sell model, under which we may be required to purchase designated raw materials or components from such parties or their designated suppliers for use in manufacturing products for those customers, primarily to meet their requirements on quality control, cost control and supply chain stability. As a result, our ability to negotiate favorable purchase prices, payment terms and other commercial terms for such designated materials may be limited, as we may have fewer alternative sources and reduced flexibility to switch suppliers. If our raw material costs increase and we are unable to fully or promptly pass those increases on to customers under our pricing arrangements, our gross profit margin, profitability and results of operations could be adversely affected.

At the same time, many raw materials, including those that are available from multiple sources, are at times subject to industry-wide shortages and significant commodity pricing fluctuations. We cannot assure you that we will be able to extend or renew the agreements that we have entered into for the supply of raw materials on similar terms, or at all. The effects of global or regional economic conditions on our suppliers could also affect our ability to obtain raw materials, which may also adversely affect our business, results of operations and financial condition.

We may experience adverse developments in labor costs and labor relations.

Labor costs have been fluctuating and may rise in the future due to various factors, including inflationary pressure, changes in minimum wage standards, government mandates on employee benefits, social insurance contributions or market competition for skilled workers. Rising labor costs could increase our overall production costs. We may not be able to fully pass on such cost increases to our customers

through higher product prices in a timely or effective manner, which could negatively affect our margins. In addition, sustained increases in labor expenses may require us to adjust workforce allocation or enhance automation, which could lead to temporary inefficiencies and additional investment.

At the same time, we cannot assure you that labor disputes will not occur in the future. Any deterioration in labor relations could result in loss of key personnel, business interruptions, increased costs associated with recruitment and training and loss of institutional know-how, all of which may materially and adversely affect our business, financial condition, results of operations and prospects.

We may not be able to identify suitable acquisition candidates or complete acquisitions on our desired timing or terms, which could limit our potential for growth.

We have made acquisitions in recent years and may consider new acquisitions that provide meaningful opportunities for growth. We also intend to use approximately 20% of the net proceeds from the Global Offering for potential strategic investments or acquisitions. However, we may not be able to identify suitable acquisition candidates or complete acquisitions on acceptable timing, terms and conditions. Other companies in our industries have similar investment and acquisition strategies to ours, and competition for acquisitions may intensify. If we are unable to identify acquisition candidates that meet our criteria, our potential for growth may be restricted. Even if we identify acquisition candidates that we believe meet our criteria, we may be unable to complete such acquisitions in a timely manner, on desirable terms or at all, including as a result of an inability to satisfy related closing conditions or obtain necessary consents from the relevant authorities, the expiration or termination of applicable regulatory waiting periods, or competing offers from other potential acquirers that provide more favorable terms and conditions. For example, our ability to close certain of our prior acquisitions may be delayed due to regulatory procedures. Our efforts to identify suitable acquisition candidates, even if successful, could also cause us to incur substantial screening and transaction fees, divert our management and administrative resources or fail to identify due diligence or other issues affecting the value and suitability of potential acquisition targets. Any of these results could have a material and adverse effect on our business, results of operations, financial condition and prospects.

At the same time, the valuation of potential targets is inherently uncertain and involves significant judgment. In particular, it may be affected by factors such as rapidly changing technology, customer concentration, the sustainability of order pipelines, qualification and certification status, yield and reliability performance, capacity expansion needs, cyclicality in end-market demand and volatility in raw material and other input costs. As a result, our valuation assumptions, including projected revenue growth, margins, synergies, capital expenditure requirements and discount rates, may prove inaccurate. If we are unable to value or execute acquisitions as expected due to inaccurate assumptions, we may be required to write down the value of an acquired business, incur significant losses and divert management resources, which could materially and adversely affect our business, financial condition, results of operations and prospects.

The changes in trade relationships and tariff policies could negatively affect our operating results and cause fluctuations in demand for our products.

We operate within a global supply chain, and our products are sold globally as part of various end products. As such, we face risks associated with export and import controls, tariffs, economic sanctions and other trade protection measures. Recent trade tensions, such as the ongoing U.S.-China trade dispute, have led to broader and substantially higher tariffs, export controls and other restrictive measures targeting high-technology goods, semiconductors and electronics. While our sales by delivery destination to the United States accounted for approximately 7.7% of our total revenue in 2024, we are exposed to the impact of these measures through our international customers and global supply chains. Regarding tariffs, in February 2025, the United States imposed a 20% tariff on certain categories of Chinese goods (the "**Fentanyl Tariff**"). Subsequently, on April 2, 2025, the United States imposed a 10% baseline tariff on all imports from its trading partners, along with additional country-specific tariffs for various countries, as adjusted from time to time (the "**Reciprocal Tariff**"). Following the U.S.-China leaders' meeting in October 2025, the President of the United States issued executive orders on November 4, 2025 that, among other things, reduce the Fentanyl Tariff from 20% to 10%, effective November 10, 2025, and continue the suspension of heightened

China-specific Reciprocal Tariff rates through November 10, 2026, thereby maintaining the 10% Reciprocal Tariff baseline on imports from China during that period. The United States and China are engaged in ongoing trade discussions, but there is no assurance that the higher tariffs will be suspended further or that a long-term agreement will be reached, and there is no assurance that the tariff policy will remain in its current form. At the same time, on February 20, 2026, the U.S. Supreme Court issued its opinion affirming the lower court's ruling, striking down the tariffs implemented pursuant to the International Emergency Economic Powers Act (IEEPA), including the Reciprocal Tariff and the Fentanyl Tariff. Following this decision, the administration rescinded the IEEPA-based tariffs but concurrently imposed a 10% temporary import surcharge under Section 122 of the Trade Act of 1974 on imports from all U.S. trading partners for a 150-day period commencing on February 24, 2026 and discussed plans to impose other tariffs in reliance on other statutory authorities. On May 7, 2026, the U.S. Court of International Trade ruled that the Section 122 tariffs are unlawful, but its injunction applied only to the specific plaintiffs in the case. The administration appealed to the U.S. Court of Appeals for the Federal Circuit, which stayed the injunction pending the appeal. The Section 122 tariffs expired on July 24, 2026 at the end of the 150-day period. On the same day, the Office of the U.S. Trade Representative imposed new tariffs under Section 301 of the Trade Act of 1974 on imports from 60 economies, at rates ranging from 10% to 12.5%, including a rate of 12.5% on imports from China. The U.S. tariff policies are rapidly evolving, and the final outcome, including the timing, impact and potential legal challenges regarding any newly implemented tariffs, is highly uncertain. Any additional tariff may increase the price of the end products imported to the U.S. market and reduce their competitiveness. Our customers who import the products may wish to pass on the additional tariff on us, their other suppliers or their customers. Even if the tariff is not passed on to us, the reduced competitiveness of our customers' end products could lead to the reduction or cancellation of their purchase orders from us, and tariffs could generally negatively affect economic conditions in China and other countries and regions, which could adversely affect our business.

We are subject to governmental export and import controls and economic sanctions, which could affect our ability to compete in certain markets or expose us to liability in certain jurisdictions.

Exports, re-exports and transfers of our products must be made in compliance with various economic sanctions and export controls laws in different jurisdictions. Regarding economic sanctions, the most significant controls are those administered by OFAC, which prohibit the provision of products to certain countries or regions, governments, entities and persons targeted by U.S. sanctions. Regarding U.S. export controls, EAR have broad jurisdiction, covering both U.S.-origin items and certain foreign-produced items, such as those containing more than a de minimis level of controlled U.S. content or those subject to FDPR. The expansion of the FDPR under the EAR first came into broader effect in May 2020 when BIS amended General Prohibition Three of the EAR to apply to foreign-produced direct product when destined for or used by certain entities on the BIS Entity List (the "**Entity List**"). Since that date, the FDPR has been further extended to cover advanced computing integrated circuits, supercomputers and advanced semiconductor manufacturing equipment for certain jurisdictions under the EAR. In October 2022, the BIS issued an interim final rule (the "**BIS October 2022 IFR**") to limit China's access to advanced computing integrated circuits, supercomputers and advanced semiconductor manufacturing equipment. In October 2023, the BIS released another interim final rule (the "**BIS October 2023 IFR**") that updated and expanded the restrictions from the BIS October 2022 IFR (together with the BIS's April 2024 interim final rule, the "**BIS 2022/23 IFRs**"). Among other measures, the BIS 2022/23 IFRs added certain advanced and AI computing integrated circuits and related computer commodities to the Commerce Control List, imposing new or expanded license requirements for items subject to the EAR intended for use in developing or producing supercomputers, advanced node integrated circuits, and advanced semiconductor manufacturing equipment in certain jurisdictions, including China. Most recently, in January 2025, BIS issued an interim final rule (the "**BIS January 2025 IFR**") to further limit China's access to this advanced manufacturing equipment.

In addition to the restrictions introduced above, the BIS also maintains lists of persons that are subject to enhanced export control restrictions. One such list, the Entity List, includes a list of foreign persons on which certain trade restrictions are imposed. In recent years, the United States has placed an increasing

number of entities, including hundreds of entities in China, on the Entity List and other restricted or prohibited party lists. In addition to naming additional persons to these lists, BIS has imposed complex and restrictive rules applicable to doing business with persons on them. The restrictions applicable to Entity List parties include licensing requirements for exports, re-exports or transfers of items on lists of controlled items maintained by the U.S. government, which in most cases prevents these named entities from receiving essentially any item subject to U.S. export controls, including, in some cases through the application of the EAR's foreign direct product rules, to items produced wholly outside the United States. In addition, on September 29, 2025, the BIS issued an interim final rule extending Entity List and MEU List restrictions to non-listed foreign entities that are 50% or more owned, directly or indirectly and in the aggregate, by parties on the Entity List or certain other restricted party lists (the "**Affiliates Rule**"). However, following the leaders' meeting on October 30, 2025, the United States will suspend implementation of the Affiliates Rule for one year beginning November 10, 2025. As a result, this extension of Entity List restrictions is not expected to apply during the suspension period unless BIS issues implementing rules to the contrary or the suspension is modified or revoked. We screen our counterparties to determine if they are subject to applicable economic sanctions or export control restrictions and have not identified any sales that involve such sanctioned parties or jurisdictions, including those parties and jurisdictions subject to OFAC-administered sanctions. However, certain of our customers have been included on the BIS Entity List. During the Track Record Period, a customer group and a customer of ours were included on the BIS Entity List. Revenue generated from the relevant customers in the aggregate accounted for 1.0%, 1.6%, 1.7% and 1.3% of our total revenue in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. Revenue generated from the relevant customers of Source Photonics in the aggregate accounted for 6.0%, 6.2% and 8.1% of Source Photonics' total revenue in 2023, 2024 and the nine months ended September 30, 2025, respectively. As advised by our legal advisor as to international sanctions, none of the items we sold to Entity List-designated customers involve the transfer, export or re-exports of items subject to the EAR, including through the FDPR.

Further, it has recently been reported that the U.S. government is considering measures to prohibit the importation of new models of Chinese-manufactured optical transceivers for use in data centers in the United States. To date, the U.S. Federal Communications Commission (the "**FCC**") has not enacted, formally proposed or published in draft form any prohibition or restriction on optical modules originating from China ("**Potential FCC Restriction**"). There is currently no information available regarding the legal basis or scope of the Potential FCC Restriction, the optical module products that may be affected or its potential implementation timeline. Accordingly, we are not currently in a position to assess or quantify the potential impact of such a measure, the details of which remain unclear. Based on the reports available to date, we understand that any Potential FCC Restriction would likely operate as a restriction on the importation and/or marketing of affected optical modules in the United States, rather than as an export control measure. However, if the Potential FCC Restriction or any similar measure is adopted, our ability to sell our optical transceivers in the United States may be restricted, and our business, financial condition and results of operations could be materially and adversely affected.

These policies have introduced uncertainties to global supply chains, limited access to critical raw materials and components and increased production and compliance costs and uncertainties for companies operating in affected industries. For instance, restrictions on the export of specific technologies or materials to certain regions could disrupt our ability to procure key inputs or supply products to customers in affected markets, causing operational delays or interruptions. If these trade restrictions or geopolitical tensions escalate, we may face additional risks such as reduced access to key markets, strained customer relationships and loss of market opportunities.

Tariffs, quotas and local content rules may further raise production costs, impacting the profitability and competitiveness of our products. As the Entity List and other sanctions and export control laws and regulations, including the EAR's de minimis rules and the FDPR, continue to evolve, future sanctions and export controls may significantly impact our business relationships with some of the key customers or suppliers. For example, if restrictions are imposed on the export of certain computing products from the United States to China, the resulting decline in downstream production or demand may adversely affect our

sales of related PCB products. In addition, dealing with customers or suppliers that are subject to export control or sanctions may pose significant risks to our business. These risks include potential disruptions in our supply chain, legal and regulatory compliance challenges and the possibility of civil and criminal penalties. We have no control over the countries, regions or destinations to which the customers will sell and/or export their end products. If the export sales of the customers' end solutions are restricted, prohibited or made subject to any export controls or economic sanctions imposed by any jurisdictions, the customers' demand for our products may decline, and, as a result, our business, financial condition and results of operations may be materially and adversely affected.

If we experience operational disruption in our production facilities, our inventory level and production schedule may be adversely affected.

Our success and reputation depend on our ability to deliver quality products to our customers on time and in required quantities, which in turn relies on the proper and reliable functioning of our production processes. Any operational disruption or machinery breakdown could directly impact our production schedules and stock levels, hindering our ability to meet customer orders in a timely manner, thus affecting customer satisfaction.

Operational disruptions or machinery breakdowns in our production facilities may arise from various unexpected incidents or catastrophic events. Additionally, instability or shortages in electricity supply could halt production activities, causing delays in fulfilling customer orders. In the event of such disruptions, maintaining production volumes and ensuring sufficient stock levels to meet customer demands could be challenging. Identifying and securing alternative facilities or machinery in a timely and cost-effective manner may not always be feasible. Delays in resuming normal operations could also affect the quality and schedule of product deliveries, potentially impacting customer satisfaction and damaging our reputation.

We may encounter difficulties with our manufacturing technology or certain of our equipment suppliers may fail to perform their contracts.

We purchase substantially all of our equipment from external suppliers based on our technical specifications, and we cannot guarantee that such suppliers will perform their contractual duties as we expect. For example, only a few companies can produce the mechanical drilling machine and flying probe tester that are necessary to achieve a desirable level of production yields, and their production capacities are limited. Supply shortage due to any reason can hinder our capability to expand our production capacity.

To meet the diverse needs of our end customers, we are often required to manufacture customized products with a high degree of flexibility. Accordingly, some of our manufacturing equipment is customized to the designs or specifications that we provide to our equipment supplier, who then undertakes a specialized process to procure and assemble the customized equipment. As a result, the equipment is not immediately available from other vendors and may take time to repair or replace if it were damaged to a great extent or stopped working. Inability to make timely repair or replacement of such equipment can result in disruption to our production activities.

We may face warranty claims, product return and liability, economic damage claims and negative publicity if our products fail.

We receive warranty claims from our customers from time to time in the ordinary course of our business. However, if we experience an unusually high incidence of such claims, we could incur significant costs and our business, financial condition and results of operations could be materially and adversely affected.

Our products are complex and may contain defects for many reasons, including design flaws, manufacturing irregularities, material deficiencies or other factors. Latent defects may exist or new issues may emerge in our existing or future products. If any of our products contain defects or have reliability, quality or compatibility problems, our reputation might be negatively impacted, and we may be unable to retain existing customers or attract new customers. In the event of an actual or perceived defect, we may

need to devote significant capital, technical, managerial and other resources to investigate and correct the issue, which could divert attention and resources from other important development projects. If we are unable to identify and implement an acceptable solution in a timely and cost-effective manner, we may be required to bear substantial product recall, warranty, repair, replacement and litigation costs, all of which could materially and adversely affect our operating results.

At the same time, as our products are integrated into a variety of end products, we are exposed to product and economic liability risks, as well as the risk of negative publicity affecting our customers. Our sales may decline as our customers may be subject to product liability claims or experience negative publicity regarding the quality or safety of their products, even if our products are not at fault. Such events could result in reduced demand for our products, reputational harm and material adverse effects on our business, financial condition and results of operations.

During the Track Record Period, the credits incurred by us in relation to product return accounted for approximately 0.4%, 0.3%, 0.4% and 0.2% of our total revenue in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively; the costs associated with warranty claims accounted for approximately 0.1% of our total revenue in each year.

Our business is subject to legal, regulatory, political, compliance and other risks associated with our overseas operations.

We derive a significant portion of our revenue from overseas customers and are continuing to expand our global presence to serve a broader customer base. Accordingly, we have faced, and will continue to face, numerous risks, including legal, regulatory, political, compliance and other risks associated with conducting operations in various jurisdictions, any of which could negatively affect our financial performance. These risks include the following: (i) changes in foreign tax rules, regulations and other requirements, such as changes in tax rates and statutory and judicial interpretations of tax laws; (ii) the risk that our interpretation of local statutory and regulatory requirements relating to sales taxes, VAT, other taxes, accounting standards, licenses and permits, may prove to be incorrect or unsupportable due to their complexity or our own oversight, resulting in fines, penalties or other liabilities related to non-compliance, damage to our reputation, unanticipated operational restrictions or other consequences as a result of our actions, or inaction, taken to perform our responsibilities; (iii) changes in international trade policies and regulations, including those in relation to economic sanctions, export controls and import restrictions, as well as tariffs, non-tariff barriers, duties, government royalties, including the imposition or increase of withholding and other taxes on remittances, or changes in restrictions on trade between China and the countries or regions where our products are manufactured or sold; (iv) difficulty in coping with possible conflict of laws and regulations of different jurisdictions where we operate; (v) changes in foreign countries' regulatory requirements, including with respect to data privacy, AI, consumer protection, environmental and antitrust matters; (vi) complexities relating to compliance with foreign anti-bribery, anti-corruption and anti- money laundering regulations and antitrust laws; (vii) risks associated with overseas investment, construction, production and operations, including compliance with local investment approval processes, environmental protection requirements, labor and employment regulations and tax obligations; (viii) product boycotts, including with respect to products of our multi-national customers; (ix) difficulty in obtaining or enforcing intellectual property rights; (x) difficulty in enforcing agreements and collecting overdue receivables through local legal systems; (xi) loss or non-renewal of treaties between foreign governments and China; (xii) changes in geopolitical situations, especially those in jurisdictions where we do business; (xiii) strict foreign exchange controls and cash repatriation restrictions; (xiv) high social benefit costs for labor, including more expansive rights of foreign unions and works councils; (xv) misconduct by our customers beyond our control, including but not limited to breaching the agreements with them and laws and regulations of various jurisdictions that are applicable to them; (xvi) changes in immigration and labor laws that may adversely impact our access to technical and professional talent; (xvii) legal, regulatory, political instability and uncertainty; and (xviii) labor disputes and work stoppages at our operations and suppliers.

In addition, as we operate in many different jurisdictions, we have conducted cross-border inter-group transactions in our ordinary course of business, which may result in an increased likelihood of tax audits,

possibly leading to challenges in relation to, amongst other things, tax residence, permanent establishment and transfer pricing. The materialization of any of the foregoing risks could increase our compliance costs, disrupt our international operations, limit our market access or result in significant liabilities, any of which could materially and adversely affect our business, financial condition, and results of operations.

Our results of operations and profitability depend on general economic conditions and cyclical demand in our customers' end markets.

Our results of operations depend on general economic conditions. More specifically, as our products are primarily applied in consumer electronics, automobiles, data center and other AI computing infrastructure, our customers' ability and willingness to invest in these areas could significantly affect our business and financial performance. These investments and spending in turn are affected by a number of economic and other factors beyond our control. Economic uncertainty and other related factors may exacerbate negative trends in these investments and spendings and may postpone or preclude the investment in AI infrastructure or purchasing of EVs or consumer electronics, which in turn will negatively affect demands for our products and thereby adversely affect our business, results of operations and financial condition. At the same time, as these industries are highly competitive and driven by cycles of end-user demand, which are also partly affected by general economic conditions, our customers face persistent pricing pressure and ongoing requirements to reduce production costs and increase efficiency, which can translate into lower average selling prices for our products, shorter product life cycles and more volatile ordering patterns. For example, during the Track Record Period, the consumer electronics industry went through a prolonged period of inventory destocking throughout 2023, after demand was pulled forward in 2021 and 2022 by the increase in remote working during the COVID-19 pandemic. This led to significant declines in both the average selling prices of our touch panels and the utilization rates of our related production capacity. We cannot assure you that similar downturns will not occur in the future, that any such downturn will not last for a prolonged period, or that we will be able to respond to it effectively.

In addition, relevant industrial policies, fiscal incentives or subsidy programs in different jurisdictions may affect investment levels and production priorities in our customers' end markets. Divergences or changes in such policies among major economies may also create regional imbalances or uncertainties that could disrupt our customers' capital expenditure plans and affect our sales performance. As a result, fluctuations in end-market demand and pricing may cause our revenue, margins and cash flows to vary significantly from period to period, which could materially and adversely affect our business, financial condition and results of operations.

Our sales may be influenced by seasonality.

Our results of operations are affected by seasonal fluctuations in the demand for consumer electronics, which in turn influence our customers' demands for our products. For products used in consumer electronics, we typically experience higher sales in the second half of the year due to the synchronized launch cycles of new smart devices and the heightened purchasing activity associated with the holiday season. Accordingly, various aspects of our operations, including sales, working capital and operating cash flows, are exposed to the risks associated with seasonal fluctuations in the demand for our products, and our quarterly or half year results may not reflect our full year results.

Our intellectual properties may be subject to infringement.

Our success depends in part on our ability to obtain and maintain appropriate patent and trade secrets protection for our technologies, processes and products and to successfully enforce our rights against infringement, such as unauthorized replication, reverse engineering and design theft. If our patents do not adequately cover our technologies or are invalidated or circumvented, we may be unable to prevent competitors from utilizing similar technologies.

We also rely on unpatented proprietary technologies, processes, know-how and data protected mainly through trade secrets and confidentiality arrangements, which are inherently difficult to safeguard and may be breached or independently replicated by competitors. In addition, we may face intellectual property

disputes alleging infringement or misappropriation or need to enforce our own rights. Such disputes are costly, time-consuming, may divert management attention and have uncertain outcomes, and adverse results could allow competitors to use our technologies.

Our business depends on the continuing efforts of our senior management and our ability to attract and retain key employees.

Our business operations depend on the continuing efforts of our management, particularly the members of our senior management team. If one or more members of our senior management are unable or unwilling to continue serving in their present positions, we may not be able to replace them readily, or at all. As a result, our business may be severely disrupted, and we may incur additional expenses to recruit and retain new officers. In addition, if any member of our senior management joins a competitor or forms a competing company, we may lose some of our customers, and more importantly, our trade secrets. We protect our trade secrets by entering into confidentiality agreements, which contain the noncompetition clauses, with each member of our senior management. However, we cannot assure you that, if any disputes arise between our senior management and us, these confidentiality clauses could be adequately enforced in our favor.

Our success also depends to a significant extent on the skills and efforts of our key managerial, technical, sales and other employees and upon our ability to continue to attract, retain and motivate qualified personnel. We compete with other manufacturing companies for technical and other skilled employees, especially skilled roles such as production management and quality control, which are critical to maintaining efficient operations and meeting customer specifications. We cannot assure you that we will be able to continue to attract and retain qualified employees essential to our growth. The loss of the services of these key employees or the inability to attract or retain qualified employees could have a material adverse effect on us.

Our business may be impacted by geopolitical uncertainties and other political, social and economic instability that lead to business interruptions.

Geopolitical uncertainties, such as war, military conflicts and general regional instability, strategic rivalries among major economies, particularly between the United States and China, acts of terrorism, health emergencies, widespread outbreaks of infectious diseases and other political, social and economic instability and geopolitical tensions, including the impact of potential changes in tariffs or sanctions and escalating trade wars, could lead to business interruptions and cause damage or disruption to international commerce and the global economy, and thus could have a material adverse effect on us, our customers and suppliers. Our business operations are subject to interruption by, among others, natural disasters, whether as a result of climate change or otherwise, fire, power shortages and other industrial accidents, terrorist attacks and other hostile acts, labor disputes, public health issues, demonstrations or strikes, and other events beyond our control. Such events could decrease demand for our products, make it difficult or impossible for us to make and deliver products to our customers, or to receive materials from our suppliers, and create delays and inefficiencies in our supply chain.

U.S. outbound investment regulations and other foreign laws and regulations could have a negative impact on our future ability to access capital.

On October 28, 2024, the U.S. Department of the Treasury ("**Treasury**") issued a final rule, codified in the United States Code of Federal Regulations at 31 C.F.R. part 850, to implement the Executive Order 14105 of August 9, 2023 (the "**Outbound Investment Rule**"). On January 2, 2025, a U.S. outbound investment security program (the "**Outbound Investment Security Program**"), implemented by the Treasury under the Outbound Investment Rule, became effective. The Outbound Investment Rule imposes investment prohibition and notification requirements on U.S. persons for a wide range of investments in entities associated with China (including Hong Kong and Macau) that are engaged in activities relating to three sectors: (i) semiconductors and microelectronics, (ii) quantum information technologies, and (iii) artificial intelligence systems, collectively defined as "**Covered Foreign Persons**". U.S. persons subject to the Outbound Investment Rule are prohibited from making, or required to report, certain investments in Covered Foreign Persons, which are defined as "Covered Transactions," and include certain acquisitions of an equity interest or contingent equity

interest, certain debt financing, joint ventures, and certain investments as a limited partner in a non-U.S. person pooled investment fund. The Outbound Investment Rule contains exceptions for certain investments, including those in publicly traded securities, except when the U.S. person investor secures rights that go beyond standard minority shareholder protections. Based on the advice of legal advisor as to international sanctions, the Group is not engaged in any "covered activities" (as defined in 31 CFR § 850.208) under the Outbound Investment Rule. In particular, although Source Photonics designs and produces certain optical and laser-based semiconductor components, such products are discrete optoelectronic devices rather than integrated circuits for purposes of the Outbound Investment Rule. In certain cases, to meet customer demand for higher-speed pluggable optical transceivers, Source Photonics sources photonic integrated circuits ("**PICs**") from third-party vendors. In these arrangements, the vendors design and fabricate the PICs, and Source Photonics fits the externally sourced PICs as the photonic engine within its optical transceiver products. Accordingly, as advised by the Company's legal advisor as to international sanctions, Source Photonics' optical transceiver production does not involve the design, fabrication or packaging of PICs or any other integrated circuits for the purposes of the Outbound Investment Rule, and therefore does not constitute a "covered activity" thereunder. In addition, based on our audited consolidated financial statements for the year ended December 31, 2025, the Subsidiary did not contribute 50% or more of the Company's consolidated revenue, net income, operating expenses or capital expenditure. The 50% threshold is relevant because a parent company may also be treated as a "covered foreign person" if a subsidiary engaged in covered activities accounts for more than 50% of any of these financial metrics. Under 31 CFR § 850.209(a), this calculation is based on the audited financial statements for the most recent financial year. Accordingly, based on the advice of legal advisor as to international sanctions, even under a conservative assumption that Source Photonics were deemed to engage in covered activities, such activities would not have resulted in the Group being classified as a "covered foreign person" under the Outbound Investment Rule. For details, please refer to "Business — Trade Restrictions, Tariff Policies and International Sanctions — U.S. Outbound Investment Security Program." In addition, we will not use any proceeds from this offering to, directly or indirectly, fund or acquire any entities, that are engaged in activities or businesses that would be deemed "covered activities" under the Outbound Investment Rule. Based on the advice of our international sanctions counsel and our current business activities, this offering is not an indirect covered transaction and is not a prohibited or notifiable transaction under Outbound Investment Rule. However, there is no assurance that the Treasury will take the same view as ours, which could implicate the prohibitions or notification requirements under the Outbound Investment Rule for U.S. persons. Investors should consult their legal counsel regarding the applicability of the Outbound Investment Rule to this offering.

Adverse changes to foreign laws or regulations, including the Outbound Investment Rule, could also heighten our exposure to legal and business risks, restrict our access to capital, disrupt our operations and affect our results of operations. For example, on February 21, 2025, U.S. President issued a memo entitled the "America First Investment Policy" (the "**America First Memo**"), indicating that Executive Order 14105 is under review, and the U.S. government will consider possible application of the Outbound Investment Rule to a wider range of technology sectors and application of restrictions to a wider range of investments, including publicly traded securities.

On December 18, 2025, the U.S. Comprehensive Outbound Investment National Security Act of 2025 (the "**COINS Act**"), which will supersede the Outbound Investment Rule, became law. The COINS Act is subject to a rulemaking process, which is required to be completed by March 2027, and there is substantial uncertainty regarding how the new law will be implemented. Possible changes to the Outbound Investment Rule, the COINS Act, or similar laws and regulations could limit or, in the worst-case scenario, eliminate our ability to raise capital or contingent equity capital (such as convertible bonds) from U.S. investors in the future, or our ability to raise such capital may be significantly and negatively affected, which could be detrimental to our capital-raising capacity and our business, financial condition and prospects. In addition, while we believe that purchases of our H Shares in this Global Offering and subsequent secondary market trading should fall within the publicly traded securities exception under the current Outbound Investment Rule, any changes to the publicly traded securities exception or other aspects of the Outbound Investment Rule could prohibit the purchase or trading of our H Shares by U.S. persons, impose new notification or other regulatory requirements, or make our H Shares less attractive to such investors. In such cases, the value of our

H Shares could significantly decline, and our liquidity may be materially and adversely affected. Investors, including those that are U.S. persons or are subsidiaries of U.S. persons, should consult their own legal counsel regarding the applicability of the Outbound Investment Rule, the COINS Act or similar laws and regulations to this Global Offering and any potential obligations and exceptions thereunder.

We may require additional funding to finance our operations, which may not be available or on terms acceptable to us.

We may require additional cash resources to finance our continued growth or other future developments, including any investments or acquisitions we may decide to pursue. To the extent that our funding requirements exceed our financial resources, we will be required to seek additional financing or to defer planned expenditures. We may not be able to obtain additional funds, or obtain such funds on terms acceptable to us. In addition, our ability to raise additional funds in the future is subject to a variety of uncertainties, including our future financial condition, results of operations, general market conditions for capital raising and debt financing activities and economic, political and other conditions in the markets in which we operate.

We may be subject to delivery failures or disruptions.

We use third-party logistics service providers to deliver certain of our work-in-progress and finished products. As we do not have any direct control over these logistics service providers, we cannot guarantee their quality of services. In addition, our suppliers sometimes deliver materials to us through third-party logistics service providers. Delays in delivery could adversely impact our suppliers' ability to timely deliver materials to us and as a result, our ability to deliver to our customers.

At the same time, we may not be able to continue or renew our contractual arrangements with our existing logistics service providers, particularly if disputes arise or if we are unable to cooperate on terms acceptable to us. This could result in delivery delays, higher transportation costs or other operational disruptions. If we experience a breakdown in our relationships with existing logistics providers or fail to engage new providers that can ensure accurate, timely and cost-efficient delivery services, we may incur additional costs or suffer business interruptions that could materially and adversely affect our business, financial condition and results of operations.

Our insurance coverage may be insufficient to cover all of our potential losses.

We maintain insurance coverage over our daily operations and the shipment of our products in transportation. We cannot assure you that our insurance will provide adequate coverage for all the risks in connection with our business operations. If we were to incur substantial losses and liabilities that are not covered by our insurance policies, we may be required to bear our losses to the extent that our insurance coverage is insufficient. As a result, we could suffer significant costs and diversion of our resources, which could have a material and adverse impact on our business, results of operations and financial condition.

Failure to comply with the PRC Social Insurance Law and the Regulation on the Administration of Housing Provident Funds or other PRC labor related regulations may subject us to fines and other legal or administrative sanctions.

According to applicable PRC laws and regulations, employers must contribute to social insurance funds and housing provident fund for the benefit of their employees. During the Track Record Period, we and certain of our PRC subsidiaries did not make adequate contributions to social insurance and housing provident funds for employees as required by relevant PRC laws and regulations. According to our PRC Legal Advisor, (i) the likelihood of an administrative penalty being imposed is remote in the event that the relevant authorities require us and our PRC subsidiaries to pay any shortfalls within a prescribed period, provided that we make such payments in full within the required timeframe; (ii) the likelihood that the relevant authorities would proactively initiate collective action to recover such shortfalls is also remote, absent any significant changes in current policies, regulations and local enforcement practices and supervision or any major employee complaints, reports or related litigation or arbitration.

However, there is no assurance that our historical and current practices with respect to the contribution of social insurance plans and housing provident fund will at all times satisfy the government authorities in the Chinese mainland. In the event of any such non-compliance, we may be required to pay any shortfall in the contribution of social insurance plans and housing provident fund within a prescribed time period and to pay penalties if we fail to do so. See "Regulatory Overview — Regulations on Employment and Social Welfare" for further details. In addition to the above, if we fail to comply with any other relevant labor laws and regulations in the Chinese mainland, we may be exposed to penalties or be required to compensate employees.

Furthermore, the Interpretation II of the Supreme People's Court of Issues Concerning the Application of Law in the Trial of Labor Dispute Cases (《最高人民法院關於審理勞動爭議案件適用法律問題的解釋(二)》) (the "New Judicial Interpretation") was enacted by the Supreme People's Court on July 31, 2025 and effective as of September 1, 2025. According to the New Judicial Interpretation, if the employer and its employee agree or the employee undertakes that social insurance contributions need not be paid, the People's Court shall deem such agreement or undertaking invalid. Furthermore, where the employer fails to pay social insurance contributions in accordance with the applicable laws, and the employee seeks to terminate the labor contract and claims economic compensation from the employer pursuant to the Labor Contract Law of the PRC, the People's Court shall support such claims. See "Regulatory Overview — Regulations on Employment and Social Welfare" for details.

Given the magnitude, complexity and continuous amendments to these laws and regulations, compliance therewith may be onerous and may involve substantial financial and other resources to establish efficient compliance and monitoring systems. The liabilities, costs, obligations and requirements associated with these laws and regulations may therefore be disruptive to our operations. Non-compliance may even result in substantial penalties or fines, suspension or revocation of our relevant licenses, among other things.

We are subject to risks in relation to our properties.

We currently lease several premises in China mainly for office, production or storage uses. Under the PRC laws and regulations, lease agreements in general are required to be registered with the local real estate administration bureau. As of June 30, 2026, we and our major PRC subsidiaries had not registered 15 lease agreements for our aforementioned leased properties, which are leased by us or our major subsidiaries for office, production or storage uses. We may be subject to fines if we fail to rectify such non-compliance within the prescribed time frame after receiving notice from the relevant PRC government authorities. The penalty ranges from RMB1,000 to RMB10,000 for each unregistered lease, at the discretion of the relevant authority. The maximum aggregate amount of potential administrative penalties we would be subject to for the 15 lease agreements is RMB150,000. In the event that any fine is imposed on us for our failure to register our lease agreements, we may not be able to recover such losses from the lessors.

In addition, as of June 30, 2026, the lessors with whom we enter into the aforementioned lease agreements did not provide the valid property ownership certificates of the leased premises for 7 leased premises mainly used as warehouse and offices. The aggregate floor area of these premises accounted for approximately 2.9% of the total gross floor area of our leased premises mainly used for office, production or storage by us and our major subsidiaries in the Chinese mainland. Therefore, we cannot ensure that they have the rights to lease such premises to us, and we may need to find alternative locations with similar functionalities as the original locations and at commercially reasonable terms in a timely manner, which may incur extra costs for us.

Furthermore, we have certain buildings we own in the PRC, and due to historical reasons, we have not obtained ownership certificates. As of June 30, 2026, the aggregate gross floor area of properties owned by us and our major subsidiaries lacking ownership certificates accounted for 1.0% of the total gross floor area of properties owned by us and our major subsidiaries in the Chinese mainland. According to the relevant PRC laws and regulations and as advised by our PRC Legal Advisor, our rights as owner or occupant of these properties may be adversely affected due to the absence of the relevant building ownership certificates. Accordingly, certain rights including our rights to transfer the properties and/or to mortgage the properties may be restricted.

We may from time to time become a party to litigation, other legal and contractual disputes, claims and administrative or other regulatory proceedings.

We may from time to time be subject to various litigation, legal or contractual disputes, claims or administrative proceedings in the ordinary course of our business, which may divert our management's attention and other resources. Furthermore, any litigation, legal or contractual disputes, claims or administrative proceedings that are initially not of material importance may escalate and become important to us, due to a variety of factors such as the subject matter of the disputes, the likelihood of loss, the monetary amount at stake and the parties involved. If any adverse verdict, judgment or award is rendered against us or if we settle with any third parties, we may be required to pay significant monetary damages or assume other liabilities. In addition, negative publicity arising from litigation, legal or contractual disputes, claims or administrative proceedings may damage our reputation and have a material and adverse impact on our business, results of operations and financial condition.

We face risks in relation to the inability to obtain and maintain the approvals, licenses and permits required for our operations.

We may experience difficulties, delays or failures in obtaining the necessary approvals, licenses and permits for our businesses. In addition, there can be no assurance that we will be able to obtain or renew all of the approvals, licenses and permits required for our existing business operations in a timely manner, or at all, given we lack control over the competent authorities' accreditation process and timeframe.

Complying with government regulations may require substantial expenses, and any non-compliance may expose us to liability. In the event of any non-compliance incident, we may have to incur significant expenses and divert substantial management time and resources to resolving any deficiencies. We may also experience negative publicity arising from such deficiencies, which could have a material and adverse impact on our business, results of operations and financial condition.

Share pledges by certain shareholders may result in enforcement sales and adversely affect our Share price, liquidity and control.

Certain shares held by Mr. Yuan Yonggang and Mr. Yuan Yongfeng have from time to time been pledged to PRC securities companies regulated by the CSRC as collateral to secure financing for their personal capital needs. If any pledged shares are enforced upon and sold by the pledgee, a substantial number of shares may be disposed of within a short period of time, which could result in significant downward pressure on, or increased volatility in, the trading price of our Shares, reduce liquidity and adversely affect market confidence. Any actual or perceived risk of enforcement or forced sale may itself negatively affect the market price of our Shares. In addition, any enforcement and disposal of pledged shares may reduce the shareholding interests of our Controlling Shareholders and could, depending on the scale and timing of disposal, affect our shareholder structure and control, and may result in additional compliance and disclosure obligations under applicable laws, regulations and the Listing Rules. Any of the foregoing could materially and adversely affect our business, financial condition, results of operations and/or the market price of our Shares.

RISKS RELATING TO OUR FINANCIAL PERFORMANCE AND POSITION

Failure to collect our trade receivables or notes receivables in a timely manner may adversely affect our liquidity.

We may not be able to collect our trade and notes receivables in a timely manner, and we may face difficulty collecting receivables for reasons beyond our control, such as customers delaying payment past the relevant credit periods granted or being unable to pay us when payments are due. We had total trade and notes receivables with gross carrying amounts of RMB7,716.6 million, RMB7,672.5 million, RMB10,073.0 million and RMB10,856.0 million as of December 31, 2023, 2024 and 2025 and June 30, 2026. Our trade and notes receivables turnover days were 79 days, 75 days, 71 days and 68 days in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. Any significant delay or default in our

collection of trade and notes receivables or other receivables may impose pressure on our cash flow and working capital and reduce the pool of available financial resources relative to our expectations and expenditure plans, which in turn could have a material adverse effect on our business, financial condition and results of operations.

Our revenue and cost of sales are subject to foreign exchange fluctuations.

A substantial portion of our sales and a portion of our procurement is settled in USD. Certain subsidiaries of ours also conduct transactions in foreign currencies and have cash and bank balances, trade receivables, other Receivables, trade payables, other payables and borrowings denominated in currencies other than the functional currency of the Company, being RMB, which exposes us to foreign exchange risks. As of December 31, 2023, 2024 and 2025 and June 30, 2026, our non-RMB denominated financial assets accounted for 23.2%, 21.9%, 14.5% and 14.2% of our total assets, respectively, with US dollars denominated financial assets accounting for 23.1%, 21.7%, 14.4% and 13.4% of our total assets. Meanwhile, our non-RMB denominated financial liabilities accounted for 14.4%, 14.4%, 15.5% and 14.0% of our total liabilities, with US dollars denominated financial liabilities accounting for 14.2%, 12.4%, 8.1% and 6.3% of our total liabilities. Any significant fluctuations in the exchange rates between foreign currencies and RMB may materially and adversely affect our results of operations.

In 2023 and 2024, we incurred net foreign exchange gains of RMB129.9 million and RMB294.7 million, respectively. In 2025 and the six months ended June 30, 2026, we incurred net foreign exchange losses of RMB27.4 million and RMB436.6 million. We cannot predict the future exchange rate fluctuations, and we cannot assure you that we will not incur any net exchange loss in the future. See Note 3 of "Appendix IA — Accountants' Report of the Group", "Appendix IB — Accountants' Report of the Source Photonics Group" for further details on foreign currency risk exposures and related sensitivity test.

During the Track Record Period, we have maintained certain hedging policies, such as leveraging certain derivative instruments, in an effort to reduce our exposure to foreign exchange risks and commodity price risks, and we may maintain, or further enhance, our hedging policies in the future. Our derivative financial instruments mainly include forwards, options and futures contracts. As of December 31, 2023, 2024 and 2025 and June 30, 2026, our derivative financial liabilities amounted to RMB33.3 million, RMB11.0 million, RMB46.5 million and RMB181.6 million, respectively, while our derivative financial assets amounted to RMB17.4 million, RMB14.9 million, RMB65.1 million and RMB48.7 million, respectively. However, the availability and effectiveness of these hedging measures may be limited, and we may not be able to cover our exposure adequately, or at all.

Our indebtedness could adversely affect our cash flow, increase our vulnerability to economic conditions and limit or restrict our business activities.

We have incurred, and may incur in the future, significant indebtedness, including in connection with mergers or acquisitions, which may impact the manner in which we conduct business or our access to external sources of liquidity. In addition to interest payments, a significant portion of our cash flow may need to be used to service our indebtedness, and therefore, may not be available for use in our business. In addition, we may be unable to complete the Global Offering on the timing we anticipate or at all, which would further burden our debt service and operations and limit our ability to invest in our business. Our ability to generate cash flow is subject to general economic, financial, competitive, legislative, regulatory and other factors that may be beyond our control. Our indebtedness could have a significant impact on us, including, but not limited to: (i) increasing our vulnerability to general adverse economic and industry conditions; (ii) requiring us to dedicate a significant portion of our cash flow from operations to payments on our indebtedness, thereby reducing the amount of our cash flow available to fund working capital, acquisitions and capital expenditures, and for other general corporate purposes; (iii) limiting our flexibility in planning for, or reacting to, changes in our business and our industry; (iv) restricting us from making strategic acquisitions or exploiting business opportunities; (v) necessitating the divestiture of certain of our assets or businesses in order to generate cash to service our indebtedness; (vi) limiting our ability to continue paying dividends; or (vii) limiting our ability to borrow additional funds.

Certain of our debt agreements impose restrictions with respect to the maintenance of financial ratios and the disposition of assets. The most restrictive covenants currently require us to maintain a minimum level of interest coverage and a minimum level of net worth. These restrictive covenants could adversely affect our ability to engage in certain business activities that would otherwise be in our best long-term interests.

Any impairment of goodwill could have a material adverse effect on our results of operations.

As of December 31, 2023, 2024, 2025 and June 30, 2026, our goodwill amounted to RMB2,162.7 million, RMB2,077.5 million, RMB4,769.3 million and RMB4,682.7 million, primarily as a result of our acquisitions. We test the goodwill and intangible assets for impairment on an annual basis and when events occur or circumstances change that indicate that the fair value of the reporting unit may be below its carrying amount. Fair value determinations require considerable judgment and are sensitive to inherent uncertainties and changes in estimates and assumptions regarding revenue growth rates, capital expenditures, working capital requirements, tax rates, benefits associated with a taxable transaction and synergies available to market participants. Declines in market conditions, a trend of weaker than anticipated financial performance of our reporting units or an increase in the market-based weighted average cost of capital, among other factors, are indicators that the carrying value of our goodwill may be impaired. Any impairment of our goodwill could have a material adverse effect on our results of operations.

We received government grants and preferential tax treatment during the Track Record Period, and any discontinuation of government grants or preferential tax treatment or any change in the relevant policies may adversely affect our financial performance and results of operations.

We received government grants and preferential tax treatment under relevant preferential tax policies during the Track Record Period. In 2023, 2024, 2025 and the six months ended June 30, 2026, we recognized income from government grants of RMB236.9 million, RMB489.6 million, RMB359.3 million and RMB163.2 million. We may not be able to continue to enjoy similar government grants and preferential tax treatment in the future as they are non-recurring in nature. The discontinuation of any of our government grants or current tax treatments could adversely impact our net income and materially increase our tax obligations. Government grants and preferential tax treatments are subject to review by the authorities and may be adjusted or revoked at any time in the future. We cannot guarantee that government grants and preferential tax treatments to which we and certain of our subsidiaries are currently entitled would be successfully renewed. There can be no assurance that the local tax authorities will not change their position in the future and discontinue any of our current tax treatments, potentially with retrospective effect.

Our annual effective tax rate and the amount of taxes we pay can change materially as a result of changes in Chinese and foreign tax laws and changes in the mix of our domestic and overseas earnings.

As a multinational corporation, we are subject to tax laws of PRC and foreign tax laws and regulations, all of which are complex and subject to significant change and varying interpretations. Tax laws and regulations are continuously evolving with global minimum tax and increased transparency continuing to be high priorities in many tax jurisdictions in which we operate. For example, as of June 30, 2026, the Company and 13 of our PRC subsidiaries were accredited as "High and New Technology Enterprises," and are entitled to a preferential income tax rate of 15%. We cannot assure you that the PRC policies on preferential tax treatments will not change or that the current preferential tax treatments we enjoy or will be entitled to enjoy will not be canceled. Moreover, we cannot assure you that relevant entities will be able to renew the same preferential tax treatments upon expiration. If any such change, cancelation or discontinuation of preferential tax treatment occurs, the relevant PRC subsidiary will be subject to the PRC enterprise income tax, at a rate of 25% on taxable income. As a result, changes in this and other tax laws or regulations, or any change in the position of taxing authorities regarding their application, administration or interpretation, could have a material adverse effect on our business, consolidated financial condition or results of our operations.

At the same time, the OECD has issued the Global Anti-Base Erosion Model Rules ("**Pillar Two**") which generally provides for multinational organizations to have a minimum effective corporate tax rate of 15% in each jurisdiction in which they operate. Certain countries in which we operate have enacted legislation, and other countries have introduced legislation to implement the minimum tax directive. Subject to tax legislation enacting Pillar Two being passed in the jurisdictions where the Company and its subsidiaries operate, we are required to pay a top-up tax for any deficiency between the minimum tax rate of 15% and the effective tax rate per respective jurisdiction. For jurisdictions where the Pillar Two legislation was enacted but not effective at the reporting date, we currently have no related current tax exposure. To the extent additional legislative changes take place in the countries in which we operate, it is possible that these changes may yield an adverse impact on our effective tax rate, financial results and cash flows.

Uncertainty in the valuation of financial assets at fair value through profit or loss may affect our financial position.

As of December 31, 2023, 2024, 2025 and June 30, 2026, we had financial assets at fair value through profit or loss of RMB128.8 million, RMB63.2 million, RMB136.4 million and RMB747.9 million, respectively. The fair value of certain of these financial assets is determined using valuation techniques, which involve a significant degree of management judgment and the use of unobservable inputs. Such inputs and assumptions may be subject to a high degree of uncertainty and may not reflect prevailing market conditions, particularly in the absence of active markets for these assets. There is no assurance that our estimates or the assumptions underlying the valuation models will prove to be accurate. If the valuation of these financial assets fluctuates or proves inaccurate due to changes in market conditions or assumptions, our other comprehensive income and financial performance may be adversely affected.

Failure to maintain optimal inventory levels could increase our inventory holding costs or cause us to lose sales.

In order to operate our business effectively and meet our consumers' demands and expectations, we maintain a certain level of inventory to meet the customer needs and ensure timely delivery of our products. As of December 31, 2023, 2024 and 2025 and June 30, 2026, we had inventories of RMB6,293.9 million, RMB6,152.7 million, RMB8,928.9 million and RMB11,418.0 million, respectively. In 2023, 2024 and 2025 and the six months ended June 30, 2026, our inventory turnover days were 77 days, 69 days, 70 days and 82 days, respectively.

We determine our level of inventory based on historical sales performance, demand forecasts and supply chain capacity fluctuations. We cannot assure you that we are able to always maintain optimal inventory levels in the future. If we fail to accurately assess the customer demand, we may experience inventory obsolescence and inventory shortage risk. Inventory levels in excess of demand or substantial decrease in the expected market price of our products may result in inventory write-downs, and we may consequently sell the excess inventory at discounted prices, which would have an adverse effect on our profitability. Furthermore, if we underestimate the demand for our products, we may not have a sufficient number of products to meet such unanticipated demand, which could result in delays in the delivery of our products and negatively affect our reputation. Any of the above may materially and adversely affect our business, results of operations and financial conditions.

We have awarded and may continue to award equity instruments under equity incentive plans, which may cause shareholding dilution to our shareholders and result in increased share-based compensation.

We adopted the Share Incentive Scheme on March 8, 2022. See "Appendix IV — Statutory and General Information — Employee Stock Ownership Plans." In 2023, 2024 and 2025 and the six months ended June 30, 2026, we recorded share-based compensation of RMB8.9 million, RMB0.5 million, nil and RMB29.5 million, respectively. To further incentivize our employees, we may adopt other equity incentive plans and award additional equity incentives in the future. Issuance of Shares with respect to our equity incentive plan may dilute the shareholding of our existing shareholders and incur substantial share-based compensation that could have a material and adverse impact on our results of operations.

Our historical dividends may not be indicative of our future dividend policy, and we cannot assure you whether and when we will pay dividends in the future.

We have declared dividends in the past. We declared dividends of RMB187.3 million, RMB425.3 million and RMB118.8 million in 2023, 2024 and 2025, respectively. However, we cannot assure you that dividends of any amount will be declared or distributed by us in any year in the future. Under the applicable laws and regulations of the Chinese mainland, the payment of dividends may be subject to certain limitations, and the calculation of our profit under the Accounting Standards for Business Enterprises may differ in certain respects from the calculation under IFRS. The declaration, payment and amount of any future dividends are at the discretion of our Directors, after taking into account various factors, including our results of operations, cash flows, capital expenditure requirements, market conditions, our strategic plans and prospects for business development, regulatory restrictions on the payment of dividends and other factors as our Directors may deem relevant, and subject to approval at a Shareholders' meeting. Any declaration and payment as well as the amount of dividends will be subject to our constitutional documents and the applicable laws and regulations of the Chinese mainland. See "Financial Information — Dividend Policy" for further details. No dividend shall be declared or payable except out of our profits and reserves lawfully available for distribution. Our historical dividends should not be taken as indicative of our dividend policy in the future.

Under the existing foreign exchange regulations of the Chinese mainland, payments of current account items, including profit distributions, interest payments and trade and service-related foreign exchange transactions, can be made in foreign currencies without prior SAFE approval by complying with certain procedural requirements. However, approval from or registration with competent government authorities is required where RMB is to be converted into foreign currency and remitted out of the Chinese mainland to pay capital expenses such as the repayment of loans denominated in foreign currencies. If the foreign exchange control system prevents us from obtaining sufficient foreign currencies to satisfy our foreign currency demands, we may not be able to pay dividends in foreign currencies to our Shareholders. Further, we cannot assure you that new regulations will not be promulgated in the future that would have the effect of further restricting the remittance of RMB into or out of the Chinese mainland.

RISKS RELATING TO THE JURISDICTIONS IN WHICH WE OPERATE

Changes in economic, political or social conditions or government policies in the markets in which we operate could have a material adverse effect on our business and results of operations.

We derive revenue from and operate in multiple jurisdictions. As such, changes in any of these jurisdictions could have a material and adverse impact on our future prospects, business, results of operations and financial condition. For example, a substantial part of our revenue is derived from our businesses in the PRC during the Track Record Period. In 2023, 2024, 2025 and the six months ended June 30, 2026, revenue generated from the Chinese mainland in each year/period amounted to RMB5,649.3 million, RMB6,187.3 million, RMB7,459.7 million and RMB4,669.1 million, respectively, representing 16.8%, 16.8%, 18.6% and 16.8% of our total revenue in the same years/periods. Accordingly, our future prospects, business, results of operations and financial condition are, to a material extent, subject to economic, political and legal developments in the PRC. If the macroeconomic condition in China experiences significant adverse changes, demand for our products and our ability to maintain our operations may suffer, which could consequently lead to a material and adverse impact on our business, results of operations and financial condition. Moreover, if foreign governments implement laws or regulations restricting investment in Chinese entities and we are deemed to be subject to such restrictions, the investment and transactions in our Shares, our business prospects, results of operations, financial conditions and future capital raising may be adversely affected.

China's economy has experienced significant growth over the past decades. In recent years, the PRC government has implemented measures emphasizing the utilization of market forces in economic reform and the establishment of sound corporate governance practices in business enterprises. These economic reform measures may be adaptively adjusted from industry to industry or across different regions of the

country. Changes in the business environment in China and the other jurisdictions in which we operate could have a material and adverse impact on our business, results of operations and financial condition.

Any uncertainties embedded in the legal systems of certain geographic markets where we operate could affect our business, financial condition and results of operations.

Legal systems of the geographic markets where we operate vary significantly from jurisdiction to jurisdiction. Some jurisdictions have a civil law system based on written statutes and others are based on common law. Unlike the common law system, prior court decisions under the civil law system may be cited for reference but have limited precedential value.

We are subject to certain uncertainties embedded in the legal systems of some geographic markets where we operate. Laws and regulations that are recently enacted may not sufficiently cover all aspects of economic activities in such markets. In particular, the interpretation and enforcement of these laws and regulations are subject to future implementations, and the application of some of these laws and regulations to our businesses is not settled. Since local administrative and court authorities are authorized to interpret and implement statutory provisions and contractual terms, it may be difficult to evaluate the outcome of administrative and court proceedings and the level of legal protection we have in many of the geographic markets where we operate. Local courts may have discretion to reject the enforcement of foreign awards or arbitration awards. These uncertainties may affect our judgment on the relevance of legal requirements and our ability to enforce our contractual rights or claims. In addition, the regulatory uncertainties may be exploited through unmerited or frivolous legal actions, claims concerning the conduct of third parties, or threats in attempt to extract payments or benefits from us.

It may be complex to effect service of process upon us or our management or to enforce against them or us any judgments obtained from foreign courts.

We are a company incorporated under the PRC laws, and a majority of our assets are located in the PRC. In addition, most of our Directors and senior management reside in the PRC. As a result, it may be complex for investors to effect service of process outside the Chinese mainland upon us, our Directors or senior management or to enforce judgments obtained against us in courts outside the Chinese mainland. A judgment of a court of another jurisdiction may be reciprocally recognized or enforced in the Chinese mainland only if the jurisdiction has a treaty with the Chinese mainland or if the jurisdiction has been otherwise deemed by the courts of the Chinese mainland to satisfy the requirements for reciprocal recognition, subject to the satisfaction of other requirements. However, the Chinese mainland is not a party to treaties providing for the reciprocal enforcement of judgments of courts with certain foreign countries such as the United States, and enforcement in the Chinese mainland of judgments of a court in these jurisdictions may consequently be difficult or impossible.

We may be subject to additional regulatory requirements under new laws and regulations on overseas offerings and listings issued by PRC government authorities.

On July 6, 2021, the relevant PRC government authorities issued the Opinions on Strictly Cracking Down on Illegal Securities Activities in Accordance with the Law (《關於依法從嚴打擊證券違法活動的意見》). These opinions emphasized the need to strengthen the administration over illegal securities activities and the supervision on overseas listings by China-based companies and proposed to take effective measures, such as promoting the establishment of relevant regulatory systems to deal with the risks and incidents faced by China-based overseas-listed companies.

On February 24, 2023, the CSRC, the MOF, the National Administration of State Secrets Protection of China, and the National Archives Administration of China published the Provisions on Strengthening Confidentiality and Archives Administration of Overseas Securities Offering and Listing by Domestic Companies (《關於加強境內企業境外發行證券和上市相關保密和檔案管理工作的規定》) (the "**Archives Rules**"), which came into effect on March 31, 2023. The Archives Rules require that, in relation to the overseas securities offering and listing activities of domestic enterprises, either in direct or indirect form, such domestic enterprises, as well as securities companies and securities service institutions providing relevant securities services, strictly comply with relevant requirements on confidentiality and archives management, establish a sound confidentiality and archives system and take necessary measures to

implement their confidentiality and archives management responsibilities. The interpretation and implementation of the Archives Rules may keep evolving, and failure to comply with them may materially affect our business, results of operations or financial conditions.

We may be subject to the approval, filing or other requirements of the CSRC or other PRC governmental authorities in connection with future capital raising activities.

We cannot assure you that any new rules or regulations promulgated in the future will not impose additional requirements or restrictions on us or our financing activities. If it is determined in the future that approval from or filing with the CSRC or other regulatory authorities or other procedures are required, we may fail to obtain such approval, perform such filing procedures or meet such other requirements in a timely manner or at all. We may face sanctions by the CSRC or other PRC regulatory authorities for failure to seek CSRC approval or other government authorization, or perform filing procedures, for our future financing activities, and these regulatory authorities may impose fines and penalties on us, limit our operating activities in the PRC, limit our ability to pay dividends outside the PRC, delay or restrict the repatriation of the proceeds from such future financing activities into the PRC or take other actions to restrict our financing activities, which could have a material and adverse effect on our financial conditions and business prospects.

We are subject to the currency exchange regulatory system.

The conversion of Renminbi is subject to applicable laws and regulations in the PRC. It cannot be guaranteed that under a certain exchange rate, we will have sufficient foreign exchange to meet our foreign exchange requirements. Under the current PRC foreign exchange regulatory system, foreign exchange transactions under the current account conducted by us, including the payment of dividends, do not require advance approval from the SAFE, but we are required to present documentary evidence of such transactions and conduct such transactions at designated foreign exchange banks within China that have the licenses to carry out foreign exchange business. Payment of dividends, if any, will be subject to relevant regulations. See "Regulatory Overview — Regulations on Foreign Exchange".

We are a Chinese mainland enterprise, and we are subject to the Chinese mainland tax on our global income. As such, any gains on the sales of H Shares and dividends on the H Shares may be subject to the Chinese mainland income taxes.

Under the PRC EIT Law and its implementation rules, subject to any applicable tax treaty or similar arrangement between the Chinese mainland and a non-Chinese mainland investor's jurisdiction of residence that provides for a different income tax arrangement, the Chinese mainland withholding tax at the rate of 10% is normally applicable to dividends from the Chinese mainland sources payable to investors that are non-Chinese mainland resident enterprises, which do not have an establishment or place of business in the Chinese mainland, or which have an establishment or place of business in the Chinese mainland if the relevant income is not effectively connected with such establishment or place of business. Any gains realized on the transfer of shares by such investors are subject to a 10% Chinese mainland income tax rate if such gains are regarded as income from sources within the Chinese mainland unless a treaty or similar arrangement provides otherwise. See "Regulatory Overview — Tax on Dividends" for details.

As of June 30, 2026, the relevant PRC individual income tax laws and regulations have not expressly provided that individual income tax shall be collected from non-Chinese mainland resident individuals on the sale of shares of the Chinese mainland resident enterprises listed on overseas stock exchanges. If the Chinese mainland income tax is imposed on gains realized from the transfer of our H Shares or on dividends paid to our non-Chinese mainland resident investors, the value of your investment in our H Shares may be affected. Furthermore, our Shareholders whose jurisdictions of residence do not have tax treaties or arrangements with the Chinese mainland may not qualify for benefits under such tax treaties or arrangements.

RISKS RELATING TO THE GLOBAL OFFERING

We will be concurrently subject to listing and regulatory requirements of the Chinese mainland and Hong Kong.

As our A Shares are listed on the Shenzhen Stock Exchange and our H Shares will be listed on the Main Board in Hong Kong, we will be required to comply with the listing rules (where applicable) and other regulatory regimes of both jurisdictions, unless an exemption is available or a waiver has been obtained. Accordingly, we may incur additional costs and resources in continuously complying with all sets of listing rules in the two jurisdictions.

Our A Shares are listed on the Shenzhen Stock Exchange. The characteristics of the A Share and H Share markets may differ.

Our A Shares are listed and traded on the Shenzhen Stock Exchange. Following the Global Offering, our A Shares will continue to be traded on the Shenzhen Stock Exchange, and our H Shares will be traded on the Hong Kong Stock Exchange. Under current laws and regulations of the Chinese mainland, without the approval from the relevant regulatory authorities, our H Shares and A Shares are neither interchangeable nor fungible, and there is no trading or settlement between the H Share and A Share markets. With different trading characteristics, the H Share and A Share markets have divergent trading volumes, liquidity and investor bases, as well as different levels of retail and institutional investor participation. As a result, the trading performance of our H Shares and A Shares may not be comparable. Nonetheless, fluctuations in the price of our A Shares may adversely affect the price of our H Shares, and vice versa. Due to the different characteristics of the H Share and A Share markets, the historical prices of our A Shares may not be indicative of the performance of our H Shares. You should therefore not place undue reliance on the trading history of our A Shares when evaluating the investment decision in our H Shares.

There has been no prior public market for our H Shares, and an active trading market for our H Shares may not develop or be sustained.

Prior to the completion of the Global Offering, there has been no public market for our H Shares. There can be no guarantee that an active trading market for our H Shares will develop or be sustained after the completion of the Global Offering. The Offer Price is the result of negotiations between our Company and the Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters), which may not be indicative of the price at which our Shares will be traded following the completion of the Global Offering. The market price of our H Shares may drop below the Offer Price at any time after completion of the Global Offering.

The price and trading volume of our H Shares may be volatile, which could lead to substantial losses to investors.

The trading price of our H Shares may be volatile and could fluctuate widely in response to factors beyond our control. In particular, the performance and fluctuation of the market prices of other companies with business operations located mainly in the Chinese mainland that have listed their securities in Hong Kong may affect the volatility in the price of and trading volumes for our H Shares. A number of the Chinese mainland-based companies have listed their securities, and some are in the process of preparing for listing their securities, in Hong Kong. The share price of some of these companies has experienced significant volatility, including significant price declines after their initial public offerings. The trading performances of the securities of these companies at the time of or after their offerings may affect the overall investor sentiment toward the Chinese mainland-based companies listed in Hong Kong and consequently may impact the trading performance of our Shares. These factors may significantly affect the market price and volatility of our Shares, regardless of our actual operating performance.

Future sales or perceived sales of substantial amounts of our Shares in the public market could negatively affect the price of our Shares and our ability to raise additional capital in the future.

The market price of our H Shares could decline as a result of future sales of a substantial number of our Shares or other securities relating to our H Shares in the public market, the issuance of new shares or other securities or the perception that such sales or issuances may occur. Future sales, or perceived sales, of substantial amounts of our securities, including any future offerings, could also materially and adversely affect our ability to raise capital at a specific time and on terms favorable to us. Equity-linked securities issued by us may also confer rights and privileges that take priority over those conferred by the Shares.

You will incur immediate and significant dilution and may face further dilution if we issue additional Shares in the future.

The Offer Price of the Offer Shares is higher than the net tangible asset value per Share immediately prior to the Global Offering. Therefore, purchasers of the Offer Shares in the Global Offering will experience an immediate dilution in pro forma consolidated net tangible asset value. To expand our business, we may consider offering and issuing additional Shares in the future. Purchasers of the Offer Shares may experience dilution in the net tangible asset value per Share of their Shares if we issue additional Shares in the future at a price that is lower than the net tangible asset value per Share at that time.

Our Controlling Shareholders have significant influence over our Company and their interests may not be aligned with the interests of our other Shareholders.

Our Controlling Shareholders have substantial influence over our business and operations, including matters relating to management and policies, decisions in relation to acquisitions, expansion plans, business consolidation, the sale of all or substantially all of our assets, nomination of directors, dividends or other distributions, as well as other significant corporate actions. Immediately following the completion of the Global Offering, our Controlling Shareholders will collectively beneficially own approximately 31.41% of the voting power of our outstanding share capital (excluding treasury shares with no voting rights), assuming the Over-allotment Option is not exercised. The concentration of voting power and the substantial influence of our Controlling Shareholders over our Company may discourage, delay or prevent a change in control of our Company, which could deprive other shareholders of an opportunity to receive a premium for their Shares as part of a sale of our Company and reduce the price of our Shares. In addition, the interests of our Controlling Shareholders may differ from the interests of our other Shareholders. Subject to the Listing Rules, our Articles of Association and other applicable laws and regulations, our Controlling Shareholders will continue to have the ability to exercise their substantial influence over us and to cause us to enter into transactions or take, or fail to take, actions or make decisions which conflict with the best interests of our other shareholders.

You should not place any reliance on any information released by us in connection with the listing of our A Shares on the Shenzhen Stock Exchange.

As our A Shares are listed on the Shenzhen Stock Exchange, we have been subject to periodic reporting and other information disclosure requirements in PRC. As a result, from time to time, we publicly release information relating to us on the Shenzhen Stock Exchange or other media outlets designated by the CSRC. However, the information announced by us in connection with the A Shares listing is based on regulatory requirements of the securities authorities, industry standards and market practices in the Chinese mainland, which are different from those applicable to the Global Offering. The presentation of financial and operational information for the Track Record Period disclosed on the Shenzhen Stock Exchange or other media outlets may not be directly comparable to the financial and operational information contained in this prospectus. As a result, prospective investors in the H Shares should be reminded that, in making their investment decisions as to whether to purchase the H Shares, they should rely only on the financial, operating and other information included in this prospectus. By applying to purchase the H Shares in the Global Offering, you will be deemed to have agreed that you will not rely on any information other than that contained in this prospectus and any formal announcements made by us in Hong Kong with respect to the Global Offering.

Certain facts, forecasts and other statistics contained in this prospectus derived from official government sources have not been independently verified and may not be reliable.

Certain facts, forecasts and other statistics in this prospectus are derived from various government and official resources. These comprise data published by PRC government authorities that are set out in "Industry Overview" and the policies of PRC government departments that are described in "Regulatory Overview." We believe that the sources of the said information are appropriate sources from official government sources and have taken reasonable care in extracting and reproducing such information and have no reason to believe that such information is false or misleading or that any fact has been omitted that would render such information false or misleading. Nevertheless, information from official government sources has not been independently verified. You should therefore not place undue reliance on such information. Further, we cannot assure our investors that they are stated or compiled on the same basis or with the same degree of accuracy as similar statistics presented elsewhere. In all cases, our investors should consider carefully how much weight or importance should be attached to or placed on such facts or statistics.

Forward-looking statements contained in this prospectus are subject to risks and uncertainties.

This Prospectus contains certain statements and information that are forward-looking and uses forward-looking terminology such as "aim," "anticipate," "believe," "broaden," "commit," "consider," "continue," "could," "drive," "estimate," "evolve," "expect," "forecast," "goal," "going forward," "grow," "in development," "intend," "likely," "maintained," "may," "objective," "ongoing," "opportunity," "plan," "possible," "potential," "predict," "project," "pursue," "schedule," "seek," "shall," "should," "target," "will," "would" and similar expressions. These statements are, by their nature, subject to significant risks and uncertainties. Prospective investors are cautioned that reliance on any forward-looking statement involves risk and uncertainties and that, even if the Directors believe the assumptions related to those forward-looking statements are reasonable, any or all of those assumptions could prove to be inaccurate and, as a result, the forward-looking statements based on those assumptions could also be incorrect. The risks and uncertainties in this regard consist of those identified in the risk factors discussed above. In light of these and other risks and uncertainties, the disclosure of forward-looking statements in this prospectus should not be regarded as representations by us that the plans and objectives will be achieved, and investors should not place undue reliance on such statements. Our Company does not undertake any obligation to update publicly or release any revisions of any forward-looking statements, whether as a result of new information, future events, or otherwise. All forward-looking statements in this prospectus are qualified by reference to this cautionary statement.

You should read the entire prospectus carefully and only rely on the information included in this prospectus to make your investment decision, and we strongly caution you not to rely on any information contained in press articles or other media coverage relating to us, our Shares or the Global Offering.

There have been, prior to the publication of this prospectus, and there may be, subsequent to the date of this prospectus but prior to the completion of the Global Offering, press and media coverage regarding us, our business, our industry and the Global Offering. Such press and media coverage may include references to certain information that does not appear in this prospectus, including certain operating and financial information and projections, valuations and other information. None of us, the Joint Sponsors, the Sponsor-Overall Coordinators, the Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers, the Underwriters or any other person involved in the Global Offering has authorized the disclosure of any such information in the press or media coverage, or accepts any responsibility for any such press or media coverage or the accuracy or completeness of any such information or publication.

Accordingly, prospective investors should not rely on any such information or publication in making their decision whether to invest in our H Shares. Prospective investors are reminded that, in making their investment decisions as to whether to purchase our Shares, they should rely only on the financial, operational, and other information included in this prospectus. By applying to purchase our H Shares in the Global Offering, you will be deemed to have agreed that you will not rely on any information other than that contained in this prospectus.

In preparation of the Global Offering, the Company has sought the following waivers from strict compliance with the relevant provisions of the Listing Rules.

WAIVER IN RESPECT OF MANAGEMENT PRESENCE IN HONG KONG

Rules 8.12 and 19A.15 of the Listing Rules provide that a new applicant for listing on the Stock Exchange must have a sufficient management presence in Hong Kong and, under normal circumstances, at least two of the new applicant's executive directors must be ordinarily resident in Hong Kong. Rule 19A.15 of the Listing Rules further provides that the requirement in Rule 8.12 of the Listing Rules may be waived by having regard to, among other considerations, the Company's arrangements for maintaining regular communication with the Stock Exchange.

The Company's headquarters are based, and most of the business operations of the Group are managed in the PRC. The executive Directors ordinarily reside in the PRC, as the Board believes it would be more effective and efficient for the executive Directors to be based in a location where the Group's substantial operations are located. As such, the Company does not and, in the foreseeable future, will not be able to comply with the requirements of Rules 8.12 and 19A.15 of the Listing Rules for sufficient management presence in Hong Kong.

Accordingly, pursuant to Rule 19A.15 of the Listing Rules, the Company has applied to the Stock Exchange for, and the Stock Exchange has granted, a waiver from strict compliance with the requirements under Rules 8.12 and 19A.15 of the Listing Rules, provided that the Company implements the following arrangements:

(i) the Company has appointed Mr. Yuan Yonggang and Ms. Mao Xiaoyan as the authorized representatives of the Company (the "**Authorized Representatives**") for the purpose of Rule 3.05 of the Listing Rules. The Authorized Representatives will serve as the Company's principal channel of communication with the Stock Exchange. They can be readily contactable by phone and email to deal promptly with enquiries from the Stock Exchange and will also be available to meet with the Stock Exchange to discuss any matters on short notice. The contact details of the Authorized Representatives have been provided to the Stock Exchange;

(ii) all the Directors who are not ordinarily resident in Hong Kong possess or can apply for valid travel documents to visit Hong Kong and can meet with the Stock Exchange within a reasonable period. In addition, each Director has provided his/her contact details, including office phone numbers, mobile phone numbers, email addresses and fax numbers (if any), to the Authorized Representatives and to the Stock Exchange, so that each of the Authorized Representatives and the Stock Exchange would be able to contact all the Directors (including the independent non-executive Directors) promptly at all times if and when the Stock Exchange wishes to contact the Directors;

(iii) the Company has appointed Somerley Capital Limited as its Compliance Advisor for the period commencing on the Listing Date and ending on the date on which the Company complies with Rule 13.46 of the Listing Rules in respect of the Company's financial results for the first full financial year commencing after the Listing Date, or until the agreement is terminated, whichever is earlier. The Compliance Advisor will act as the Company's additional and alternative channel of communication with the Stock Exchange, and its representatives will be readily available to answer enquiries from the Stock Exchange; and

(iv) the Company has appointed designated staff members as the responsible communication officers at the Company's headquarters to oversee regular communication with the Authorized Representatives and the Company's professional advisors in Hong Kong, including its legal advisors and the Compliance Advisor, keep abreast of any correspondence and/or inquiries from the Stock Exchange and report to the executive Directors, streamlining communication between the Stock Exchange and the Company following the Listing.

WAIVER IN RESPECT OF JOINT COMPANY SECRETARIES

Pursuant to Rules 3.28 and 8.17 of the Listing Rules, the company secretary must be an individual who, by virtue of his or her academic or professional qualifications or relevant experiences, is, in the opinion of the Stock Exchange, capable of discharging the functions of the company secretary. Pursuant to Note 1 to Rule 3.28 of the Listing Rules, the Stock Exchange considers the following academic or professional qualifications to be acceptable:

(i) a member of The Hong Kong Chartered Governance Institute;

(ii) a solicitor or barrister (as defined in the Legal Practitioners Ordinance); and

(iii) a certified public accountant (as defined in the Professional Accountants Ordinance).

Pursuant to Note 2 to Rule 3.28 of the Listing Rules, in assessing "relevant experience", the Stock Exchange will consider the individual's:

(i) length of employment with the issuer and other issuers and the roles he played;

(ii) familiarity with the Listing Rules and other relevant law and regulations including the SFO, Companies Ordinance, CWUMPO, and the Takeovers Code;

(iii) relevant training taken and/or to be taken in addition to the minimum requirement under Rule 3.29 of the Listing Rules; and

(iv) professional qualifications in other jurisdictions.

The Company has appointed Ms. Mao Xiaoyan ("**Ms. Mao**") as one of the joint company secretaries. Ms. Mao joined the Group in August 2010. She currently also holds the position of executive Director, deputy general manager and secretary of the Board in the Company. See "Directors and Senior Management" for further biographical details of Ms. Mao. Although Ms. Mao does not possess the qualifications set out in Rule 3.28 of the Listing Rules, the Company believes that it would be in the best interests of the Company and the corporate governance of the Group to have Ms. Mao as its joint company secretary who is familiar with the Group's internal operation and management and possesses professional knowledge and experience in handling corporate governance and compliance, legal affairs and public relationship related matters. The Company has also appointed Mr. TSANG Chun Ho ("**Mr. TSANG**") to act as the other joint company secretary to assist Ms. Mao in discharging the duties of a company secretary of the Company. Mr. TSANG is an associate member of The Hong Kong Chartered Governance Institute (formerly known as The Hong Kong Institute of Chartered Secretaries) and The Chartered Governance Institute (formerly known as The Institute of Chartered Secretaries and Administrators) in the United Kingdom and is therefore qualified under Rule 3.28 of the Listing Rules to act as a joint company secretary of the Company. See "Directors and Senior Management" for further biographical details of Mr. TSANG.

Since Ms. Mao does not possess the formal qualifications required of a company secretary under Rule 3.28 of the Listing Rules, the Company has applied to the Stock Exchange for, and the Stock Exchange has granted, a waiver from strict compliance with the requirements under Rules 3.28 and 8.17 of the Listing Rules for a period of three years since the Listing Date on the following conditions: (i) Ms. Mao must be assisted by Mr. TSANG who possesses the qualifications or experience as required under Rule 3.28 of the Listing Rules and is appointed as a joint company secretary throughout the waiver period; and (ii) the waiver will be revoked immediately if and when Mr. TSANG ceases to provide such assistance to Ms. Mao as the joint company secretary or there are material breaches of the Listing Rules by the Company.

In support of the waiver application, the Company has adopted, or will adopt the following arrangements:

(i) in preparation of the application of the Listing, Ms. Mao has attended training on the respective obligations of the Directors, senior management and the Company under the relevant Hong Kong laws and the Listing Rules organized by the Hong Kong legal advisor to the Company;

(ii) Mr. TSANG will work closely with Ms. Mao to jointly discharge the duties and responsibilities as the joint company secretaries and to assist Ms. Mao in acquiring the relevant experience as required under the Listing Rules for an initial period of three years from the Listing Date, a period which should be sufficient for Ms. Mao to acquire the relevant experience as required under the Listing Rules;

(iii) the Company will ensure that Ms. Mao continues to have access to the relevant training and support in relation to the Listing Rules and the duties required for a company secretary of an issuer listed on the Stock Exchange. Furthermore, both Ms. Mao and Mr. TSANG will seek advice from the Company's Hong Kong legal and other professional advisors as and when required. Ms. Mao also undertakes to take no less than 15 hours of relevant professional training in each financial year of the Company; and

(iv) at the end of the three-year period, the qualifications and experience of Ms. Mao and the need for on-going assistance of Mr. TSANG will be further evaluated by the Company. The Company will then endeavour to demonstrate to the Stock Exchange's satisfaction that Ms. Mao, having had the benefit of the assistance of Mr. TSANG for the immediately preceding three years, has acquired the relevant experience (within the meaning of Note 2 to Rule 3.28 of the Listing Rules) such that a further waiver from Rules 3.28 and 8.17 of the Listing Rules will not be necessary. The Company understands that the Stock Exchange will revoke the waiver if Mr. TSANG ceases to provide assistance to Ms. Mao during the three-year period.

Prior to the expiry of the three-year period, the Company will demonstrate to the Stock Exchange and seek the Stock Exchange's confirmation that Ms. Mao, having had the benefit of Mr. TSANG's assistance during the three-year period, has attained the relevant experience and is capable of discharging the functions of company secretary under Rule 3.28 of the Listing Rules so that a further waiver from Rules 3.28 and 8.17 of the Listing Rules will not be necessary.

WAIVER IN RESPECT OF ALTERATION IN SHARE CAPITAL

Paragraph 26 of Appendix D1A to the Listing Rules requires this Prospectus to include the particulars of any alterations in the share capital of any member of our Group within the two years immediately preceding the issue of this Prospectus.

As of the Latest Practicable Date, we had more than 100 subsidiaries. It would be unduly burdensome for us to disclose the required information in respect of all of its subsidiaries as the Company would have to incur additional costs and devote additional resources in compiling and verifying the relevant information for such disclosure, which would not be material nor meaningful to investors. The non-disclosure of such information will not prejudice the interests of our Shareholders or potential investors.

We have identified 15 subsidiaries (collectively, the "**Major Subsidiaries**" and each a "**Major Subsidiary**") that we consider are material to our operations and/or our financial performance during the Track Record Period. By way of illustration, with intercompany eliminations, the aggregate assets of the Company and its Major Subsidiaries represent 78.6%, 82.5%, 74.7% and 73.5% of our Group's total assets as of December 31, 2023, 2024, 2025 and June 30, 2026, the aggregate revenue of the Company and its Major Subsidiaries represents 89.2%, 90.8%, 89.4% and 76.9% of our Group's total revenue for each of the financial years ended December 31, 2023, 2024, 2025 and the six months ended June 30, 2026, and the aggregate net profits of the Company and its Major Subsidiaries represent 123.1%, 176.4%, 158.0% and 82.0% of our Group's total net profits for each of the financial years ended December 31, 2023, 2024, 2025 and the six months ended June 30, 2026. The Major Subsidiaries hold our Group's material assets, intellectual property rights, proprietary technologies, licenses and permits, human capital expertise and capacities, and cover all of our business segments. None of our subsidiaries other than the Major Subsidiaries hold any major assets, intellectual property rights, proprietary technologies, licenses and permits, human capital expertise and capacities which is material to the Group's business. None of the other subsidiaries of the Company with substantial business operations that are not Major Subsidiaries individually contributes to 5% or more of our Group's total assets as of December 31, 2023, 2024, 2025 and June 30, 2026, or 5% or

more of our Group's revenue or net profits for each of the financial years ended December 31, 2023, 2024, 2025 and the six months ended June 30, 2026. Accordingly, the remaining subsidiaries of our Group which are not Major Subsidiaries are relatively insignificant to the overall results of our Group.

We have disclosed the particulars of the changes in the share capital of the Company and the Major Subsidiaries in the section headed "Statutory and General Information — Further Information About The Group" in Appendix IV to this Prospectus.

We have applied for, and the Stock Exchange has granted, a waiver from strict compliance with the requirements under paragraph 26 of Appendix D1A to the Listing Rules, in respect of disclosing the particulars of any alteration in the capital of any member of our Group within the two years immediately preceding the issue of this Prospectus.

WAIVER IN RESPECT OF ALLOCATION OF H SHARES TO EXISTING MINORITY SHAREHOLDERS AND/OR THEIR CLOSE ASSOCIATES

Rule 10.04 of the Listing Rules requires that a person who is an existing shareholder of the issuer may only subscribe for or purchase any securities for which listing is sought which are being marketed by or on behalf of the issuer either in his or its own name or through nominees if the conditions in Rules 10.03(1) and (2) of the Listing Rules are fulfilled. It is provided in Rule 10.03(1) of the Listing Rules that no securities may be offered to existing shareholders on a preferential basis and no preferential treatment may be given to them in the allocation of the securities; and in Rule 10.03(2) of the Listing Rules that the minimum prescribed percentage of public shareholders required by Rule 8.08(1) of the Listing Rules must be achieved.

Paragraph 1C of Appendix F1 to the Listing Rules provides that no allocations will be permitted to the existing shareholders of the applicant or their close associates, whether in their own names or through nominees, in the Global Offering unless the conditions set out in Rules 10.03 and 10.04 of the Listing Rules are fulfilled.

Chapter 4.15 of the Guide for New Listing Applicants provides that the Stock Exchange will consider giving consent and granting waiver from Rule 10.04 of the Listing Rules to an applicant's existing shareholders or their close associates to participate in an initial public offering if any actual or perceived preferential treatment arising from their ability to influence the applicant during the allocation process can be addressed.

Prior to the Listing, our Company's share capital comprises entirely A Shares listed on the Shenzhen Stock Exchange. We have a large and widely dispersed public A Share shareholder base.

We have applied for, and the Stock Exchange has granted us, a waiver from strict compliance with the requirements under Rule 10.04 of the Listing Rules and consent under Paragraph 1C of Appendix F1 to the Listing Rules to permit H Shares in the International Offering to be placed to certain existing minority Shareholders who (i) hold less than 5% of the total voting rights in our Company prior to the completion of the Global Offering and (ii) are not and will not become (upon the completion of the Global Offering) core connected persons of our Company or the close associates of any such core connected person (together, the "**Existing Minority Shareholders**") and/or their close associates, subject to the conditions as follows:

(a) each Existing Minority Shareholder to whom our Company may allocate the H Shares in the International Offering holds less than 5% of the total voting rights in our Company before Listing;

(b) each Existing Minority Shareholder is not, and will not be, a core connected person of our Company or any close associate of any such core connected person immediately prior to or following the Global Offering;

(c) none of the Existing Minority Shareholders has the right to appoint a Director and/or have any other special rights;

(d) allocation to the Existing Minority Shareholders or their close associates will not affect our ability to satisfy the public float requirement as prescribed by the Stock Exchange under Rule 8.08 (as amended and replaced by Rule 19A.13A) of the Listing Rules or otherwise approved by the Stock Exchange;

(e) that no preferential treatment is given to the Existing Minority Shareholders or their respective close associates (other than the assured entitlement for a cornerstone investor (if applicable));

provided further that:

(i) the Joint Sponsors confirm the matters set out in (a) to (d) above;

(ii) the Joint Sponsors confirm to the Stock Exchange in writing that based on (i) their discussions with our Company and the Overall Coordinators; and (ii) the confirmations provided to the Stock Exchange by our Company and the Overall Coordinators (confirmations (f) and (g) mentioned below), and to the best of their knowledge and belief, they have no reason to believe that any of the Existing Minority Shareholders or their close associates received any preferential treatment, or is in a position to exert influence on the Company to obtain actual or perceived preferential treatment in the allocation either as a cornerstone investor or as a placee by virtue of their relationship with our Company other than the preferential treatment of assured entitlement under a cornerstone investment following the principles set out in Chapter 4.15 of the Guide for New Listing Applicants, and details of the allocation to the Existing Minority Shareholders holding more than 1% of the issued share capital of the Company immediately prior to the completion of the Global Offering will be disclosed in this prospectus and/or the allotment results announcement, as the case may be;

(f) our Company will confirm to the Stock Exchange in writing that:

(i) in the case of participation as cornerstone investors, no preferential treatment has been, nor will be, given to the Existing Minority Shareholders or their close associates by virtue of their relationship with our Company, other than the preferential treatment of assured entitlement under a cornerstone investment following the principles set out in Chapter 4.15 of the Guide for New Listing Applicants, nor is the Existing Minority Shareholder in a position to exert influence on the Company to obtain actual or perceived preferential treatment, and the Existing Minority Shareholders or their close associates' cornerstone investment agreements do not contain any material terms which are more favorable to the Existing Minority Shareholders or their close associates than those in other cornerstone investment agreements; or

(ii) in the case of participation as placees, no preferential treatment has been, nor will be, given to the Existing Minority Shareholders or their close associates, nor is the Existing Minority Shareholder in a position to exert influence on the Company to obtain actual or perceived preferential treatment, by virtue of their relationship with our Company in any allocation in the placing tranche; and

(g) in the case of participation as placees, the Overall Coordinators will confirm to the Stock Exchange that, to the best of their knowledge and belief, no preferential treatment has been, nor will be, given to the Existing Minority Shareholders or their close associates by virtue of their relationship with our Company in any allocation in the placing tranche.

WAIVER IN RESPECT OF DISCLOSURE OF OFFER PRICE

Paragraph 15(2)(c) of Appendix D1A to the Listing Rules provides that the issue price or offer price of each security must be disclosed in the prospectus. Pursuant to Paragraph 12 of Chapter 4.14 of the Guide, the Stock Exchange also allows an indicative offer price range to be included in the prospectus, as an alternative to the disclosure of a fixed offer price.

We have applied to the Stock Exchange for a waiver from strict compliance with paragraph 15(2)(c) of Appendix D1A to the Listing Rules so that our Company will only disclose the maximum Offer Price in this prospectus on the below basis:

(a) the Offer Price will be determined with reference to the closing prices of our A Shares on the Shenzhen Stock Exchange during the trading days from the date of this prospectus to the last trading day before the Price Determination Date (both inclusive). Given the nature of our A Shares, we are unable to control the trading price of our A Shares on the Shenzhen Stock Exchange;

(b) as a company listed on the Shenzhen Stock Exchange with A Shares publicly traded thereon, setting a price range with a low-end may adversely affect (i) the market price of our A Shares; (ii) our ability to price the Offer Shares given potential price fluctuations of our A Shares during the period from the date of this prospectus until the pricing of the Global Offering; and (iii) ultimately our Company's ability to price in the best interest of our Company and our Shareholders;

(c) pursuant to paragraphs 9 and 10(b) of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance, the amount payable on application and allotment on each Offer Share, and the price to be paid for shares subscribed for, shall be specified in this prospectus, respectively. Disclosure of a maximum offer price complies with the requirements prescribed under paragraphs 9 and 10(b) of Part A of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance by providing a clear indication of the maximum subscription consideration a potential investor shall pay for the Offer Shares; and

(d) a maximum Offer Price will be disclosed in this prospectus. This alternative disclosure approach would not prejudice the interests of the investing public in Hong Kong.

The Stock Exchange has granted us a waiver from strict compliance with paragraph 15(2)(c) of Appendix D1A to the Listing Rules on the conditions that this prospectus will disclose:

(a) the maximum Offer Price;

(b) the time for the determination of the Offer Price and the form of its publication;

(c) the historical prices of our A Shares and trading volume on the Shenzhen Stock Exchange during the Track Record Period and up to the Latest Practicable Date;

(d) the determinant of the final Offer Price, i.e. the closing prices of our A Shares on the Shenzhen Stock Exchange during the trading days from the date of this prospectus to the last trading day before the Price Determination Date (both inclusive); and

(e) the source for investors to access the latest market price of our A Shares.

See "Structure of the Global Offering — Pricing — Determining the Pricing of the Offer Shares" in this prospectus for the historical prices of our A Shares and trading volume on the Shenzhen Stock Exchange.

DIRECTORS' RESPONSIBILITY FOR THE CONTENTS OF THIS PROSPECTUS

This prospectus, for which our Directors (including any proposed Director who is named as such in this prospectus) collectively and individually accept full responsibility, includes particulars given in compliance with the Hong Kong Listing Rules, the Companies (Winding Up and Miscellaneous Provisions) Ordinance and the Securities and Futures (Stock Market Listing) Rules (Chapter 571V of the Laws of Hong Kong) for the purpose of giving information with regard to our Group. Our Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief, the information contained in this prospectus is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this prospectus misleading.

RESTRICTIONS ON OFFER AND SALE OF H SHARES

Each person acquiring the Hong Kong Offer Shares under the Hong Kong Public Offering will be required to, or be deemed by his acquisition of Hong Kong Offer Shares to, confirm that he is aware of the restrictions on the offer and sale of the Hong Kong Offer Shares described in this prospectus.

No action has been taken to permit a public offering of the H Shares or the distribution of this prospectus in any jurisdiction other than Hong Kong. Accordingly, and without limitation to the following, this prospectus may not be used for the purpose of, and does not constitute, an offer or invitation in any jurisdiction or in any circumstances in which such an offer or invitation is not authorized or to any person to whom it is unlawful to make such an offer or invitation for subscription. The distribution of this prospectus and the offering and sale of the Offer Shares in other jurisdictions are subject to restrictions and may not be made except as permitted under the applicable securities laws of such jurisdictions pursuant to registration with or authorization by the relevant securities regulatory authorities or an exemption therefrom. In particular, the Offer Shares have not been publicly offered and sold, and will not be offered and sold, directly or indirectly, in the Chinese mainland.

CSRC FILING

We have filed the required documents with the CSRC, and we have received a filing notice from the CSRC dated September 23, 2026, confirming our completion of the filing procedures pursuant to the new filing regime introduced by the new regulations on filing for the Global Offering and the application for listing of the H Shares on the Stock Exchange.

INFORMATION ON THE GLOBAL OFFERING

This prospectus is published solely in connection with the Hong Kong Public Offering. For applications under the Hong Kong Public Offering, this prospectus contains the terms and conditions of the Hong Kong Public Offering. The Global Offering comprises the Hong Kong Public Offering of initially 11,378,400 Offer Shares and the International Offering of initially 102,404,800 Offer Shares (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised and subject, in each, to reallocation on the basis as set out in "Structure of the Global Offering").

The Offer Shares are offered solely on the basis of the information contained and representations made in this prospectus and on the terms and subject to the conditions set out herein and therein. No person is authorized to give any information in connection with the Global Offering or to make any representation not contained in this prospectus, and any information or representation not contained herein must not be relied upon as having been authorized by our Company, the Joint Sponsors, the Sponsor-Overall Coordinators, the Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers, the Underwriters, the Capital Market Intermediaries, any of our or their affiliates or any of their respective directors, officers, employees, advisers, agents or representatives, or any other persons or parties involved in the Global Offering. Neither the delivery of this prospectus nor any subscription or acquisition made under it shall, under any circumstances, create any implication that there has been no change in our affairs since the date of this prospectus or that the information in this prospectus is correct as of any subsequent time.

UNDERWRITING

The Listing is sponsored by the Joint Sponsors and the Global Offering is managed by the Overall Coordinators. The Hong Kong Public Offering is fully underwritten by the Hong Kong Underwriters subject to the terms and conditions of the Hong Kong Underwriting Agreement and is subject to us and the Sponsor-Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) agreeing on the Offer Price. The International Offering is expected to be fully underwritten by the International Underwriters, subject to the terms and conditions of the International Underwriting Agreement. See "Underwriting" for further details on the Underwriters and the underwriting arrangements.

APPLICATION FOR LISTING OF THE H SHARES ON THE HONG KONG STOCK EXCHANGE

We have applied to the Hong Kong Stock Exchange for the granting of listing of, and permission to deal in, our H Shares to be issued pursuant to the Global Offering (including any H Shares which may be issued pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option). Dealings in the H Shares on the Hong Kong Stock Exchange are expected to commence on Wednesday, October 28, 2026. Except for the A Shares that have been listed on the Shenzhen Stock Exchange and our pending application to the Hong Kong Stock Exchange for the listing of, and permission to deal in, the H Shares, no part of our share or debt securities is listed on or dealt in on the Hong Kong Stock Exchange or any other stock exchange and no such listing or permission to list is being or proposed to be sought in the near future.

Under section 44B(1) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance, any allotment made in respect of any application will be invalid if the listing of, and permission to deal in, the H Shares on the Hong Kong Stock Exchange is refused before the expiration of three weeks from the date of the closing of the application lists, or such longer period (not exceeding six weeks) as may, within the said three weeks, be notified to our Company by or on behalf of the Hong Kong Stock Exchange.

H SHARES WILL BE ELIGIBLE FOR ADMISSION INTO CCASS

Subject to the granting of listing of, and permission to deal in, the H Shares on the Hong Kong Stock Exchange and our compliance with the stock admission requirements of HKSCC, the H Shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the date of commencement of dealings in the H Shares on the Hong Kong Stock Exchange or any other date as determined by HKSCC. Settlement of transactions between participants of the Hong Kong Stock Exchange is required to take place in CCASS on the second settlement day after any trading day. All activities under CCASS are subject to the General Rules of HKSCC and HKSCC Operational Procedures in effect from time to time. Investors should seek the advice of their stockbroker or other professional advisers for the details of the settlement arrangements as such arrangements may affect their rights and interests. All necessary arrangements have been made for the H Shares to be admitted into CCASS.

H REGISTER OF MEMBERS AND STAMP DUTY

All of the H Shares issued pursuant to applications made in the Global Offering will be registered on our H Share register of members to be maintained in Hong Kong by our H Share Registrar, Tricor Investor Services Limited. Our principal register of members will be maintained by us at our headquarters in the PRC.

Dealings in the H Shares registered in our H Share register of members will be subject to Hong Kong stamp duty.

DIVIDENDS PAYABLE TO HOLDERS OF H SHARES

Unless determined otherwise by our Company, dividends payable in Hong Kong dollars in respect of our H Shares will be paid to the shareholders as recorded on the H Share register of members of our Company in Hong Kong and sent by ordinary post, at the shareholders' risk, to the registered address of each shareholder of our Company.

REPRESENTATION OF PERSONS APPLYING FOR OR PURCHASING H SHARES UNDER THE GLOBAL OFFERING

Persons applying for or purchasing H Shares under the Global Offering are deemed, by their making an application or purchase, to have represented that they are not close associates (as defined in the Hong Kong Listing Rules) of any of the Directors of the Company or an existing Shareholder of the Company or a nominee of any of the foregoing.

PROFESSIONAL TAX ADVICE RECOMMENDED

You should consult your professional advisers if you are in any doubt as to the taxation implications of subscribing for, purchasing, holding, disposal of, dealing in or the exercise of any rights in relation to our H Shares. None of our Company, the Joint Sponsors, the Sponsor-Overall Coordinators, the Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers, the Underwriters, the Capital Market Intermediaries, any of our or their affiliates or any of their respective directors, officers, employees, advisers, agents or representatives, or any other persons or parties involved in the Global Offering accepts responsibility for any tax effects on, or liabilities of, any person resulting from the subscription, purchase, holding, disposal of, dealing in, or the exercise of any rights in relation to, our H Shares.

LANGUAGE

If there is any inconsistency between this prospectus and its Chinese translation, this prospectus shall prevail. For ease of reference, the names of the Chinese laws and regulations, government authorities, institutions, natural persons or other entities (including certain of our subsidiaries) have been included in this prospectus in both the Chinese and English languages. In the event of any inconsistency, the Chinese name shall prevail.

ROUNDING

Certain amounts and percentage figures, such as share ownership and operating data, included in this prospectus may have been subject to rounding adjustments. Accordingly, figures shown as totals in certain tables may not be an arithmetic aggregation of the figures preceding them.

CURRENCY TRANSLATIONS

Solely for your convenience, this prospectus contains translations among certain amounts denominated in Renminbi, Hong Kong dollars and U.S. dollars.

Unless otherwise specified, this prospectus contains certain translations for convenience purposes at the following rates: Renminbi into Hong Kong dollars at the rate of HK$1.00 to RMB0.8575, Renminbi into U.S. dollars at the rate of US$1.00 to RMB6.7298 and Hong Kong dollars into U.S. dollars at the rate of US$1.00 to HK$7.8479.

No representation is made that any amounts in RMB or Hong Kong dollars can be or could have been at the relevant dates converted at the above rate or any other rates or at all.

The information and statistics set out in this section and other sections of this prospectus were extracted from a report prepared by CIC under our commission, various official government publications and other publicly available sources. We engaged CIC to prepare an independent industry report, or the CIC Report, in connection with the Global Offering. The information from official government sources has not been independently verified by us, or any of our directors and advisors, or any other persons or parties involved in the Global Offering, and no representation is given as to its accuracy.

OVERVIEW OF THE GLOBAL PCB INDUSTRY

Printed circuit boards (PCBs) serve as a fundamental component in electronic devices, providing critical functions such as precise electrical interconnection, low-loss signal transmission, and mechanical support for components. The continuous advancement in performance of electronic devices is driving increasingly stringent requirements for PCBs, particularly in terms of higher circuit density, enhanced signal integrity, and improved thermal management, which in turn directly fuels technological upgrades within the PCB industry.

Value Chain Analysis of the Global PCB Industry

The upstream of the global PCB industry value chain includes suppliers of raw materials and base materials. Raw materials encompass copper, glass fiber yarn, wood pulp, and synthetic resin, while base materials mainly refer to copper-clad laminates. The midstream consists of PCB manufacturers, which are responsible for the research, development, and production of PCB products. The types of products manufactured include FPCs, RPCBs, rigid-flex PCBs, and package substrates. The downstream refers to application scenarios, covering a wide range of industries such as consumer electronics, automotive, telecommunication equipment, and data centers.

Market Size of the Global PCB Industry by Application

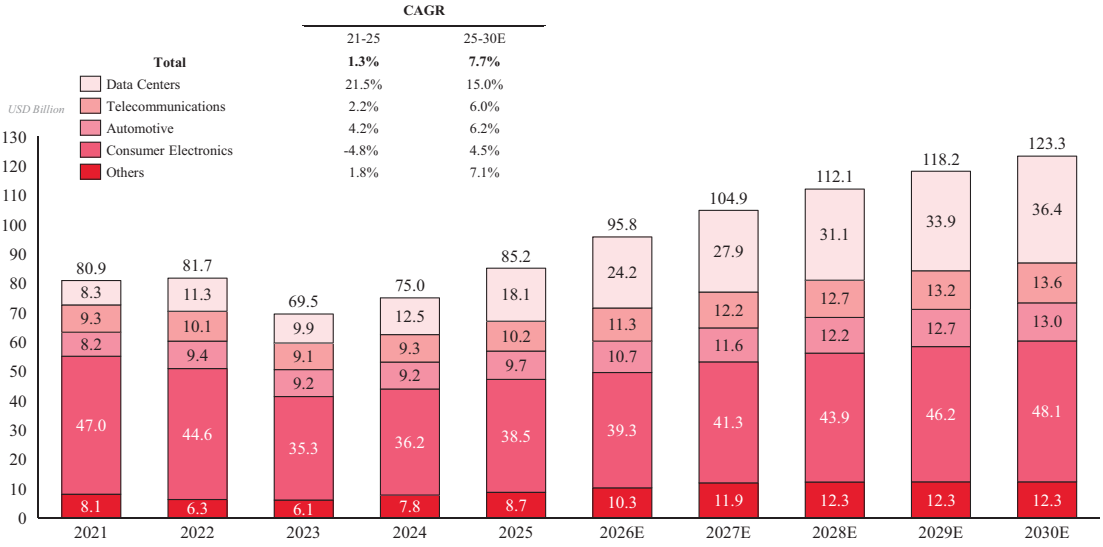

PCB products can be customized to address evolving application requirements through tailored design choices, specialized materials, and advanced manufacturing processes. PCBs are extensively utilized across various sectors, including consumer electronics, automotive, data centers, and telecommunications.

- **Consumer Electronics:** A specialized category of PCBs provides mechanical support and interconnections for electronic components in devices. Its product designs and technical parameters are closely aligned with the core characteristics of consumer electronics, including slim profiles, compact forms, lightweight construction, and rapid iteration cycles.
- **Automotive:** Automotive PCBs are PCBs specifically designed and manufactured for automotive electronic systems. They serve as supports for electronic components while enabling electrical connections and signal transmission between these components. These PCBs are widely applied in areas such as electrification systems, intelligent driving systems, and body control systems.
- **Data Centers:** A specialized category of PCBs mainly supports the operation of general-purpose servers and AI servers, and data center switches. Data center PCBs are typically high-layer-count PCBs and HDIs that utilizes high-speed materials to facilitate massive data exchange among GPU/CPU clusters and enable high-speed signal transmission.
- **Telecommunications:** This category refers to PCB used in wired or wireless network transmission, including communication base stations, routers, switches, antennas, radio frequency (RF) devices and backbone network transmission. The demand for PCBs within telecommunications equipment is predominantly for multi-layer PCBs. Furthermore, 5G communication equipment imposes more stringent requirements on PCB processes and materials, necessitating capabilities for high-frequency and high-speed performance.

In 2025, the global PCB market recorded US$18.1 billion for data centers, US$10.2 billion for telecommunications, US$38.5 billion for consumer electronics and US$9.7 billion for automotive. Supported by AI and industrial intelligentization, the four segments are forecast to rise to US$36.4 billion,

US$13.6 billion, US$48.1 billion and US$13.0 billion by 2030, with corresponding CAGRs of 15.0%, 6.0%, 4.5% and 6.2% respectively. The global PCB market declined from US$81.7 billion in 2022 to US$69.5 billion in 2023, as sluggish consumer electronics and data center demand, macroeconomic headwinds and conservative cloud investment reduced overall PCB needs, while supply-demand imbalance intensified industry price competition.

Market Size of the Global PCB Market, by Application, 2021–2030E

Source: Prismark, CIC Report

Notes:

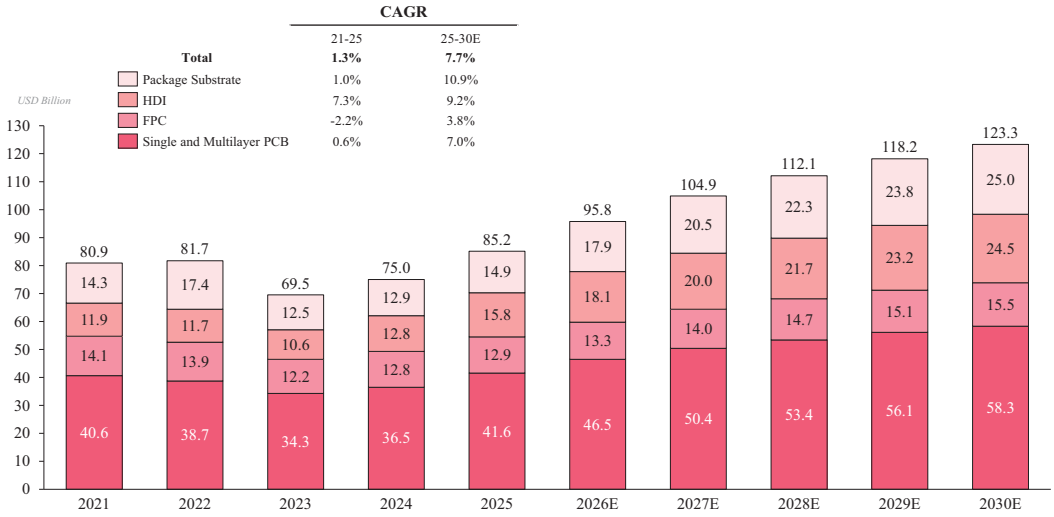

(1) Others mainly refer to industrial control system, medical apparatus, etc.

(2) The total global PCB market and all major application segments recorded a year-on-year decline in 2023, primarily due to (i) sluggish end-demand across major downstream markets amid global macroeconomic headwinds; (ii) industry-wide supply chain inventory destocking; (iii) conservative capital expenditure by cloud service providers and telecom operators; and (iv) intensified price competition caused by temporary supply-demand imbalance.

Products and Segments of the Global PCB Industry

PCBs can be categorized into single and multi-layer PCBs, HDIs, FPCs, and package substrates. In 2025, the global market sizes, in terms of sales revenue, reached US$41.6 billion for single and multi-layer PCBs, US$15.8 billion for HDIs, US$12.9 billion for FPCs, and US$14.9 billion for package substrates, respectively. The global market sizes for single and multi-layer PCBs, HDI PCBs, FPCs, and package substrates are projected to reach US$58.3 billion, US$24.5 billion, US$15.5 billion, and US$25.0 billion, respectively by 2030, the corresponding CAGRs of which from 2025 to 2030 are 7.0%, 9.2%, 3.8%, and 10.9% for each segment.

Market Size of the Global PCB market, by Product Types, 2021-2030E

Source: Prismark, CIC Report

Note:
The market size of rigid-flex boards is included in that of FPCs primarily due to their core reliance on flexible substrates and the substantial overlap in manufacturing processes with FPCs, rendering them technologically and structurally affiliated with the FPC category. By product type, all PCB categories recorded a year-on-year downturn in 2023. Package substrates saw the steepest decline, due to semiconductor supply chain destocking and temporary overcapacity built during the prior upcycle. Single and multi-layer PCBs and FPCs were impacted by weak end-demand and inventory destocking across telecommunications and consumer electronics markets, while HDI recorded a milder decline supported by emerging server demand. All product categories returned to year-on-year growth in 2024.

Competitive Landscape of the Global PCB Market

The global PCB industry is highly competitive and fragmented with the top 10 players accounting for 37.4% of the market share. In terms of PCB sales revenue, the Company ranked third in the global PCB market in 2025.

Ranking of the Global Providers of PCB, in Terms of Sales Revenue, 2025

Rank	Company Name	Sales Revenue (US$ million)	Market Share (%)
1	Company A	5,895.5	6.9
2	Company B	4,074.3	4.8
3	**The Company**	**3,615.3**	**4.2**
4	Company C	3,150.7	3.7
5	Company D	2,906.3	3.4
6	Company E	2,560.2	3.0
7	Company F	2,551.8	3.0
8	Company G	2,454.7	2.9
9	Company H	2,370.8	2.8
10	Company I	2,273.0	2.7
	Sum of Top 10	**31,852.6**	**37.4**

Notes:

1. Company A is a public company founded in 2006 and listed on the Taiwan Stock Exchange, headquartered in Taiwan, mainly engaged in the production and sale of diversified PCBs.
2. Company B is a public company founded in 1990 and listed on the Taiwan Stock Exchange, headquartered in Taiwan, mainly engaged in the production and sale of diversified PCBs.
3. Company C is a public company founded in 1984 and listed on the Shenzhen Stock Exchange, headquartered in Guangdong, China, primarily engaged in production and sale of diversified PCBs.

4. Company D is a public company founded in 1978 and listed on Nasdaq, headquartered in the United States, committed to providing PCBs, radio frequency and microelectronic components, as well as system integration services.
5. Company E is a public company founded in 1992 and listed on the Shenzhen Stock Exchange, headquartered in Jiangsu, China, mainly engaged in the research, development. production and sales of various types of PCBs.
6. Company F is a public company founded in 2006 and listed on the Shenzhen Stock Exchange and Hong Kong Stock Exchange, headquartered in Guangdong, China, mainly engaged in the research, development, production and sale of various PCBs.
7. Company G is a public company founded in 1973 and listed on the Taiwan Stock Exchange, headquartered in Taiwan, mainly engaged in production and sale of diversified PCBs.
8. Company H is a public company founded in 1991 and listed on the Taiwan Stock Exchange, headquartered in Taiwan, mainly engaged in the production and sale of diversified PCBs.
9. Company I is an enterprise founded in 1969 and headquartered in Japan, mainly engaged in the production and sale of diversified PCBs.

Drivers and Future Trends of the Global PCB Industry

- **Material innovation drives technological progress:** High-frequency performance with low loss, advanced thermal management, and flexible stretchability are main directions of PCB materials advancement. These material innovations directly enhance PCB performance in signal integrity, integration density, and reliability, meeting stringent demands from downstream applications. By enabling breakthroughs in high-frequency operation, precise thermal control, and mechanical flexibility, new materials are effectively addressing core challenges within high-speed, high-density, and high-power electronic systems. Furthermore, they are accelerating development in fields such as 5G communication, ADAS, wearable medical devices, and sustainable electronics. Consequently, dedicated R&D investment in advanced material technologies have become pivotal for capturing future opportunities and maintaining competitive edge in the global PCB industry.

- **Proliferation of Edge Computing and Edge AI Devices:** With the development of 5G, IoT, digital intelligence of consumer and automotive electronics, massive data is being generated at the edge. This will not only increase PCB volume in applications of edge AI devices, but also impose higher requirements for reliability, miniaturization, and durability in complex environments, driving technical upgrades and value enhancement for FPC, HDI, and specialty substrate PCBs at the edge.

- **Constant Growth in Demand for High-Performance PCBs:** High-performance PCB demand is growing, driven by AI (edge AI, data centers, AI-enabled automotive) and the evolution to 5G+ and potential 6G, which require higher PCB performance. These performance requirements are approaching the physical limits of traditional raw materials. High-end PCBs (with advanced technologies and materials) have higher unit value, and industry growth will focus on enterprises with core technologies focusing on the high-end market.

- **Increasing Industry Concentration among Leading Suppliers:** Downstream customers are demanding higher levels of stability, reliability of delivery, and technical collaborative support from suppliers. As downstream customers may face high validation costs, technical integration costs, and potential production disruption risks of switching suppliers, they prefer to establish long-term, stable partnerships with certified and leading PCB manufacturers. This trend is contributing to the increasing concentration level of the industry.

- **Acquisitions as a Strategic Pathway for Market Entry and Expansion:** As the PCB industry continues to consolidate around leading suppliers with established technical capabilities, certifications and customer relationships, acquisition has become an increasingly common route for market participants seeking to expand their market position, broaden their product and technology portfolio, or diversify into high-growth technology sectors. Acquiring an established platform with existing certifications, production capabilities and customer relationships allows participants to obtain mature manufacturing capacities and differentiated technical capabilities, substantially shortening the time required to achieve market entry as compared to building such capabilities from scratch. Such consolidation activities are, in turn, further driving up the overall concentration level of the industry.

Entry Barriers of the Global PCB Industry

- **Customer Certification Barriers:** Customer certification serves as a critical entry barrier in the PCB industry. Key customers implement rigorous supplier audits and lengthy product qualification tests, and maintain long-term stable cooperation with qualified suppliers with high customer stickiness. New entrants require substantial time and capital to complete complex certification procedures, making it difficult to obtain customer recognition and core orders in a short period.
- **Capital Investment Barriers:** Capital barriers in the global PCB industry are mainly concentrated in equipment, R&D, and capacity expansion. Regarding equipment, PCB manufacturing necessitates high-end specialized equipment such as drilling machines, exposure machines, and plating lines. The equipment carries high price tags and may entail substantial maintenance and upgrade costs. In terms of R&D, companies have to continuously commit significant funds to new material development, process optimization, and product innovation so that they could meet the escalating demands for high-speed signal transmission, miniaturized design, and multi-functional integration in consumer electronics and data centers. For capacity expansion, the high production and R&D costs raise the economies of scale threshold in the PCB industry. New entrants need to consistently invest in high-standard production lines, leveraging the economies of scale to spread fixed costs and achieve unit cost competitiveness. Consequently, small and medium-sized PCB companies have relatively limited capital resources to compete with industry giants in equipment, technology, and production capacity.
- **Supply Chain Barriers:** Core raw materials (e.g., copper foil, copper-clad laminates) determine product performance and cost, while high-end raw materials have concentrated supply and high cooperation barriers. Leading enterprises have stable cooperation with core suppliers and global layout capabilities to avoid supply risks, while new entrants struggle to obtain stable high-end raw materials and lack related operational capabilities, being at a disadvantaged position in terms of production stability and cost control.
- **R&D and Technology Barriers:** Leading enterprises have established technical barriers through long-term R&D investment and accumulation, mastering customized design, advanced manufacturing processes, core technologies and yield control. New entrants lack stable R&D funding, core technology accumulation and production experience, making it difficult to break through technical bottlenecks and penetrate the high-end market.

Cost of the Global PCB Industry

The primary raw materials of PCBs are copper-clad laminates, copper foil, and copper balls. Copper-based materials account for 70% of the total raw material cost of PCB substrate, with the intrinsic value of copper constituting approximately 30%-40% of the total cost of these primary copper-based materials. The global annual average copper settlement price increased from US$9,317.5 per MT in 2021 to US$10,800.0 per MT in 2025. In the future, the global annual average copper settlement price is projected to reach US$12,394.0 per MT by 2030. This upward trajectory is primarily attributed to demand growth, driven by the global energy transition and the expansion of new infrastructure such as data centers, which is expected to consistently outpace supply growth constrained by factors including declining ore grades and limited new capacity additions in the mining sector.

OVERVIEW OF THE GLOBAL FPC INDUSTRY

FPC refers to a type of PCB manufactured using flexible copper-clad laminates as the base material, featuring bendable and foldable properties. Endowed with performance advantages such as thinness, light weight, and high wiring density, FPC serves as a critical foundational component for achieving miniaturization, lightweight design, and highly reliable connection of electronic devices.

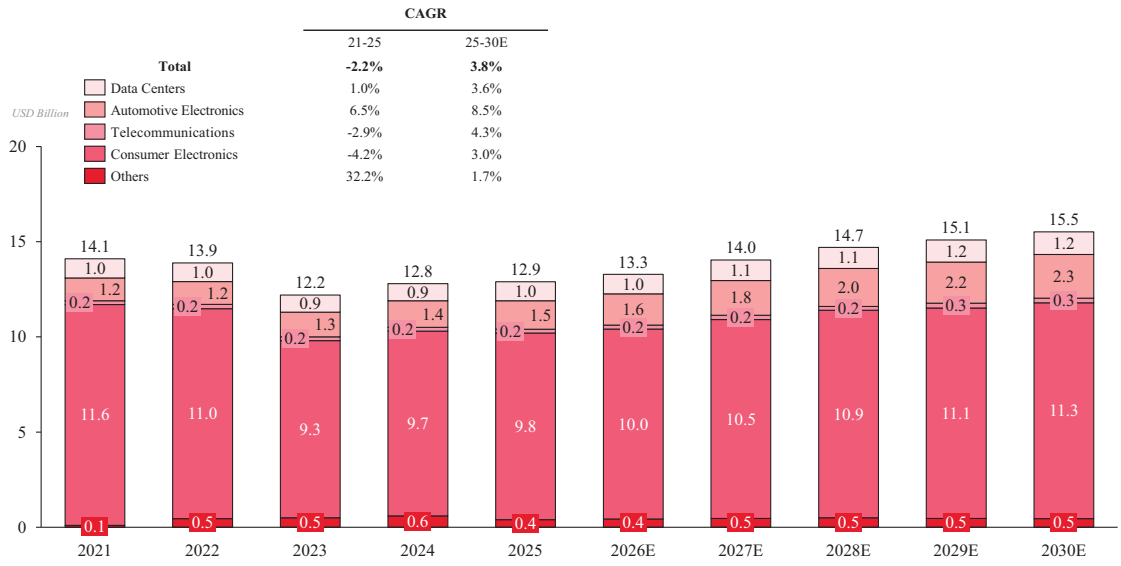

In consumer electronics, FPC is the mainstream solution for enabling high-speed signal transmission between internal modules, including display modules, cameras, and biometric modules, of smartphones,

tablets, and wearable devices. In the automotive field, FPC is most commonly applied in automotive battery management systems (BMS) and in-vehicle displays. In industrial control, leveraging its high durability and spatial adaptability in complex environments, FPC supports industrial equipment in achieving stable and efficient connectivity. As edge AI devices pack more functions into smaller designs, FPCs, which enable 3D wiring and high-density connectivity, will see rising demand driven by the move toward high-end and customized products, making them a key driver of value in the edge-side PCB industry.

Market Size of the Global FPC Industry by Applications

The global FPC market has maintained a steady growth trend. Its market size reached US$12.9 billion in 2025 and is expected to grow to US$15.5 billion by 2030 with a CAGR of 3.8%. From 2026 to 2030, the consumer electronics market will continue to drive the expansion of the FPC market, supported by the growing shipment volumes of edge AI devices, such as smartphones, AR/VR devices, and wearable devices. On the other hand, the automotive electronics is the fastest-growing application area for global FPC.

Market Size of the Global FPC Market, by Application, 2021-2030E

Source: Prismark, CIC Report

Notes:

(1) Others mainly refer to industrial control system, medical apparatus, etc.

(2) The global FPC market recorded a year-on-year decline in 2023. The downturn was primarily driven by the steep decline in the consumer electronics segment (the largest FPC downstream market), amid sluggish global smartphone and consumer wearable demand and industry-wide supply chain destocking; the data center segment also declined amid conservative cloud capital expenditure. The market returned to year-on-year growth in 2024 as industry inventories normalized.

Competitive Landscape of the Global FPC Industry

Against the backdrop of the current global economic recovery and rapid technological advancement, the FPC industry is undergoing continuous transformation and consolidation, characterized by high industry concentration and intense competition. Additionally, driven by technological innovation and digital transformation, enterprises with leading advantages are demonstrating stronger competitiveness and influence in the market. The global FPC market features intense competition, while the competitive landscape among top players is relatively concentrated. In terms of sales revenue, the Company ranked the second in the global FPC market in 2025.

Ranking of the Global Providers of PCB, in terms of Sales Revenue of FPC, 2025

Rank	Company Name	Sales Revenue (US$ million)	Market Share (%)
1	Company A	4,030.3	31.2
2	**The Company**	**3,159.7**	**24.5**
3	Company I	1,405.6	10.9
4	Company J	911.4	7.1
5	Company K	721.9	5.6
6	Company L	574.2	4.4
7	Company M	527.3	4.1
8	Company N	401.6	3.1
9	Company O	314.0	2.4
10	Company P	278.8	2.2
	Sum of the Top 10	**12,324.8**	**95.5**

Source: Annual Reports of Listed Companies, Interviews with industry experts by CIC, CIC Report

Notes:

1. Company J is a company founded in 1999 and listed on the Korea Exchange, headquartered in South Korea, mainly engaged in the research and development, production and sales of FPCs and related application components.
2. Company K is a public company founded in 2000 and listed on the Taiwan Stock Exchange, headquartered in Taiwan, mainly engaged in the research and development, production and sales of FPCs.
3. Company L is a public company founded in 1993 and listed on the Shanghai Stock Exchange and Hong Kong Stock Exchange, headquartered in Guangdong, China, mainly engaged in the research and development, production and sales of diversified PCBs.
4. Company M is a public company founded in 2003 and listed on the Shenzhen Stock Exchange, headquartered in Fujian, China, mainly engaged in the research and development, production and sales of FPCs.
5. Company N is a public company founded in 1918 and listed on the Tokyo Stock Exchange, headquartered in Japan, mainly engaged in the research, development, manufacturing and sales of advanced functional materials and FPCs.
6. Company O is a public company founded in 1897 and listed on the Tokyo Stock Exchange, headquartered in Japan, mainly engaged in the research, development, production and sales of electrical wires/cables, electronic components, automotive parts and FPCs.
7. Company P is a public company founded in 1885 and listed on the Tokyo Stock Exchange, headquartered in Japan, mainly engaged in the research, development, production and sales of optical fibers, cables, FPCs and electronic components.

Drivers and Future Trends of the Global FPC Industry

- **Thinness, Lightweight Design and Multi-Functional Integration of Edge AI Device:** Edge AI devices continue to evolve toward greater thinness, lightness, and compactness while integrating more complex functions, driving the growth in demand for FPC. With its bendability and high-density wiring capabilities, FPC has become an ideal choice for connecting various modules within limited spaces, effectively meeting the stringent requirements for product miniaturization and functional integration.
- **Rapid Development of Innovative Consumer Electronics Spurs Further FPC Demand Growth:** In recent years, the consumer electronics market has witnessed continuous innovation, with emerging segments such as AR/VR devices, wearable devices, and foldable smartphones experiencing rapid demand growth, further fueling demand in the FPC market. In the AR/VR sector, advancements in chips, display technologies, and communication methods have propelled the industry into a phase of rapid growth. The global shipment volume of AR/VR devices is expected to reach approximately 50 million units by 2030. In the wearable device segment, products need to accommodate more components to enable additional functions while maintaining lightweight and integrated features, which further increases requirements for wiring density. This will lead to a growing proportion of FPC usage per device.
- **Electrification, Intelligence, Integration, and Lightweight Trends in Automotive Boost In-Vehicle FPC Demand:** FPC's advantages, including high wiring density, light weight, thin thickness, foldability, 3D wiring, and safety, are unparalleled by other types of circuit boards.

These advantages align better with the downstream trends of lightweight, intelligent, and integrated electronic products, making FPC particularly suitable for EV. As the automotive industry advances toward electrification and intelligence, the share of automotive electronics in total automotive costs is projected to reach 50% by 2030. With the rise in electrification levels, the demand for electronic components in automotive autonomous driving systems, infotainment systems, lighting systems, display systems, power systems, BMS, and sensors will expand. Correspondingly, the demand for FPC used to connect these electronic components will increase, further driving growth in in-vehicle FPC demand.

OVERVIEW OF THE GLOBAL PCB INDUSTRY FOR EDGE AI DEVICES

Growth and Value Proposition of the Global Edge AI Device Industry

Edge AI refers to a technology where AI models are deployed at edge nodes close to data generation sources. Edge AI devices are specifically intelligent hardware integrated with this technology, enabling them to directly perform data collection, processing, AI model inference, and decision-making locally at the point of data generation. Compared with cloud-based IoT equipment, they feature lower latency, better data privacy and higher operational stability. Widely recognized across industries, Edge AI is a new distributed computing paradigm that stands apart from conventional centralized cloud computing. Its growing adoption has driven sweeping changes to Edge AI devices in design, architecture and production. AI phones and AI PCs are typical application scenarios. Edge AI devices require high computing power in a compact size, bringing stringent requirements for PCBs. Relevant circuit boards need high integration density to accommodate densely arranged core components, excellent thermal management to dissipate heat from high-power AI chips, and strong environmental adaptability to withstand temperature changes, vibration and electromagnetic interference in automotive, industrial and other complex scenarios.

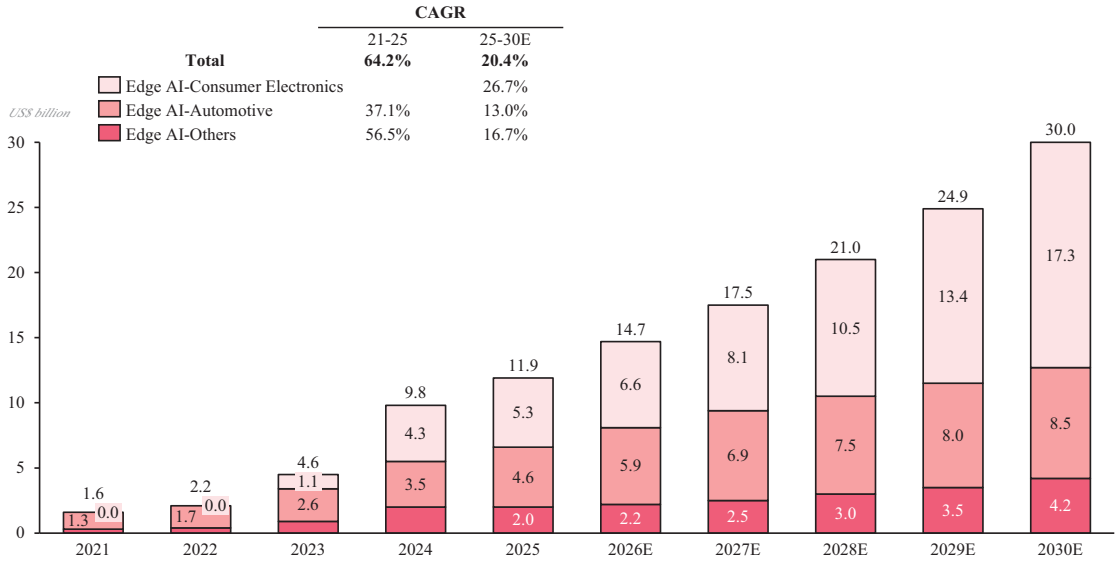

With technological advancement, edge AI has been widely applied in consumer electronics, wearables, XR devices and smart home products. In particular, automotive electrification and intelligent transformation have further driven the rapid development of edge AI terminal applications.

Market Size of the Global PCB Industry For Edge AI Devices

The commercialization of edge AI technology is becoming a core factor driving the upgrading and value restructuring of the edge AI device industry. Edge AI devices mainly include AI-enabled consumer electronics, industrial device, and medical devices, among others. On one hand, in the field of AI-enabled consumer electronics, a new cycle of hardware upgrades and increasing of value per unit further drive the market growth. On the other hand, edge AI is a key technology for ADAS and human vehicle co-piloting in intelligent cockpits in the AI-enabled automotive industry, driving automobiles to evolve from transportation tools to mobile intelligent spaces.

As the core carrier supporting AI computing at edge nodes, the market size of the global PCB industry for edge AI devices has expanded rapidly amid the explosive growth in demand for edge computing power. The global PCB market for edge AI devices is part of the overall global PCB market, corresponding to the market size of PCBs deployed in edge AI devices. It is a key driver for the global PCB market's future growth, with its share steadily increasing. In 2025, the global PCB industry for edge AI devices exceeded US$11.9 billion, with a CAGR of 64.2% from 2021 to 2025. From a growth perspective, driven by the penetration of generative AI in edge scenarios and the accelerated deployment of edge AI device, the market will enter a period of high-speed growth. It is projected that the global edge AI PCB market size will increase to US$30.0 billion by 2030, representing a CAGR of 20.4% from 2025 to 2030, significantly outpacing the overall growth rate of the global PCB industry.

Market Size of the Global PCB Industry for Edge AI Devices[1], by Application, 2021–2030E

Note:

Others mainly refer to industrial control system, medical apparatus, etc.

Drivers and Future Trends of the Global PCB Industry for Edge AI Devices

- **The Deployment of AI Applications at the Edge:** The deployment of AI applications at the edge drives demand for high-performance, low-latency PCBs in intelligent scenarios like consumer electronics and smart vehicles. In the smart vehicle sector, the iteration of ADAS, intelligent cockpits, and connected car functions raises higher requirements for automotive PCBs in high-frequency, high-temperature reliability, and long-term stability; in the consumer electronics industry, a large number of devices need local real-time data processing and decision-making, enabling PCBs to evolve toward high-density integration, low signal loss, and miniaturization. In the future, with the development of telecommunications and deeper collaboration between the edge and data center, PCB will continue to upgrade toward higher frequency, higher speed, better heat dissipation, and higher reliability.
- **Innovation in Consumer Electronics Drives New Growth:** Driven by AI technology, consumer electronics are undergoing continuous innovation, driving the development of the global PCB industry for edge AI devices through performance, form factor, and functionality. Firstly, enhanced performance drives PCBs toward high-end advancement. To support local AI computing, devices require more powerful processors, which in turn demand PCBs with increased layer counts, low-loss high-speed materials, and more precise wiring processes, such as advanced HDI and Substrate-Like PCB (SLP) technologies. Secondly, miniaturized form factors are driving PCBs toward higher density and flexibility. To accommodate the compact structures of foldable screens, wearable devices, and other compact products, PCBs must achieve greater integration within a smaller footprint. As a result, HDI and FPC technologies have been widely adopted. Thirdly, diversified functions are spurring upgrades in PCBs' heat dissipation capabilities and integration levels. Complex functionalities such as multi-sensor fusion require PCBs to utilize specialized materials and adopt technologies such as System-in-Package (SiP) to ensure stable operation. The AI-driven trends of intelligence, slimness, and multi-functionality in consumer electronics continuously drive continuous upgrades in PCB for edge AI devices across materials, design, and processes via these three pathways, giving strong growth momentum into the industry.
- **A Strong Demand in Automotive Scenarios Drives the Growth of PCB Market:** the automotive sector has become a core demand segment within the whole market. As L2 or above

autonomous driving technologies accelerate their penetration, their penetration rate climbed from 57.3% in 2024 to 70.3% in 2025, driving up the PCB value per vehicle. According to the Ministry of Industry and Information Technology, penetration rate of combined driving assistance systems (L2 or above) is calculated by dividing the number of new passenger vehicles sold in China during the relevant period that are equipped with L2 or above driving automation systems, by the total number of new passenger vehicles sold in China during the same period. Among these, high-frequency PCBs for edge AI devices used in millimeter-wave radar modules cost more than three times that of ordinary automotive PCBs, highlighting the critical role and high-value-added nature of high-end automotive PCBs in autonomous driving systems. As the complexity of autonomous driving functions continues to rise, systems are placing higher demands on PCBs for edge AI devices, in terms of signal transmission stability, high-temperature resistance, and anti-electromagnetic interference capabilities. This trend is prompting the industry to increase R&D investment, driving product iteration toward multi-layer, high-frequency, and high-speed directions. Meanwhile, the rapid popularization of EV and intelligent connected automotive is driving sustained growth in demand for PCBs for edge AI devices, and the market size of this segment is expected to expand further in the future.

- **Leading companies solidify their market dominance through capacity scaling and M&A integration:** Rising technical and capital barriers in the edge AI sector raise operational requirements for PCB manufacturers. Edge AI devices in consumer electronics and automotive have differentiated PCB needs, so manufacturers need cross-sector technical capabilities to meet stringent computing and signal integrity demands. Increased investment in high-end production lines and R&D further lifts industry thresholds. Market leaders consolidate dominance by expanding global high-end capacity and conducting strategic M&A to acquire core patents, complementary products and high-quality customers, accelerating industry resource concentration toward leading players with strong technology, capital and customer coverage.

OVERVIEW OF THE GLOBAL PRECISION COMPONENT INDUSTRY

The precision component industry refers to a sector engaged in the design, forming and assembly of precision metal structural components and functional modules, together with associated welding, surface treatment and testing processes. These are parts and modules built into a customer's finished product, not complete machines or equipment sold as an end product in their own right. From the perspective of the industrial chain structure, the upstream of the precision component industry chain covers raw material and equipment supply, mainly including raw materials such as metal materials, as well as production equipment such as cutting and forming equipment, processing equipment, and testing and inspection equipment. The midstream of the industrial chain is the precision processing and manufacturing link, where manufacturers are responsible for processing high-precision parts and components, functional modules, and providing complete machine assembly. The downstream of the industrial chain refers to the application fields of precision component products, mainly including automotive, telecommunications, industrial equipment, medical devices and other areas.

Market Size of the Global Precision Component Industry

With the continuous upgrading of downstream manufacturing industries and the accelerated rise of emerging fields such as 5G communications, AI, and new energy vehicles, the global demand for precision component products has maintained steady growth—providing broad growth space for the development of the global precision component industry.

The global market size of precision component has grown from US$420.1 billion in 2021 to US$538.1 billion in 2025, with a CAGR of 6.4%. As the global advanced manufacturing industry continues to develop, technological progress accelerates, and intelligent manufacturing becomes more widespread, this market size is projected to reach US$743.9 billion by 2030, with a CAGR of 6.7% from 2025 to 2030.

Drivers and Future Trends of the Global Precision Component Industry

- **Booming development and capacity expansion across downstream high-end manufacturing have fueled strong new demand for precision components:** The growing popularity of new energy vehicles and smart driving raises both the quantity and quality requirements for automotive electronic and autonomous driving components. Rising adoption of industrial automation and robots drives steady demand for high-precision transmission and actuating parts. Meanwhile, upgrades to semiconductor equipment, AI hardware and edge smart terminals push up needs for ultra-precision structural and connecting components. Collectively, these downstream sectors propel the sustained growth of the precision components market.
- **Intelligent Collaboration System:** Driven by the macro trends of digital transformation and intelligent manufacturing development, the precision component industry is accelerating its evolution toward a full-process intelligent collaborative manufacturing system. This is specifically reflected in two aspects: First, the in-depth integrated application of artificial intelligence (AI) algorithms and digital twin technology. By building high-precision virtual simulation models to systematically optimize process parameters, the machining accuracy of complex precision structural components can be improved to the nanometer level, while significantly shortening the product R&D cycle. Second, the widespread deployment of the Internet of Things (IoT) technology and edge computing architecture has promoted the intelligent upgrading of production workshop equipment, forming an intelligent terminal network with autonomous perception and decision-making capabilities. This further builds a closed-loop intelligent manufacturing ecosystem covering demand forecasting, flexible production, and full-lifecycle quality traceability.
- **In the Consumer Electronics Sector, the Precision Component Field Shows Trends of Digitalization, Refinement, and Customization:** As the consumer electronics industry pursues thinness, lightness, high performance, and multi-functionality, the precision component industry presents three core trends: As the consumer electronics industry pursues thinner, lighter, and higher-performance products with multifunctional designs, the precision component industry is showing clear trends of digitalization, refinement, and customization. The demand for ultra-high precision continues to grow as smartphones and wearable devices evolve toward greater integration, requiring tighter tolerances and finer surface finishes, driving manufacturers to upgrade machining and testing technologies. Meanwhile, shorter product cycles have made customization and flexible production essential, with enterprises adopting modular design and parametric programming to enable rapid product switching. In addition, policies such as the EU's Circular Economy Action Plan are accelerating the shift toward green manufacturing, increasing the use of bio-based and recyclable materials while emphasizing energy efficiency and wastewater control as key competitiveness indicators.
- **The Trends of Automotive Electrification, Intelligence, and Modularization Are Reshaping the Technical Paths and Business Models of Precision Component:** Amid the trend of automotive intelligence, the application of large AI models is reshaping the decision-making logic of the entire vehicle, making software-defined vehicles a core direction. This not only places higher requirements on the real-time performance, in-vehicle data interaction, and automotive communications but also drives the demand for more high-performance data connectivity components, communication modules, and intelligent parts, greatly promoting the development of the industry. The development of the automotive industry is accelerating, and modularization and customization will become important trends in automotive precision intelligent manufacturing. Modularization can improve efficiency and expand functions, promoting the vertical integration of the module supply chain through hardware atomization splitting, standardized interfaces, and software definition. Customization meets personalized needs through the Consumer-to-Manufacturer model, flexible production, and additive manufacturing. These two trends form an elastic synergy in the supply chain. The focus of competition lies in the scalability of modular platforms, the degree of segmentation of customized services, and data-driven capabilities. Enterprises need to establish advantages through pre-embedded hardware, software definition, and ecological synergy.

OVERVIEW OF THE GLOBAL OPTOELECTRONIC DISPLAY INDUSTRY

The optoelectronic display industry focuses on display devices that convert electrical signals into visible images. These devices serve as core components for electronic equipment to present visual content and enable information and sensory interaction. Currently, with the global popularization of consumer electronics, the accelerated development of internet communication technologies, and the penetration of AI hardware and software terminals, human demand for information interaction has surged. As a core carrier, optoelectronic display devices are widely used in fields such as automotive and consumer electronics. Driven by innovations in display technologies, the expansion of application fields, and the penetration of smart devices, the global optoelectronic display industry is expected to achieve rapid development. From the perspective of technical routes, the global optoelectronic display industry is mainly divided into two major technical routes, LCD and OLED.

Market Size of the Global Optoelectronic Display Industry

With the continuous iteration of optoelectronic display technologies and the ongoing empowerment of optoelectronic display modules by technologies such as AI and the Internet of Things (IoT), the market size of the global optoelectronic display industry has grown from US$164.2 billion in 2021 to US$200.3 billion in 2025, representing a CAGR of 5.0%. It is projected that by 2030, the size of the global optoelectronic display industry will further increase to US$264.3 billion, with a CAGR of 5.7% from 2025 to 2030.

Optoelectronic display modules are mainly applied in the automotive and consumer electronics sectors. In the automotive sector, as the automotive industry completes its strategic transformation from functional mobility tools to intelligent interactive terminals, smart cockpits—serving as the core scenario for human-vehicle interaction—are witnessing an accelerated rise in market penetration. The global adoption rate of smart cockpits is projected to exceed 80%, with a penetration rate of over 82% by 2030 in the EV segment. Against this backdrop, in-vehicle display devices have evolved from traditional information presentation carriers to core media for human-vehicle interaction, enabling connectivity and communication between humans and vehicles. In the context of consumer electronics applications, the evolving demand for optoelectronic display modules in the consumer electronics industry has gradually reshaped human-machine connectivity. Driven by the dual forces of continuously improving display technology maturity and the in-depth penetration of 5G and AI technologies, optoelectronic display modules have evolved from simple image output windows to human-machine interaction hubs.

Drivers and Future Trends of the Global Optoelectronic Display Market

- **Integration of Display Forms:** In-vehicle displays are evolving from scattered functional screens to integrated central hubs, with core manifestations in the dual upgrading of form integration and computing power collaboration. At the form level, large-size and irregular-shaped displays have become standard configurations in high-end vehicle models. At the functional level, the "one-chip multi-screen" architecture is accelerating its implementation, and the popularization of domain controllers is driving the in-depth integration of display systems with ADAS and connected vehicles. This integration not only optimizes the space utilization of the cockpit but also upgrades the display system from an information presentation terminal to an intelligent interactive hub—with the value of display modules per vehicle increasing by approximately 2x compared to that of fuel-powered vehicles.
- **High-Definition Display:** With the rising penetration rate of intelligent vehicle cockpits, meeting passengers' personalized driving and entertainment needs has become a key focus in the development of in-vehicle displays. To enhance the driving and riding experience, in-vehicle displays continue to move toward high definition: their resolution is evolving from the previous 800×400 to 1920×1080 or even higher, while emerging display technologies such as flexible screens, seamless connected screens, OLED screens, and Mini LED are gradually being applied. The entertainment experience and human-machine interaction demands of intelligent cockpits are driving the high-definition development of in-vehicle displays.

- **Upgraded Interactive Experience:** Display interaction is shifting from one-way visual output to multi-modal collaboration, with AR-HUD emerging as a key driver of intelligent transformation. Currently, W-HUD solutions are the mainstream HUD solutions. However, in the future, as cockpit visualization and interaction become fully intelligent, the market share of AR-HUD solutions will continue to rise and surpass that of W-HUD solutions.
- **Widening application scenarios and higher product penetration fuel growth for touch panels:** Steady upgrades of consumer smart terminals underpin basic market demand. Rapid adoption of automotive cockpits, industrial, commercial and smart medical devices raises requirements for touch displays, pushing up demand for high-end, large and highly reliable touch panels.

OVERVIEW OF THE GLOBAL OPTICAL TRANSCEIVER INDUSTRY

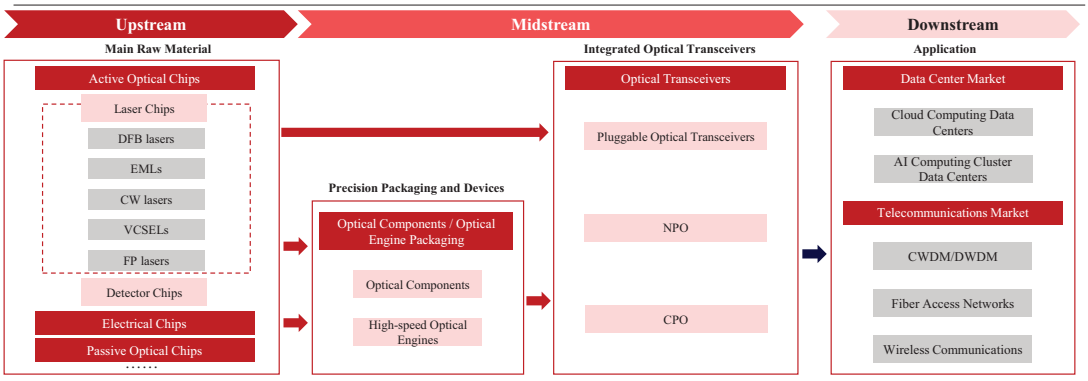

Development Background of the Global Optical Transceiver Industry

Optical transceiver technology represents a next-generation communication technology that has overcome the physical transmission bottlenecks of traditional electrical communication. Through an electrical-optical-electrical signal conversion mechanism and leveraging the optical signal transmission characteristics of optical fibers, optical transceiver technology has established generational advantages across key dimensions such as bandwidth capacity, transmission distance, anti-interference capability, and energy efficiency density. It systematically addresses the core transmission challenges of large-volume data interaction and wide-area connectivity in the digital era, and while supporting the upgrade of communication networks, it fully empowers computing infrastructure.

Analysis of the Global Optical Transceiver Industry Chain

The upstream segment of the optical transceiver industry chain mainly includes active optical chips, electrical chips and passive optical chips. Optical chips are upstream of the optical transceiver industrial chain, constituting a key link with high technical barriers and sophisticated manufacturing processes. Their performance directly underpins the transmission speed and energy efficiency of downstream optical devices, optical transceivers and the entire optical communication system. Driven by booming growth in the optical transceiver market, rapid penetration of emerging technologies including silicon photonics, and rising end-market demand for high-performance optical transceivers, the optical chip industry has registered robust expansion. As an essential core component of optical transceivers, optical chips stand to benefit materially from the aforesaid industry trends, fueling their rapid development amid a prevailing market supply shortage. The midstream of the industry value chain comprises optical transceivers. Optical and electronic components are integrated into optical transceivers to enable efficient data transmission across networks. Transmission rate is the core performance indicator, directly determining their data transmission efficiency and adaptability to downstream scenarios. The optical transceiver industry is categorized into low-to-medium speed and high-speed products based on transmission rate. The downstream application scenarios of the optical transceiver industry cover datacom scenarios and telecom scenarios. The differentiated demands of these two types of scenarios have driven optical transceiver technology to achieve breakthroughs in multiple dimensions.

Industry Value Chain Analysis of the Global Optical Transceiver Industry

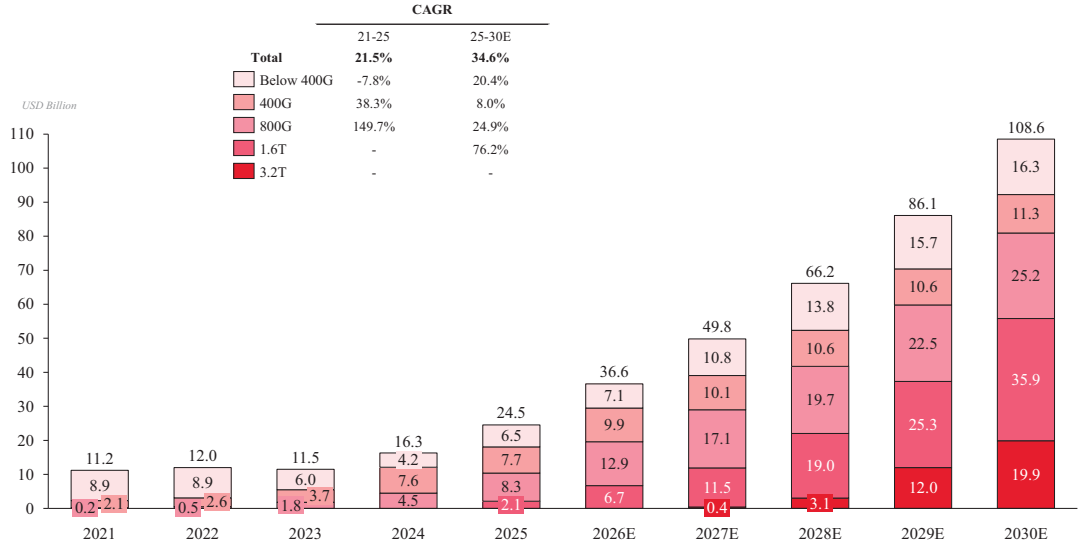

Source: CIC Report

Market Size of the Global Optical Transceiver Industry

Optical transceivers are core components to break data transmission bottlenecks. Driven primarily by AI large model training's surging demand for high-bandwidth, low-latency interconnection, the global market grew from US$11.2 billion in 2021 to US$24.5 billion in 2025, representing a CAGR of 21.5% and is projected to reach US$108.6 billion by 2030. Industry growth is underpinned by technological iteration, including EML solutions retaining targeted performance advantages, silicon photonics gaining traction in high-speed interconnects, and upstream optical chip breakthroughs solidifying the industry foundation.

For product lines, 800G transceivers saw explosive growth; 1.6T products have entered mass production and become a core growth driver; 3.2T products remain in R&D; while traditional 400G and lower-rate transceivers have seen a significant growth slowdown.

Market Size of the Global Optical Transceiver Market, by Transmission Rate, 2021-2030E

Source: Historical and forecast figures are largely derived from data sourced from LightCounting, while the detailed breakdown of forecast data is based on estimates by CIC.

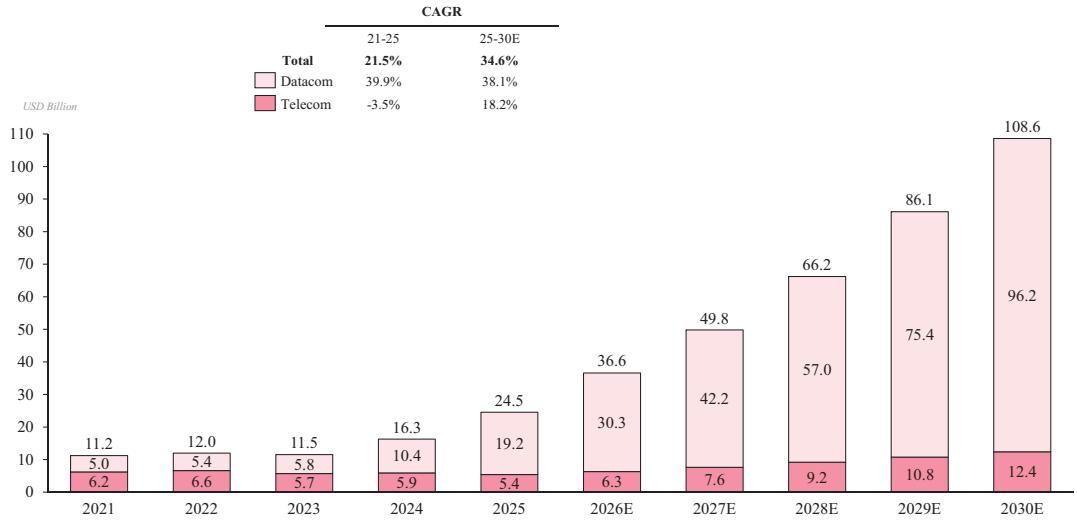

Note:
The global optical transceiver market recorded a year-on-year decline in 2023. The downturn was primarily driven by a steep decline in the below-400G transceiver segment, amid macroeconomic headwinds, slower 5G network rollout by telecom operators, weak demand from traditional data centers, industry-wide supply chain destocking and intensified price competition.

Optical transceivers are categorized into datacom and telecom segments by core application: the datacom segment focuses on high-speed connectivity within and across data centers, while the telecom segment serves long-distance transmission over wide-area networks. The datacom segment, driven by global computing infrastructure expansion, has become the core growth engine of the optical transceiver market.

From 2021 to 2025, global data center construction accelerated amid exponential growth in AI large model training-driven computing power demand and sustained computing infrastructure investment from cloud service providers. The datacom optical transceiver market grew from US$5.0 billion in 2021 to US$19.2 billion in 2025, with a CAGR of 39.9%. Looking ahead, the datacom segment will see further strengthened demand resilience. Driven by rising cloud data center investment shifting toward computing power clustering, and superlinear computing power growth from AI model scaling, the datacom market is projected to reach US$96.2 billion by 2030, with a 38.1% CAGR from 2025 to 2030. In-datacenter demand for extreme bandwidth density and energy efficiency has spurred the development of low-power solutions including LPO and CPO technology, while SiPh technology is gaining higher penetration in high-speed products for its high integration and cost advantages.

The global telecom optical transceiver market registered a CAGR of -3.5% from 2021 to 2025, a decline attributable to two primary factors. First, the large-scale deployment of 5G communication infrastructure has been completed, leading to reduced incremental demand for optical interconnects. Second, major telecom operators worldwide curtailed their network upgrade expenditures as part of cost-control measures. Starting from 2025, driven by technological advancements and the expansion of computing infrastructure, the global telecom optical transceiver market is expected to grow from US$5.4 billion in 2025 to US$12.4 billion in 2030, achieving a CAGR of 18.2%.

Market Size of the Global Optical Transceivers, by Application, 2021-2030E

Source: Historical and forecast figures are largely derived from data sourced from LightCounting, while the detailed breakdown of forecast data is based on estimates by CIC.

Note:
The global optical transceiver market recorded a year-on-year decline in 2023. The downturn was primarily driven by a fall in the telecom transceiver segment amid macroeconomic headwinds, slower 5G network deployment by telecom operators, industry-wide supply chain destocking and intensified price competition.

Competition Landscape of the Global Optical Transceiver Industry

The global optical transceiver industry is propelled by growing demand for high-speed data transmission. Its competitive landscape is highly concentrated, wherein a few leading enterprises hold a substantial market share. This is largely attributable to their technological leadership in high-speed (800G and above), high-reliability products and consistent supply enabled by their stable mass-production capabilities.

Meanwhile, the rising R&D costs and stringent quality requirements in core application fields such as data centers and 5G base stations have further intensified this concentration trend, setting a high threshold for new entrants. The global optical transceiver industry is exhibiting trends of technology-driven development and vertical industrial chain integration; leading industry participants will continue to enhance their market share by continuously improving their R&D capabilities and mass production capacity.

Following its acquisition of Source Photonics in September 2025, the Company ranked seventh in the global optical transceiver industry in 2025 with a market share of 2.9%, based on Source Photonics' revenue for that year. High-speed optical chips (single-channel 50Gbps and above) are one of the core segments in the optical transceiver industry chain, accounting for 30% to 70% of the total cost of optical transceivers. The shipment capacity of such chips serves as a strong indicator of suppliers' core technological strength, upstream bargaining power and long-term growth potential.

Ranking of Optical Transceiver Suppliers, in Terms of Sales Revenue of Optical Transceivers, 2025

Rank	Company Name	Sales Revenue (US$ million)	Market Share (%)
1	Company Q	5,285.5	21.5
2	Company R	3,505.5	14.3
3	Company S	2,648.1	10.8
4	Company T	1,194.2	4.9
5	Company U	922.1	3.8
6	Company V	860.3	3.5
7	**The Company**	**714.5**	**2.9**
8	Company W	655.8	2.7
9	Company X	651.0	2.7
10	Company Y	236.4	1.0
	Sum of the Top 10	**16,673.4**	**68.1**

Source: Annual Reports of Listed Companies, Interviews with industry experts by CIC, CIC Report

Notes:

The underlying revenue and market position were attributable to Source Photonics, rather than generated by the Group prior to the acquisition.

1. Company Q is a public company founded in 2005 and listed on the Shenzhen Stock Exchange and Hong Kong Stock Exchange, headquartered in Shandong, China, focusing on the research and development as well as manufacturing of optical transceivers.
2. Company R is a public company founded in 2008 and listed on the Shenzhen Stock Exchange, headquartered in Sichuan, China, focusing on the research and development as well as manufacturing of optical transceivers.
3. Company S is a public company founded in 1966 and listed on the New York Stock Exchange, headquartered in the United States, developing, manufacturing and selling lasers, transceivers, as well as other optical and optoelectronic devices, modules, systems and engineering materials.
4. Company T is a public company founded in 2001 and listed on the Shenzhen Stock Exchange, headquartered in Hubei, China, and mainly engaged in the research, development, manufacturing and sales of optoelectronic components and transceivers.
5. Company U is a public company founded in 2003 and listed on the Shenzhen Stock Exchange, headquartered in Shandong, China, focusing on the research, development and mass production of optical transceivers, optical chips and optical network terminal products.
6. Company V is a public company founded in 1999 and listed on the Shenzhen Stock Exchange, headquartered in Hubei, China, mainly engaged in the research, development, manufacturing and technical services of optical transceivers, laser processing equipment and sensors.
7. Company W is a public company founded in 2015 and listed on NASDAQ, headquartered in the United States, mainly engaged in the design and manufacturing of optical transceivers, optical chips and optical network terminal products.
8. Company X is a public company founded in 1995 and listed on NASDAQ, headquartered in the United States, mainly engaged in the research, development, design and supply of semiconductor chips and optical transceivers.
9. Company Y is a public company founded in 2006 and listed on the Shanghai Stock Exchange and the Stock Exchange of Hong Kong, headquartered in Shanghai, China, mainly engaged in the R&D, production and sales of optical transceivers, telecom broadband terminals, wireless networks and small cells.

Drivers and Future Trends of the Global Optical Transceiver Market

- **Leading global cloud vendors keep ramping up capital expenditure to expand large-scale data centers, AI computing clusters and other digital infrastructure on a full scale:** To meet the demand for high-bandwidth and low-latency interconnection driven by massive data transmission as well as AI model training and inference within server racks, between racks and across campuses, cloud providers have drastically increased the procurement and deployment of high-speed optical modules. Robust purchasing demand from cloud vendors has become the core driver sustaining the growth of the global optical transceiver industry.
- **AI training requires massive collaborative computing with GPUs, and the number of optical transceivers paired with GPUs continues to rise:** The core demand for GPU collaborative computing efficiency in large AI model training has directly driven the development of the optical transceiver industry. Traditional general-purpose servers focus on single-machine computing, with a demand for only 2–4 optical transceiver ports per machine. In contrast, AI servers need to support multi-GPU parallel computing. Taking mainstream models equipped with 8 GPUs as an example, their optical transceiver port configuration has increased to 24–32 ports—representing a 6–8 times increase in port density compared to traditional models, which directly meets the high-frequency data interaction needs between multiple GPUs. As GPU computing clusters scale up to 100,000-GPU clusters, the ratio of optical transceivers to individual GPUs is evolving from 1:1 to

4:1. This means the demand for optical transceivers per cabinet will increase by 3–4 times as the ratio upgrades, becoming a core growth driver for overall optical transceiver demand.

- **AI Data Center Cluster Scale Expansion Drives Optical Transceiver Rate Iteration:** The continuous expansion of AIDC cluster scale has made optical transceiver rates a key variable determining model training efficiency, driving rapid industry development. The data interaction volume of a 100,000-GPU cluster is more than 10 times higher than that of a 10,000-GPU cluster. Traditional optical transceivers with rates of 400G and below can no longer meet the low-latency and high-bandwidth transmission requirements, making high-speed optical transceivers shift from an optional configuration to a necessity.
- **CPO Technology Unlocks Extreme Density and Business Model Innovation:** CPO technology, by deeply integrating optical transceivers with switch chips, not only reduces the package size by 50% and supports ultra-high-speed requirements of 3.2T and above, but also reshapes the business collaboration model of the electronic device industry. The traditional supply system where optical transceivers and switches are relatively independent is gradually evolving toward close strategic cooperation. Optical transceiver manufacturers need to participate in the design phase of switch chips in advance, and conduct in-depth collaborative R&D with switch manufacturers in aspects such as architecture planning, interface standards, and heat dissipation solutions to jointly optimize the performance of optoelectronic hybrid systems.
- **Vertical Integration and Horizontal Acquisitions Jointly Shape Technical Barriers:** In recent years, leading global optical transceiver manufacturers have deepened vertical integration of the industry chain and executed strategic horizontal M&A to extend their technological and market reach. Through both vertical and horizontal acquisitions, leading optical transceiver manufacturers can enhance production capacity, strengthen core technologies, establish a fully integrated supply chain and capture greater market share. In addition, leveraging industrial synergies in the AI infrastructure field, a number of companies have also entered the optical transceiver industry via cross-border acquisitions. Such cross-border acquisitions can enhance acquirers' influence in the AI infrastructure industry and increase their market share. In the field of optical chips, a number of enterprises have achieved independent R&D and large-scale mass production of high-speed optical chips such as EML chips. Amid the surging demand for massive data transmission, they have realized a generational leap in both technology and commercialization, while also reducing reliance on imported optical chips.

SOURCE OF INFORMATION

We engaged CIC, an independent market research and consulting company that provides industry consulting services, commercial due diligence and strategic consulting, to conduct detailed research on and analysis of Global PCB, FPC, optical transceiver, precision component, optoelectronic display industries. We have agreed to pay a fee of RMB0.5 million to CIC in connection with the preparation of the CIC Report. We have incorporated certain information from the CIC Report into this section, as well as into the "Summary", "Business", "Financial Information" sections and elsewhere in this prospectus to provide potential investors with a comprehensive presentation of the industries where we operate.

During the preparation of the CIC Report, CIC conducted both primary and secondary research, and gathered knowledge, statistics, information and insights on industry trends within the target research markets. The primary research involved interviews with key industry experts and leading industry participants. The secondary research consisted of analyzing data from various publicly available sources, such as the National Bureau of Statistics.

The CIC Report was compiled based on the following assumptions: (i) the overall social, economic and political environment in China is expected to remain stable during the forecast period; (ii) related key industry drivers are likely to propel continued growth in Global PCB, FPC, optical transceiver, precision component, optoelectronic display industries throughout the forecast period, including favorable policies and wider acceptance of different levels of autonomous driving features in vehicles; and (iii) there will be no extreme force majeure or unforeseen industry regulations through which the market may be affected in either a dramatic or fundamental way during the forecast period.

APPLICABLE LAWS AND REGULATIONS TO OUR BUSINESS IN THE PRC

REGULATIONS ON PCB INDUSTRY

The Standard Conditions for the Printed Circuit Board Industry (《印製電路板行業規範條件》) and the Interim Measures for the Administration of Industry Standard Announcements in the Printed Circuit Board Industry (《印製電路板行業規範公告管理暫行辦法》) promulgated by the MIIT and became effective on February 1, 2019, establish a quantified standard system for printed circuit board enterprises and projects across multiple dimensions, including capacity layout and project construction, production scale and process technology, intelligent manufacturing, green manufacturing, workplace safety, social responsibility, and other dimensions.

The Catalog of Encouraged Industries for Foreign Investment (2025 Edition) (《鼓勵外商投資產業目錄（2025年版）》) (the "Encouraging Catalog") explicitly includes "high-density interconnect laminated boards, single-layer, double-layer, and multi-layer flexible boards, rigid-flex printed circuit boards and packaging substrates, flexible circuit boards with high-density and high-fine lines (line width/line spacing ≤ 0.05mm)" in the encouraged foreign investment industries.

According to the Guidance Catalog for Industrial Structure Adjustment (2024 Edition) (《產業結構調整指導目錄（2024年本）》) promulgated by the NDRC on December 27, 2023 and became effective on February 1, 2024, the printed circuit boards manufactured by the Company fall under the encouraged industries category.

REGULATIONS ON PRECISION COMPONENT INDUSTRY

On August 22, 2025, the MIIT and the SAMR issued the 2025-2026 Stable Growth Action Plan for the Electronics Manufacturing Industry (《電子信息製造業2025-2026年穩增長行動方案》), aiming at enhancing the resilience and security level of the industrial and supply chains, maintaining the economic operation of the electronics manufacturing industry within a reasonable range, and providing strong support for the stable growth of the industrial economy.

On March 7, 2025, the MIIT and the National Standardization Administration of the PRC issued National Guidelines for the Construction of Intelligent Manufacturing Standards System (2024 Edition) (《國家智能製造標準體系建設指南（2024年版）》), which focus on exploring new methods for standard development, solidifying successful experiences and innovative achievements, forming typical scenario-based systematic solution standards and guiding enterprises to apply standards to practice, building enterprise intelligent manufacturing standards systems, and promoting the high-quality development of intelligent manufacturing.

REGULATIONS ON OPTOELECTRONIC DISPLAY INDUSTRY

The Encouraging Catalog explicitly includes the research, development, and manufacturing of TFT-LCD, OLED, AMOLED, laser display, quantum dot, 3D display and other flat panel displays, as well as display screen materials and e-book materials (such as electronic ink screens) in the national encouraged foreign investment industry catalog. This policy aimed to attract foreign investment, introduce advanced technology and capital, and promote the upgrading and development of the optoelectronic display industry.

In March 2021, the MOFCOM, the General Administration of Customs (the "**GACC**"), and the State Taxation Administration jointly released the Notice on Import Tax Policies to Support the Development of the New-type Display Industry from 2021 to 2030 (《關於2021-2030年支持新型顯示產業發展進口税收政策的通知》). From January 1, 2021 to December 31, 2030, for production enterprises of new-type display devices, self-used productive (including R&D-related) raw materials, consumables, cleanroom supporting systems, and spare parts of production equipment that cannot be produced domestically or whose performance cannot meet the requirements are exempt from import duties. For production enterprises of key raw materials and spare parts in the new-type display industry, self-used productive raw materials and consumables that cannot be produced domestically or whose performance cannot meet the requirements are also exempt from import duties. For enterprises undertaking major new-type display device projects, during

the period from January 1, 2021 to December 31, 2030, when importing new equipment, except for commodities listed in the relevant non-duty-free catalog, providing customs-approved tax guarantees for unpaid taxes allows the installment payment of import-link value-added tax within a period of 6 years (72 consecutive months) after the import of the first piece of equipment. This policy significantly reduced the production costs of relevant enterprises, enhanced their international competitiveness, and promoted the large-scale development of the new-type display industry.

In March 2021, the Outline of the 14th Five-Year Plan for National Economic and Social Development of the People's Republic of China and the Long-Range Objectives Through the Year 2035 (《中華人民共和國國民經濟和社會發展第十四個五年規劃和2035年遠景目標綱要》), adopted by the NPC, focused on strategic emerging industries such as new-generation information technology. It emphasized accelerating the innovation and application of key core technologies, strengthening factor guarantee capabilities, and cultivating and expanding new drivers of industrial development.

According to the Outline of the 15th Five-Year Plan for National Economic and Social Development of the People's Republic of China (《中華人民共和國國民經濟和社會發展第十五個五年規劃綱要》) promulgated by the National People's Congress on March 13, 2026, China shall accelerate the development of strategic emerging industries including next-generation information technology, new energy, new materials, intelligent connected new energy vehicles, robots, biomedicine, high-end equipment, aerospace and other such industries. The optoelectronic display industry, as an important part of the information technology industry, benefited from this overall strategic guidance, which provided a strong impetus for its technological innovation and industrial expansion.

REGULATIONS ON OPTICAL TRANSCEIVER INDUSTRY

On August 12, 2026, the MIIT issued the 15th Five-Year Plan for the Development of the Information and Communication Industry (《信息通信行業發展"十五五"規劃》). The plan proposes that by 2030, a new-generation communications network with comprehensive coverage and leading performance is expected to be fully established, according to the plan, which has called for efforts to accelerate the development of a technologically advanced, secure and controllable information and communications industrial system. The plan lays out 26 key tasks across six major areas including information infrastructure construction as well as network and data security assurance.

The Guidance on the Construction of National Data Infrastructure (《國家數據基礎設施建設指引》) was promulgated in 2024 by the National Development and Reform Commission (the "**NDRC**"), the National Data Administration (the "**NDA**"), and the MIIT. This Guidance outlines a comprehensive framework for the national data ecosystem, aiming to establish circulation facilities that support a unified national data market and ensure secure and free data flow. In the realm of computing power, it mandates the development of a high-quality, diverse, and heterogenous supply system that is efficiently allocated, intelligently on-demand, green, and secure.

The Upgraded "Sail" Action Plan for Large-Scale 5G Application (《5G規模化應用"揚帆"行動升級方案》) was released in 2024 by twelve departments, including the MIIT, the NDRC and the CAC. This Action Plan sets forth quantifiable targets to be achieved by the end of 2027, which include reaching 38 5G base stations per 10,000 people, achieving a 5G personal user penetration rate of over 85%, and securing over 100 million 5G Internet of Things terminal connections. The overarching goal is to achieve comprehensive, large-scale 5G application, establishing a development paradigm characterized by universal capability, widespread application, and inclusive empowerment.

REGULATIONS ON CORPORATION AND FOREIGN INVESTMENT

The establishment, operation and management of corporate entities in the PRC is governed by the Company Law of the PRC (《中華人民共和國公司法》), which was promulgated by the Standing Committee of the National People's Congress of the PRC (the "**SCNPC**") on December 29, 1993 and became effective on July 1, 1994, and was last amended on December 29, 2023 and became effective on July 1, 2024. The Company Law of the PRC generally governs two types of companies, namely limited

liability companies and joint stock limited companies. Both types of companies have the status of legal persons, and the liability of shareholders of a limited liability company or a joint stock limited company is limited to the amount of registered capital they have contributed. The Company Law of the PRC shall also apply to foreign invested companies in form of limited liability company or joint stock limited company. Where laws on foreign investment have other stipulations, such stipulations shall apply.

On January 1, 2020, the Foreign Investment Law of the PRC (《中華人民共和國外商投資法》) (the "**FIL**") and the Regulations on the Implementation of the Foreign Investment Law of the PRC (《中華人民共和國外商投資法實施條例》) became effective, which sets out the definition of foreign investment and the framework for promotion, protection and administration of foreign investment activities. On December 30, 2019, the Ministry of Commerce (the "**MOFCOM**") and the State Administration for Market Regulation jointly promulgated the Measures for Reporting of Information on Foreign Investment (《外商投資信息報告辦法》), which became effective on January 1, 2020 and pursuant to which, the establishment of the foreign invested enterprises by foreign investors and establishment through purchasing the equities of a non-foreign invested enterprise and its subsequent changes are required to submit an initial or change report through the Enterprise Registration System.

Pursuant to the FIL, China has adopted a system of national treatment which includes a negative list with respect to foreign investment administration. The negative list will set forth industries in which foreign investments are prohibited and industries in which foreign investments are restricted. Foreign investments and domestic investments in industries outside the scope of the prohibited industries and restricted industries stipulated in the negative list will be treated equally. The Special Administrative Measures (Negative List) for the Access of Foreign Investment (2024 Edition) (《外商投資准入特別管理措施（負面清單）（2024年版）》) (the "**Negative List**"), which were promulgated by the National Development and Reform Commission (the "**NDRC**") and the MOFCOM on September 6, 2024 and became effective on November 1, 2024, listed the categories of restricted, and prohibited industries. Any industry not included in the Negative List shall be administered under the principle of equal treatment to domestic and foreign investment.

REGULATIONS ON IMPORT AND EXPORT OF GOODS

The Customs Law of the PRC (《中華人民共和國海關法》) was promulgated by the SCNPC on January 22, 1987 and became effective on July 1, 1987, and last amended and became effective on April 29, 2021, stipulate that the customs of the PRC is a governmental organization responsible for supervision and control over all arrivals in and departures from the customs territory. All the transports, goods and articles shall enter into or exit from the territory of the PRC at a place where a customs office is established. The customs declaration and duty payment formalities may be undergone by the consignees or consignors of imported and exported goods, or by the customs clearing enterprises entrusted by such consignees or consignors. The consignees or consignors of imported and exported goods and the customs clearing enterprises shall file records with the customs when undergoing customs declaration formalities, otherwise may be imposed fines by the customs.

The Administrative Provisions of the Customs of the PRC on Record-Filing of Customs Declaration Entities (《中華人民共和國海關報關單位備案管理規定》) promulgated by the GACC on November 19, 2021 and became effective on January 1, 2022, further provides detailed requirement on the documents needed for the filing and the requirement on reporting certain changes of the filed information to the relevant customs authority.

Pursuant to the Regulations of the PRC on the Administration of Import and Export of Goods (《中華人民共和國貨物進出口管理條例》) (the "**Regulations on the Administration of Import and Export of Goods**") promulgated by the State Council on December 10, 2001 and last amended on March 10, 2024, and became effective on May 1, 2024, enterprises engaged in the trade activities of importing goods into the territory of the PRC or exporting goods outside of China must comply with the Regulations on the Administration of Import and Export of Goods. Goods whose import or export is prohibited shall not be imported or exported; goods whose import or export is restricted shall be subject to a licensing or quota system; and goods whose import or export is free shall not be subject to restriction.

REGULATIONS ON PRODUCTION SAFETY

Pursuant to the Production Safety Law of the PRC (《中華人民共和國安全生產法》)(the "**Production Safety Law**"), which was last amended on June 10, 2021 by the SCNPC and became effective on September 1, 2021, entities engaged in production and business activities in the Chinese mainland shall comply with the Production Safety Law and other laws and regulations related to production safety. Entities shall strengthen the management, establish and improve responsibility systems and polices, improve conditions, strengthen the standardized and information technology development of work safety, and improve the production level to ensure their production safety.

In accordance with the Regulations on the Safety Facilities of Construction Projects "Three Simultaneities" Supervision and Management (《建設項目安全設施"三同時"監督管理辦法》), promulgated by the former State Administration of Work Safety on April 2, 2015, and became effective on May 1, 2015, safety facilities of new construction, reconstruction and expansion projects must be designed, constructed and put into operation and use simultaneously with the main project. Enterprises are required to conduct safety pre-evaluations for construction projects, entrust preliminarily designed entities with the corresponding qualifications to design the safety facilities simultaneously, prepare safety facility designs, submit them to relevant production safety supervision and management departments for review applications and apply for the acceptance inspection of safety facilities upon completion.

REGULATIONS ON PRODUCT QUALITY

As per the Product Quality Law of the PRC (《中華人民共和國產品質量法》) promulgated by the SCNPC on February 22, 1993, and was last amended on December 29, 2018 and became effective on the same date, producers shall be responsible for the quality of their products. The product quality shall meet the following requirements: (i) no unreasonable dangers endangering the safety of persons and property; where there are national or industry standards ensuring the health and safety of persons and property, such standards must be complied with; (ii) the product shall possess the properties it is supposed to possess, except where the product's flaws in their properties are explicitly stated; and (iii) the product shall comply with the product standards stated on the product or its packaging, and meet the quality conditions as represented in product descriptions, physical samples, etc.

REGULATIONS ON ENVIRONMENTAL PROTECTION

According to the Ecological and Environmental Code of the People's Republic of China (《中華人民共和國生態環境法典》) (the "Ecological and Environmental Code"), which was promulgated by the National People's Congress on March 12, 2026 and came into effect on August 15, 2026, the Environmental Protection Law of the People's Republic of China (《中華人民共和國環境保護法》), the Environmental Impact Assessment Law of the People's Republic of China (《中華人民共和國環境影響評價法》), the Marine Environmental Protection Law of the People's Republic of China (《中華人民共和國海洋環境保護法》), the Law of the People's Republic of China on the Prevention and Control of Atmospheric Pollution (《中華人民共和國大氣污染防治法》), the Law of the People's Republic of China on the Prevention and Control of Water Pollution (《中華人民共和國水污染防治法》), the Law of the People's Republic of China on the Prevention and Control of Soil Pollution (《中華人民共和國土壤污染防治法》), the Law of the People's Republic of China on the Prevention and Control of Environmental Pollution Caused by Solid Wastes (《中華人民共和國固體廢物污染環境防治法》), the Law of the People's Republic of China on the Prevention and Control of Noise Pollution (《中華人民共和國噪聲污染防治法》), the Law of the People's Republic of China on the Prevention and Control of Radioactive Pollution (《中華人民共和國放射性污染防治法》) and the Cleaner Production Promotion Law of the People's Republic of China (《中華人民共和國清潔生產促進法》) were repealed on the same date.

The Ecological and Environmental Code comprises General Provisions, Pollution Prevention and Control, Ecological Protection, Green and Low-Carbon Development, Legal Liability and Supplementary Provisions, and covers, among others, matters relating to ecological and environmental impact assessment, prevention and control of atmospheric pollution, prevention and control of water pollution and prevention

and control of solid waste pollution. Pursuant to the Ecological and Environmental Code, enterprises, institutions and other production and operation units shall take effective measures to prevent and reduce environmental pollution and ecological damage. The discharge of pollutants shall comply with the applicable pollutant discharge standards, total discharge control targets for key pollutants, pollutant discharge permit administration requirements and other relevant laws and regulations.

According to the Ecological and Environmental Code, the Regulation on the Administration of Environmental Protection of Construction Projects (《建設項目環境保護管理條例》), which was last amended by the State Council on July 16, 2017 and became effective on October 1, 2017, and the Interim Measures for Environmental Protection Acceptance Inspection Upon Completion of Construction Projects (《建設項目竣工環境保護驗收暫行辦法》), which was promulgated by the former Ministry of Environmental Protection on November 20, 2017 and became effective on the same date, the PRC implements a system to assess the ecological and environmental impact of construction projects. The construction entity shall submit an environmental impact report or an environmental impact statement for approval prior to the commencement of the construction project, or an environmental impact registration form as required by the environmental protection competent administrative department of the State Council for record. In addition, after the completion of a construction project for which an environmental impact report or an environmental impact statement has been prepared, the construction entity shall, in accordance with the standards and procedures prescribed by the competent administrative department of environmental protection under the State Council, conduct acceptance inspection on the supporting environmental protection facilities and prepare an acceptance report.

Regulations on Atmospheric Pollution

According to the Ecological and Environmental Code, enterprises, institutions and other production and operation units shall, in accordance with the relevant national regulations and monitoring standards, monitor their emissions of industrial waste gasses or toxic and hazardous air pollutants, and keep the original monitoring records.

Regulations on Solid Wastes

According to the Ecological and Environmental Code, any entity or individual that generates, collects, stores, transports, utilizes or disposes of solid waste shall take effective measures to prevent or reduce the pollution of solid waste, and shall be responsible for the environmental pollution caused in accordance with the law. Where solid waste contains hazardous waste, it shall be managed in accordance with the relevant national requirements on the prevention and control of pollution by hazardous waste.

Regulations on Water Pollution

According to the Ecological and Environmental Code, enterprises, institutions and other production and operation units that directly or indirectly discharge industrial waste water or medical sewage into water bodies and are subject to pollutant discharge permit administration in accordance with law shall obtain a pollutant discharge permit.

Regulations on Pollutant Discharge

According to the Regulations on the Management of Pollutant Discharge Permits (《排污許可管理條例》) promulgated by the State Council on January 24, 2021 and became effective on March 1, 2021, and the Catalog for the Classified Management of Fixed Pollution Source Discharge Permits (2019 Edition) (《固定污染源排污許可分類管理名錄（2019年版）》) promulgated by the Ministry of Ecology and Environment on December 20, 2019 and became effective on the same date, enterprises, institutions and other manufacturers subject to pollutant discharge permit management as stipulated by law must apply for and obtain a pollutant discharge permit. Without this permit, discharging pollutants is prohibited. Pollutant discharging entities with a significant volume of pollutant generation, emissions or environmental impact are subject to key management of pollutant discharge permits. Those with a smaller volume of pollutant generation, emissions and environmental impact are subject to simplified management. Entities with minimal pollutant generation, emissions and environmental impact are subject to pollutant discharge registration management.

REGULATIONS ON REAL ESTATE AND CONSTRUCTION PROJECTS

Regulations on Real Estate

The Civil Code of the PRC (《中華人民共和國民法典》) (the "**Civil Code**") was promulgated by the NPC on May 28, 2020, and became effective on January 1, 2021. According to the Civil Code, the establishment, modification, assignment and extinguishment of real estate property rights are effective upon registration in accordance with the law; unless the law stipulates otherwise, such establishment, modification, assignment and extinguishment shall be ineffective without registration. Real estate registration shall be handled by the registration authority at the location of the property.

The Land Administration Law of the PRC (《中華人民共和國土地管理法》) was last amended by the SCNPC on August 26, 2019, and became effective on January 1, 2020. Pursuant to the Land Administration Law, construction entities that have obtained state-owned land use rights through paid leasing must pay the land use right leasing fees and other fees and expenses in accordance with the standards and methods prescribed by the State Council before they can use the land. Construction entities using state-owned land must use the land in accordance with the provisions of the contract for paid use of leased land use right or according to the provisions of the documents of approval concerning the allocation of land use right.

The Interim Regulations on Real Estate Registration (《不動產登記暫行條例》) which was last amended by the State Council on March 10, 2024 and became effective on May 1, 2024, and the Implementing Rules of the Interim Regulations on Real Estate Registration (《不動產登記暫行條例實施細則》) which was last amended by the Ministry of Land and Resources on May 9, 2024 and became effective on the same date, provide that, among other things, the State implements a uniform real estate registration system and real estate registration shall follow the principles of strict administration, stability, continuity, and convenience for the masses.

Regulations on Construction Projects

The Construction Law of the PRC (《中華人民共和國建築法》) (the "**Construction Law**") was first promulgated by the SCNPC on November 1, 1997, and was last amended on April 23, 2019, and became effective on the same date. According to the Construction Law, before the commencement of construction work, the construction entity shall apply for a construction permit from the construction administrative department of the people's government at or above the county level where the project is located in accordance with relevant rules of the state, except for small-scale projects below the limit determined by the construction administrative department of the State Council. Construction projects approved for commencement according to the authority and procedures prescribed by the State Council are exempted from obtaining a construction permit.

The Administrative Measures for Construction Permits of Building Engineering (《建築工程施工許可管理辦法》) were first promulgated by the former Ministry of Construction of the PRC in 1999, and were last amended by the Ministry of Housing and Urban-Rural Development (the "**MOHURD**") on March 30, 2021, and became effective on the same date. According to these measures, construction entities engaging in the construction and renovation of various types of buildings and their ancillary facilities, as well as the installation of corresponding lines, pipelines, and equipment and the construction of urban municipal infrastructure projects within the territory of the PRC, shall apply for a construction permit from the competent housing and urban-rural construction department of the local people's government at or above the county level where the project is located before commencing work. Building projects with an investment of less than RMB300,000 or a construction area of less than 300 sqm may be exempt from applying for a construction permit.

The Fire Protection Law of the PRC (《中華人民共和國消防法》) was promulgated by the SCNPC on April 29, 1998, and became effective on September 1, 1998, and was last amended on April 29, 2021, and became effective on the same date. The Interim Regulations on Fire Protection Design Review and Acceptance Management of Construction Projects (《建設工程消防設計審查驗收管理暫行規定》) were first promulgated by the MOHURD on April 1, 2020, and were last amended on August 21, 2023, and became effective on October 30, 2023. In accordance with the aforementioned laws and regulations, for construction

projects that are required to undergo fire safety acceptance inspections as stipulated by the State Council's housing and urban-rural development authorities, the construction entity must apply for a fire safety acceptance inspection with the housing and urban-rural development authorities.

The Administrative Measures for the Record-filing of Completion Acceptance of Building Construction and Municipal Infrastructure Projects (《房屋建築和市政基礎設施工程竣工驗收備案管理辦法》) were promulgated by the MOHURD on October 19, 2009, and became effective on the same date. According to these measures, construction entities shall file with the construction department of the local people's government at or above the county level where the project is located (hereinafter referred to as the filing authority) within 15 days from the date of completion and qualified acceptance of the project, in accordance with these measures.

REGULATIONS ON THE MANAGEMENT OF LEASE HOUSING

Pursuant to (i) the Law on Administration of Urban Real Estate of the PRC (《中華人民共和國城市房地產管理法》), promulgated by the SCNPC on July 5, 1994 and was last amended on August 26, 2019 and became effective on January 1, 2020, (ii) the Administrative Measures on Leasing of Commodity Housing (《商品房屋租賃管理辦法》), promulgated by the MOHURD on December 1, 2010 and became effective on February 1, 2011, and (iii) the Regulation on Housing Leasing (《住房租賃條例》) promulgated by the State Council on July 16, 2025 and effective from September 15, 2025, when leasing premises, the lessor and lessee are required to enter into a written lease contract, containing such provisions as the leasing term, use of the premises, rental and repair liabilities, and other rights and obligations of both parties. Both lessor and the lessee shall complete property leasing registration and filing formalities within 30 days from the execution of the property lease contract with the real estate administration department where the leased property is located. If the lessor and lessee fail to go through the registration and filing procedures, both lessor and lessee may be subject to fines.

REGULATIONS ON INTELECTUAL PROPERTY RIGHTS

Patent

The Patent Law of the PRC (《中華人民共和國專利法》) was promulgated by the SCNPC on March 12, 1984, and was last amended on October 17, 2020, and became effective on June 1, 2021. The Detailed Rules for the Implementation of the Patent Law of the PRC (《中華人民共和國專利法實施細則》) were promulgated by the State Council on June 15, 2001, became effective on July 1, 2001, and was last amended on December 11, 2023, and became effective on January 20, 2024. According to these laws, regulations and detailed rules, patents in China are categorized into three types: invention patents, utility model patents and design patents. The term of an invention patent right is 20 years, the term of a utility model patent is 10 years, and the term of a design patent is 15 years, all of which are calculated from the filing date. Any entity or individual that exploits another's patent must conclude a licensing agreement with the patent holder and pay royalties. Exploiting a patent without the permission of the patent holder constitutes an infringement of their patent rights.

Trademark

The Trademark Law of the PRC (《中華人民共和國商標法》) was promulgated by the SCNPC on August 23, 1982, became effective on March 1, 1983, and was last amended on April 23, 2019, and became effective on November 1, 2019. The Regulations for the Implementation of the Trademark Law of the PRC (《中華人民共和國商標法實施條例》) were promulgated by the State Council on August 3, 2002, became effective on September 15, 2002, and was last amended on April 29, 2014, and became effective on May 1, 2014. According to these laws and regulations, the validity period of a registered trademark is 10 years from the date of approval. To continue using a trademark upon the expiry of its validity, renewal procedures must be completed in accordance with the provisions within the 12 months preceding expiration. If renewal procedures are not completed within this period, a six-month extension is allowed. Each renewal extends the validity period for 10 years.

Domain Name

The Internet Domain Name Management Measures (《互聯網域名管理辦法》) were promulgated by the MIIT on August 24, 2017, and became effective on November 1, 2017. According to these management measures, the MIIT is the primary regulatory authority for the management of Internet domain names in China. Domain name registration is processed through domain name root servers and their operating institutions, domain name registration management institutions and domain name registration service institutions established in accordance with the relevant regulations.

Computer Software Copyright

The Measures for the Registration of Computer Software Copyright (《計算機軟件著作權登記辦法》), which was promulgated by the National Copyright Administration on February 20, 2002, and became effective on the same date, regulates the registration of software copyright, the exclusive licensing contract and assignment contracts of software copyright. The National Copyright Administration is mainly responsible for the registration and management of national software copyright and designates the China Copyright Protection Center as the agency for software registration. The China Copyright Protection Center will grant certificates of registration to computer software copyright applicants.

REGULATIONS ON EMPLOYMENT AND SOCIAL WELFARE

Employment

The major PRC laws and regulations that govern employment relationship are the Labor Law of the PRC (《中華人民共和國勞動法》), the Labor Contract Law of the PRC (《中華人民共和國勞動合同法》) and its implementation, which impose stringent requirements on the employers in relation to entering into fixed term employment contracts, hiring of part-time employees and dismissal of employees.

The Labor Law of the PRC was promulgated by the SCNPC on July 5, 1994, and became effective on January 1, 1995, and was last amended on December 29, 2018 and became effective on the same date. The Labor Law of the PRC stipulates matters related to promoting employment, labor contracts, working hours, rest and leave, wages, labor safety and hygiene, special protection for female and minor workers, vocational training, social insurance and welfare, labor disputes, supervision and inspection, as well as legal liabilities.

The Labor Contract Law of the PRC was promulgated by the SCNPC on June 29, 2007, and became effective on January 1, 2008, and was last amended on December 28, 2012, and became effective on July 1, 2013. The Implementation Regulation of the Labor Contract Law of the PRC (《中華人民共和國勞動合同法實施條例》) was promulgated by the State Council on September 18, 2008, and became effective on the same date. According to the aforementioned law and regulation, a written labor contract shall be established when forming a labor relationship. Employers shall not force employees to work overtime and must pay overtime wages according to national regulations if overtime is arranged. Wages must not be lower than the local minimum wage standard and must be paid to employees promptly.

Social Insurance

The PRC Social Insurance Law (《中華人民共和國社會保險法》) (the "**Social Insurance Law**"), which was last amended by the SCNPC on December 29, 2018, and became effective on the same date, has established social insurance systems of basic pension insurance, basic medical insurance, work-related injury insurance, unemployment insurance and maternity insurance and has elaborated in detail the legal obligations and liabilities of employers who fail to comply with relevant laws and regulations on social insurance. According to the Social Insurance Law and the Provisional Regulations on Collection and Payment of Social Insurance Premiums (《社會保險費徵繳暫行條例》) promulgated by the State Council on January 22, 1999, and was last amended on March 24, 2019 and became effective on the same date, enterprises shall register social insurance with local social insurance and pay or withhold relevant social insurance for or on behalf of its employees. Any employer that fails to make social insurance contributions may be ordered to rectify the non-compliance and pay the required contributions within a prescribed time limit and be subject to a late fee. If the employer still fails to rectify the failure to make the relevant

contributions within the prescribed time, it may be subject to a fine ranging from one to three times the amount overdue.

According to the Interpretation II of the Supreme People's Court of Issues Concerning the Application of Law in the Trial of Labor Dispute Cases (《最高人民法院關於審理勞動爭議案件適用法律問題的解釋(二)》), which was promulgated on July 31, 2025 and came into effect on September 1, 2025, if the employer and its employee agree or the employee undertakes that social insurance contributions need not be paid, the People's Court shall deem such agreement or undertaking invalid. Furthermore, where the employer fails to pay social insurance contributions in accordance with the applicable laws, and the employee seeks to terminate the labor contract and claims economic compensation from the employer pursuant to the Labor Contract Law of the PRC, the People's Court shall support such claims.

Housing Provident Fund

Pursuant to the Regulations on Management of Housing Provident Fund (《住房公積金管理條例》), which was promulgated by the State Council on April 3, 1999, and was last amended on August 10, 2026, and became effective on September 20, 2026, employers in the Chinese mainland shall provide their employees with housing provident fund. Employers who fail to contribute to the above housing provident funds may be ordered to make full payment within a prescribed time period by the housing provident fund management center. If an employing entity fails to make the payment towards the housing provident funds within a prescribed time limit, an application may be made to a people's court for enforcement.

REGULATIONS ON OVERSEAS INVESTMENT

According to the Regulations of the State Council on Outbound Investment (《國務院關於對外投資的規定》), promulgated by the State Council on May 5, 2026 and effective from July 1, 2026, where investors engaging in foreign investment activities are required by law to complete procedures such as approval, filing, information reporting, and cross-border capital registration, they shall comply with relevant national regulations, submit the required materials truthfully, and cooperate with the supervisory inspections conducted by the relevant competent authorities.

According to the Measures for the Administration of Overseas Investment of Enterprises (《企業境外投資管理辦法》) promulgated by the NDRC on December 26, 2017 and became effective on March 1, 2018, an investor shall, in overseas investment, undergo the formalities for the confirmation or recordation, among others, of an overseas investment project, report the relevant information, and cooperate in supervisory inspection. The Measures classify overseas investment projects into sensitive and non-sensitive categories, with sensitive projects requiring approval by the NDRC and non-sensitive projects requiring recordation with the NDRC or its local branches. The regime establishes a comprehensive supervisory framework governing the entire overseas investment process, from initial project filing or approval to post-investment information reporting and operational compliance.

Pursuant to the Measures for the Administration of Overseas Investment (《境外投資管理辦法》) promulgated by the MOFCOM on March 16, 2009, lastly amended on September 6, 2014 and became effective on October 6, 2014, "overseas investment" means the acts of an enterprise legally formed in China to own a non-financial enterprise or obtain the ownership, control, or right of business management of or any other interest in an existing non-financial enterprise outside of China by formation, acquisition or merger, or other means. The MOFCOM and the provincial counterparts promulgate regulations providing that overseas investment of enterprises to be subject to recordation or confirmation management, depending on the actual circumstances of investment. Overseas investment involving any sensitive country or region or any sensitive industry shall be subject to confirmation management. Overseas investment under other circumstances shall be subject to recordation management. When an overseas enterprise invested by an enterprise conducts overseas reinvestment, the enterprise shall report to the commerce departments after completing the overseas legal procedures.

Pursuant to the Provisions on the Foreign Exchange Administration of the Overseas Direct Investment of Domestic Institutions (《境內機構境外直接投資外匯管理規定》) promulgated by the State Administration

of Foreign Exchange on July 13, 2009 and became effective on August 1, 2009 and the Notice on Further Simplifying and Improving Policies for the Foreign Exchange Administration of Direct Investment (《關於進一步簡化和改進直接投資外匯管理政策的通知》) promulgated by the SAFE on February 13, 2015, became effective on June 1, 2015 and was partially repealed on December 30, 2019, upon obtaining the approval for overseas investment, the overseas direct investment of PRC enterprises shall apply for foreign exchange registration to the banks at their places of registration.

REGULATIONS ON FOREIGN EXCHANGE

Pursuant to the Foreign Exchange Administrative Regulations of the PRC (《中華人民共和國外匯管理條例》) promulgated by the State Council on January 29, 1996, became effective on April 1, 1996 and last amended on August 5, 2008, and became effective on the same date, and the Administrative Regulations on Foreign Exchange Settlement, Sales and Payment (《結匯、售匯及付匯管理規定》) promulgated by the People's Bank of China on June 20, 1996 and became effective on July 1, 1996, Renminbi is freely convertible for payments of current account items such as trade and service-related foreign exchange transactions and dividend payments after the relevant financial institutions have reasonably examined the authenticity of the transactions documents and their consistency with foreign exchange receipts and payments, but are not freely convertible for capital expenditure items such as direct investment, loans or investments in securities outside the PRC unless the approval of the SAFE or its local counterparts is obtained in advance.

According to the Notice of the People's Bank of China and the SAFE on the Management of Funds for Overseas Listings by Domestic Enterprises 《中國人民銀行國家外匯管理局關於境內企業境外上市資金管理有關問題的通知》，which is promulagted on December 24, 2025, and effective from April 1, 2026, domestic enterprises listing overseas shall, within 30 business days from the first trading day of the overseas listing or the completion of the over-allotment, submit the relevant materials to a bank within the jurisdiction of the provincial-level or separately listed municipal area where the enterprise is registered to apply for overseas listing registration.

According to the Circular of the State Administration of Foreign Exchange on Reforming and Regulating Policies for the Administration over Foreign Exchange Settlement of Capital Accounts (《國家外匯管理局關於改革和規範資本項目結匯管理政策的通知》) promulgated by SAFE on June 9, 2016 and became effective on the same date, the Notice of the State Administration of Foreign Exchange on Further Deepening Reform to Promote Cross-border Trade and Investment Facilitation (《國家外匯管理局關於進一步深化改革促進跨境貿易投資便利化的通知》) promulgated by SAFE on December 4, 2023, and became effective on the same date, and the Notice of the State Administration of Foreign Exchange on Deepening the Reform of Foreign Exchange Administration for Cross-border Investment and Financing (《國家外匯管理局關於深化跨境投融資外匯管理改革有關事宜的通知》) promulgated by SAFE on September 12, 2025 and became effective on the same date, the foreign exchange receipts under capital accounts of domestic institutions are subject to discretionary settlement policies. The foreign exchange receipts under capital accounts (including foreign exchange capital, foreign debts, and repatriated funds raised through overseas listing) subject to discretionary settlement as expressly prescribed in the relevant policies may be settled with banks according to the actual need of the domestic institutions for business operation. Domestic institutions may, at their discretion, settle up to 100% of foreign exchange receipts under capital accounts for the time being. SAFE may adjust the above proportion in due time according to the balance of payments. While eligible for the discretionary settlement of foreign exchange receipts under capital accounts, domestic institutions may also opt to use their foreign exchange receipts according to the payment-based settlement system. A bank shall, in handling each transaction of foreign exchange settlement for a domestic institution according to the principle of payment-based settlement, review the authenticity and compliance of the use of the funds settled in the previous foreign exchange settlement (including discretionary settlement and payment-based settlement) of such domestic institution. Domestic institutions' foreign exchange receipts under the capital account and the Renminbi funds obtained from the settlement thereof shall not, directly or indirectly, be used for expenditure beyond the enterprise's business scope or expenditure prohibited by laws and regulations of the state. Unless otherwise specified, the funds shall not, directly or indirectly, be used for investments in securities or other investments other than wealth

management products and structured deposits with a risk rating of Level 2 or lower. The funds shall not be used for the granting of loans to non-affiliated enterprises, except where it is expressly permitted in the business scope. The funds shall not be used for the purchase of real estate for purposes other than self-use (except for real estate enterprises).

According to the Circular on Optimizing Administration of Foreign Exchange to Support the Development of Foreign-related Business by the State Administration of Foreign Exchange (《國家外匯管理局關於優化外匯管理支持涉外業務發展的通知》) promulgated by SAFE on April 10, 2020, became effective on the same date, eligible enterprises are allowed to make domestic payments by using receipts under capital accounts, such as their capital funds, foreign credits and the income from overseas listing, with no need to provide the evidentiary materials concerning authenticity on a transaction-by-transaction basis to banks in advance, provided that their capital use shall be authentic and in line with provisions, and conform to the prevailing administrative regulations on the use of receipts under capital accounts. Local foreign exchange authorities shall strengthen monitoring analysis and interim and post regulation.

REGULATIONS ON TAXATION

Enterprise Income Tax

According to the Enterprise Income Tax Law of the PRC (《中華人民共和國企業所得税法》) which was promulgated by the SCNPC on March 16, 2007 and last amended on December 29, 2018, and became effective on the same date, a unified income tax rate of 25% will be applied towards foreign investment and foreign enterprises which have set up institutions or facilities in the PRC as well as PRC enterprises. Under the EIT Law, enterprises established outside of China whose "de facto management bodies" are located in China are considered "resident enterprises" and will generally be subject to the unified 25% enterprise income tax rate as to their global income.

Enterprises that are recognized as high and new technology enterprises in accordance with the Administrative Measures for the Determination of High and New Tech Enterprises (《高新技術企業認定管理辦法》) promulgated by the Ministry of Science and Technology, the MOF and the STA on January 29, 2016, and became effective on January 1, 2016, are entitled to enjoy a preferential enterprise income tax rate of 15%, under which the validity period of the high and new technology enterprise qualification shall be three years from the date of issuance of the certificate. An enterprise can re-apply for such recognition as a high and new technology enterprise before or after the previous certificate expires.

Value-added Tax

On December 25, 2024, the SCNPC promulgated the Value-added Tax Law of the PRC《中華人民共和國增值税法》), which became effective on January 1, 2026. The State Council promulgated the Implementing Regulations of the Value-Added Tax Law of the PRC (《中華人民共和國增值税法實施條例》) on December 25, 2025, which came into effect on January 1, 2026. This new law establishes a unified legal framework for Value-added Tax by consolidating existing regulations and practices, maintaining the core multi-tier tax rate structure while refining tax exemption and credit mechanisms. It provides clearer guidance on taxpayer obligations, taxable activities, and computational methods, thereby enhancing the stability and transparency of China's Value-added Tax regime for businesses operating in the market.

According to the Notice on the Adjustment to Value-Added Tax Rates (《財政部、國家税務總局關於調整增值税税率的通知》) (Cai Shui [2018] No. 32), promulgated by the MOF and the STA on April 4, 2018, and became effective on May 1, 2018, the Value-Added Tax rates of 17% and 11% applicable to the taxpayers who have Value-Added Tax taxable sales activities or imported goods are adjusted to 16% and 10%, respectively.

According to the Announcement on Relevant Policies for Deepening Value-Added Tax Reform (《關於深化增值税改革有關政策的公告》) (2019 No. 39 of MOF, STA and GACC), promulgated by the MOF, the STA and the GACC on March 20, 2019 and became effective on April 1, 2019, the Value-Added Tax rates of 16% and 10% applicable to the taxpayers who have Value-Added Tax taxable sales activities or imported goods are adjusted to 13% and 9%, respectively.

Tax on Dividends

For Individual Investors

According to the Individual Income Tax Law of the PRC (《中華人民共和國個人所得税法》), which was last amended by the SCNPC on August 31, 2018 and became effective on January 1, 2019, and the Implementation Rules of the Individual Income Tax Law of the PRC (《中華人民共和國個人所得税法實施條例》) (the "**Implementation Rules of the Individual Income Tax Law**"), which was last amended by the State Council on December 18, 2018 and became effective on January 1, 2019, dividends paid by PRC companies to individual investors are ordinarily subject to a withholding income tax levied at a flat rate of 20%. Meanwhile, according to the Notice on Issues Concerning Differentiated Individual Income Tax Policies on Dividends and Bonus of Listed Companies (《關於上市公司股息紅利差別化個人所得税政策有關問題的通知》) promulgated by the MOF, the STA and CSRC on September 7, 2015 and became effective on September 8, 2015, where an individual holds the shares of a listed company obtained from the public offering for more than one year and transfers the stock of the listed company on the stock market, the dividend and bonus income shall be temporarily exempted from individual income tax. Where an individual acquires shares of a listed company from the public offering and transfers the stock of the listed company on the stock market, if the holding period is within one month (inclusive), the dividend income shall be included in the taxable income in full; if the holding period is more than one month but less than one year (inclusive), the dividend income shall be included in the taxable income at the rate of 50%; the aforesaid income shall be subject to individual income tax at a uniform rate of 20%.

Pursuant to the Arrangement between the Chinese mainland and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《內地和香港特別行政區關於對所得避免雙重徵税和防止偷漏税的安排》), became effective on December 8, 2006, the PRC government may impose tax on dividends paid by a PRC company to a Hong Kong resident (including natural person and legal entity), but such tax shall not exceed 10% of the total amount of dividends payable. If a Hong Kong resident directly holds 25% or more of the equity interests in a PRC company and the Hong Kong resident is the beneficial owner of the dividends and meets other conditions, such tax shall not exceed 5% of the total amount of dividends payable by the PRC company. The Fifth Protocol to the Arrangement between the Chinese mainland and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income (《內地和香港特別行政區關於對所得避免雙重徵税和防止偷税漏税的安排》第五議定書) (the "**Fifth Protocol**"), promulgated by the STA and became effective on December 6, 2019 provides that such provisions shall not apply to arrangements or transactions made for one of the primary purposes of obtaining such tax benefits.

For Enterprise Investors

Pursuant to the EIT Law and the Implementation Rules of the Enterprise Income Tax Law of the PRC (《中華人民共和國企業所得税法實施條例》), which was last amended by the State Council on December 6, 2024, and became effective on January 20, 2025, a non-resident enterprise is subject to a reduced rate of 10% enterprise income tax on PRC-sourced income, including dividends paid by a PRC resident enterprise that issues and lists shares in Hong Kong, if such non-resident enterprise does not have an establishment or place of business in the PRC or has an establishment or place of business in the PRC but the PRC-sourced income is not actually connected with such establishment or place of business in the PRC. The aforesaid income tax payable by non-resident enterprises shall be withheld at source, and the payer shall be the withholding agent, and the tax shall be withheld by the withholding agent from the payment or due payment every time it is paid or due. Such tax may be reduced or exempted pursuant to an applicable treaty for the avoidance of double taxation.

Pursuant to the Notice on the Issues Concerning Withholding the Enterprise Income Tax on the Dividends Paid by Chinese Resident Enterprises to H Share Holders which are Overseas Non-resident Enterprises (《關于中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得税有關問題的通知》) promulgated by the STA on November 6, 2008, and became effective on the same date, a PRC resident enterprise is required to withhold enterprise income tax at a rate of 10% on dividends paid to non-PRC

resident enterprise holders of H Shares which are derived out of profit generated since 2008. The Reply on the Collection of Enterprise Income Tax on Dividends Received by Non-resident Enterprises from Holding B Shares and Other Shares (《關於非居民企業取得B股等股票股息徵收企業所得税問題的批覆》) promulgated by the STA on July 24, 2009, and became effective on the same date, further provides that PRC resident enterprises listed on Chinese and overseas stock exchanges by issuing stocks (including A shares, B shares and overseas shares) must withhold enterprise income tax at a flat rate of 10% on dividends of 2008 and onwards that it distributes to non-resident enterprise shareholders. Such tax rates may be further modified pursuant to the tax treaty or agreement that China has concluded with a relevant jurisdiction, where applicable.

According to the Arrangement between the Chinese mainland and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《內地和香港特別行政區關于對所得避免雙重徵税和防止偷漏税的安排》), the PRC government may impose tax on dividends paid by a PRC company to a Hong Kong resident (including natural person and legal entity), but such tax shall not exceed 10% of the total dividends payable by the PRC company. If a Hong Kong resident directly holds 25% or more of equity interest in a PRC company and the Hong Kong resident is the beneficial owner of the dividends and meets other conditions, such tax shall not exceed 5% of the total dividends payable by the PRC company. The Fifth Protocol provides that such provisions shall not apply to arrangements or transactions made for one of the primary purposes of obtaining such tax benefits.

Pursuant to applicable regulations, we intend to withhold tax at a rate of 10% from dividends paid to non-PRC resident enterprise holders of our H Shares (including Hong Kong Securities Clearing Company Nominees Limited). Non-PRC resident enterprises that are entitled to be taxed at a reduced rate under an applicable income tax treaty will be required to apply to the PRC tax authorities for a refund of any amount withheld in excess of the applicable treaty rate, and payment of such refund will be subject to the PRC tax authorities' verification.

Tax related to equity transfer income

For Individual Investors

Under the Individual Income Tax Law and its implementation rules, individuals are subject to individual income tax at a rate of 20% on gains realized on the sale of equity interests in PRC resident enterprises. Pursuant to the Circular on Continuing the Temporary Exemption of Individual Income Tax on Gains from Share Transfers by Individuals (《關於個人轉讓股票所得繼續暫免徵收個人所得税的通知》), which was promulgated by the MOF and the STA on March 30, 1998, and became effective on the same date, from January 1, 1997, income of individuals from the transfer of shares in listed companies continues to be temporarily exempted from individual income tax. The STA does not specify whether to continue to exempt individuals from personal income tax on the income from the transfer of shares in listed company in the newly revised Individual Income Tax Law and Implementation Rules of the Individual Income Tax Law.

For Enterprise Investors

Under the EIT Law and its implementation rules, a non-PRC resident enterprise is subject to enterprise income tax at the rate of 10% with respect to PRC-sourced income, including gains derived from the disposal of shares in a PRC resident enterprise, if it does not have an establishment or premises in the PRC or has an establishment or premises in the PRC but the PRC-sourced income is not actually connected with such establishment or premises in the PRC. The aforementioned income tax payable by non-PRC resident enterprises is subject to source withholding, and the payer is the withholding agent. The tax shall be withheld by the withholding agent from the payment or due payment every time it is paid or due. Such tax may be reduced or exempted under applicable tax treaties or arrangements.

Stamp Duty

According to the Stamp Duty Law of the PRC (《中華人民共和國印花税法》), which was promulgated by the SCNPC on June 10, 2021 and became effective on July 1, 2022, all entities and individuals who

make taxable documents and conduct securities transactions within the territory of the PRC are the taxpayers of stamp duty and shall pay stamp duty. All entities and individuals who make taxable documents outside the territory of the PRC to be used within the territory of the PRC shall pay stamp duty.

REGULATIONS ON SECURITIES AND OVERSEAS LISTING

Securities Laws and Regulations

The Securities Law of the PRC (《中華人民共和國證券法》), which was promulgated by the SCNPC on December 29, 1998, and was last amended on December 28, 2019 and became effective on March 1, 2020, comprehensively regulating activities in the PRC securities market including issuance and trading of securities, takeovers by listed companies, securities exchanges, securities companies and the duties and responsibilities of securities regulatory authorities, etc. The Securities Law further regulates that a domestic enterprise issuing securities overseas directly or indirectly or listing their securities overseas shall comply with the relevant provisions of the State Council and for subscription and trading of shares of domestic companies using foreign currencies, detailed measures shall be stipulated by the State Council separately.

Overseas Listings

On February 17, 2023, the CSRC promulgated the Trial Administrative Measures of the Overseas Securities Offering and Listing by Domestic Enterprises (《境內企業境外發行證券和上市管理試行辦法》) and relevant five guidelines, which became effective on March 31, 2023. According to the Overseas Listing Trial Measures, PRC domestic enterprises that seek to offer and list securities in overseas markets, either in direct or indirect means (the "**Overseas Offering and Listing**"), are required to fulfill the filing procedure with the CSRC and submit filing reports, legal opinions, and other relevant documents. If a PRC company fails to complete the filing procedure or the filing documents submitted by a PRC company contain misrepresentation, misleading statement or material omission, such PRC company may be subject to order to rectify, warnings and fines, and its controlling shareholders, actual controllers, the person directly in charge and other directly responsible persons may also be subject to fines.

In addition, the Overseas Listing Trial Measures also provides the circumstances where the Overseas Offering and Listing is explicitly prohibited, including: (i) such securities offering and listing is explicitly prohibited by provisions in laws, administrative regulations and relevant state rules; (ii) the Overseas Offering and Listing may endanger national security as reviewed and determined by competent authorities under the State Council in accordance with law; (iii) the PRC domestic enterprise, or its controlling shareholder(s) and the actual controller, have committed relevant crimes such as corruption, bribery, embezzlement, misappropriation of property or undermining the order of the socialist market economy during the latest three years; (iv) the PRC domestic enterprise is currently under investigations for suspicion of criminal offenses or major violations of laws and regulations, and no conclusion has yet been made thereof; or (v) there are material ownership disputes over equity held by the controlling shareholder(s) or by other shareholder(s) that are controlled by the controlling shareholder(s) and/or actual controller.

According to the Provisions on Strengthening the Confidentiality and File Management of Domestic Enterprises Related to Overseas Issuance of Securities and Listing (《關於加強境內企業境外發行證券和上市相關保密和檔案管理工作的規定》) which was promulgated by the CSRC together with the MOF and National Administration of State Secrets Protection and National Archives Administration of China on February 24, 2023, and became effective on March 31, 2023, during the overseas offering and listing activities of domestic enterprises, domestic enterprises, securities companies and securities service providers providing corresponding services shall strictly abide by the relevant PRC laws and regulation as well as the requirements of the provisions, enhance legal awareness of guarding state secrets and strengthening the management of archives, establish and complete systems for confidentiality and archives work, employ necessary measures to implement the responsibility for confidentiality and archives management, and shall not divulge state secrets and work secrets of state organs, and shall not harm the interests of state and the public.

APPLICABLE LAWS AND REGULATIONS TO OUR BUSINESS IN SINGAPORE

DSBJ Singapore and MFLEX Singapore, being our subsidiaries in Singapore, are principally engaged in the sale of electronic component parts and boards, the provision of related support services, and general office functions for the flex and flex assemblies business in Singapore.

REGULATIONS ON EMPLOYMENT OF PERSONNEL

Regulations on Employment

The Employment Act 1968 of Singapore ("**Employment Act**") is Singapore's main labor law, which is administered by the Ministry of Manpower ("**MOM**") and sets out the basic terms and working conditions for almost all types of employees.

All employers are required to issue to their employees who (a) enter into a contract of service on or after April 1, 2016 with the employer, (b) are covered by the Employment Act and (c) are employed for 14 days or more, a written record of the key employment terms ("**KET**s") of the employee not later than 14 days after the day that the employee starts employment with the employer, or within such other period as may be prescribed in substitution. The KETs required to be provided (unless inapplicable to such employee) include, amongst others, full name of employer and employee, job title and main duties and responsibilities, start date of employment, working arrangements (such as daily working hours, number of working days per week and rest day(s)), salary period, basic salary, fixed allowances and deductions, overtime rate of pay, other salary-related components, types of leave, other medical benefits, probation period and notice period.

Regulations on Employment of Foreign Manpower

The Employment of Foreign Manpower Act 1990 of Singapore ("**EFMA**") governs the employment of foreign workers in Singapore, and the regulatory authority is MOM. Under Section 5(1) of the EFMA, no person shall employ a foreign employee unless the foreign employee has obtained a valid work pass.

A work pass includes, amongst others:

(a) Employment Pass, for foreign professional, managers and executives who meet the relevant eligibility criteria and earn a fixed monthly salary comparable to the top one-third of local PMET (Professionals, Managers, Executives and Technicians) salaries. As at the Latest Practicable Date, the minimum qualifying salary starts from S$5,600 and increases progressively with age, up to S$10,700 for those in their mid-40s. Candidates in the financial services sector need higher salaries to qualify;

(b) S Pass, for skilled workers who meet the relevant eligibility criteria and earn a fixed monthly salary comparable to top one-third of local APT (Associate Professionals and Technicians) salaries. As at the Latest Practicable Date, the minimum qualifying salary is S$3,300 and increases progressively with age, up to S$4,800 for those in their mid-40s. Candidates in the financial services sector need higher salaries to qualify; and

(c) Work Permit, for workers from approved source countries/regions working in the construction, manufacturing, marine shipyard, process or service sector.

Regulations on Workplace Safety and Health

Under Section 12 of the Workplace Safety and Health Act 2006 of Singapore ("**WSHA**"), every employer has the duty to take, so far as is reasonably practicable, such measures as are necessary to ensure the safety and health of (a) his employees at work and (b) persons (not being his employees) who may be affected by any undertaking carried on by him in the workplace.

Regulations on Work Injury Compensation

Work injury compensation is governed by the Work Injury Compensation Act 2019 of Singapore ("**WICA**") and is regulated by the MOM. The WICA applies to any person who has entered into or works

under a contract of service with an employer, except: any member of the Singapore Armed Forces; any officer of the Singapore Police Force, the Singapore Civil Defence Force, the Central Narcotics Bureau or the Singapore Prisons Service; and a domestic worker, being an individual employed in or in connection with the domestic services of any private premises. WICA provides for compensation for injuries arising out of and in the course of employment, and prescribes the entitlement and calculation methods of calculating such compensation.

Under Section 7(1) of the WICA, an employer is liable to pay compensation for personal injury caused to an employee by an accident arising out of and in the course of employee's employment with the employer. Compensation is calculated under the First Schedule, subject to minimum and maximum limits and factors such as severity and permanence of injury.

Section 24(1) of the WICA requires employers to maintain approved insurance for all manual workers and employees earning S$2,600 or below (excluding allowances, bonuses, etc.), in accordance with the Work Injury Compensation (Insurance) Regulations 2020. Failure to comply with Section 24(1) is an offense punishable by fine or imprisonment.

Regulations on Central Provident Fund

The Central Provident Fund ("**CPF**") is a mandatory social security savings scheme funded by contributions from employers and employees. The Central Provident Fund Act 1953 of Singapore ("**CPF Act**") governs the contributions made by employers and employees into the CPF, and the CPF Act is administered by the Central Provident Fund Board.

Section 7(1) of the CPF Act provides that subject to any regulations made under Section 77(1) of the CPF Act, every employer of an employee must pay to the CPF monthly in respect of each employee contributions at the appropriate rates set out in the First Schedule of the CPF Act. Pursuant to Section 7(2) of the CPF Act, notwithstanding the provisions of any written law or any contract to the contrary, an employer is entitled to recover from the monthly wages of an employee the amount shown in the First Schedule of the CPF Act as so recoverable from the employee. Section 7(3) of the CPF Act further provides that where any employer who has recovered any amount from the monthly wages of an employee in accordance with the CPF Act fails to pay the contributions to the CPF within such time as may be prescribed, the employer shall be guilty of an offense and shall be liable on conviction to a fine not exceeding S$10,000 or to imprisonment for a term not exceeding seven (7) years or to both.

REGULATIONS ON PATENTS

The Patents Act 1994 ("**PA**") of Singapore, together with the Patents Rules, governs the registration, enforcement, and other matters relating to patents.

Under the PA, patent infringement arises when, without the consent of the patent proprietor, any of the following acts are carried out in Singapore in relation to the patented invention:

(a) where the invention is a product, a person makes, disposes, or offers to dispose of, uses or imports or keeps it;

(b) where the invention is a process, a person uses or offers the process for use in Singapore when the person knows or it is obvious to a reasonable person that the use would be an infringement of the patent; or

(c) where the invention is a process, a person disposes, offers to dispose of, uses or imports or keeps a product obtained directly by that process.

Patent infringement rights is actionable through civil litigation. The patent proprietor or an exclusive licensee may commence legal action against the infringer in their own name. If found liable, the patent owner or exclusive licensee is entitled to a claim for damages or an account of profits, an injunction, an order to deliver up or destroy an infringing product, and for a declaration that the patent is valid and has

been infringed by the defendant. Despite the foregoing, it should be highlighted that the law does not permit the award of both damages and an account of profits for the same act of infringement. As such, the successful party may only claim either damages or an account of profits, but not both.

Under the PA, it is a criminal offense to

(a) make or cause to be made a false entry in the Singapore patent register,

(b) produces a false document claiming to be a copy of an entry in the register,

(c) make unauthorized claims about patent rights or a patent has been applied for, or

(d) misuse the title "Registry of Patents" on a person's place of business, or on any document issued by the person.

Any person convicted of such an offense is liable to a fine, imprisonment, or both.

REGULATIONS ON PERSONAL DATA PROTECTION

The Personal Data Protection Act 2012 of Singapore ("**PDPA**") governs the collection, use and disclosure of personal data by organizations. For the purposes of the PDPA, "personal data" means data, whether true or not, about an individual who can be identified from that data, or from that data and other information to which the organization has or is likely to have access.

An organization is required to comply with, amongst others, the data protection obligations prescribed by the PDPA, which includes as follows:

(a) Accountability obligation – to develop and implement policies and practices that are necessary for the organization to meet the obligations of the organization under the PDPA, develop a process to receive and respond to complaints that may arise with respect to the application of PDPA, communicate to its staff information about the organization's policies and practices, and make information available on request about such policies and practices and the organization's complaints process;

(b) Consent obligation – not to collect, use or disclose personal data about an individual unless (i) the individual gives, or is deemed to have given, his or her consent under the PDPA to the collection, use or disclosure, as the case may be; or (ii) such collection, use or disclosure without the consent of the individual is required or authorized under the PDPA or any other written law;

(c) Purpose limitation obligation – to collect, use or disclose personal data about an individual only for purposes (i) that a reasonable person would consider appropriate in the circumstances; and (ii) that the individual has been informed of, if applicable;

(d) Notification obligation – to inform an individual of the purposes for the collection, use or disclosure of his or her personal data, on or before collecting such personal data, except if the individual is deemed to have consented to the collection, use or disclosure in accordance with the provisions of the PDPA or the organization collects, uses or discloses the personal data without the consent of the individual in accordance with the provisions of the PDPA;

(e) Access and correction obligation – on request of an individual, to, as soon as reasonably possible, (i) provide the individual with personal data about the individual that is in the possession or under the control of the organization, and information about the ways in which such personal data has been or may have been used or disclosed by the organization within a year before the date of the request, unless certain specified exceptions apply and/or (ii) correct an error or omission in the personal data about the individual that is in the possession or under the control of the organization, unless certain specified exceptions apply;

(f) Accuracy obligation – to make a reasonable effort to ensure that personal data collected by or on behalf of the organization is accurate and complete, if the personal data is likely to be used by the organization to make a decision that affects the individual to whom the personal data relates or is likely to be disclosed by the organization to another organization;

(g) Protection obligation – to protect personal data in the possession or under the control of the organization by making reasonable security arrangements to prevent unauthorized access, collection, use, disclosure, copying, modification, disposal or similar risks, and the loss of any storage medium or device on which personal data is stored;

(h) Retention limitation obligation – to cease to retain documents containing personal data, or remove the means by which the personal data can be associated with particular individuals, as soon as it is reasonable to assume that the purpose for which that personal data was collected is no longer being served by retention of the personal data and retention is no longer necessary for legal or business purposes;

(i) Transfer limitation obligation – not to transfer any personal data to a country or territory outside Singapore except in accordance with the requirements prescribed under the PDPA; and

(j) Data breach notification obligation – to assess if a data breach will result in, or is likely to result in, significant harm to an affected individual, or is, or is likely to be, of a significant scale. If so, to notify the Personal Data Protection Commission as soon as is practicable, but in any case no later than three (3) calendar days after making such an assessment. Each affected individual must also be notified in any manner that is reasonable in the circumstances.

The maximum financial penalty that can be imposed on organizations is S$1,000,000, or 10% of the organization's annual turnover in Singapore, whichever is higher. The severity of the penalties will be assessed based on, amongst others, the amount of personal data involved, and the degree of harm caused to individuals.

LAWS AND REGULATIONS RELATING TO IMPORTS AND EXPORTS ACT

The Regulation of Imports and Exports Act 1995 of Singapore ("**RIEA**") together with its subsidiary legislation regulate all import and export activities. The RIEA is administered by the Director-General of Customs, an appointment made under the Customs Act 1960 of Singapore.

Under the Regulation of Imports and Exports Regulations of Singapore ("**RIER**") issued pursuant to the RIEA, and unless otherwise specified, the import, export, or transhipment of any goods in Singapore may only be carried out with a permit granted by the Director-General of Customs.

Applications for permits to import, export, or tranship goods must be filed with the Director- General of Customs by:

(a) the relevant importer, exporter, shipping agent, air cargo agent, freight forwarder or common carrier; or

(b) a registered declarant with Singapore Customs.

Unless stated otherwise, any person who commits an offense under the RIER is subject to the following penalties:

(a) for a first conviction, a fine of up to S$100,000 or three (3) times the value of the goods involved (whichever is higher), imprisonment of up to two (2) years, or both; and

(b) for a second or subsequent conviction, a fine of up to S$200,000 or four (4) times the value of the goods (whichever is higher), imprisonment of up to three (3) years, or both.

REGULATIONS ON PRODUCT LIABILITY

In Singapore, the issue of product liability is generally governed by the law of negligence in the case of manufacturers, and by contract law in the case of sellers/suppliers.

To establish negligence, a claimant must prove that the manufacturer owed a duty of care, breached that duty, and that the breach caused loss or damage to the claimant. What amounts to negligence depends on the facts of each case. Where there is a duty to exercise care, reasonable care must be taken to avoid acts

or omissions that can be reasonably foreseen as likely to cause physical injury to the persons or property. Liability for death or personal injury resulting from negligence cannot be excluded. Other liability for negligence may be excluded if such restriction is reasonable.

A contractual claim for damages requires privity of contract between the claimant and the seller/ supplier of the goods, and that the seller/supplier breached an express or implied term of the contract (e.g., by supplying defective goods). Liability is strict where the contract has been breached, and will depend on the terms agreed between the parties or implied into the contract.

The content of such contractual obligations may be influenced by statute. Standard conditions are implied into all contracts for the sale of goods under the Sale of Goods Act 1979 and the Supply of Goods Act 1982. Products sold in the course of business must be of satisfactory quality and comply with the description applied to them or a sample supplied.

The Consumer Protection (Trade Descriptions and Safety Requirements) Act 1975 of Singapore ("**CPTSA**") prohibits the application of a false trade description to any goods and supply of goods which have a false trade description. A false trade description under the CPTSA includes a trade description which is false or likely to mislead in a material respect, whether from anything contained in or omitted from the description. Under the CPTSA, the Minister for Trade and Industry may by regulations impose requirements for ensuring that, amongst others: (a) certain goods are marked with or accompanied by any information or instruction relating to the goods; (b) any description of advertisements of certain goods should contain or refer to any information relating to the goods, or of an indication of the means by which that information may be obtained; and (c) certain goods are subject to safety requirements relating to composition or contents, design, construction, finish or packing and marked with or accompanied by any information, warning or instruction.

REGULATIONS ON GENERAL CORPORATE GOVERNANCE

The Companies Act 1967 of Singapore generally governs, among others, matters relating to the status, powers and capacity of a company, shares and share capital of a company (including allotments and issuances and transfers of ordinary shares and preference shares), treasury shares, share splits, share buybacks, redemption of shares, conversion of shares, reduction of share capital, declaration of dividends, financial assistance, directors and officers and shareholders of a company (including meetings and proceedings of directors and shareholders and dealings between such persons and the company), protection of minority shareholders' rights, accounts and audit requirements, arrangements, reconstructions and amalgamations, winding up and dissolution.

In addition, members of a company are subject to, and bound by, the provisions of the constitution of the company. The constitution of a company contains, among others, provisions relating to some of the matters in the foregoing paragraph as well as the rights and privileges attached to the different classes of shares of the company (if applicable).

REGULATIONS ON TAXATION

The discussion in this section is not intended to be and does not constitute legal or tax advice. It is based on the current tax laws and practice in Singapore and is subject to changes in such laws, or in the interpretation thereof. Such changes may be retrospective. No assurance can be given that courts or fiscal authorities responsible for the administration of such laws will agree with this interpretation or that changes in such laws and practice will not occur on a retrospective basis.

Regulations on Corporate Tax

Corporate taxpayers (whether Singapore tax resident or non-Singapore tax resident) are generally subject to Singapore income tax on income accruing in or derived from Singapore or received in Singapore from outside Singapore (unless specified conditions for exemption are satisfied). Foreign income in the form of foreign-sourced dividends, foreign branch profits, and foreign-sourced service income by a Singapore tax resident corporate taxpayer may however be exempt from Singapore tax if specified conditions are satisfied.

Section 43(1) of the Income Tax Act 1947 of Singapore ("**ITA**") provides, among others, that the prevailing corporate income tax rate is 17%. Section 43(6B) of the ITA provides, among others, that there is partial tax exemption for chargeable income of up to S$200,000 as follows:

(a) for every dollar of the first $10,000 of the chargeable income, only 25% is chargeable with tax; and

(b) for every dollar of the next $190,000 of the chargeable income, only 50% is chargeable with tax.

The chargeable income of a company in excess of the first S$200,000 (after the partial tax exemption) will be fully taxable at the prevailing corporate income tax rate of 17%.

Regulations on Dividend Distributions and Withholding Tax

All Singapore tax resident companies are under the one-tier corporate taxation system of Singapore ("**One-Tier System**"). Under the One-Tier System, the tax collected from corporate profits is a final tax and the after-tax profits of a company resident in Singapore can be distributed to its shareholders as tax-exempt dividends. Such dividends are tax-exempt in the hands of the shareholders, irrespective of whether the shareholder is a company or an individual and whether or not the shareholder is a Singapore tax resident.

Singapore currently does not impose withholding tax on dividends paid to resident or non-resident shareholders.

Regulations on Goods and Services Tax

The Goods and Services Tax Act 1993 of Singapore governs goods and services tax ("**GST**"), which is a consumption tax that is levied on the import of goods into Singapore, as well as nearly all supplies of goods and services in Singapore at a prevailing rate of 9%.

Regulations on Stamp Duty

There is no stamp duty payable on the subscription and issuance of shares.

Stamp duty is payable on a transfer of shares if there is an instrument of transfer executed in Singapore or if there is an instrument of transfer executed outside Singapore which is received in Singapore. In such situations, stamp duty is payable on the instrument of transfer of shares at the rate of 0.2% of the consideration for, or net asset value of, the shares, whichever is higher.

APPLICABLE LAWS AND REGULATIONS TO OUR BUSINESS IN THAILAND

Through our Thai subsidiaries, MFLEX Thailand, we operate in Thailand as a manufacturer of printed circuit board.

REGULATIONS ON FOREIGN BUSINESS

The Foreign Business Operations Act B.E. 2542 (1999) ("**FBOA**") is the key piece of legislation that restricts foreign entities or companies in which foreigners hold 50% or more of the registered capital from engaging in certain businesses that are reserved for Thai nationals unless a foreign business license or foreign business certificate is obtained from the Department of Business Development, Ministry of Commerce.

The restricted activities are listed in three schedules annexed to the FBOA. These cover, among others, businesses relating to national security, natural resources, and services that Thai authorities deem appropriate to reserve for Thai nationals. However, manufacturing activities and export activities are not restricted under the FBOA. A foreign majority-owned company may engage in manufacturing and the sale (including export) of products it manufactures without the need for a foreign business license or foreign business certificate.

Violations of the FBOA may result in penalties including imprisonment and fines.

REGULATIONS ON INVESTMENT

Investment promotion in Thailand is governed by the Investment Promotion Act B.E. 2520 (1977), which empowers the Board of Investment of Thailand ("**BOI**") to grant both tax and non-tax incentives to qualifying investment projects in designated industries or locations.

BOI-promoted companies are entitled to a range of incentives, including exemption from corporate income tax for a period of up to eight years, reduction of import duties on machinery and raw materials, permission for foreign ownership of land used in the promoted project, and relaxed requirements on the employment of foreign skilled workers and experts.

BOI-promoted companies are required to comply with the conditions stated in their promotion certificates, including restrictions on the use of machinery, the scope of business, environmental standards, and reporting obligations to the BOI. Failure to comply may result in partial or full revocation of promotional benefits.

REGULATIONS ON MANUFACTURING

The activities relating to manufacturing in Thailand are primarily regulated under the Factory Act B.E. 2535 (1992), which governs the establishment, operation, and supervision of factories. Depending on the type and size of the factory or the total horsepower of machinery used, an operator may be required to obtain a factory licenses (Ror. Ngor. 4) from the Department of Industrial Works or the relevant industrial estate authority.

Operating a factory without the requisite licenses, or in violation of the conditions specified in the factory licenses, may result in penalties including imprisonment and fines.

As the Thai Subsidiary is located within an industrial estate, its factory operation falls under the supervision of the Industrial Estate Authority of Thailand ("**IEAT**"), and the requisite licenses are issued by the IEAT rather than by the Department of Industrial Works.

INDUSTRIAL ESTATE AUTHORITY OF THAILAND REGULATIONS

Industrial estates in Thailand are governed by the Industrial Estate Authority of Thailand Act B.E. 2522 (1979), administered by the IEAT under the Ministry of Industry. The IEAT is responsible for the establishment, supervision, and regulation of industrial estates, which are designated zones for industrial operations with integrated infrastructure and environmental management.

Factories established within IEAT estates benefit from streamlined administrative processes, such as one-stop service for licenses, construction permits, and customs clearance. The IEAT may grant special privileges for foreign investors, including the right to own land within the industrial estate.

Companies operating in an IEAT estate must comply with the regulations such as land use, environmental protection, waste management, safety, and utility usage. The IEAT also monitors compliance with industrial standards and may impose administrative penalties or order suspension of operations in case of material non-compliance.

REGULATIONS ON LABOR AND EMPLOYMENT

Employment relationships in Thailand are governed primarily by the Labor Protection Act B.E. 2541 (1998) ("**LPA**"). The LPA prescribes minimum employment standards, including working hours, rest periods, holidays, leave entitlements, overtime and termination procedures. Any employment contract that provides less favourable conditions than the statutory minimum will be void to the extent of such inconsistency.

Employers with ten or more employees are required to establish written work rules, maintain an employee register, and submit annual declarations of working conditions (Form Kor Ror 11) to the Department of Labor Protection and Welfare. Employers must also contribute to the Social Security Fund under the Social Security Act B.E. 2533 (1990) and the Workmen's Compensation Fund under the Workmen's Compensation Fund Act B.E. 2537 (1994).

Foreign nationals may be employed in Thailand subject to the Emergency Decree on Managing the Work of Foreigners B.E. 2560 (2017), which requires a valid work permit or other authorization.

In addition, employers must ensure compliance with occupational health and safety standards under the Occupational Safety, Health and Environment Act B.E. 2554 (2011). Non-compliance with Thai labor laws may result in administrative fines and criminal penalties.

REGULATIONS ON EXPORT

Under Thai law, the exportation of certain categories of goods is subject to control or restriction, and a specific permit or license may be required. The relevant legislation includes the Export and Import of Goods Act B.E. 2522 (1979) and ministerial notifications issued thereunder.

In addition, exporters must also take into account the laws and regulations of the jurisdictions of destination, including any import restrictions or product standards applicable in those jurisdictions.

Exporters are responsible for obtaining the necessary licenses and ensuring compliance with customs, tariff and documentation requirements. Failure to comply with applicable export control laws may result in penalties such as fines, confiscation of goods or revocation of export privileges.

REGULATIONS ON TAX MATTERS

The Revenue Code of Thailand is the principal legislation governing taxation in Thailand. Companies incorporated in Thailand are generally subject to corporate income tax at a rate of 20% on their net profits. The sale of goods and the provision of services in Thailand are subject to value-added tax (VAT), currently at the rate of 7%, except for certain exempt goods and activities. Other taxes include withholding tax, specific business tax for certain activities, and stamp duty on specified instruments.

Dividends paid by a Thai company to non-Thai resident shareholders are generally subject to withholding tax at the rate of 10%, unless reduced or exempted under an applicable double taxation treaty.

BOI-promoted companies may be entitled to exemptions from corporate income tax and import duties as specified in their promotion certificates. Companies operating within IEAT estates may also enjoy additional facilitation measures on duties payment in connection with import and export operations.

Stamp duty is payable on certain instruments executed in Thailand or brought into Thailand. For a transfer of shares, the share transfer instruments are subject to stamp duty at the rate of THB 1 for every THB 1,000 (or fraction thereof) of the greater of the paid-up value, or consideration of the shares as specified in the share transfer instruments.

OVERVIEW

The history of the Company could be traced back to 1998, when it was founded by Mr. Yuan Fugen (袁富根) and six other individuals in Suzhou as a provider of precision component services for metal structural parts. In April 2010, the A Shares of the Company were listed on the main board of the Shenzhen Stock Exchange under the stock code 002384.SZ.

Over the years, the Group has evolved into a global player in intelligent manufacturing. With a strategic focus on intelligent manufacturing, we are committed to providing advanced products and solutions to top technology companies in the field of intelligent connection.

MILESTONES

The following sets out the summary of the Company's key business development milestones:

Year	Milestone
1998	The Company was established and headquartered in Suzhou.
2007	The Company was renamed as "Suzhou Dongshan Precision Manufacturing Co., Ltd."
2010	The A Shares of the Company were listed on the main board of the Shenzhen Stock Exchange (stock code: 002384.SZ).
2014	The Company initiated its LCM business and completed the acquisition of Mutto Optronics, marking its entry into the touch panel market.
2016	The Company completed the acquisition of MFLEX, a global leader in FPCs based in the United States.
2017	The Company established the Yancheng Industrial Base as its production centre.
2018	The Company has improved its PCB market footprint, acquired the capability to manufacture high-end PCBs, cementing its position in the interconnectivity solutions sector through the acquisition of Multek, a leading PCB manufacturer.
2019	The Company established its overseas headquarters in Singapore.
2023	The Company bolstered its industrial presence in Southeast Asia through the commencement of construction for its Thailand factory and successfully completed the acquisition of Suzhou Display.
2025	The Company entered into the optical transceiver business through the acquisition of Source Photonics and successfully completed the acquisition of GMD, further expanding our business footprint in Europe.

MAJOR SUBSIDIARIES

As of the Latest Practicable Date, we conducted our business operations through 133 subsidiaries. The following sets out the principal business activities, place of establishment and date of establishment of the Company's subsidiaries that made a material contribution to the Group's results of operations during the Track Record Period.

Name of subsidiary	Place of establishment	Date of establishment	Equity interest attributable to the Company	Principal business activities
Multek China	PRC	July 19, 1995	100%	Production of PCBs
Suzhou Display	PRC	February 17, 1996	100%	Production of liquid crystal displays
MFLEX Suzhou	PRC	June 20, 2002	100%	Production of FPCs
MFLEX Singapore	Singapore	September 3, 2007	100%	Overseas marketing and sales
Mutto Optronics	PRC	June 6, 2008	100%	Research and development of touch panel technologies and production of related components
MFLEX Yancheng	PRC	June 19, 2017	100%	Production of FPCs
Yancheng Dongshan	PRC	June 19, 2017	100%	Production of LED packaging and testing
Multek Group	Hong Kong	April 25, 2018	100%	Investment holding
DSBJ Singapore	Singapore	March 8, 2019	100%	Overseas operation
Yancheng Dongchuang	PRC	November 2, 2020	100%	Production of automotive precision components
Suzhou Dongyue	PRC	September 6, 2022	100%	Research and production of automotive precision components
MFLEX Thailand	Thailand	June 30, 2023	100%	Overseas production of PCBs
Multek Industries	PRC	April 4, 2000	100%	Manufacture of PCBs
Source Photonics Chengdu	PRC	March 12, 2001	100%	R&D, production, and sales of optical transceivers
Source Photonics Macau	Macau	May 29, 2006	100%	Overseas sales of optical transceivers

MAJOR SHAREHOLDING CHANGES OF THE COMPANY

Early Development and Conversion into a Joint Stock Company

On October 28, 1998, the Company was established under the laws of the PRC as a limited liability company with an initial registered capital of RMB500,000 and was held as to 60% by Mr. Yuan Fugen, 7% by Mr. Bao Wenjie, 7% by Mr. Xie Juan, 7% by Ms. Lv Ying, 7% by Ms. Zhang Xiuying, 7% by Mr. Chen Yiping, and 5% by Mr. Zhou Jian. Between 1998 and 2007, the Company underwent several rounds of capital increases and equity transfers, upon completion of which its registered capital increased to RMB33,060,000.

On December 24, 2007, the Company was converted into a joint stock company. Upon completion of the conversion, the Company had a total share capital of RMB120,000,000 divided into 120,000,000 Shares, which were held as to 36.31% by Mr. Yuan Yonggang, 36.31% by Mr. Yuan Yongfeng, 12.71% by Mr. Yuan Fugen, 6.75% by Suzhou National Development Creation Capital Investment Co., Ltd. (蘇州國發創新資本投資有限公司), 5.42% by 13 other then individual Shareholders of the Company and 2.50% by Shanghai Hengrui Innovation Investment Co., Ltd. (上海恒銳創業投資有限公司).

Listing on the main board of the Shenzhen Stock Exchange

In April 2010, the A Shares of the Company were listed on the main board of the Shenzhen Stock Exchange (stock code: 002384.SZ) (the "**A-Share Listing**"). The Company offered a total of 40,000,000 A Shares under the A-Share Listing, representing 25% of the Company's enlarged share capital immediately following the completion of the A-Share Listing. Immediately upon the completion of the A-Share Listing, the share capital of the Company increased to RMB160,000,000.

Private Placement of A Shares in 2015

In April 2015, the Company conducted a private placement of its A Shares (the "**2015 A Share Placement**") to raise funds for the LED devices production project, the LCM module production project and the precision metal components production project. Pursuant to the 2015 A Share Placement, a total of 79,390,270 A Shares were issued to six investors which are Independent Third Parties at an issue price of RMB14.80 per share, which was determined based on various factors, including, among other things, the average trading price of our A Shares of the 20 trading days prior to the pricing date and the indicative investment interest of potential investors. The 2015 A Share Placement raised net proceeds of approximately RMB1,153.8 million, which have been fully utilized as of the Latest Practicable Date. Following the completion of the 2015 A Share Placement, the Company's total issued share capital increased to RMB847,390,270.

Private Placement of A Shares in 2017

In May 2017, the Company conducted a private placement of its A Shares (the "**2017 A Share Placement**") to raise funds for the acquisition of 100% of the equity interest in Multi-Fineline Electronix, Inc. and to supplement the working capital of the Company. Pursuant to the 2017 A Share Placement, a total of 223,658,048 A Shares were issued to seven institutional investors, which are Independent Third Parties, at an issue price of RMB20.12 per share, which was determined based on various factors, including, among other things, the average trading price of our A Shares of the 20 trading days prior to the pricing date and the indicative investment interest of potential investors. The 2017 A Share Placement raised net proceeds of approximately RMB4,439.3 million, which have been fully utilized as of the Latest Practicable Date. Following the completion of the 2017 A Share Placement, the Company's total issued share capital increased to RMB1,071,048,318.

Private Placement of A Shares in 2020

In August 2020, the Company conducted a private placement of its A Shares (the "**2020 A Share Placement**") to raise funds primarily for the expansion project of fine-line PCB and the technical transformation project of Multek's PCB production. Pursuant to the 2020 A Share Placement, a total of

103,294,850 A Shares were issued to twenty investors, who are Independent Third Parties, at an issue price of RMB28.00 per share, which was determined based on various factors, including, among other things, the average trading price of our A Shares of the 20 trading days prior to the pricing date and the indicative investment interest of potential investors. The 2020 A Share Placement raised net proceeds of approximately RMB2,864.0 million, which have been fully utilized as of the Latest Practicable Date. Following the completion of the 2020 A Share Placement, the Company's total issued share capital increased to RMB1,709,867,327.

Cancellation of A Shares in 2024

In August 2024, our registered capital decreased to RMB1,705,913,710 from RMB1,709,867,327 upon completion of repurchase and cancelation of 3,953,617 A Shares relating to the ungranted shares under the employee incentive scheme.

Private Placement of A Shares in 2025

In June 2025, the Company conducted a private placement of its A Shares (the "**2025 A Share Placement**") to supplement the working capital of the Company for business development and to consolidate the control of the Controlling Shareholders over the Company. Pursuant to the 2025 A Share Placement, a total of 125,693,822 new A Shares were issued to Mr. Yuan Yonggang and Mr. Yuan Yongfeng, members of the Controlling Shareholders at an issue price of RMB11.17 per Share, which was determined based on various factors, including, among other things, the average trading price of our A Shares of the 20 trading days prior to the pricing date and the indicative investment interest of potential investors. The 2025 A Share Placement raised net proceeds of approximately RMB1,391.5 million, which have been fully utilized as of the Latest Practicable Date. Following the completion of the 2025 A Share Placement, the Company's total issued share capital increased to RMB1,831,607,532.

ACQUISITIONS

Suzhou Display

On October 28, 2022, the Company and Japan Display Inc. ("**JDI**") entered into a share purchase agreement, pursuant to which, the Company agreed to purchase 100% equity interests in Suzhou Display held by JDI at the consideration of RMB1,383 million (the "**Suzhou Display Acquisition**"). Suzhou Display engaged in development, design and production of LCDs and other electronic application machinery products and related components, including display panels for automotive applications and consumer devices. Suzhou Display had a production base in the PRC with over 900 employees, bringing decades of expertise from its lineage with JDI, enabling advanced LCD module assembly and supply of high-precision components for display systems. The Suzhou Display Acquisition was expected to expand the Company's business layout into automotive display business sector, and enhance overall efficiency and competitiveness. By integrating the acquired display capabilities, the Company can better leverage industry chain synergies, combining its PCB/FPC, touch panel technologies and display technologies. This creates the ability to offer one-stop product solutions for automotive customers, improving customer value and competitive differentiation. The consideration of the Suzhou Display Acquisition was determined based on arm's length negotiation among the Company, JDI, and Suzhou Display, taking into account the latest audited financial result of Suzhou Display and with reference to valuation of other comparable companies. The Suzhou Display Acquisition was completed in January 2023. Both of JDI and Suzhou Display were Independent Third Parties.

GMD

On May 12, 2025, DSBJ Singapore entered into a share purchase agreement with GMD and all of its existing shareholders, pursuant to which, DSBJ Singapore agreed to purchase 100% equity interests in GMD at the purchase price of EUR3 and restructure the financial debts of GMD at the total settlement amount of EUR100 million (the "**GMD Acquisition**"). Established in 1986, GMD was a leading French automotive components supplier, operating both in France and internationally, focusing on production of components for passenger and commercial vehicles. It had approximately 6,500 employees worldwide, with operations through over 30 production bases across 12 countries spanning Europe, Asia, and Africa. The GMD

Acquisition was expected to expand our presence in the automotive components sector, enhance our global footprint, and improve overall efficiency and competitiveness. GMD was recognized as one of France's largest automotive component suppliers, serving major OEMs and automotive manufacturers in Europe. Its large footprint and established relationships gave the Company immediate access to high-value European and global automotive customers. The purchase price of the equity interests in GMD and the settlement amount with the creditors for the GMD Acquisition were determined based on arm's length negotiation, taking into account the latest audited financial result of GMD and with reference to valuation of other comparable companies. The GMD Acquisition was completed in October 2025. To the best knowledge of the Directors, GMD, its then existing shareholders and their respective beneficial owners were Independent Third Parties.

Source Photonics

In June 2025, the Company, together with Multek Group (Hong Kong) Limited, a wholly-owned subsidiary of the Company, entered into an equity transfer agreement with Source Photonics and its existing shareholders (together with Source Photonics, "**Source Photonics Parties**"), pursuant to which the Company agreed to acquire 97.48% shareholding in Source Photonics from its existing shareholders, for a consideration in an amount of not exceeding approximately USD629 million. The acquisition of 97.48% shareholding in Source Photonics was completed on September 30, 2025, and the financial statements of Source Photonics have been consolidated in the consolidated financial statements of the Group since October 2025 in accordance with IFRS. In May 2026, Multek Group (Hong Kong) Limited entered into a share purchase agreement (including a supplemental agreement thereto) with V-Capital International Holding Co., Limited (一村國際控股有限公司), an Independent Third Party, for acquiring the remaining 2.52% shareholding in Source Photonics for a consideration of approximately US$24 million. On May 30, 2026, the acquisition of remaining 2.52% shareholding in Source Photonics was completed.

Separate from the consideration paid for the acquisition, to provide funding support for Source Photonics, the Group subscribed for a series of convertible bonds issued by Source Photonics and its subsidiaries following the acquisition from June 2025 to December 2025 in an aggregate amount of approximately RMB700 million.

Source Photonics is a limited liability company incorporated in the Cayman Island on November 17, 2010 and is primarily engaged in the design, research and development, production and sales of optical transceivers. With the rapid development of 5G communications, data centers and other industries, the demand for optical transceivers continues to grow. Source Photonics has profound technological experience, advanced R&D capabilities and an established industrial chain layout in the field of optical transceivers. Source Photonics currently conducts its principal business through key R&D bases in China and manufacturing facilities located in China and Thailand. Through the acquisition of Source Photonics, the Directors believe we can quickly expand into the optical transceiver market by leveraging Source Photonics' technology and as a global provider of advanced technology solutions. Source Photonics possessed extensive global client resources, already serving telecom carriers, data center operators and equipment manufacturers customer base. Combined with Source Photonics' technologies and products which serve a wide range of data center and telecommunications applications, we believe a unique advantage that combines AI PCB with optical transceiver would be created and significant synergies are anticipated in terms of customer resource sharing, technology research and development collaboration, manufacturing optimization and supply chain integration.

To the best knowledge of the Directors, Source Photonics Parties and their respective beneficial owners were Independent Third Parties. Based on views of our PRC Legal Advisor and Taiwan legal advisor, the acquisition of Source Photonics is legally completed pursuant to the explicit legal requirements under the applicable PRC and Taiwan laws. As advised by our PRC Legal Advisor, the Company has made filings in the PRC with respect to the acquisition and all necessary approvals explicitly prescribed under the applicable PRC laws have been obtained. As a result of the acquisition, the Company indirectly holds Source Photonics Taiwan, a wholly-owned subsidiary of Source Photonics. As advised by our Taiwan legal advisor, there is no explicit provision under Taiwan laws requiring prior approval from the Investment Commission for the acquisition. However, the Investment Commission has the discretion to review such transaction on its own initiative. Source Photonics Taiwan has submitted relevant documents to the Investment Commission for its review, which was in progress as of the Latest Practicable Date. Considering that the Investment Commission

had not raised any material substantive regulatory concerns in respect of the acquisition as of the Latest Practicable Date and no penalty, order or other restriction had been imposed on the Company or Source Photonics by the Investment Commission, our Taiwan legal advisor is of the view that the likelihood of the Investment Commission rejecting the indirect investment in and control of Source Photonics Taiwan is remote. Our Taiwan legal advisor is further of the view that the validity of the acquisition will not be affected by the outcome of the review by the Investment Commission, the completion of the acquisition is not conditional upon the approval of the Investment Commission and the acquisition will not be rendered invalid or voidable under Taiwan law by the outcome of the review by the Investment Commission on the basis that the acquisition is a share transfer outside Taiwan as it involves the acquisition of a Cayman company and the relevant share transfer agreement is not governed by the laws of Taiwan, pursuant to Articles 14 and 20 of the Act Governing the Choice of Law in Civil Matters Involving Foreign Elements of Taiwan (涉外民事法律適用法), the internal affairs of a foreign legal person and the formation and efficacy of a juridical act creating an obligation relation shall be governed by the laws of the respective foreign jurisdiction and Taiwan has no direct jurisdiction over the business and assets of a company incorporated outside Taiwan.

For details of the relevant risks if the Investment Commission takes a negative or unsupportive view of the acquisition, please see "Risk Factors — We may fail to effectively integrate acquisition targets into our operation and culture or realize expected benefits from our acquisitions, and we may become subject to liabilities and legal claims in connection with such transactions, which could have an adverse effect on our financial condition and results of operations." Even in the unlikely event that our shareholder's rights in Source Photonics Taiwan are suspended or we are ordered to cease or withdraw our indirect investment in Source Photonics Taiwan, our Directors are of the view that this would not have a material adverse effect on the business operations or financial condition of the Group, having considered that: (i) Source Photonics Taiwan primarily functions as a production base of the Source Photonics group. It does not hold core technologies or intellectual property that are material to the business of the Source Photonics group; (ii) customer relationships are maintained, and customer orders are obtained, primarily, by other trading companies of Source Photonics Group. As such the Directors expect that the relevant customers would continue to place purchase orders with such trading companies of Source Photonics Group; (iii) in addition to Source Photonics Taiwan, the Source Photonics group has manufacturing facilities in Changzhou and Chengdu and (iv) since its consolidation into the financial statements of the Group, Source Photonics Taiwan has made an insignificant financial contribution to the Group. If the production of Source Photonics Taiwan is affected, we would be able to take advantage of, or where necessary, expand the relevant production capacity at other manufacturing facilities. The timing of completion of the review is subject to the discretion of the Investment Commission. As advised by our Taiwan legal advisor, there is no prescribed timeline for the Investment Commission's review process under the applicable Taiwan laws.

To the best knowledge of the Directors, save for the acquisition of Source Photonics, none of the acquisitions listed above is subject to the disclosure requirements under 4.05A of the Listing Rules.

LISTING ON THE MAIN BOARD OF THE SHENZHEN STOCK EXCHANGE AND REASONS FOR THE H SHARE LISTING

Since April 2010, the A Shares of the Company have been listed on the main board of the Shenzhen Stock Exchange. The Directors confirm that, since the A-Share Listing and up to the Latest Practicable Date, there had been no instances of non-compliance of the Company with the applicable rules of the Shenzhen Stock Exchange and other applicable PRC securities laws and regulations in any material respects. To the best knowledge of the Directors, there are no material matters in relation to the compliance record of the Company on the Shenzhen Stock Exchange that should be brought to the attention of the Stock Exchange or potential investors of the Global Offering. The PRC Legal Advisor advised us that, since the A-Share Listing and up to the Latest Practicable Date, we had complied with the relevant laws and regulations on A share listings applicable to us in all material respects. Based on the independent due diligence conducted by the Joint Sponsors and the PRC Legal Advisor's view above, no material matter has come to the Joint Sponsors' attention that would cause them to disagree with the Directors' confirmation with regard to the compliance records of the Company on the Shenzhen Stock Exchange.

The Company seeks to list its H Shares on the Stock Exchange to raise additional capital for expanding portfolios, capacity expansion, strategic transactions, technology R&D, intelligent manufacturing and strengthening talent pipeline. See "Business — Our Growth Strategies" and "Future Plans and Use of Proceeds" for more details.

PUBLIC FLOAT AND FREE FLOAT

Pursuant to Rules 8.08(1) and 19A.13A of the Listing Rules, as the Company has Shares apart from the H Shares for which the Listing is sought, the H Shares for which the Listing is sought that are held by the public, at the time of the Listing, must (a) represent at least 10% of the Company's total number of issued Shares (excluding treasury shares); or (b) have an expected market value of not less than HK$3 billion.

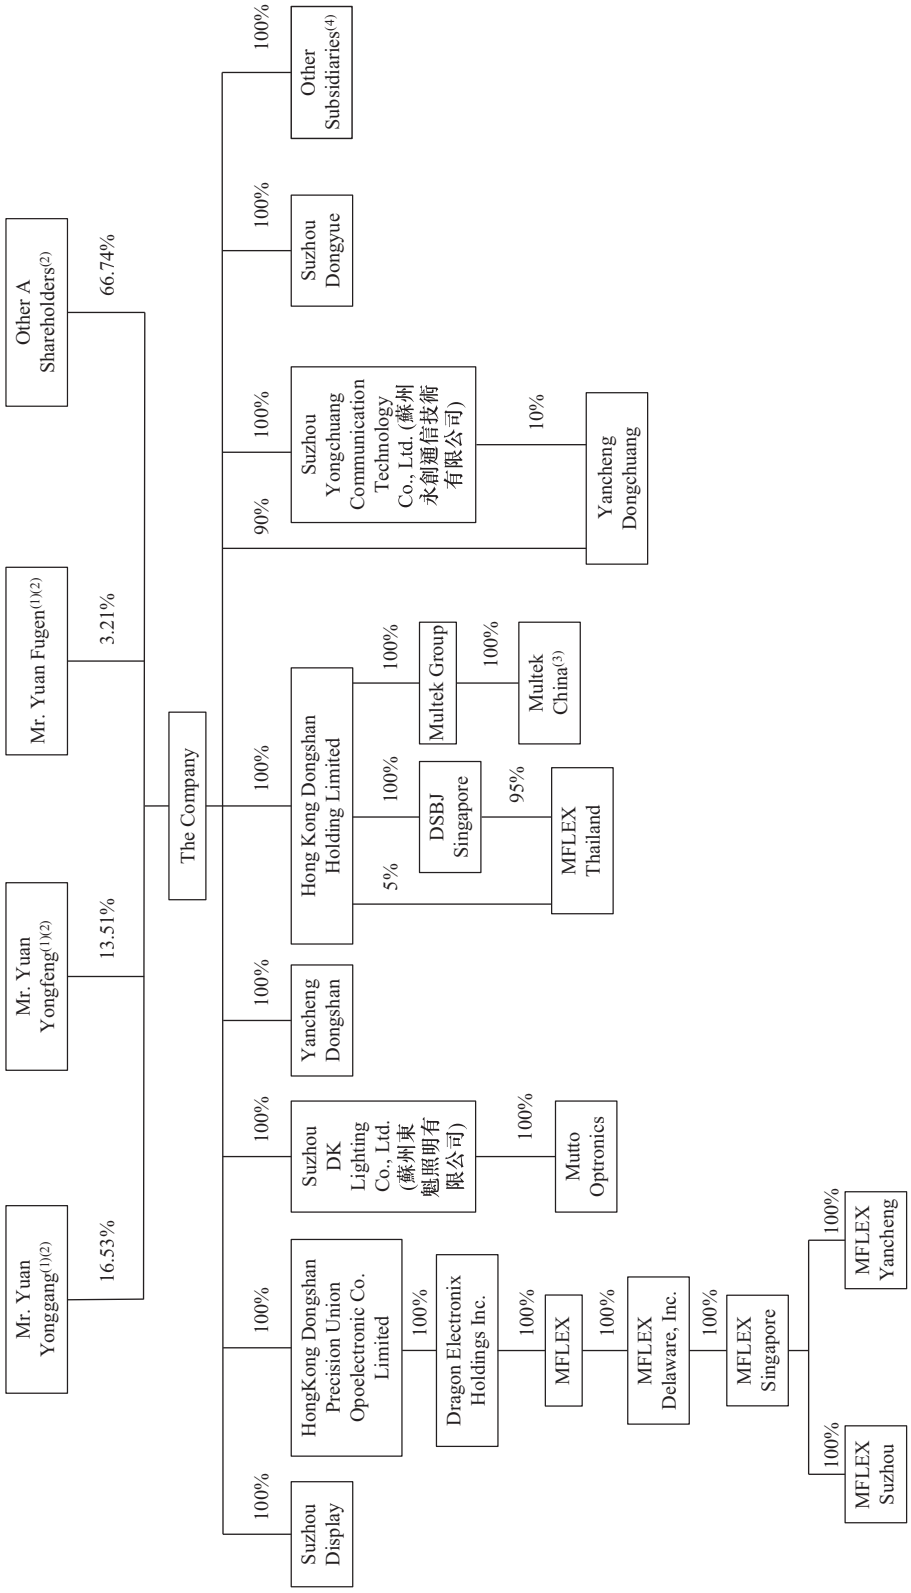

The total number of the H Shares to be issued pursuant to the Global Offering represents approximately 5.8% of the total issued share capital of the Company (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised and excluding treasury shares). It is expected that upon Listing (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised), based on an Offer Price of HK$93.80 per Share (being the maximum Offer Price), the market capitalization of our H Shares immediately upon Listing is expected to be approximately HK$10,672.9 million, thereby satisfying Rule 8.08(1) (as amended and replaced by Rule 19A.13A) of the Listing Rules, which requires an expected market value of the H Shares of the Company to be not less than HK$3 billion at the time of the Listing.

Based on an Offer Price of HK$93.80 per H Share, being the maximum Offer Price, the Company will satisfy the free float requirement under Rule 8.08A (as amended and replaced by Rule 19A.13C) of the Listing Rules.

CORPORATE STRUCTURE

Corporate Structure Immediately Before the Global Offering

The following chart sets forth the shareholding and corporate structure of the Group immediately before the Global Offering:

Notes:

(1) Mr. Yuan Fugen, Mr. Yuan Yonggang and Mr. Yuan Yongfeng are the Controlling Shareholders. See "Relationship with Our Controlling Shareholders". As of the Latest Practicable Date, Mr. Yuan Yonggang directly held 302,781,254 A Shares, of which 104,828,000 A Shares were pledged, and Mr. Yuan Yongfeng directly held 247,526,917 A Shares, of which 46,583,800 A Shares were pledged.

(2) The shareholding set forth in the above graph is calculated based on the total share capital of 1,831,607,532 Shares of the Company immediately before the Global Offering. As of the Latest Practicable Date, 6,046,200 A Shares were held by the Company as treasury

shares. According to the Company's PRC Legal Advisor, the treasury shares held by the Company did not carry any voting rights on all matters at Shareholders' meetings or enjoy any dividend rights. As such, Mr. Yuan Yonggang, Mr. Yuan Yongfeng, Mr. Yuan Fugen and other A Shareholders were entitled to exercise approximately 16.59%, 13.56%, 3.22% and 66.63% of the voting rights at general meetings of the Company (excluding treasury shares with no voting rights), respectively, as of the Latest Practicable Date.

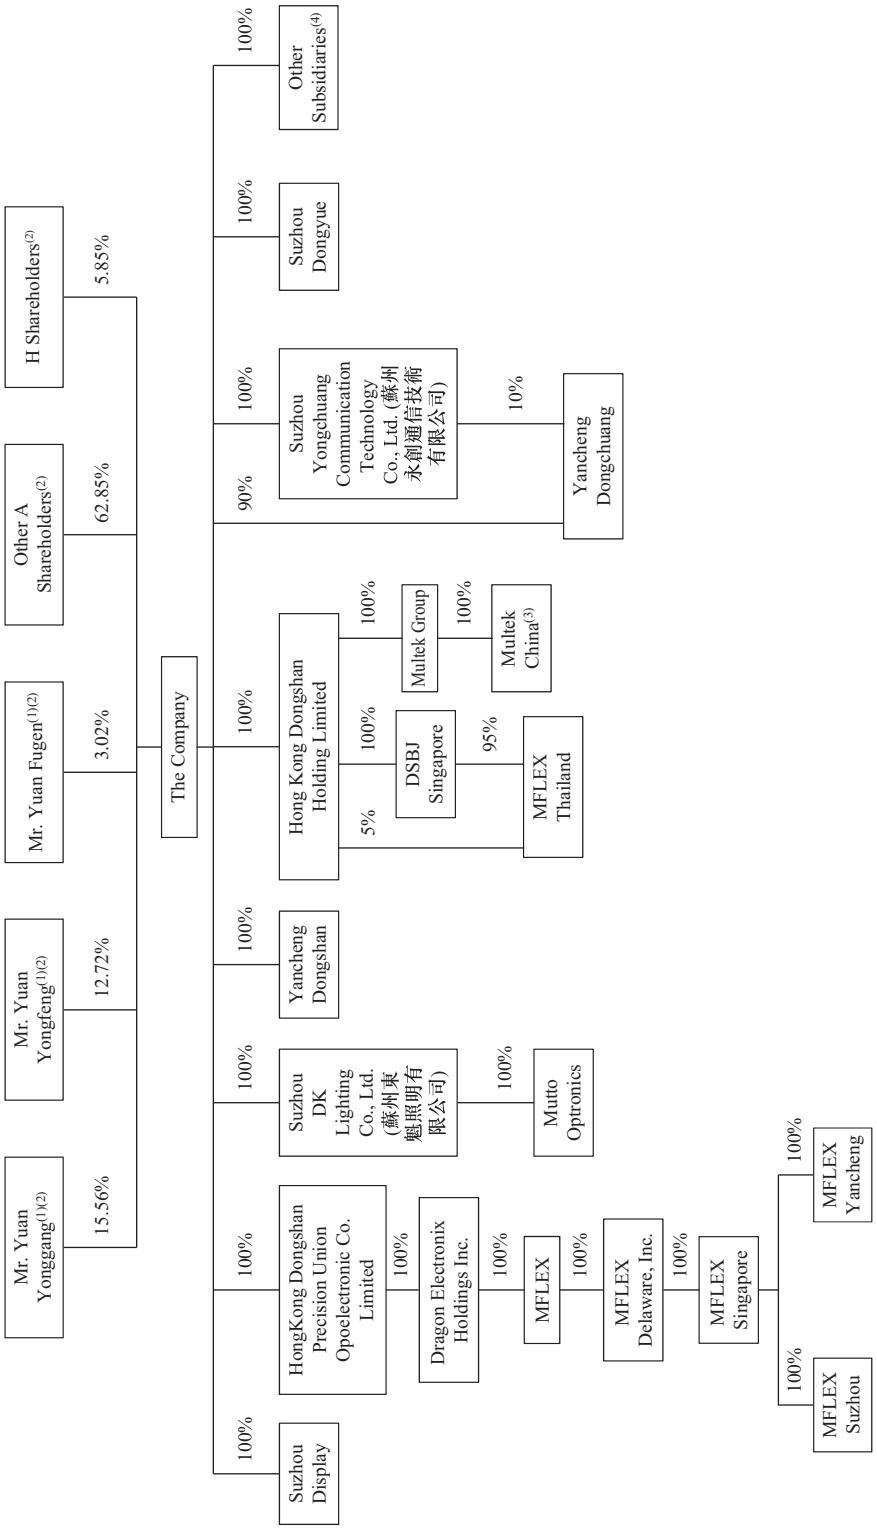

(3) Multek China is indirectly wholly owned by Multek Group.

(4) As of the Latest Practicable Date, other subsidiaries include (i) 108 wholly-owned subsidiaries established in various jurisdictions, (ii) Suzhou Jebson Intelligent Technology Co., Ltd. (蘇州捷佈森智能科技有限公司), which was owned as to 51% by our Company and 49% by Zhu Wenbing (朱文兵), an Independent Third Party, respectively, (iii) Suzhou Dongdai Electronic Technology Co., Ltd. (蘇州東岱電子科技有限公司), which was owned as to 51% by our Company, 30.33% by Qian Baolong (錢寶龍), an Independent Third Party and 18.67% by Chen Limin (陳利民), an Independent Third Party, respectively, (iv) Suzhou RF Top Electronic Communication Co., Ltd. (蘇州艾福電子通訊股份有限公司), which was owned as to 93.51% by our Company, 6.04% by Mr. Kang Namgu, an Independent Third Party and 0.45% by Suzhou Aiyishide Investment Management Center (Limited Partnership) (蘇州艾伊施德投資管理中心（有限合夥）), an Independent Third Party, respectively, (v) Jiangsu Source Communication Technology Co., Ltd. (江蘇索爾思通信科技有限公司, "**Source Jiangsu**") which was held as to 90.00% indirectly by Source Photonics and 10.00% by Zhuhai Hengqin Anshi Information Consulting Partnership (Limited Partnership) (珠海橫琴安實信息諮詢合伙企業(有限合夥)), an Independent Third Party, (vi) Chengdu Antong Semiconductor Co., Ltd. (成都安瞳半導體有限公司), which was held as to approximately 50.06% by Source Jiangsu, 26.95% by Zhuhai Hengqin Ancong Information Consulting Partnership (Limited Partnership) (珠海橫琴安聰信息諮詢合伙企業(有限合夥)), a limited liability partnership ultimately controlled by the Group, 13.20% by Kunshan Qi Village Investment Center (L.P) (昆山啟村投資中心(有限合夥)), an Independent Third Party, 6.60% by Fengtu Tongyue (Sanya) Equity Investment Fund Partnership (L.P) (灃途同悅(三亞)股權投資基金合夥企業(有限合夥)), an Independent Third Party, 2.42% by Jiaxing Gencheng Equity Investment Partnership (Limited Partnership) (嘉興根誠股權投資合夥企業(有限合夥)), an Independent Third Party and 0.77% by Beijing Yingjiu Tongyue Enterprise Management Consulting Center (Limited Partnership) (北京盈久同悅企業管理諮詢中心(有限合夥)), an Independent Third Party, respectively, and (vii) Shenzhen Qin Tao Dongchuang Investment Partnership (Limited Partnership) (深圳市勤道東創投資合夥企業（有限合夥）), which was owned as to 76.92% by our Company, 20.77% by Pingxiang Qin Tao Xin Equity Investment Fund Center (Limited Partnership) (萍鄉市勤道鑫控股權投資基金中心（有限合夥）), an Independent Third Party and 2.31% by Shenzhen Qin Tao Capital Management Co., Ltd. (深圳市勤道資本管理有限公司), an Independent Third Party, respectively. For further details of the subsidiaries of our Company, see Note 17 to "Appendix IA — Accountants' Report of the Group" of this Prospectus.

(5) Certain percentage figures included in the above chart have been subject to rounding adjustments.

Corporate Structure Immediately After the Global Offering

The following chart sets forth the shareholding and corporate structure of the Group immediately after the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised):

Notes:

(2) The shareholding set forth in the above graph is calculated based on the total share capital of 1,945,390,732 Shares immediately after the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised). As of the Latest Practicable Date, 6,046,200 A Shares were held by the Company as treasury shares. According to the Company's PRC Legal Advisor, the treasury shares held by the Company did not carry any voting rights on all matters at Shareholders' meetings or enjoy any dividend rights. As such, Mr. Yuan Yonggang, Mr. Yuan Yongfeng, Mr. Yuan Fugen, other A Shareholders and the H Shareholders will be entitled to exercise approximately 15.61%, 12.76%, 3.03%, 62.73% and 5.87% of the voting rights at general meetings of the Company (excluding treasury shares with no voting rights), respectively, immediately after the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised).

Please refer to the notes (1), (3), (4) and (5) to the paragraph headed "—Corporate Structure Immediately before the Global Offering" above for more information.

OVERVIEW

We are a manufacturer primarily focused on PCBs, precision components, touch panels and LCMs and optical transceivers, with a global presence and operating footprint. Our products are widely used in consumer electronics, automobiles, data centers, telecommunications equipment and industrial control devices, ultimately enabling the connection of people, devices and infrastructure. We are also rapidly expanding our capabilities into the data center end market, strengthening our capabilities to support the deployment of AI across data center and the edge and thereby advancing the transformation towards an intelligent and connected era. In September 2025, we entered the optical transceiver business through our acquisition of Source Photonics, thereby expanding our product portfolio to include optical transceivers.

Our dedication to innovation, continuous improvement and operational excellence since the beginning of our journey has enabled us to achieve leadership in our core product areas. The global PCB market is highly competitive and fragmented, with the top 10 players accounting for 37.4% of the total market. According to CIC, we are the second-largest FPC supplier with a market share of 24.5% and the third-largest PCB supplier globally by revenue with a market share of 4.2% in 2025.

We have a diversified portfolio built around our core customers. Our PCBs, precision components, touch panels and LCMs and optical transceivers are widely used in consumer electronics, automobiles, data centers, telecommunications equipment and industrial control devices. We leverage synergies across R&D, engineering, supply chain and operations to deliver comprehensive solutions for our customers, and we offer an extensive multi-product portfolio to leading global technology companies.

Within our diversified product portfolio, our products with long-standing track record, including PCBs, precision components, touch panels and LCMs, serve the consumer electronics, automotive and telecommunications end markets and provide a stable and resilient revenue and cashflow. These businesses form the foundation of our operations and support the sustainability of our overall performance. In parallel, our optical transceivers and AI PCBs targeting the AI and data-center end-markets, represent our primary growth engine, with the demand driven by the accelerating global build-out of AI-related infrastructure.

The increasing penetration of edge AI devices, primarily smartphones, PCs, automotive and industrial and IoT equipment where AI models are run locally at or near the point of data generation rather than relying primarily on cloud-based processing, together with the ongoing electrification of vehicles and the upgrade of in-vehicle infotainment systems, is expected to support continued growth in content value and demand across our products with long-standing track record. Meanwhile, according to CIC, major hyperscalers in the United States and China are expected to materially increase their capital expenditure, by approximately 60% to 70%, in 2026, driving the demand for our optical transceiver and AI PCB products.

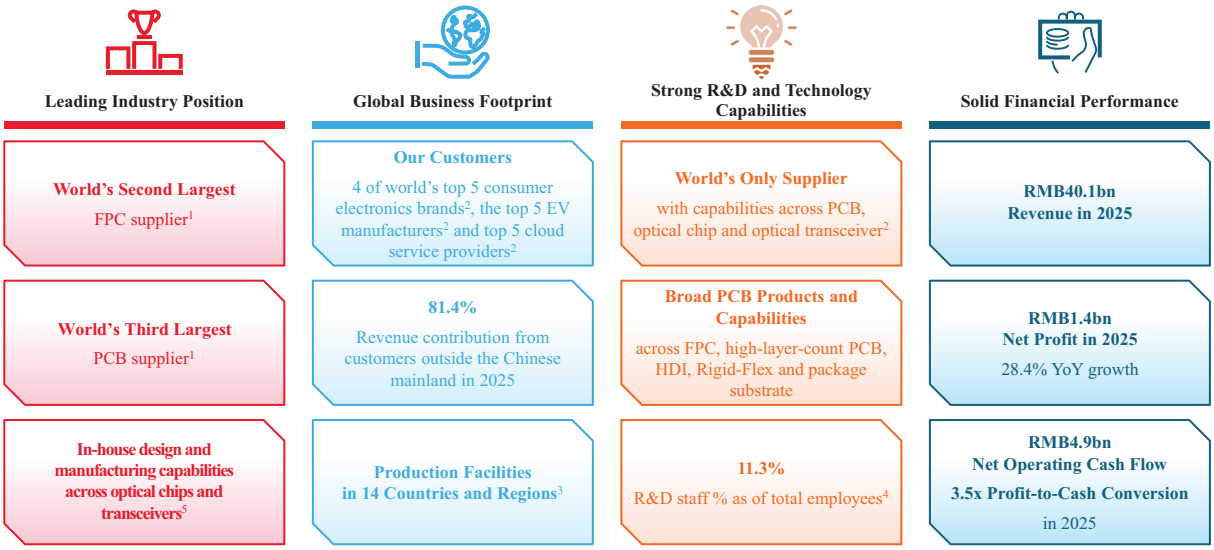

Our strategies have translated into deep, long-term relationships with leading global brands. We are a long-standing partner to four of the world's top five consumer electronics brands, as well as the top five EV manufacturers and the top five cloud service providers. We work closely with customers in the early stages of their product design processes, which enables us to build long-term trusted customer relationships and gains insight into latest industry developments and technological trends. Together with our intelligent manufacturing capabilities and global footprint, this approach is critical to meeting our customers' stringent requirements to ensure product quality, delivery efficiency and supply chain resilience.

We have been focusing on expanding our global manufacturing presence while enhancing regionalized operations and service capabilities that address our customers' evolving needs. Our recent acquisition of GMD, a European automotive components supplier, further exemplifies this strategy, where we will apply our manufacturing expertise to localized operations to deliver best-in-class service to an expanded customer base. In the six months ended June 30, 2026, 83.2% of our revenue came from outside the Chinese mainland. As of the Latest Practicable Date, we had production facilities across 14 countries and regions in Asia, North America, Europe and Africa, with overseas employees representing approximately 19.1% of our total headcount.

At the same time, through investment in R&D and strategic M&A, we have built substantial know-how and capabilities in key technologies, including deep-via micro-drilling and ultra-fine line processing for FPC, high-layer-count PCB and high-build-up HDI used in GPUs, AI accelerator cards and data center switches, metal-mesh touch, automotive LCMs, brazing of die-cast components and design and

manufacturing of optical chips and optical transceivers. As of June 30, 2026, our R&D personnel accounted for approximately 11.3% of our total workforce, placing us in a competitive position in the global PCB industry and reflecting our strong focus on innovation. We continuously digitalize and automate our facilities to push the limits of advanced processes in intelligent manufacturing. Our smart production lines and facilities have received several distinctions, including the "National Intelligent Manufacturing Demonstration Factory," "Excellence-tier Smart Factory," "5G Factory" certification from the MIIT of the PRC, and the "IIoT Benchmark Factory" certification from Jiangsu Province.

The following chart demonstrates the highlights of our business:

Notes:

1. According to CIC, by revenue in 2025
2. According to CIC
3. As of the Latest Practicable Date
4. As of June 30, 2026
5. Taking into account Source Photonics, which we acquired in September 2025

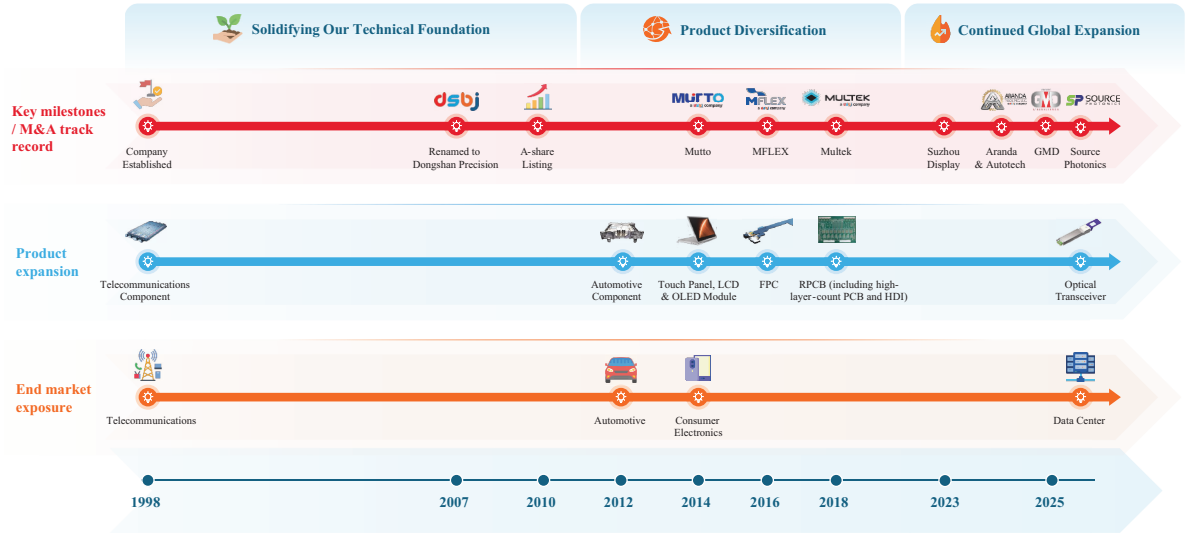

Development Phases

Since our founding in 1998 in Suzhou, China, we have been guided by our core values, "Diversity, Simplicity, Breakthrough, Journey." We strive to stay ahead of industry shifts and market dynamics. Through the combination of organic growth and strategic acquisitions, we have strengthened our core businesses while expanding into different markets. Along the way, we have continued to develop products that meet our customers' needs, enhanced our customer mix, broadened our end-market coverage and strengthened our competitiveness and technical capabilities.

We have been committed to serving a global customer base since our founding around the turn of the millennium. With a global mindset and through a focus on execution, we have continuously met the rigorous standards of international brands and earned recognition and trust from key players across machine tools and telecommunications equipment for the quality of our products and services since our early days. In 2010, we completed our initial public offering and became listed on the Shenzhen Stock Exchange. Since then, we have expanded the end markets we serve from telecommunications equipment to consumer electronics, automotive and data centers while broadening our product portfolio to include touch panels, LCD and OLED modules, automotive components, and FPCs and RPCBs, including high-layer-count PCBs and HDIs, keeping us in step with the global digitalization and intelligent transformation. More recently, we have further expanded our capabilities and product portfolio into optical transceivers, thereby deepening our footprint in emerging growth areas such as data center and AI server.

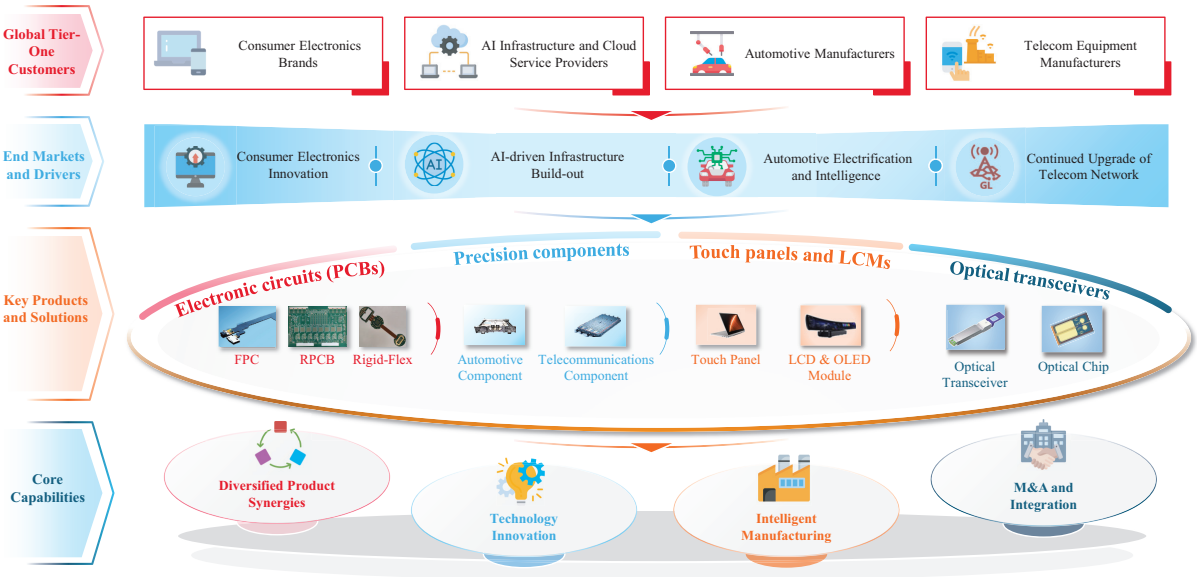

Over the years, we have established a strong track record in strategic acquisitions, which, together with our integration capabilities, has been instrumental in the expansion of our product portfolio and technological capabilities. As a result, we have expanded our customer base in both established and emerging markets, broadened our addressable markets and delivered sustained value creation for our shareholders.

The chart below highlights our journey and key milestones.

Our Products

Our products include PCBs, precision components, touch panels and LCMs and optical transceivers. We provide distinctive and comprehensive solutions by leveraging technological innovation and advanced manufacturing and creating synergies across product, R&D, technology, supply chain and sales. The following highlights our main products and solutions and their respective applications.

- *PCBs*: Our PCB products include FPC, RPCB and Rigid-Flex for consumer electronics, automotive, data centers and AI servers and telecommunications equipment. We serve leading global consumer electronics manufacturers, automakers and cloud service providers. Through these partnerships, we have built deep technical and process capabilities that reinforce our competitive advantage.

- *Precision Components*: Our precision components primarily include automotive components and telecommunications equipment components. We have established capabilities in precision components for the automotive and telecommunications industries. Over the past decade, we have extended our R&D and manufacturing capabilities developed in telecommunications components into automotive, broadening downstream applications and establishing long-term partnerships with major automakers worldwide and laying a solid foundation for further growth.
- *Touch Panels and LCMs*: We offer touch panels and LCD and OLED modules used in automobiles, smartphones, tablets, laptops, industrial control devices and smart home applications. Building on years of experience in consumer touch displays, we expanded into in-vehicle displays in 2023, where our proven technology and commercial execution continue to provide a strong platform for growth.
- *Optical Transceivers*: In September 2025, we entered the optical transceiver business through our acquisition of Source Photonics, a global provider of optical transceivers. Through the acquisition, we have gained in-house optical chip capabilities centered on high-speed EML chips with transmission rates from 2.5G to 200G. We currently focus on commercializing high-end 100G and 200G PAM4 EML chips, while advancing the development of next-generation technologies such as 400G EML chips and continuous wave-based ("**CW-based**") silicon photonics solution. In addition, we offer optical transceivers from 10G to 1.6T and are developing next-generation transceivers of 3.2T or higher. Our optical transceiver products serve a wide range of data center and telecommunications applications, creating a unique advantage that combines AI PCB with optical transceiver, positioning us as an integrated supplier of critical enabling technologies in the AI ecosystem.

Our Growth Opportunities

We operate in industries and markets in the midst of rapid innovation cycles and secular growth where AI plays an increasingly central role. Our sustained R&D supports downstream sectors such as consumer electronics, automotive and data center, with each creating significant opportunities for us. According to CIC, the global markets for PCBs, optical transceivers, precision components and optoelectronic displays are projected to grow at a CAGR of 7.7%, 34.6%, 6.7% and 5.7%, respectively, to reach US$123.3 billion, US$108.6 billion, US$743.9 billion and US$264.3 billion by 2030.

AI is catalyzing a new investment cycle and driving strong demand from the edge to data center. At the edge, as AI becomes mainstream and models advance, consumers are more frequently upgrading their devices. At the same time, surging AI compute needs are accelerating the build-out of new data centers and servers to deliver higher throughput, reliability and energy efficiency. With a comprehensive presence from the edge to data center, we are positioned to benefit from the following growth drivers.

AI-Driven Upgrades in Consumer Electronics

The growing prevalence of ultra-slim phones, foldable phones and edge AI devices is sharply increasing demand for FPCs and raising the bar for routing density, layer stacking and process precision. According to CIC, the global PCB market for AI-enabled consumer electronics reached approximately US$5.3 billion in 2025 and is projected to grow at a CAGR of 26.7% to reach US$17.3 billion by 2030. Today, FPCs in AI-enabled smartphones carry more than three times the routing density of those in conventional smartphones to accommodate additional traces in limited space and to enable high-speed connections between AI chips and multiple sensors. These designs pack more circuits and functions into the same footprint and demand extremely precise lamination and layer alignment. With faster product iteration, our advanced manufacturing technologies and long-standing relationships with tier-one customers enable us to adapt quickly to new designs, strengthening our competitive position and creating additional growth opportunities.

Electrification and Intelligence in the Automotive End Market

As the popularity of EVs and smart vehicles increases, automotive electronics accounts for a growing portion of vehicle cost, driving higher demand for PCBs that connect different critical electrical components. According to CIC, the size of global PCB market for automotive was approximately

US$9.7 billion in 2025 and is projected to grow at a CAGR of 6.2% to reach US$13.0 billion by 2030. In particular, automotive is the fastest-growing FPC application. This trend underpins sustained growth in automotive FPCs. According to CIC, the global automotive FPC market reached approximately US$1.5 billion in 2025, which accounts for 11.6% of the global FPC market and is projected to grow at a CAGR of 8.5% to reach US$2.3 billion, which accounts for 14.8% of the global FPC market by 2030, making automotive the fastest-growing FPC application. Shorter model cycles are also propelling the demand of our automotive components, including thermal components, battery enclosures, body-in-white parts and battery structural parts, into a high-growth phase.

Data Centers in the AI Era

The AI wave is driving significant investment in AI infrastructure, raising performance requirements and creating rapid growth opportunities in data centers. According to CIC, the size of global PCB market for data center was approximately US$18.1 billion in 2025 and is projected to grow at a CAGR of 15.0% to reach US$36.4 billion by 2030. We have production capabilities for high-layer-count PCBs with up to 78 layers, and for advanced HDIs on which eight or more extra layers of circuitry are added to each side of the board, and we are expanding capacity for high-layer-count PCBs. According to CIC, the size of global datacom optical transceiver market was approximately US$19.2 billion in 2025 and is projected to grow at a CAGR of 38.1% to reach US$96.2 billion by 2030. By combining our PCB expertise with our capabilities in optical chips and optical transceivers through our acquisition of Source Photonics in September 2025, we have built an integrated advantage in high-speed transmission that supports the expansion of AI infrastructure. We believe our comprehensive product portfolio and advanced technologies position us well to capture additional share in this growing market.

Our Financial Performance

In 2023, 2024, 2025 and the six months ended June 30, 2026, our revenue was RMB33,651.2 million, RMB36,770.4 million, RMB40,124.9 million and RMB27,797.7 million, respectively. Our net profit for the same years/periods was RMB1,965.1 million, RMB1,085.1 million, RMB1,393.0 million and RMB2,984.6 million, respectively.

Consistent growth and profitability in our core businesses have generated strong operating cash flow, supporting our future expansion and shareholder returns. In 2023, 2024, 2025, the six months ended June 30, 2025 and the six months ended June 30, 2026, net cash from operating activities was RMB5,040.7 million, RMB4,978.6 million, RMB4,902.3 million, RMB2,229.9 million and RMB2,268.5 million, respectively. Our profit-to-cash conversion ratio for the same years/periods was 2.6, 4.6, 3.5, 2.9 and 0.8, respectively.

OUR COMPETITIVE STRENGTHS

Integrated Technology Capabilities: Strategic Focus on Comprehensive AI from the Edge to Data Center

We are a company providing advanced products and solutions to leading technology companies worldwide. Built around the AI ecosystem, our capabilities span from edge AI devices to large-scale data centers. Our portfolio is positioned to capture the growth stemming from the demand for high-speed interconnects and data transmission worldwide. Our business uniquely integrates across PCB, optical chip and optical transceivers. This unique capability further strengthens our competitive position in the data center end market, and our integrated capability allows us to deliver optimized and high-performance solutions tailored to the specific needs of AI infrastructure. Additionally, it provides operational advantages, such as more collaborative relationships with tier-one customers.

This strategic focus underpins our ability to capture opportunities in our key end markets. According to CIC, by revenue in 2025, we are among the world's top three PCB suppliers with the market share of 4.2% and the second-largest FPC supplier globally with the market share of 24.5%. This blend of scale and specialization demonstrates our ability to mass produce increasingly complex, high-reliability PCB products

that meet AI-driven requirements for signal integrity, power density, thermal management and compact form factors. It also reflects a consistent track record of execution with tier-one customers where quality, yield and on-time delivery are paramount.

At the same time, we operate in the optical transceiver market through Source Photonics, which, according to CIC, is one of the only three companies globally with in-house design and manufacturing capabilities in high-speed optical chips and optical transceivers. In 2025, following our acquisition of Source Photonics in September 2025, we ranked seventh amongst global optical transceiver suppliers by revenue with the market share of 2.9%, based on Source Photonics' revenue for that year. With a roadmap spanning 10G to 1.6T and next-generation 3.2T modules under development, Source Photonics complements our PCB leadership and strengthens our position in the high-bandwidth optical interconnects that power modern AI data centers. By combining AI-ready PCBs with high-speed optical transceivers, we deliver lower latency, higher throughput and improved energy efficiency across the data center infrastructure. This also enables tighter co-design with customers, shortens development cycles and improves system-level performance in end products.

Taken together, our capabilities in AI and integrated technology stack create durable advantages for the next phase of AI-driven growth. We have invested ahead of demand in advanced processes and capacity as AI adoption accelerates across the edge and data center, and we are prepared to ramp new products and capture outsized share of the industry's expansion.

Partnerships with Tier-One Customers: Broader Coverage, Greater Value

Our long-term strategic relationships with leading global brands validate our capabilities and reputation. Our customer base includes top consumer electronics brands, automakers, cloud service providers and telecommunications equipment vendors, including four of the world's top five consumer electronics brands, the top five EV manufacturers and the top five cloud service providers.

We stay close to our customers and their evolving needs. Supported by a broad product portfolio and an intelligent, global manufacturing network, we deliver consistent quality with localized production and service. This model has made us a trusted, long-term partner to tier-one customers worldwide. Our strategy balances proven, established products that generate stable profits and cash flow with targeted investment in high-growth opportunities that define our next phase of expansion.

We act as a full-lifecycle partner to our customers with a broad yet tightly integrated portfolio. We work closely with our customers from early concept and co-development through testing, mass production, cost and yield optimization, supply chain coordination and continuous improvement. Early engagement allows us to contribute to our customers' product development and technology roadmaps, using real-world feedback to iterate our products more efficiently. Once established in a customer's supply chain, our technical depth, manufacturing scale and service model help us win adjacent products, expand share of wallet and establish deeper and stronger relationships that compound over time. For example:

- *Consumer Electronics:* We have been a key FPC supplier to a leading global consumer electronics company since our acquisition of MFLEX in 2016. Over the years of collaborations, we were able to gradually expand their use of our FPCs in their products and expand the applications of our FPCs from smartphones to tablets, laptops, smartwatches and wireless earbuds. Revenue contributed by this customer increased from RMB4,588.1 million in 2017 to reach RMB18,642.8 million in 2025.
- *Automotive:* We provide a suite of integrated solutions to a leading global manufacturer of high-performance EV, starting from body structural components and gradually expanding to smart cockpit and battery PCBs, liquid cold plates, battery pack trays, battery enclosures, and thermal parts, making us the only supplier able to provide automakers with multiple core components simultaneously, including FPCs, RPCBs, Rigid-Flexes and various other structural components, with customization across each category, according to CIC. From 2020 to 2025, the content value of the various products that we provide per vehicle in its EVs increased by approximately eight folds.

Globalization: Global by Scale, Local in Execution

We operate with a global mindset. Since our earliest days, we have been serving global customers based on international standards. We grew alongside China's reform and opening up process and have been operating to the standards set by global brands, from equipment and process controls to delivery and service. That discipline shaped our culture where operational excellence is instilled as a core value that has helped us build deep relationships with multinational enterprises. This has also given us the experience and mindset to drive global expansion.

As China shifted from attracting inbound investment to making outbound investment, we evolved from meeting foreign companies' needs in China to serving customers worldwide. Today, we are integrated into global supply chains and operate as a true global company.

We recruit talent across the globe, foster an inclusive culture and build service capabilities close to our core customers. We have R&D teams in the Chinese mainland, the United States, Singapore, Taiwan, France, Sweden, the Netherlands, Italy and Germany, enabling us to attract local experts and stay at the forefront of innovation.

We operate production facilities across 14 countries and regions in Asia, North America, Europe and Africa as of the Latest Practicable Date. Proximity to end markets helps us navigate complex trade dynamics, lower logistics and delivery costs and improve fulfillment efficiency. We are expanding and upgrading overseas production centers to meet customers' current and future needs and to build a supply chain that is cost-efficient, resilient and flexible. With local sales, engineering and operations teams, we respond quickly to orders, technical needs and service requests, ensuring seamless delivery with on-the-ground support.

The recent acquisition of GMD represents our latest efforts towards globalization. GMD brings a mature supply chain and resource network, with production and sales across Europe, Asia, and Africa and plants located near various automakers in Europe. This expands our reach with top European automakers, extends our automotive PCB and in-vehicle display offerings to GMD's customers and strengthens our European manufacturing and service footprint.

In an increasingly volatile global market, we orchestrate regional operations by leveraging technology leadership, scalable capacity, strong customer relationships and a multi-region manufacturing and supply chain network. This increases our resilience to disruptions, improves local responsiveness and delivery and ensures a stable supply chain for customers worldwide.

Technology and R&D: Market-Driven Innovation with Proven Track Record

We operate an innovation-centric R&D system designed to translate customer needs into products quickly and reliably. Our R&D effort spans a product's full lifecycle, from concept and design through prototyping, pilot builds and mass production, under disciplined stage-gate processes. We invest steadily in new materials, processes and production methods to shorten time-to-market and enhance yield and reliability.

Our R&D is market-driven and customer-centric. We maintain a robust pipeline and iterate rapidly, so our roadmap tracks where demand and technology are heading and can be deployed at scale. Through co-development with tier-one global customers, we advance technologies and accelerate commercialization across the value chain. Through sustained R&D investment and strategic acquisitions, we have developed distinctive strengths across PCBs, optical transceivers, precision components and touch panels and LCMs:

PCBs. We are a leader in FPC, high-layer-count PCB and HDI. Among the first manufacturers to mass-produce FPC with 50 μm microvias and 25 μm line/space, we offer dynamic FPC rated for over one million bend cycles. We produce advanced HDIs on which eight build-up layers of circuitry are added to each side of the inner core for GPU and AI accelerator cards, using heat-fused solid copper pillars to connect the layers, which keeps high-speed electrical signals stable and reliable. For AI data centers and high-end switches, we manufacture high-layer-count PCBs with more than 50 layers that support 224 Gbps

signaling. To meet the interconnect demands of multi-GPU AI clusters, we have mastered the technology of MLPCBs with over 70 layers. This technology replaces traditional high-speed cables while improving signal integrity, operability, and reliability.

Precision Components. We possess wide-ranging process strengths in precision components and have a proven record of bringing innovations into mass production that traces back to the 2000s. Our continuous tunnel-furnace copper brazing delivers over 90% bonding yield while meeting stringent specifications. Our automated flux spot-dispensing targets complex geometries, significantly lowers residue levels, reduces cost and enhances product reliability.

Touch Panels and LCMs. Years of sustained investments have given us robust capabilities and a leading position in advanced display technologies, and we are among the few suppliers qualified to produce complex, custom-shaped modules for all major LCD brands. Our metal-mesh touch solutions set the industry benchmark in various technical aspects. In the automotive sector, our LCD modules support the shift to slim, highly customized smart-cockpit displays with outstanding in-vehicle performance.

Optical Transceivers. Through Source Photonics, we now have capabilities ranging from optical chip development to optical transceiver manufacturing, with parallel roadmaps in EML and silicon photonics. We are at the forefront of ultra-high-speed transceivers R&D and commercialization: our 1.6T transceivers have entered the volume shipment stage with our key customers, and we are actively developing 3.2T and higher modules to meet the ultra-bandwidth interconnect needs of AI data centers.

To supplement our in-house R&D efforts, we collaborate with various leading universities, research institutes and trade associations to establish joint laboratories and talent programs. These partnerships extend our research limits and help convert breakthroughs into differentiated product advantages.

During the Track Record Period, we spent RMB4,629.5 million on R&D. Combined with our global footprint and deep customer engagements, these sustained investments enable rapid commercialization of next generation technologies for AI infrastructure and across all our focus areas, delivering higher quality, improved yields and resilient, reliable supply worldwide.

Intelligent Manufacturing: AI-powered and Data-driven Production Process

We operate an intelligent manufacturing system that embeds digital technologies across production planning, factory operations and shop-floor management, reshaping how we optimize production lines, run factories and manage performance. It has increased our throughput and yield and improved our ability to respond flexibly to demand.

Our intelligent manufacturing lines deliver significant economies of scale and capital efficiency. Continuous enhancements ranging from optimized line configurations to expanded capacity allow us to capture scale benefits across a broad product mix. Moreover, we are deepening AI automation processes across operations to elevate quality, lower costs and increase efficiency.

In practice, we deploy fully automated test lines incorporating machine vision and AI inspection, and we have rolled out SMT automation across our PCB production to reduce labor intensity and cycle time. AI-powered monitoring provides real-time guidance on the shop floor, optimizing workflows and ensuring adherence to operating standards. For quality control, AI vision systems improve defect-detection accuracy and reduce re-inspection costs, supported by a comprehensive multi-factor quality analytics system that unifies detection, analysis, and optimization in a closed loop. A centralized production control center orchestrates operations across all stages, enabling rapid exception response, efficient resource deployment, expedited issue diagnosis and consistently superior operational performance.

Our progress is validated by external recognition. Among our PCB production centers, our Yancheng Weixin FPC Intelligent Factory holds multiple distinctions from MIIT, including recognition as a "National Intelligent Manufacturing Demonstration Factory," an "Excellence-tier Smart Factory," and a "5G Factory." Our Suzhou Weixin FPC Smart Factory is recognized as a "Jiangsu Provincial IIoT Benchmark Factory." For touch panel and LCM, our Suzhou Display automotive LCD panel manufacturing unit was recognized

as a "Jiangsu Provincial Intelligent Manufacturing Demonstration Workshop." For precision component, our NEV motor controller smart factory earned the recognition of "Jiangsu Provincial Advanced-level Intelligent Factory." These distinctions underscore the scalability and robustness of our intelligent manufacturing model. Together, our AI-powered, data-driven production system and global factory network provide a resilient, cost-competitive supply base that can ramp new programs quickly and consistently.

Strategic M&A: A Key Driver for Step-Change Growth

We have a strong track record of strengthening and expanding our business, anticipating industry shifts and accelerating entry into high-potential markets through strategic acquisitions. Over the years, we have executed a series of landmark transactions, including the Mutto Optronics, MFLEX, Multek, Suzhou Display, GMD and Source Photonics. They opened focused pathways into high-growth opportunities across consumer electronics, automotive and data centers while expanding our footprint in North America and Europe.

We follow a disciplined screening process rooted in our industry insights and deep M&A experience. We prioritize targets with experienced management teams, blue-chip customers, stable cash flows, sensible valuations and clear synergy potential. This approach ensures we secure profitable growth from the outset and invest in businesses with demonstrable value-creation potential.

Accordingly, acquisitions unlock value for us in two pivotal ways. On one hand, they accelerate time to market for new products. By acquiring a target with proven technologies and manufacturing capacity with established teams and customers, we can swiftly capture growth windows as they open and leverage R&D, capacity, management organization and customer base of the target. On the other hand, they strengthen the broader ecosystem and our competitive position by streamlining and upgrading capacity, consolidating the market and creating durable synergies across product portfolios, cost structures, customer access and talent.

In this process, integration is where we differentiate ourselves. We begin with organizational integration by retaining strong management, seconding seasoned leaders to bridge processes and systems and instituting clear governance. We then realize strategic synergies by expanding customer access, optimizing the supply chain and standardizing shared finance and analytics platforms. On execution, we fuse operational strengths to build scalable models that elevate quality, yield and delivery reliability. Incentives are aligned by preserving existing compensation frameworks and layering in performance-linked short- and long-term cash and equity plans. We cultivate an open, inclusive culture that supports transparent engagement and durable performance across combined teams.

MFLEX, a leading global FPC supplier we acquired in 2016, has grown significantly since the acquisition. By 2025 the acquisition delivered an approximately 8x ROI on an operating-cash-flow basis. From 2018 to 2025, the net margin of Multek, a leading global PCB manufacturer focused on RPCB, including MLPCB and HDI that we acquired in 2018, improved from 4.6% to 10.4%. Collectively, these outcomes show that our M&A model delivers growth and profitability, enhances capital efficiency and generates operating leverage at scale. GMD and Source Photonics will further extend our reach into European automotive and high-speed optical transceivers.

Leadership: Experienced Management with a Global Perspective

Our Chairman, Mr. Yuan Yonggang, and our General Manager, Mr. Yuan Yongfeng, have guided our development since the 1990s. With sharp industry insight and decisive leadership, they have steered the company to capture opportunities and deliver consistent growth. Our management team is young yet deeply experienced in advanced manufacturing; many of them have experience in multinational enterprises that reinforce our globalization strategy and cross-border execution.

Our core management team brings an average of 25 years' experience across PCB, precision manufacturing and capital markets, bringing both strategic acumen and rigorous operational discipline. As of June 30, 2026, our R&D staff comprised 11.3% of our total employees, reflecting the depth of our engineering capabilities and our commitment to innovation.

We consistently raise operational standards, deliver superior products and services and drive industry-wide innovation as AI-enabled, connected technologies scale across devices, vehicles and data center infrastructure.

OUR GROWTH STRATEGIES

As we continue to grow our business and respond to evolving customer needs, our key priorities are to upgrade our portfolio toward higher-value products, scale capacity in key regions, pursue disciplined M&A with seamless integration, deliver breakthrough innovations and drive data- and AI-enabled productivity and deepen our global talent bench. By combining organic growth with strategic acquisitions, we expect to continue to broaden our addressable market, gain share in high-growth areas and solidify our position as a global advanced intelligent manufacturing leader with a strong technology portfolio and a collaborative stakeholder ecosystem.

Customers and Products: Closer to Demand, Faster to Market

We are committed to staying aligned with customer needs and expanding our portfolio in step with AI-driven demand, concentrating resources on high-growth products, deepening engagement with tier-one customers and scaling across priority end markets. To achieve this, we plan to pursue the following strategies:

- ***Anticipating tech and customer roadmaps***: We plan to stay ahead of technology trends and track tier-one customers' roadmaps to build a portfolio that enables upselling and cross-selling, increases value per product and drives revenue and market-share growth. Specifically, we plan to enable upselling primarily by leveraging our manufacturing platforms and qualification capabilities to support customers' adoption of more premium products, and deepening early-stage design engagement with customers to expand from initial sales into additional products and subsequent generations. We plan to enable cross-selling primarily by broadening our product portfolio within each customer by integrating and consolidating Source Photonics' product offerings into the Group's overall portfolio, and coordinating key customer coverage across business units and regions to identify and execute multi-product opportunities across customers' different product lines and end markets.
- ***Aligning to AI cycle and priority markets***: We aim to remain highly responsive to industry, market and customer shifts, align strategy to the AI growth cycle and deepen coverage across the end-to-cloud AI ecosystem. Specifically, we plan to focus on areas including consumer electronics innovation, automotive electrification and intelligence, and data center build-outs with sustained demand and significant growth potential.
- ***Investing in high-growth products and supply chains***: We plan to broaden our product portfolio and accelerate investment in products with the strongest trajectories. We plan to prioritize advanced PCBs and optical transceivers for AI computing demand, aiming to secure positions in more tier-one global brands' supply chains and to strengthen product portfolio for AI infrastructure. We will continue to refine the product mix and deploy resources to maximize operating efficiency.
- ***Feedback-driven growth***: We plan to tighten customer feedback loops to drive rapid iteration and expansion, converting customer wins into higher share with top customers. Leveraging our insight into edge AI devices and AI infrastructure, we plan to translate customer needs into scalable, high-quality products through innovation and advanced manufacturing, while building a more resilient, diversified customer base to drive volume and share gains.

Capacity Expansion: Regionalized Capacity for a Dynamic Global Market

We plan to expand advanced manufacturing capacity in line with customer demand and industry trends, while enhancing local operating capabilities across priority markets. To achieve this, we plan to pursue the following strategies:

- ***Capacity scale-up for optical transceiver and AI PCB***: We plan to proactively deploy capacity in China and overseas to sustain growth in priority products. For optical chips, we are currently developing 400G PAM4 EML chips, which are expected to be used in 3.2T optical transceivers and we plan to focus on 400G EML chips and CW-based silicon photonics solution, while expanding and optimizing capacity to respond quickly to AI-driven demand surges and to secure core positions in the supply chains of leading global cloud service providers. For optical transceivers, we offer products from 10G to 1.6T and are currently developing the next generation 3.2T transceivers. For high-end PCBs, we plan to address supply gaps by expanding capacity and optimizing the product mix at Multek to meet medium- to long-term demand from data center and AI servers.
- ***Localized capacity and supply chain***: We intend to expand and upgrade regionalized capacity and supply chains to enhance flexibility amid evolving trade and regulatory landscapes. We plan to increase the production capacity of high-precision FPC overseas to support local production and strengthen supply chain resilience. Drawing on our global network, we will allocate next-phase investments to regions with structural advantages in cost and supply chain access.
- ***Global sales and service expansion***: We plan to expand our global sales and service presence, invest in local support, reduce delivery costs and accelerate response times to deepen long-term partnerships with customers worldwide.

M&A: Strategic Transactions with Integration Excellence and Industry Insight

We aim to leverage our proven M&A and integration record to unlock synergies and pursue selective acquisitions and investments that strengthen our technology leadership and market positions. To achieve this, we plan to pursue the following strategies:

- ***Strategic transactions with market upside***: We intend to pursue acquisitions and investments across the industry value chain, focusing on targets with strong technical moats, clear product-market fit and meaningful customer pull. Guided by demand signals and industry trends, these moves will reinforce our technology leadership and underpin durable and long-term growth.
- ***Integration for rapid synergy***: We intend to continue to accelerate customer coverage and integration across operations, R&D and technology. Specifically, we plan to provide on-the-ground support in operations, customer engagement and governance and integrate processes and systems. We will leverage complementary products and customer relationships to drive joint development, enable cross-selling, broaden presence within key customers and expand market share.

Technology R&D and Intelligent Manufacturing: Invest in Innovation, Scale AI-Driven Operations

We aim to center our growth around innovation by increasing R&D in key technologies that align with tier-one global customers' needs and accelerating the rollout of digital and AI capabilities to reinforce leadership in advanced manufacturing. To achieve this, we plan to pursue the following strategies:

- ***Advancing Technology Boundaries***: We intend to increase R&D investment in strategic and core technologies. For high-end PCBs, we plan to advance high-layer-count PCB and HDI manufacturing and enhance high-speed signal-integrity control to improve performance and reliability. For optical transceivers, we intend to pursue a dual-track roadmap across EML and silicon photonics. We will prioritize EML in the near term to advance 800G+ products, while developing silicon photonics for its cost and integration advantages and deploying it in the most suitable applications.

- ***Accelerating AI- and data-driven execution***: We plan to upgrade our intelligent manufacturing infrastructure and integrated platforms on our existing systems and data governance framework. We intend to enable broad AI adoption through training and implementation, so R&D, production, supply chain and corporate teams can use AI tools in daily workflows.

Global Talent Pipeline: Attract, Develop and Integrate for Impact

We will invest in hiring, development and our rewards system to strengthen our talent pipeline to support our global strategy. To achieve this, we plan to pursue the following strategies:

- ***Attracting global talent***: We plan to broaden our recruiting channels to attract specialized talent with a global perspective. We will continue our "Evergreen Program", combining campus and experienced hiring to build a robust, long-term talent pipeline. As we scale globally, we also plan to prioritize local hiring in key overseas markets and launch programs to recruit and develop international talent in selected regions, deepening global talent integration and cross-cultural collaboration.
- ***Institutionalizing know-how and advancing career growth***: We plan to strengthen our company-wide learning system to support our employees' growth at every stage of their careers. We also aim to formalize and transfer critical technical know-how by expanding training on technologies to elevate the capabilities of our core technical talent. Leveraging our global footprint, we will combine China's engineering strengths with local expertise worldwide to build a more efficient and collaborative talent network.
- ***Rewarding results and building ownership***: We will continue to refine our compensation structures and promotion pathways to ensure fairness and market competitiveness. We intend to maintain a balanced mix of rewards, including both short- and long-term incentives and we will expand equity plans to align long-term value creation for both employees and the Company.

OUR DEVELOPMENT STAGES

We began our journey as a provider of precision components in the 1990s, growing alongside China's reform and opening up process and the rise of its manufacturing prowess. Through our focus on technological development and a culture of continuous improvement, we have since evolved into a global leader in intelligent manufacturing.

We have consistently captured opportunities in consumer electronics, automotive and AI infrastructure. For example, recognizing the growing demand for AI applications, we have been focusing on high-frequency and high-density PCBs, especially FPCs, and have become an important supplier to companies developing edge AI devices and next-generation vehicles. We respond dynamically to market demands by expanding and diversifying our product portfolio, establishing ourselves as a trusted partner to leading global brands across multiple industries.

At the same time, our ability to execute strategic acquisitions has been a cornerstone of our growth strategy. By identifying businesses that complement our own and integrating acquired companies into our operations, we have solidified our technological capabilities and expanded our product offerings. For instance, in 2016, our acquisition of MFLEX significantly expanded our expertise in FPCs, solidifying our position as a key supplier of consumer electronics and smart devices. In 2018, the acquisition of Multek enhanced our capabilities in RPCB including high-layer-count PCB and HDI, which further strengthened our positions in consumer electronics and extended them into the data center end market. Most recently, Source Photonics has expanded our product portfolio to include optical transceivers, which enable high-bandwidth data transmission for data centers, AI infrastructure and 5G networks.

Today, our PCB products, which represent our largest source of revenue, support complex, high-frequency, high-density applications that require strong signal integrity, low latency and high reliability. They meet the rigorous performance requirements of AI servers, accelerator cards and GPUs as well as high-end consumer electronics. Our optical transceivers extend that performance across the AI infrastructure, enabling high-bandwidth connections that link key components in data centers and AI servers. Our precision components and LCMs are also used in vehicles from major automakers worldwide.

Moreover, our comprehensive product portfolio enables us to cross sell to customers across end markets such as consumer electronics, automobiles and data centers. By delivering complementary solutions that span PCBs, precision components, touch panels and LCMs and optical transceivers, we are able to deepen our relationships with key customers and grow with them across successive product generations. We believe this breadth strengthens customer loyalty and margin resilience as we continue to develop products that enable greater performance, functionality and reliability.

OUR PRODUCTS

We offer a comprehensive suite of products in PCB, precision component, touch panel and LCM and optical transceiver. Many of our products are specifically designed and manufactured based on customizations and needs of our customers. During the Track Record Period, we had four operating segments:

- *PCB*: We provide a wide range of PCB products, including FPC, RPCB and Rigid-Flex for AI-enabled devices and AI infrastructure such as consumer electronics, automotive and data centers. These products meet diverse design and performance requirements of leading brands and enable compact and high-speed electronic systems for next-generation edge AI devices and data centers.
- *Precision Component*: Our precision components include structural parts and functional modules for automotive and telecommunications equipment. From battery enclosure to liquid cold plate, our products ensure superior reliability and performance to meet stringent quality standards of leading companies.
- *Touch Panel and LCM*: We offer touch panels and LCD and OLED modules designed for consumer electronics, automotive and industrial applications, supporting devices such as smartphones, tablets, laptops, all-in-one PCs, and automotive infotainment system.
- *Optical Transceiver*: We offer data center transceivers and telecommunications transceivers through Source Photonics, enabling high-speed, low-latency connectivity for data centers and telecommunications networks. With advanced technologies and energy-efficient designs, our products address the growing demands of high-speed communication.

The following table sets forth a breakdown of our revenue by business segment for the periods indicated, including the optical transceivers segment following our acquisition of Source Photonics.

	Year Ended December 31,						Six months ended June 30,

Notes:

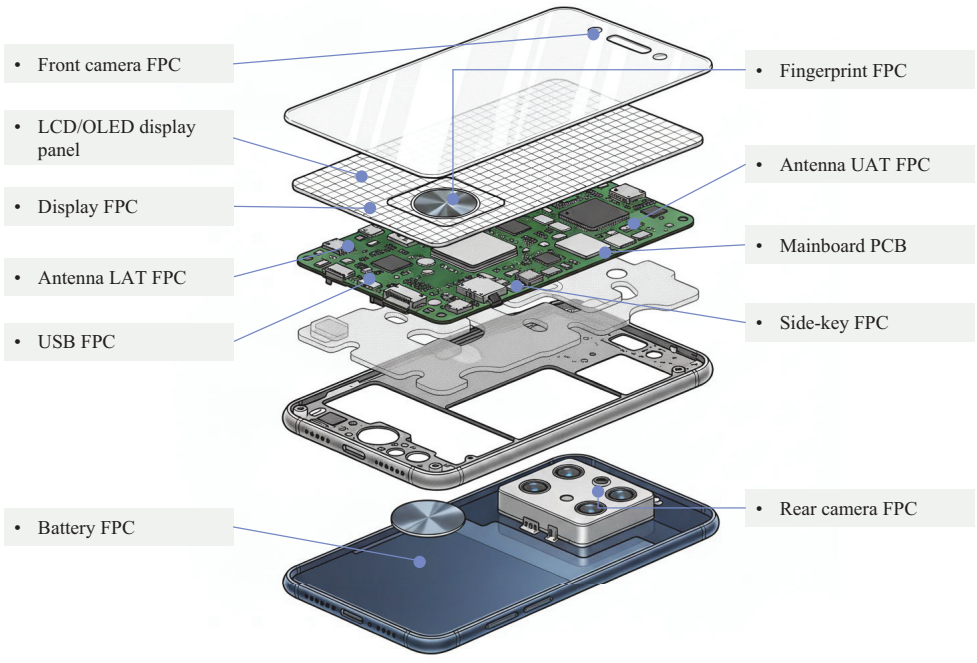

(1) Sales volume is measured using the following units for each product category: electronic circuit products are measured by the aggregate area of specific product types in square meters (m²), representing the total area of PCBs sold; precision component, touch panel and LCM and optical transceiver products are measured in units, representing the total number of finished components or assemblies.

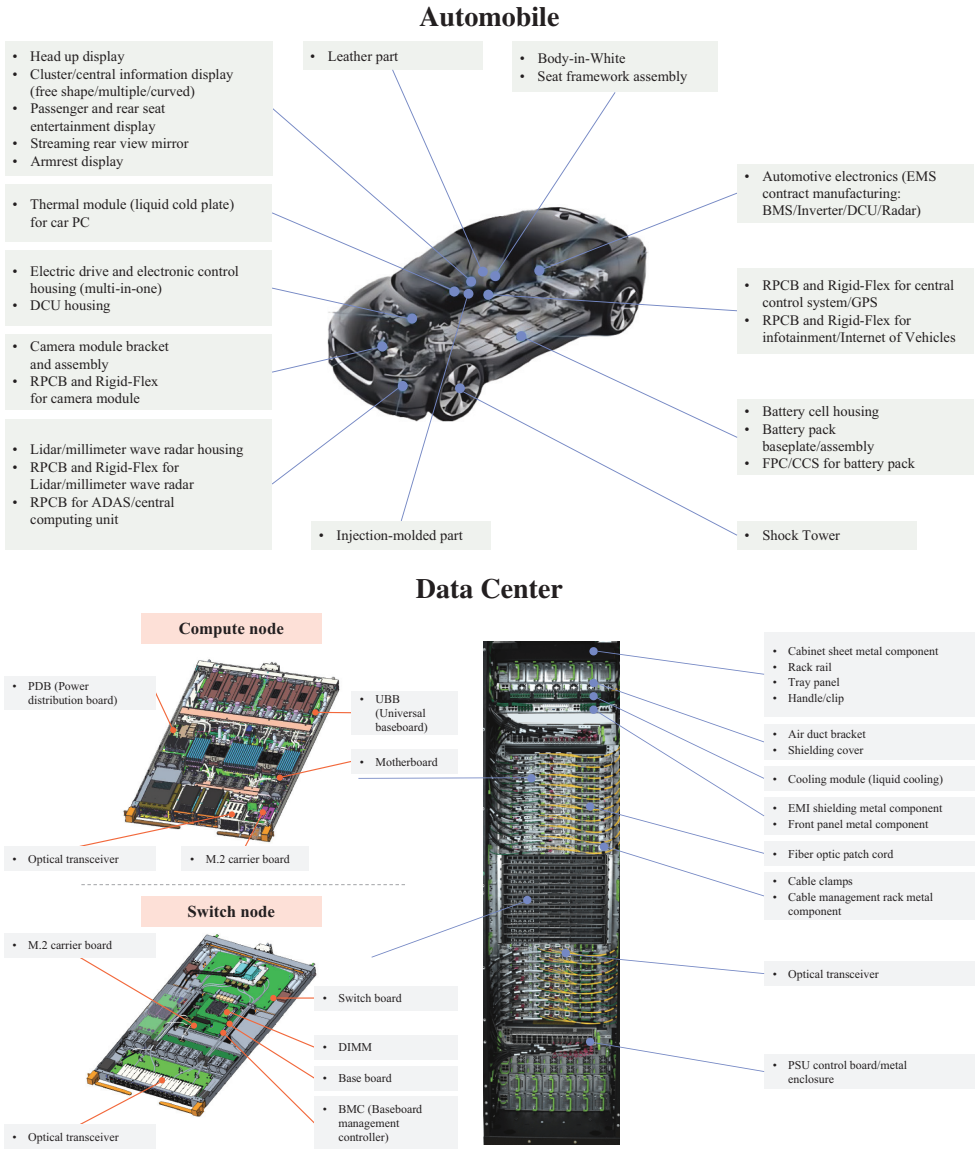

(2) Average selling price is calculated by dividing the revenue in a given product category by the corresponding sales volume.

(3) Sales volume and average selling price in 2025 represent those for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

The following diagrams show the products we are capable of producing:

Smartphone

Product Portfolio

PCB

We provide a wide range of PCB products that include FPC, RPCB and Rigid-Flex, each designed to address unique design challenges and performance requirements of these products.

FPC

FPC is a type of PCB constructed on a substrate made from flexible materials such as polyimide or polyester, with copper foil layers providing electrical interconnection. Its unique adaptability allows repeated bending, folding and twisting without compromising electrical performance. This flexibility enables FPCs to be installed seamlessly in narrow or irregular spaces, reducing weight and offering greater design freedom. These characteristics make FPCs an ideal solution for compact devices and for applications that require mobility and durability.

Our FPC portfolio includes single-layer FPCs, multi-layer FPCs and FPCAs, which integrate components such as resistors, capacitors, inductors and functional devices directly on the circuit. They are engineered to meet the performance requirements of end products across industries. With thicknesses as low as 0.05 mm, our FPCs are optimized for ultra-thin and lightweight designs, enabling compact solutions that

prioritize space efficiency and performance. To ensure durability and reliability, we use advanced materials that can withstand high temperatures and maintain signal integrity in demanding environments.

FPCs are widely used in edge AI devices, consumer and automotive electronics. In edge AI devices, our FPCs are becoming increasingly important for creating thinner, lighter and more advanced products, supporting high-performance features in increasingly miniaturized form factors. They are used by some of the world's leading brands in AI smartphones, wearables and other smart devices. In automobiles, our FPCs enable complex wiring in space-constrained environments, supporting critical systems such as battery management and infotainment in automobiles. As industries evolve, our FPCs remain at the forefront and help drive the creation of next-generation AI devices that are smarter, more compact and more efficient.

RPCB

RPCB is a type of PCB made with a rigid substrate that cannot be bent or flexed. Our RPCB products range from single-layer PCB and MLPCBs to HDI, meeting the needs of our customers across various industries with a focus on AI computing and consumer electronics.

Single- and double-layer PCBs are of simpler designs, featuring one or two layers of conductive copper foil separated by a substrate. They are cost-effective solutions ideal for electronic systems of moderate complexity. MLPCBs contain multiple layers of conductive copper separated by insulating materials, offering higher component density and enhanced electrical performance. HDI takes integration further by enabling higher wiring density and component miniaturization through advanced via structures, such as blind and buried vias.

In particular, high-layer-count PCBs and high-build-up HDIs allow for compact layouts, better signal performance and increased reliability in space-constrained applications. Therefore, they are particularly suited for AI computing infrastructure, where high-frequency and high-speed data transmission is critical. Our ELIC technology is the pinnacle of HDI by allowing interconnection between any layers, enabling ultra-dense routing in extremely compact designs. Our MLPCBs and HDIs utilize ultra-low-loss M8/9-grade materials to achieve transmission rates of up to 224Gbps, meeting the demanding requirements of GPUs, AI accelerator cards, AI servers and data center switches.

We possess expertise in producing high-layer-count MLPCBs with up to 78 layers and advanced HDIs on which eight build-up layers of circuitry are added to each side of the inner core. These capabilities enable our solutions to deliver high-speed interconnections, minimize signal loss and maintain stable performance under demanding operating conditions. To manage thermals in high-power designs, our thermal-enhanced PCBs integrate embedded copper blocks, buried copper pillars and laser copper filling to increase heat-spreading efficiency and reliability.

Rigid-Flex

Rigid-Flex consists of multiple rigid and flexible layers connected by plated through-holes, allowing them to integrate seamlessly into compact and complex electronic designs. It combines the durability of RPCB with the adaptability of FPC, creating a hybrid structure that offers both mechanical strength and design flexibility. The flexible sections enable movement or folding, while the rigid sections provide structural support and space for mounting components.

This unique combination reduces the need for connectors and cables, simplifying assembly and improving reliability by eliminating potential points of failure. Our Rigid-Flex products utilize high-performance materials to ensure thermal stability and reliability in demanding environments. Therefore, they are particularly suited for industries such as medical devices and automotive systems, where devices require both high performance and the ability to fit into tight spaces.

The table below sets forth a summary of our key PCB products.

Product Type	Key customer types	Fee charging model	Pricing policy	Average delivery cycle
FPC	Brand customers	Per-unit pricing, with payment due on agreed billing cycles after customer acceptance	Pricing determined based on aggregated costs and product specifications and design requirements	Approximately 20 to 40 days

Key Features/Specs	Application Scenarios
• Minimum line/space: 25/25 μm • Laser microhole diameter: 50 μm • Maximum product length > 2.0 m	Smartphone motherboard, display/ camera module, high-frequency and high-speed antenna, EV BMS

Product Type	Key customer types	Fee charging model	Pricing policy	Average delivery cycle
RPCB	Consumer electronics brands	Per-unit pricing, with payment due on agreed billing cycles after customer acceptance	Pricing determined based on aggregated costs and product specifications and design requirements	Approximately 20 to 40 days

Key Features/Specs	Application Scenarios
• Capability of producing MLPCBs with up to 78 layers • Advanced thick-board HDI capability, supported stack-up: 8+N+8 with max. board thickness of 6 mm • Advanced HDI/ELIC with mSAP for high-density routing, small-pitch BGA and cavity designs • Ultra-low-loss, high-frequency/high-speed materials • Advanced via and backdrilling method; high aspect ratio plating (≥30:1) • The adoption of CAF-resistant materials, thick-copper options, low-roughness copper foil and copper-paste sintering for improved reliability	AI server, 5G base station, smart driving system, AR&VR device, wearable, robotics

Product Type	Key customer types	Fee charging model	Pricing policy	Average delivery cycle
Rigid-Flex	Brand customers	Per-unit pricing, with payment due on agreed billing cycles after customer acceptance	Pricing determined based on aggregated costs and product specifications and design requirements	Approximately 20 to 40 days

Key Features/Specs	Application Scenarios
• High-layer-count Rigid-Flex with up to 20 layers and panels as large as 585 mm • Ultra-low loss materials and high planarity and cleanliness standards to minimize loss and ensure signal integrity • Hybrid stack-ups with HDI of build-ups of 6+N+6, as well as 45/45 μm lines and spaces, feature an engineered flexlayer stack design that ensures bending reliability	AI server, data center switch, smart driving system, LiDAR, smartphone and tablet, AR&VR device, CT scanner, industrial equipment, robotics

Precision Component

Automotive Component

We offer a wide range of structural parts and functional modules designed to meet the evolving features of the automobiles. Our products mainly include battery enclosures and liquid cold plates, which play critical roles in enhancing vehicle performance, safety and energy efficiency.

Battery Enclosure

Battery enclosures are integrated structural components that utilize lightweight, high-strength aluminum alloys to combine battery modules, management systems and other core elements into a single assembly. In our battery enclosures, integrated thermal management channels enhance heat dissipation, while the enclosure's structural role as part of the vehicle chassis lowers the center of gravity and improves both stability and overall vehicle performance. To achieve these functional goals with high efficiency and precision, we employ 8,200-ton one-stop stamping and advanced laser welding techniques, supplemented by automated CCD inspection systems to guarantee consistent quality and dimensional accuracy to ensure superior safety, reliability and performance to support automobiles.

Liquid Cold Plate

Liquid cold plates are liquid-cooled heat exchangers that remove heat from high-power electronics, enabling more compact and quieter cooling systems of higher reliability. Our ECU cold plates provide precise thermal management for EV ECUs, which are the vehicle computers that control functions from powertrain to safety and infotainment. Using precision-stamped laminations, fully automated laser welding and Cu-Al reflow soldering, they help maintain optimal component temperatures, ensuring consistent performance in demanding environments.

EV Motor Housing

EV motor housings are structural enclosures that protect the traction motor and controller from shock and vibration. Our products meet IP54-plus dust- and water-ingress protection for long-term reliability. We build them using high-pressure vacuum die casting with cylinder-sleeve insert casting to achieve tight tolerances on critical bores, complemented by fully automated friction welding for high-strength, leak-tight joints that withstand vibration and thermal cycling.

At the same time, GMD's capabilities across body-in-white, chassis and thermal solutions complement our portfolio, strengthening our ability to deliver integrated solutions for more global brands. Leveraging decades of experience in automotive structural components, we meet the stringent quality standards of leading automakers and are a trusted supplier to many of the world's largest automakers. The table below summarizes our key automotive component products.

Product type	Key customer types	Fee charging model	Pricing policy	Average delivery cycle
Automotive component	Automotive suppliers	One-off upfront engineering and tooling/ fixture fees, followed by per-unit pricing after the start of production	Pricing based on total costs, with designs engineered to the customer's target cost, and quotes set based on the overall program profitability	Approximately 50 days

Representative Product	Key Features/Specs	Application
Battery enclosure	• Progressive die stamping with robotic handling • Automated adhesive dispensing and welding	EV battery

Representative Product	Key Features/Specs	Application
Liquid Cold Plate	• Precision-stamped laminations • Fully automated laser welding • Copper-aluminum reflow soldering	EV ECU, EV battery, EV inverter
EV Motor Housing	• High-pressure vacuum die-cast aluminum with cylinder-sleeve insert • Fully automated friction welding for high-strength, leak-tight joints • Cleanliness-controlled manufacturing for reliability	EV motor

Telecommunications Equipment Component

We provide high-performance telecommunications equipment components tailored to support the growing complexity of global communication networks. Our products mainly include mobile communication filters and antennas that are designed to optimize the efficiency and reliability of both indoor and outdoor deployments. Notwithstanding the strategic scaling back of this business, we intend to continue its operations and will adjust its scale as market conditions evolve.

Mobile Communication Antenna

Mobile communication antenna receives electromagnetic signals from the environment and transmits signals from the base station to external networks. Aligned with next-generation network requirements, our antennas employ low-intermodulation, high-power and wideband technologies, along with high-gain, low-loss and low-wind-resistance designs. These advances deliver phase-shifter insertion loss below 0.7 dB, antenna gain above 17.5 dB and intermodulation below -155 dBc, ensuring high-quality transmission and reception while enhancing the efficiency of mobile network infrastructure.

Mobile Communication Filter

Mobile communication filter is a component of base stations to ensure only electromagnetic signals within designated frequency bands are processed, which is essential for maintaining operational integrity and minimizing interference. By combining low-intermodulation designs with high-power metal and ceramic architectures, our filters achieve passive intermodulation below -155 dBc with stability exceeding 90%. We have also reduced the volume of our individual mobile communication filter by 50%, further enhancing integration flexibility for our customers.

The table below sets forth a summary of our main telecommunications equipment component products.

Product type	Key customer types	Fee charging model	Pricing policy	Average delivery cycle
Telecommunications equipment component	Consumer electronics brands	One-off upfront engineering and tooling/ fixture fees, followed by per-unit pricing after the start of production	Pricing based on total costs, with designs engineered to the customer's target cost, and quotes set based overall program profitability	Approximately 60 days

Representative Product	Key Features/Specs	Applications
Mobile communication filter	• Peak power handling up to 7,000 W • Mass-production intermodulation (IMD) below -153 dBc • Channel isolation >110 dB • Typical insertion loss <1.0 dB	Mobile base stations

Representative Product	Key Features/Specs	Applications
Mobile base station antenna	• Antenna phase shifter insertion loss < 0.7 dB • Typical antenna gain > 17.5 dB • Mass-production intermodulation (IMD) below -155 dBc	

Touch Panel and LCM

We offer a comprehensive range of touch display modules to meet the diverse needs of consumer electronics, automotive applications and industrial equipment. Our products mainly include touch panels for automotive, industrial and medical equipment and LCD and OLED modules for smartphones, laptops and tablets.

Touch Panel

In automotive, industrial and medical applications, our touch panels are widely adopted in central control screens, digital dashboards and rearview mirrors. They achieve touch accuracy within ±1.0mm and a response time of less than 30.0 milliseconds, meeting the increasingly stringent requirements of smart driving systems. They are also used across healthcare, retail and industrial applications, including medical equipment, POS terminals and interactive kiosks. These modules feature fast response time and adaptability to various environments, ensuring versatility across industries.

LCD & OLED Module

Our LCD & OLED modules are engineered as complete solutions, combining advanced display technologies with robust structural designs to achieve superior performance and stability. For laptops, tablets and wearable devices, they deliver high brightness of up to 1,000.0 nits, ensuring clear visibility in outdoor environments and feature wide color gamuts of over 96.0% NTSC for vibrant and accurate color reproduction. These modules integrate seamlessly into devices using full-fit lamination processes, enhancing durability and improving optical clarity.

With an integrated manufacturing process and a robust supply chain, we provide customized display modules that ensure high production yields, consistent quality and reliable delivery, effectively meeting the needs of global customers in different industries.

Product type	Key customer types	Fee charging model	Pricing policy	Average delivery cycle
Touch panel	Brand customers and ODMs			Approximately from 8 to 10 weeks
LCD & OLED module	Brand customers and ODMs	Per-unit pricing, with payment due on agreed billing cycles after customer acceptance	Pricing based on total costs, with reference to prevailing market prices, and determined through tendering or commercial negotiations	Approximately from 30 to 70 days

Representative Product	Key Features/Specs	Application
GF2-structured touch panel	• In-plane mesh width 1.7 μm • Edge line width 8 μm / 8 μm • Sensor transmittance 90% • Supports active pens (AES / USI / MPP)	Laptops, all-in-one PCs, industrial control equipment, medical device
AOFT-structured touch panel	• Touch panel thickness 0.25 mm, weight 25 g • In-plane mesh width 1.7 μm • Edge line width 8 μm / 8 μm • Sensor transmittance 90% • Supports active pens (AES / USI / MPP)	Laptops, all-in-one PCs, industrial control equipment, medical device

Representative Product	Key Features/Specs	Application
LCD/OLED display module for smartphone	• Blind via fill: minimum via diameter 2.7 μm • Maximum fill height 0.5 mm & minimum fill width 0.3 mm • COG bonding accuracy ±5 μm	Smartphones
LCD/OLED display module for automotive	• Surface lamination: minimum bending radius 750 mm • Irregular cutting: minimum thickness 0.125 mm	Vehicle central display

Optical Transceiver

We offer data center transceivers and telecommunications transceivers through Source Photonics, enabling high-speed, low-latency connectivity for data centers and telecommunications networks. With advanced technologies and energy-efficient designs, our products address the growing demands of high-speed communication. The table below provides a breakdown of revenue of the optical transceivers by Source Photonics by product type during the years/period indicated before our acquisition.

Product Category	Year ended December 31,				Nine months ended September 30,	
	2023		2024		2025	
	RMB	*%*	*RMB*	*%*	*RMB*	*%*
	(in RMB thousands, except for percentages)					
Data Center transceivers	460,061	35.2	1,940,435	65.9	3,007,239	82.9
Telecommunications transceivers	826,037	63.3	971,225	33.0	599,577	16.5
Others[(1)]	19,047	1.5	33,672	1.1	20,699	0.6
Total	1,305,145	100.0	2,945,332	100.0	3,627,515	100.0

Note:

(1) Primarily includes revenue from sales of materials.

Data Center Transceiver

Our data center transceivers are designed to meet the demands of AI infrastructure, driven by the rapid growth of AI computing and applications. We focus on 400G modules in QSFP-DD, QSFP112, and OSFP and 800G modules in OSFP and QSFP-DD with DSP-based, LPO and LRO architectures. Our 1.6 T transceivers offer multiple technology options including EML, SiPh and InP PIC and adopt compact form factors such as OSFP to deliver ultra-high speed, low latency connectivity. Our own 100G PAM4 EML chips have been used in over ten million units for 400G and 800G transceivers, and our 200G PAM4 EML chips are in mass production to enable 1.6T transceivers.

Meanwhile, our 400G PAM4 EML chip in development will enable 3.2T optical transceivers. In addition, we are advancing laser packaging for co-packaged optics that integrates switching and optical/electrical conversion to significantly shorten signal paths and reduce latency, which makes it well suited for AI training and inference.

Our data center products leverage low-loss optical materials, robust signal integrity designs and adaptive power management for stable transmission and greater energy efficiency. These innovations reduce power consumption, enhance cost and durability advantages and position our solutions to meet the stringent requirements of AI data centers for speed and bandwidth.

Telecommunications Transceiver

Our telecommunications transceiver products mainly include products for optical transmission, wireless transmission and broadband.

Our optical transmission products are designed to meet the growing demand for high-speed data transmission in metro, access and long-haul networks, combining high reliability with long-distance performance. They support multiple form factors and data rates, such as SFP, SFP+, SFP28 and QSFP-DD, and are capable of operating from 1Gb/s up to 800Gb/s.

Our wireless transmission modules operate at the physical layer of the wireless networks, performing precise electrical-to-optical and optical-to-electrical conversion to enable high-speed data exchange among BBUs, AAUs and DUs, thereby supporting stable, reliable front-haul, mid-haul, and backhaul connectivity. They are fully compatible with 5G and 5.5G deployments.

Our broadband products are built on PON architecture, a point-to-multipoint fiber system that uses passive splitters to link an OLT to ONUs/ONTs without powered field equipment. Covering both 10G PON and 25G/50G PON and aligned with F5G and F5G-A, they are deployed in FTTH, enterprise broadband and campus networks to deliver high speed data services to end users. Powered by our in-house 50G laser chips, these solutions are deployed at scale in commercial 50G-PON projects, supporting high-speed broadband services and AI data centers.

Product type	Key customer types	Fee charging model	Pricing policy	Average delivery cycle
Data Center Transceivers	Cloud service providers, network equipment providers	Per-order pricing, with payment due on agreed credit terms after customer acceptance	Pricing is determined with reference to product cost plus a mark-up and prevailing end-market prices, and is adjusted based on customers' technical specifications and design requirements	Approximately 60-90 days
Telecommunications Transceivers	Telecommunications network equipment providers	Per-order pricing, with payment due on agreed credit terms after customer acceptance	Pricing is determined with reference to product cost plus a mark-up and prevailing end-market prices, and is adjusted based on customers' technical specifications and design requirements	Approximately 60-90 days

Product Type	Key Features/Specs	Application
Data Center Transceivers	• High bandwidth and protocol compatibility: supports 800G and 1.6T; supporting multiple network protocols and is optimized for AI fabrics with InfiniBand and RoCEv2 for GPU cluster parameter sync; compatible with	• Compute cluster interconnect and storage interconnect for data centers

Product Type	Key Features/Specs	Application
	standard data center Ethernet for storage–compute and server-to-server traffic • High-density packaging: scalable for large AI compute clusters • Low latency and high throughput: ensures real-time data exchange across multi-GPU training nodes	
Telecommunications Transceivers		
Optical Transmission	• Transmission distances from 10 km up to 100 km without relying on additional complex amplification or coherent detection • Multi-rate support: 10G / 25G / 100G / 400G / 800G with mainstream PAM4 modulation and NRZ for mid/low-rate scenarios, meeting bandwidth needs from metro to backbone layers • Protocol compatibility: interoperable with OTN, SDH, and Ethernet; supports standard frame structures such as OTU-k and STM-N • Designed for 24/7 continuous operation with low-power circuitry	• Data center interconnect (DCI) for cross-region sync/ backup • Enterprise private lines • Mobile backhaul between 5G core and base stations
Wireless Component	• Support 25G, 50G, and 100G data rates: core protocol adaptation for CPRI/eCPRI (front-haul AAU-DU) and Ethernet (midhaul DU-CU), meeting 5G/5.5G/6G RAN needs • Short-to-mid-reach optimization: low-loss optical packaging and high-sensitivity photodetectors to minimize attenuation over short and medium distances • Low-latency transmission • High outdoor reliability for 24/7 operation with EMI-resistant design • Low power consumption	• 5G and 5.5G wireless communications
Broadband	• Rate and generational compatibility: supports mainstream 10G-PON and 25G/50G-PON generations, with multi-tech coexistence across GPON, XGS-PON, and 50G-PON • Engineered for the cost sensitivity of large-scale broadband access deployments	• Home and enterprise broadband, IPT

RESEARCH AND DEVELOPMENT

We consistently invest in research and development to expand our product portfolio, seize new market opportunities and strengthen our competitive edge in meeting the demands of leading global brands. By exploring innovative materials and technologies, we continuously improve our products and refine our production process. These investments enable us to deliver high-performance and quality products while staying at the forefront of the rapidly evolving market.

R&D Process

Our products are designed to meet a wide range of application requirements of our customers. By closely monitoring industry trends and maintaining collaborations with our customers, we ensure that our

products meet the latest standards for performance and functionality. Due to the customized nature of our products, our R&D is often carried out in close collaboration with customers based on their customization requirements and end product designs. We typically engage well before a customer's product launch, working together to design prototype and validate components tailored to their performance, integration and reliability requirements.

We follow a systematic approach to product development as detailed below across our business lines:

- *R&D assessment and market research*. We run structured market research to pinpoint technology trends, customer needs and competitive benchmarks.
- *Concept design and feasibility validation*. We translate market insights into product concepts and then tentative specifications. Throughout this process, the R&D team conducts cross-functional reviews with marketing, engineering and supply chain to evaluate manufacturing costs, product safety and compliance with applicable laws and regulations and hazardous substances related requirements.
- *Prototype development*. We generate complete engineering documentation with detailed design and key metrics, and then build prototypes. We provide samples for customer qualification and iterate quickly based on test feedback to meet performance targets.
- *Pilot and validation*. We validate product design, production and supply chain readiness through trial builds and production process evaluations.
- *Evaluation and product release*. We complete detailed testing and project reviews prior to release, finalize supplier qualification and validate processes for mass production.
- *Mass production and scaled delivery*. We begin full-scale production in our production facilities. We leverage our intelligent manufacturing facilities by monitoring data in real time and continuously improving processes to raise yields and shorten lead times, ensuring quality and on-time delivery.
- *Continuous iteration*. We work closely with our customers on product improvements and next-generation development, iterating rapidly to keep our products aligned with their needs and at the forefront of the industry.

R&D Achievements

In addition to focusing on the R&D of specific products, we have enhanced our R&D efforts by advancing new materials, design innovations and process technologies. These advancements have resulted in a series of significant breakthroughs, earning us the trust of leading global companies as a reliable and innovative supplier:

- *PCB*. Building on integrated research in materials, processes and tooling, we have achieved mass production of ultra-thin FPCs, as well as the application of low-dielectric, low-loss modified polyimide materials in FPCs for antennas to improve signal integrity and transmission efficiency. For RPCB, we are able to produce MLPCB up to 78 layers. Our proprietary cavity fabrication process requires no extra isolation layers, significantly reducing cost and improving efficiency.
- *Precision Component*. We have advanced the use of new materials and validated their applications in production. For example, our novel solderable die-casting alloys enable direct die-casting and subsequent soldering of heat-dissipation components, eliminating laser welding, reducing part count and lowering overall costs. On production techniques, our research and deployment of continuous tunnel-furnace copper brazing has increased welding success rates.
- *Touch panel and LCM*. Our R&D in LCD and OLED design, cutting and bonding has consolidated multiple innovations into a stable, high-volume production process. With ±0.005 mm alignment and KK level output, we lead in narrow bezel and micro hole designs and apply the same precision to full lamination for 14-16 inch notebooks and large curved automotive clusters,

including complex U, C and R die cuts. These achievements deliver slimmer borders, brighter and richer visuals and scalable supply across smartphones, automobiles, and PCs.

- *Optical Transceiver*. Our R&D has driven step-change advances from 10G to 1.6T, turning inventions into products while preparing for the next wave of upgrades for AI and cloud networks. At 1.6T, our R&D teams designed and validated both EML and a SiPh path meeting 24W power targets, supporting both air and liquid cooling and advancing from customer sampling toward volume. At 800G, R&D iterations cut module power to 15-16W and enabled reliable DR/FR and SR/VR variants. At 400G, our sub-9W QSFP-DD module, among the first mass-produced at that power, showcases innovation from in-house EML chips to system design.

Future R&D Focus

We are continuously refining our R&D strategy to align with industry trends and capture emerging opportunities in PCB, precision component, touch panel and LCM and optical transceiver. In the coming years, our R&D efforts will focus on several key areas to strengthen our leadership in fields such as FPCs, robotics components, metal mesh and other display technologies and optical transceivers.

- *PCB*. For FPC, we will focus on developing FPC with sub-20 μm line/space and advancing new materials to enable different applications. Our materials roadmap includes ultra-thin dielectrics and fine-line copper-clad laminates for precision FPC, low-Dk/low-Df substrates for high frequency and high-speed FPC and high-reliability materials with high insulation for high-current and high-voltage application, targeting smarter, smaller and more reliable interconnects with superior signal integrity. For RPCB, we will focus on high-density embedded components to reduce power loss, conductive-paste via filling to enhance thermal management and materials such as thick copper with thin dielectrics to improve heat dissipation. We will also further advance the evaluation of high-speed, low-loss materials to better guide material selection for AI servers.
- *Precision Component*. We will focus on advanced robotics for next-generation automation and intelligent manufacturing, liquid-cooling technologies for servers and chips to improve thermal performance in AI computing and data centers and integrated thermal management modules for automotive applications that prioritize reliability, efficiency and system-level integration for automotive.
- *Touch Panel and LCM*. We will advance metal mesh by scaling linewidth to 1.7 μm and edge traces to 6 μm/6 μm through lithography and design optimization, targeting optical transmittance above 90%. On displays, we will lift LCM brightness toward and beyond 1,000 nits via backlight and film efficiency gains, expand wide-color performance toward 110% NTSC, thin curved-glass stacks to 0.12 mm, and push narrow borders to 0.65 mm for phones and 5 mm for automotive use.
- *Optical Transceiver.* We will pursue a dual-track roadmap for 1.6T and 800G optical modules, advancing both EML and silicon photonics paths with EML as the primary path. Our focus is to optimize 800G and 1.6T transceivers and accelerate the commercialization of transceivers with 3.2T and beyond, giving customers a broader choice set and enabling commercial deployment across diverse scenarios, especially the ultra-high-bandwidth interconnects required by AI data centers. At the same time, we will strengthen in-house optical chip R&D and manufacturing to secure key components for current products and next-generation 3.2T chips.

R&D Collaboration

In addition to our in-house R&D capabilities, we collaborate with leading universities and research institutions in China and worldwide, including Tsinghua University, Shanghai Jiao Tong University, Nanyang Technological University and University of California, Irvine, to leverage collective expertise and foster innovation for development of our PCBs. The IP co-developed is intended to be integrated into our products through incorporation of the relevant technologies into our manufacturing processes and product designs, thereby enhancing the performance, functionality and competitiveness of our existing and future

product. We believe these collaborations also enable us to gain deeper insights into industry trends and emerging technologies, allowing us to focus our R&D efforts more effectively and efficiently.

The key terms of the collaboration agreements we enter into with leading universities and research institutes generally include the following:

Technical sharing arrangements	:	We may establish an R&D center or team to conduct joint R&D on new technologies, for which we would fund certain operating expenses and provide staffing support. Such R&D centers or teams are typically established on a project- or task-specific basis to pursue a shared technological objective.
Ownership of IP rights	:	We retain ownership of our pre-existing IP, while IP developed through the joint research is generally co-owned by us and the collaborating parties, and neither party may transfer or otherwise dispose of such jointly owned intellectual property without the other party's prior written consent.
Key milestones	:	The researchers are expected to meet specified technical milestones within agreed timeframes and project phases. We will assess performance against these outcomes based on our established evaluation procedures.
Cost and/or profit sharing arrangements	:	We generally bear our own costs under the agreements, adopt fixed milestone-based development fees, and most profit-sharing terms are subject to future negotiations and are generally determined based on the progress of development activities and the manner in which the co-owned intellectual property is ultimately applied in the products.
Development Risks	:	Each party shall bear, at its own risk, any development risks arising from existing technological limitations in connection with the joint R&D projects.
Termination	:	We may terminate the agreements by mutual consent with the collaborating parties or unilaterally upon the occurrence of specified default events such as material breaches and insolvency.

While our collaborative research and development is strategically important, focusing on emerging technologies and building a technology pipeline for future application, the intellectual properties arising from it remain at the research and development stage, have not been applied in mass production and do not form part of our core products, nor are they currently deemed material to our business. Subject to the progress of the relevant collaborations, we believe that the successful commercialization of co-developed technologies has the potential to enhance our product capabilities, financial performance and strengthen our competitive position, which may in turn contribute to our long-term business growth.

R&D Team and Expenses

Our R&D team has a global footprint that enables us to address market opportunities worldwide. As of the Latest Practicable Date, we have R&D teams in the Chinese mainland, the United States, Singapore, Taiwan, France, Sweden, the Netherlands, Italy and Germany. Our dedicated R&D teams operate in a decentralized model, aligned through company-wide roadmaps and guidance to enable coordination and continuous advancement of core technologies.

As of June 30, 2026, we had 5,431 research and development personnel, representing 11.3% of our total employees. The core members of our R&D team have approximately 12, 15, nine and 10 years of experience on average in the R&D of FPC, RPCB, precision component, touch panel and LCM, respectively.

In 2023, 2024, 2025 and the six months ended June 30, 2026, our research and development expenses amounted to RMB1,161.2 million, RMB1,266.8 million, RMB1,417.2 million and RMB784.3 million, accounting for 3.5%, 3.4%, 3.5% and 2.8% of our revenue in the respective years/periods. Our research and development expenses are not capitalized.

SALES AND MARKETING

Our sales and marketing team focuses on building and expanding strategic customer relationships to become and remain as their trusted long-term collaborator. We develop short- and long-term business plans aligned with company strategy and informed by industry trends, competitors' products, technologies and pricing and customers' development plans and technology roadmaps. Currently, we have more than 20 regional sales and customer service teams covering key markets such as North America, Europe and Asia.

Our Customers

Our customers are mainly global brands and downstream manufacturers in the consumer electronics, telecommunications and automotive industries. In 2023, 2024, 2025 and the six months ended June 30, 2026, sales to our five largest customers in each year/period amounted to RMB24,734.5 million, RMB26,122.3 million, RMB25,814.1 million and RMB15,031.7 million, accounting for 73.5%, 71.0%, 64.4% and 54.1% of our total revenue in the respective years/periods, and sales to Customer A, our largest customer in each year/period, amounted to RMB18,781.2 million, RMB18,857.6 million, RMB18,642.8 million and RMB8,360.2 million, accounting for 55.8%, 51.3%, 46.5% and 30.1% of our total revenue in the respective years/periods. During the Track Record Period, to the best knowledge of our Directors, none of our Directors, their associates or any of our current Shareholders (who, to the knowledge of our Directors, own more than 5% of our share capital) had any interest in our five largest customers in any period during the Track Record Period that are required to be disclosed under the Hong Kong Listing Rules.

For the six months ended June 30, 2026

Customer	Transaction amount	Percentage of revenue	Year of Commencement of business relationship	Major products sold
	(in RMB thousands)	%		
Customer A[(1)]	8,360,194	30.1	2016	FPC
Customer I[(2)]	2,491,681	9.0	2025	Data center transceiver
Customer G[(3)]	1,869,540	6.7	2025	Automotive component
Customer B[(4)]	1,220,245	4.4	2023	Automotive display
Customer J[(5)]	1,090,082	3.9	2025	Automotive component

Notes:

(1) Customer A is a multinational corporation headquartered in the U.S., which principally engages in the design, manufacturing and marketing of consumer electronics as well as sales of related services. It is listed on Nasdaq Stock Market and had more than 100,000 full-time employees in its most recent financial year.

(2) Customer I is a company specializing in social technology and the development of metaverse platforms, headquartered in the U.S. It is listed on NASDAQ.

(3) Customer G is a multinational automotive manufacturing corporation headquartered in the Netherlands, which principally engages in the design, manufacturing, and marketing of automobiles and related mobility services. It is listed on the New York Stock Exchange.

(4) Customer B is a company specializing in the research and production of display products headquartered in Japan. It is listed on the Tokyo Stock Exchange.

(5) Customer J is a multinational automobile manufacturer headquartered in France. Its parent company is listed on Euronext Paris.

For the year ended December 31, 2025

	Customer	Transaction amount	Percentage of revenue	Year of Commencement of business relationship	Major products sold
		(in RMB thousands)	*%*		
1	Customer A	18,642,838	46.5	2016	FPC
2	Customer B	2,809,003	7.0	2023	Automotive display
3	Customer C(1)	2,281,029	5.7	2014	Laptop display
4	Customer D(2)	1,234,755	3.1	2016	FPC, RPCB, metal structural component
5	Customer E(3)	846,434	2.1	2018	RPCB

Notes:

(1) Customer C is a technology company specializing in designing, manufacturing and marketing consumer electronics headquartered in China. It is listed on HKSE.
(2) Customer D is a company specializing in EV and energy generation and storage systems headquartered in the United States. It is listed on Nasdaq Stock Market.
(3) Customer E is a company delivering smart devices, mobile electronics and consumer products headquartered in the United States. Its parent company is listed on Nasdaq Stock Market.

For the year ended December 31, 2024

	Customer	Transaction amount	Percentage of revenue	Year of Commencement of business relationship	Major products sold
		(in RMB thousands)	*%*		
1	Customer A	18,857,615	51.3	2016	FPC
2	Customer B	3,262,287	8.9	2023	Automotive display
3	Customer C	2,015,190	5.5	2014	Laptop display
4	Customer D	1,194,969	3.3	2016	FPC, RPCB, metal structural component
5	Customer E	792,254	2.2	2018	RPCB

For the year ended December 31, 2023

	Customer	Transaction amount	Percentage of revenue	Year of Commencement of business relationship	Major products sold
		(in RMB thousands)	*%*		
1	Customer A	18,781,202	55.8	2016	FPC
2	Customer B	2,521,128	7.5	2023	Automotive display
3	Customer C	1,514,071	4.5	2014	Laptop display
4	Customer D	1,166,355	3.5	2016	FPC, RPCB, metal structural component
5	Customer F(1)	751,793	2.2	2016	RPCB

Note:

(1) Customer F is a company specializing in mobile smart technology products and services headquartered in Guangdong, China.

Pricing

We price our products based on various factors, including raw material costs, production overheads, order volumes, delivery requirements, warranty offered, competitors' pricing, prevailing market conditions, payment methods and specification of products requested by customers.

During the Track Record Period and up to the Latest Practicable Date, prices for our products are generally set out in purchase orders or agreed in advance for a relatively long period under the framework agreements we have entered into with our customers. For many of our products, pricing is determined on an order-by-order basis in the relevant purchase orders. For certain of our PCB products, particularly those for consumer and automotive electronics customers, prices are agreed for a longer period and are subject to adjustment mechanisms. Price reviews and adjustments are generally negotiated quarterly or annually, depending on the individual product. Price adjustments are typically triggered by specified cost fluctuation events. Any adjustment is negotiated under the relevant framework agreement terms and takes effect after both parties' confirmation. Generally, we are able to pass on increases in raw material procurement costs to our downstream customers, as product prices are typically set in purchase orders and may be adjusted to reflect changes in raw material prices. However, our selling prices are not automatically or solely linked to raw material prices. Instead, they are determined on a product-by-product and customer-by-customer basis. During the Track Record Period, we generally managed raw material cost fluctuations through our procurement and hedging arrangements. These included improving production yields to reduce material consumption and waste, enhancing manufacturing processes to improve efficiency and lower unit costs and sourcing alternative materials of comparable quality at lower cost. As a result, we did not make any material adjustments to our selling prices solely to pass on increases in the prices of raw materials such as copper, gold salt and copper-clad laminate. Such pricing arrangements have not had, and are not expected to have, any material impact on the Group's financial performance. During the Track Record Period, there were no material differences among our major customers, products and business segments in the extent to which increases in raw material costs were passed on to customers.

For our precision components with longer-term pricing arrangements, prices are typically reviewed annually or adjusted under the framework agreement's risk sharing mechanism, under which, if raw material costs move beyond an agreed baseline, we renegotiate the acceptance price for the next pricing period under the contract. For example, among all of our five largest customers in each year/period during the Track Record Period, we entered into two agreements selling precision components that have durations longer than or equal to a year, and both of them included such price adjustment clauses. For certain LCM and touch panel products that are priced on a relatively long-term basis, prices may be reviewed monthly based on movements in raw material costs, or in some cases, reviewed and adjusted annually. For example, among all of our five largest customers in each year/period during the Track Record Period, we entered into two agreements selling LCM and touch panel products that have durations longer than or equal to a year, and both included such price adjustment clauses.

According to CIC, pricing for our products generally follows prevailing market trends. While the selling prices of certain products have historically been agreed on a relatively long-term basis, these arrangements have not had a material impact on our gross profit margin.

Arrangement with Our Customers

We generally enter into framework agreements with our key customers that cover the design, manufacturing and sales of products. Our products are highly customized, and the majority of our products are developed solely for the relevant customers. In general, shipments are handled under one of three arrangements: (i) customers collect the products from our factory; (ii) we arrange shipment to a customer-designated location or carrier; or (iii) we arrange shipment up to the point the products are loaded onto the vessel at the port of shipment. Under arrangement (i), customers are responsible for export clearance, while under arrangements (ii) and (iii), we handle export clearance. In each case, the Company assumes responsibility for associated costs and risks up to the specified delivery location, after which the customer assumes responsibility for any further costs and risks. These agreements generally contain the following terms.

Price	:	Pricing of the products is generally specified in purchase orders or predetermined on a relatively long-term basis.

Transfer of risks	:	Risks are generally transferred to customers when the products are delivered to the customer-designated location, unless otherwise specified in the agreement.
Payment and credit terms	:	We generally deliver products to our customers before payment and grant our customers credit periods ranging from 30 days to 90 days.
Minimum purchase requirements	:	Our framework agreements generally do not contain minimum purchase requirements.
Logistics	:	We are generally responsible for delivering products to locations specified by our customers.
Returns/ exchanges	:	Our customers will inspect the products upon delivery and are generally entitled to return or exchange for products that do not meet their requirements in terms of quality or specifications.
Confidentiality	:	These framework agreements usually have strict confidentiality provisions.
Duration, termination and renewal	:	Generally more than one year. Some of these framework agreements do not have fixed terms. These agreements are typically automatically renewed. These framework agreements can be terminated by mutual agreement by parties.

Relationship with Certain Top Customers

During the Track Record Period, Customer A, our top customer in each year/period during the Track Record Period, contributed to 55.8%, 51.3%, 46.5% and 30.1% of our revenue in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. Our strategic relationship with Customer A began over 10 years ago and has grown significantly since our acquisition of MFLEX in 2016, which established us as a leading global supplier of FPCs. Customer A, a global leader in consumer electronics, uses our FPC products to support the development of their high-performance devices, such as smartphones, tablets and wearables.

According to CIC, the consumer electronics market is highly concentrated, particularly among top-tier brands. As a result, suppliers to premium consumer electronics brands often have a concentrated customer base. Over the years, we have been actively involved in the product development of Customer A's signature products, providing critical technological solutions that align with their innovation and functionality requirements. Our proven ability to consistently meet Customer A's stringent standards for quality, performance and timely delivery has established us as a trusted partner in their supply chain. During the Track Record Period and up to the Latest Practicable Date, there were no material incidents of failure to renew the relevant sales agreements with Customer A, or any material reduction, delay or cancellation of orders from Customer A.

Going forward, we believe the likelihood of any material adverse change in or termination of our business relationship with Customer A is low because of the long-term, stable nature of our relationship and the extensive and rigorous supplier approval and qualification process that Customer A requires, covering aspects such as ESG compliance, corporate governance, and operational standards. This remains the case notwithstanding reports that Customer A would shift the production of certain products from the Chinese mainland to other countries, primarily because our sales are driven by Customer A's product demand and our ability to meet its specifications and delivery requirements, rather than the geographical location of final assembly. Operationally, our FPC products are shipped to Customer A's designated delivery locations in accordance with the purchase orders. Customer A's contract manufacturers and assemblers are responsible for coordinating downstream assembly and related logistics. As such, changes in the location of final assembly are not expected, in themselves, to adversely affect our performance under Customer A's purchase orders. Furthermore, during the Track Record Period, shipments delivered to manufacturing locations outside the Chinese mainland (for the avoidance of doubt, excluding special supervision zones) accounted for 9.2%, 14.1%, 15.8% and 21.7%, respectively, of the revenue attributable to Customer A. This proportion has increased steadily, demonstrating our ability to support Customer A's evolving supply chain

footprint. Our logistics and supply chain arrangements have been able to accommodate changes in delivery destinations, and we have not incurred material additional costs or experienced material disruption in fulfilling Customer A's orders as a result of changes in production location.

The decreasing revenue contribution of Customer A in each year/period during the Track Record Period also shows the effectiveness of our continued diversification efforts. In particular, the decrease in revenue from Customer A as a percentage of our total revenue from 2025 to the six months ended June 30, 2026 primarily reflected increased revenue from other customers from our existing business and the consolidation of Source Photonics and GMD. At the same time, revenue from Customer A remained relatively stable during the Track Record Period. The average selling prices of our products sold to Customer A showed a slight downward trend, decreasing by approximately 5% in each year or period during the Track Record Period, except in 2023. These decreases were the result of commercial negotiations between the Group and Customer A, which took into account factors such as order volumes, prevailing market conditions, product mix and raw material prices. In 2023, the average selling price of products to Customer A increased, mainly due to a one-off increase in sales of certain higher-priced products. Save as disclosed above, there were no material changes in the product mix, average selling prices or purchasing patterns of our sales to Customer A during the Track Record Period. At the same time, to the best of the Directors' knowledge, none of our other key customers had a material business relationship with Customer A during the Track Record Period and up to the Latest Practicable Date. Accordingly, the Directors consider that there has not been, and is not expected to be, any material adverse change in, or termination of, the Group's business relationship with Customer A. The Sponsors are not aware of any information to the contrary that would cause them to disagree with the Directors' view as set out above.

At the same time, it was reported that, in 2025, Customer B announced a plan to reduce its workforce in Japan and dispose of certain production lines. We do not expect this to have a material adverse impact on the Group. Based on the Company's assessment, our sales to Customer B are driven primarily by Customer B's demand for our products and our ability to meet its specifications and delivery requirements, rather than Customer B's internal headcount or the continued operation of any particular production line. Accordingly, Customer B's restructuring and disposal of specific production lines are not expected, in themselves, to adversely affect our performance under Customer B's purchase orders. Furthermore, revenue from Customer B amounted to RMB2,521.1 million, RMB3,262.3 million, RMB2,809.0 million and RMB1,220.2 million in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively, and we did not experience material disruption in fulfilling Customer B's orders. The Company will continue to monitor Customer B's business developments and procurement plans.

Concentration of Our Customers

During the Track Record Period, sales to our top five customers and our largest customer were relatively concentrated, with the top five customers in each year/period contributing to 73.5%, 71.0%, 64.4% and 54.1% of our revenue and the top customer in each year/period contributing to 55.8%, 51.3%, 46.5% and 30.1% of our revenue in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively.

We believe that we do not unduly rely on our major customers. As discussed above and according to CIC, the markets in which we operate, including the consumer and automotive electronics markets, are highly concentrated among top-tier brands. As a result, suppliers to premium brands often have a concentrated customer base. Furthermore, the end product design and certification processes require close cooperation with suppliers given the high degree of customization in PCBs, precision components and touch panels and LCMs. At the same time, our customers in the consumer and automotive electronics markets benefit from high-quality products that enhance product performance, reliability and integration. Accordingly, leading brands maintain stable, long-term relationships with certified suppliers capable of delivering at scale. Based on these industry characteristics and our track record of certifications, we believe our relationships with major downstream customers are durable, and the likelihood of any material adverse change in the near term is low.

Customer Diversification

In the meantime, to mitigate concentration risk and reduce reliance on any single customer, we have been focusing on expanding our customer base and our product portfolio and expanding vertically along the value chain. While we expect Customer A to remain our significant customer and to continue to be an important customer going forward, we expect our revenue base to become increasingly diversified as we continue to implement the measures described below.

With respect to customer diversification, we have broadened our customer base and increased sales to key non-Customer A customers across our business lines. During the Track Record Period, we continued to add new customers and deepen relationships across a range of end markets, including consumer electronics and emerging applications such as battery and energy storage system ("ESS") markets. As a result, revenue from these initiatives increased over time. We also continued to expand our product portfolio and customer coverage in other markets through ongoing customer development efforts in LCM and touch panel products and precision components, including our self-developed in-vehicle display products and other products for automakers.

In addition, our vertical expansion along the value chain has strengthened our ability to capture market opportunities and attract new customers, thereby further diversifying our revenue sources. By combining our PCB expertise with our capabilities in optical chips and optical transceivers through Source Photonics, we have built integrated high-speed transmission capabilities that support the expansion of AI infrastructure, covering AI PCB, high-speed optical chips and optical transceivers. As we continue to scale these capabilities and expand our offerings, we expect to further broaden our customer base and reduce our reliance on any single customer over time. As a result of such measures, (i) the absolute amount of our sales to major customers remained relatively stable in each year/period during the Track Record Period, as sales to our five largest customers in each year/period amounted to RMB24,734.5 million, RMB26,122.3 million, RMB25,814.1 million and RMB15,031.7 million in the respective years/periods, and sales to Customer A, our largest customer in each year/period, amounted to RMB18,781.2 million, RMB18,857.6 million, RMB18,642.8 million and RMB8,360.2 million in the respective years/periods, demonstrating our stable relationship with such customers; and (ii) the percentage of our sales to major customers kept decreasing in each year/period during the Track Record Period, as sales to our five largest customers in each year/period accounted for 73.5%, 71.0%, 64.4% and 54.1% of our total revenue in the respective years/periods, and sales to Customer A, our largest customer in each year/period, accounted for 55.8%, 51.3%, 46.5% and 30.1% of our total revenue in the respective years/periods. The effectiveness of our diversification efforts are particularly apparent regarding Customer A, where while the absolute amount of our sales to Customer A remained stable across years/periods during the Track Record Period, our revenue from customers other than the five largest customers stayed on a growing trajectory both in terms of absolute amount and percentage, amounting to RMB8,916.7 million, RMB10,648.1 million, RMB14,310.8 million and RMB12,766.0 million in the respective years/periods, accounting for 26.5%, 29.0%, 35.6% and 45.9% of our total revenue in the respective years/periods.

Customer Service

We work closely with our customers throughout stages of product design, development, and manufacturing, aiming to deliver services and products that meet their expectations. In particular, we maintain frequent and proactive communication with customers during the design and development phase. Throughout this process, we actively solicit and incorporate customer feedback to strengthen their experience and ensure a high level of satisfaction with our offerings.

SEASONALITY

Demand for and sales of our products are linked to the seasonality of their respective end products and markets. For products used in consumer electronics, we typically experience higher sales in the second half of the year due to the synchronized launch cycles of new devices and the heightened purchasing activity associated with the holiday season. For products used in the automobile, data center and AI computing and

telecommunications equipment, seasonality is less pronounced, often characterized by more stable, project-driven demand patterns throughout the year. These seasonal patterns influence the overall volume and timing of our business activities. For further details on risks associated with seasonality, see "Risk Factors — Risks Relating to Our Business and Industry — Our sales may be influenced by seasonality."

SUPPLY CHAIN

Raw Materials

The main raw materials used in our PCB products mainly consist of copper foil, copper-clad laminates, prepregs, gold salt, electronic components such as connectors, and chemical reagents for copper anodes. The main raw materials used in our precision components mainly consist of high-grade aluminum alloys, copper alloys, high-flexibility and high-strength steel, engineered plastics/polymers, and thermal interface materials. The main raw materials used in our touch panels and LCMs mainly consist of cover glass, touch sensor, TFT-LCD open cell, LCM module, one-glass-solution metal mesh, display panel, integrated circuits, PCBA, back light unit and OCA/OCR. The main raw materials used in our optical transceiver products mainly consist of digital signal processor, PCB, passive optical components optical fibers, laser diodes, photodiodes, optical connectors and ceramic ferrules.

We mainly source raw materials from the Chinese mainland. Our raw material prices fluctuate due to a variety of factors, including supply and demand dynamics, our ability to negotiate prices with suppliers and others. In particular, prices of several of our major raw materials generally increased during the Track Record Period, including the global average copper settlement price and the average purchase prices of gold salt and copper-clad laminate. Notwithstanding such increases, the higher prices of copper, gold salt and copper-clad laminate are estimated to have reduced our overall gross profit margin by approximately 0.0%, 0.2%, 0.3% and 0.7% in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. Accordingly, fluctuations in the prices of copper, gold salt and copper-clad laminate did not have a material impact on our overall gross profit margin during the Track Record Period. The average prices of our other raw materials remained relatively stable during the Track Record Period and did not have a material impact on our overall gross profit margin. We usually work with multiple suppliers to reduce risks associated with product supply. During the Track Record Period and up to the Latest Practicable Date, we did not experience any significant shortage of raw material supplies, and the raw materials provided by our suppliers did not have any significant quality issues.

Our Suppliers

Our suppliers are mainly suppliers of raw materials and equipment. We have established and maintain stable and long-term relationships with these major suppliers.

Selection and Management of Suppliers

We have established rigorous processes for the selection, evaluation and management of our suppliers to ensure suppliers meet our quality and performance standards. We consider a number of factors during our supplier selection and qualification process, such as the supplier's industry reputation, technical capabilities, delivery performance and the price and quality of the products or raw materials they offer and we also conduct on-site visits.

We regularly evaluate our collaboration with our suppliers, focusing on criteria such as quality, price and delivery of products supplied by them and their compliance with our policies and requirements, including our policies on occupational safety and corporate social responsibility.

Arrangement with our Suppliers

We typically enter into framework agreements with major suppliers of raw materials, with the price, quantity and specifications of the raw materials specified in individual purchase orders. The major terms of the long-term framework agreements we enter into with our suppliers generally include the following:

Purchase order	:	We generally place purchase orders with suppliers in writing, specifying the type, specification, unit price, quantity and delivery schedule.
Price	:	Generally, the price shall be determined according to the applicable purchase order. Certain of our framework agreements allow pricing adjustments. In general, pricing adjustments are primarily driven by changes in major input costs and market conditions, including (i) fluctuations in prices of key raw materials and commodities as referenced by publicly available indices and platforms, (ii) prevailing competitive and demand conditions, and to a lesser extent, (iii) changes in order volumes, product specifications and delivery requirements. Depending on the arrangement, prices may be reviewed and adjusted on a periodic basis, typically upon the occurrence of agreed triggers, such as significant movements in relevant commodity prices. Our procurement department monitors major commodity price movements on an ongoing basis and tracks relevant international trade developments on a regular basis to support internal pricing and negotiation decisions.
Inspection and product returns	:	Upon delivery, we shall have the right to inspect and accept the deliverables. If the deliverables are found during inspection not to meet our requirements, we may reject them and require suppliers to make necessary corrections at their own cost. Where applicable, suppliers shall provide a minimum one-year quality warranty period for the materials and deliverables provided.
Payment and credit terms	:	Generally, upon acceptance of the services by us and within 30 to 90 days after receipt by us of suppliers' valid invoice, we shall pay suppliers the service fees.
Confidentiality	:	We usually set confidentiality clauses with our suppliers and such obligations may continue to exist for a certain period of time after termination of the agreement.
Termination	:	We generally have the right to terminate the contract or any order at any time by giving suppliers fifteen days' prior written notice.

Major Suppliers

In 2023, 2024, 2025 and the six months ended June 30, 2026, purchases from our five largest suppliers in each year/period amounted to RMB5,975.4 million, RMB6,214.4 million, RMB5,737.5 million and RMB3,567.7 million, accounting for 25.8%, 26.1%, 21.9% and 18.5% of our total purchases in the respective years/periods. In 2023, 2024, 2025 and the six months ended June 30, 2026, purchases from our largest supplier in each year/period amounted to RMB2,034.5 million, RMB1,674.4 million, RMB1,463.8 million and RMB1,398.6 million, accounting for 8.8%, 7.0%, 5.6% and 7.3% of our total purchases in the respective years/periods. During the Track Record Period, to the best knowledge of our Directors, none of our Directors, their associates or any of our current Shareholders (who, to the knowledge of our Directors, own more than 5% of our share capital) had any interest in our five largest suppliers in any period during the Track Record Period that are required to be disclosed under the Listing Rules.

Overlapping Customers and Suppliers

During the Track Record Period, certain of our top five customers were also our suppliers, and certain of our top five suppliers were also our customers. Customer A, our largest customer in each of 2023, 2024, 2025 and the six months ended June 30, 2026, was also one of our five largest suppliers in the same

years/periods. Our revenue from Customer A amounted to RMB18,781.2 million, 18,857.6 million, RMB18,642.8 million and RMB8,360.2 million, accounting for 55.8%, 51.3%, 46.5% and 30.1% of our total revenue in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. Our procurement from Customer A amounted to RMB1,162.4 million, RMB942.6 million, RMB1,074.3 million and RMB467.1 million, accounting for 5.0%, 4.0%, 4.1% and 2.4% of our total procurement amount in the same year/periods. Customer B, one of our top five customers in each of 2023, 2024 and 2025, was one of our five largest suppliers in the same years. Our revenue from Customer B amounted to RMB2,521.1 million, RMB3,262.3 million and RMB2,809.0 million, accounting for 7.5%, 8.9% and 7.0% of our total revenue in 2023, 2024 and 2025, respectively. Our procurement from Customer B amounted to RMB871.8 million, RMB1,347.6 million and RMB1,101.3 million, accounting for 3.8%, 5.7% and 4.2% of our total procurement amount in the same year. Customer C, one of our top five customers in each of 2023, 2024, 2025, was one of our five largest suppliers in the same years. Our revenue from Customer C amounted to RMB1,514.1 million, RMB2,015.2 million and RMB2,281.0 million, accounting for 4.5%, 5.5% and 5.7% of our total revenue in 2023, 2024 and 2025, respectively. Our procurement from Customer C amounted to RMB1,048.2 million, RMB1,318.2 million and RMB1,324.2 million, accounting for 4.5%, 5.5% and 5.1% of our total procurement amount in the same year. Customer G, one of our top five customers in the six months ended June 30, 2026, was also our supplier in the same period. Our revenue from Customer G amounted to RMB1,869.5 million in the six months ended June 30, 2026, accounting for 6.7% of our total revenue in the same period. Our procurement from Customer G amounted to RMB91.3 million, accounting for 0.5% of our total procurement in the same period. Customer J, one of our top five customers in the six months ended June 30, 2026, was also our supplier in the same period. Our revenue from Customer J amounted to RMB1,090.1 million in the six months ended June 30, 2026, accounting for 3.9% of our total revenue in the same period. Our procurement from Customer J amounted to RMB210.6 million, accounting for 1.1% of our total procurement in the same period.

Customers A, B, C, G and J require suppliers, including us, to procure designated raw materials and components for their products from approved upstream vendors, including, in some cases, the customers themselves. This is commonly referred to in the industry as the buy-and-sell model, which enables tighter control over procurement, confidentiality, quality, cost and delivery lead times, which is commonly adopted in the markets in which we operate. We primarily sold FPCs to Customer A, while our purchases from Customer A mainly comprised structural parts. We primarily sold LCD/OLED modules and touch display modules for automobile to Customer B, while our purchases from Customer B mainly comprised LCD panels and display ICs used in those products. We primarily sold touch panels and LCD and OLED modules to Customer C, while our purchases from Customer C mainly comprised display structural parts. We primarily sold automotive components to Customer G, while our purchases from Customer G mainly comprised steel materials. We primarily sold automotive components to Customer J, while our purchases from Customer J mainly comprised steel and plastic materials.

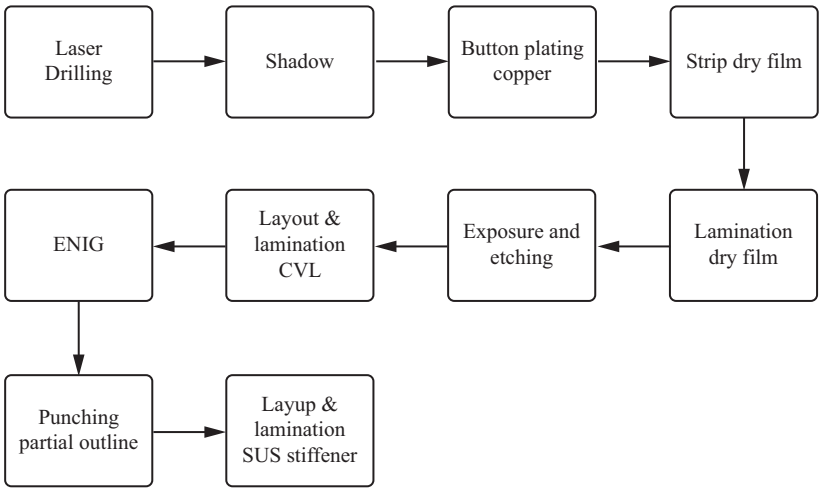

Our sales to, and purchases from, overlapping customers and suppliers were conducted in the ordinary course of business and on commercial terms negotiated on an arm's length basis. The gross profit margins attributable to sales to Customers A, B, C, G and J were generally comparable to those of their respective corresponding product categories during the relevant year/periods. The differences principally reflected differences in product specifications, degree of customization, order size and other customer-specific commercial terms. According to CIC, it is in line with industry practice for a company to have both sales to and purchases from the same customer/supplier, and the adoption of the buy-and-sell model is not a definitive determinant of pricing within the precision manufacturing industry.

PRODUCTION AND MANUFACTURING

We manufacture products in our production centers located in the Chinese mainland and overseas, ensuring the timely delivery of high-quality products across various categories to meet customer demands. These production centers are strategically situated near our customers or their suppliers, helping to reduce logistics costs effectively. By incorporating intelligent manufacturing technologies into multiple aspects of our operations, we have significantly enhanced production efficiency and product yields, allowing us to consistently achieve our performance and quality objectives.

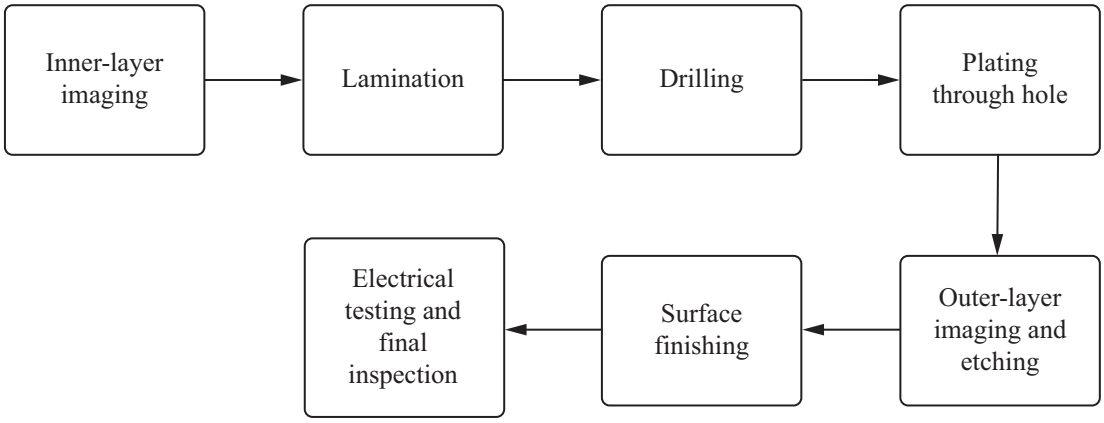

Production Process

FPC

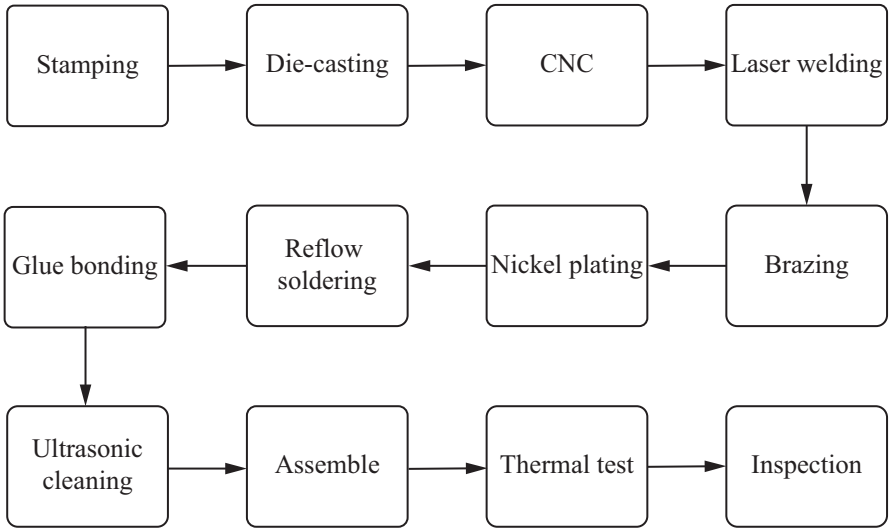

- *Laser Drilling.* Laser is used to form through, blind or microvias in the polyimide and copper, and followed by desmear or plasma cleaning to ensure reliable interlayer connection.
- *Shadow.* A conductive layer of carbon/graphite or Pd/Sn catalyst is deposited on the cleaned via walls to enable subsequent copper deposition and establish layer-to-layer conduction.
- *Button plating copper.* Electrolytic copper is plated to thicken via walls and required surface features to the specified thickness, producing low-stress, uniform interconnects.
- *Strip dry film*. Strip is to remove the exposed dry film on copper surface.
- *Lamination dry film*. Dry film is the carrier of the graphic transfer, which is the medium to transfer design data to copper surface, in order to prepare for pattern.
- *Exposure and etching*. The laminated dry film undergoes exposure to induce polymerization in the circuit pattern areas, followed by development to remove unpolymerized film. Subsequent etching removes copper from the developed areas, forming precise circuit patterns.
- *Layout & lamination CVL.* The coverlay windows are created, then the coverlay is aligned and vacuum laminated at high temperature and pressure, so the adhesive fills trace valleys and protects the copper without flooding pads.
- *ENIG.* Electroless nickel immersion gold is applied to the exposed copper pads with controlled Ni and Au thickness to provide solderable, corrosion-resistant terminations.
- *Punching partial outline.* Partial outlines or relief features are punched or laser routed to aid later singulation while retaining panel rigidity with tie bars.
- *Layup & lamination SUS stiffener.* Stainless steel stiffeners are positioned and laminated onto designated areas using heat and pressure (or PSA/epoxy) to provide mechanical support and assembly stability.

RPCB

- *Inner-layer imaging.* Copper-clad laminates are precision-cut to specified panel dimensions. Photolithographic processes transfer circuit patterns to inner layers, with subsequent etching to form copper traces.
- *Lamination.* Patterned inner layers are laminated with prepregs under high temperature and pressure to form a stable multi-layer structure.
- *Drilling.* Vias are drilled via mechanical or laser-based methods. A desmear process eliminates residual debris and conditions via walls for subsequent metallization.
- *Plating through hole*. Electroless copper is deposited onto via walls, with subsequent electroplating to form robust conductive interconnections between layers.
- *Outer-layer imaging and etching*. Photolithographic techniques define outer-layer circuit patterns, which are then etched to form the final copper layout.
- *Surface finishing*. Copper conductors are subjected to micro-etching for oxide and contaminant removal to deposit a uniform solder layer.
- *Electrical testing and final inspection*. Boards undergo electrical testing to detect shorts and opens and are inspected to confirm dimensional precision and compliance with quality standards.

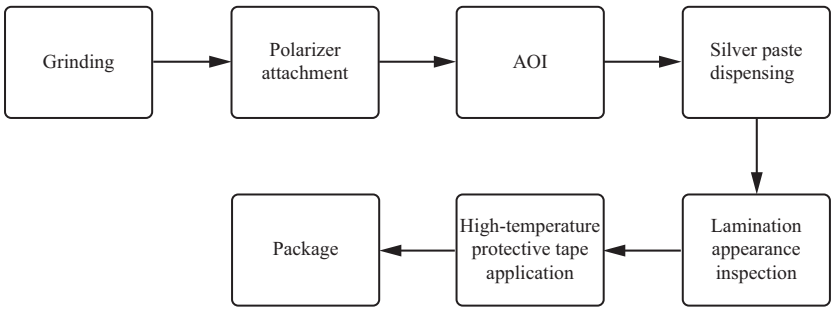

Liquid Cold Plate

- *Stamping.* This process uses specialized dies to apply pressure on metal sheets, shaping them into preliminary workpieces with predefined contours.

- *Die-casting.* Molten metal is injected into custom-designed molds under high pressure, then cooled and solidified to form metal components with complex geometries.
- *CNC.* CNC machines are programmed to perform precision machining operations such as milling, drilling, and turning on workpieces.
- *Laser welding.* A high-energy laser beam is used to melt the interfaces of workpieces, fusing them together.
- *Brazing.* A filler metal with a lower melting point than the base material is heated to join workpieces.
- *Nickel plating*. A layer of nickel is electroplated onto the workpiece surface to enhance corrosion resistance, wear resistance and electrical conductivity.
- *Reflow soldering*. Solder paste applied to component pads is heated in a controlled temperature oven, melting and reflowing to form reliable electrical and mechanical connections between electronic components and substrates.
- *Glue bonding*. Industrial adhesives are used to bond non-metallic parts or metal-non-metal assemblies. Curing time and adhesive type are selected based on material compatibility and structural requirements.
- *Ultrasonic cleaning.* High-frequency ultrasonic vibrations generate micro-bubbles in cleaning fluid, which implode to remove oil, debris and residual flux from workpiece surfaces.
- *Assemble.* Processed components are assembled into finished products or semi-finished products according to design drawings, using specialized jigs and fixtures to ensure assembly accuracy and consistency.
- *Thermal test.* Finished products are subjected to simulated operating temperature environments to evaluate their thermal stability and performance under extreme temperature conditions.
- *Inspection.* Comprehensive quality checks are conducted on finished products, including dimensional measurement, visual inspection and functional testing.
- *Inspection*. Assembled products undergo systematic functional testing using specialized equipment and testing protocols, verifying key performance indicators.
- *Package*. Qualified liquid cold plates are packed before delivery.

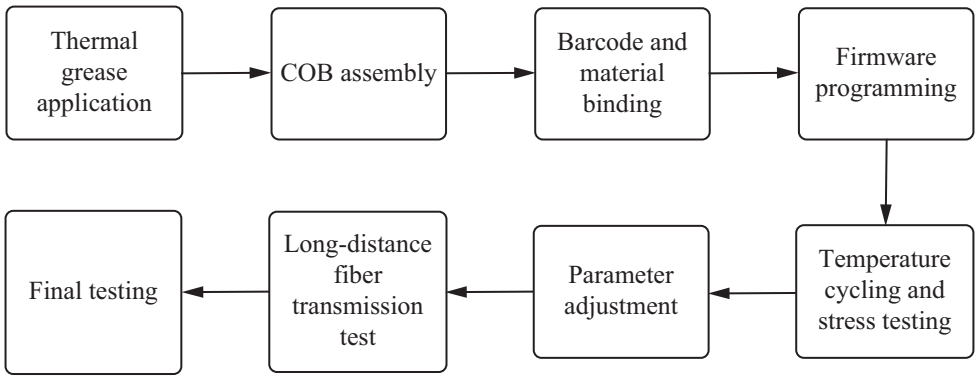

LCM

- *Grinding*. LCD glass substrates undergo precision grinding to smooth edges, eliminate burrs and achieve uniform thickness. This process ensures compliance with strict dimensional tolerances required for automotive display assemblies.
- *Polarizer attachment*. Automotive-grade polarizing films are laminated onto LCD panel surfaces using high-precision alignment equipment.
- *AOI*. It uses high-resolution cameras and image analysis algorithms to inspect the surface of workpieces. They detect surface defects and dimensional deviations, enabling fast, consistent quality screening at scale.

- *Silver paste dispensing*. Conductive silver paste is dispensed onto electrode pads via automated jetting systems, with volume control precision to ensure reliable electrical conductivity within the LCD panel.
- *Lamination appearance inspection*. Dual-stage inspection verifies lamination integrity, checking for paste overflow, misalignment, or particulate contamination.
- *High-temperature protective tape application*. Silicone-based high-temperature protective tape is applied to panel edges and contact zones, shielding critical components from thermal damage during subsequent reflow soldering and preventing scratches in downstream assembly.
- *Package*. Qualified automotive LCD products are packed before delivery.

Optical Transceiver

- *Thermal grease application*. Thermal grease is dispensed onto the internal structure components using an automated dispenser. The grease conducts heat from the chip-on-board to the metal housing.
- *COB assembly*. The COB is placed into the greased structural components, assembled together with support rods and secured by installing cover plates and fastening screws.
- *Barcode and material binding*. The COB's QR code is linked to the barcode on the structural component and additional materials such as springs and screws are also tracked via bonded identification codes.
- *Firmware programming*. Firmware and other required information are programmed into the optical module.
- *Temperature cycling and stress testing*. Modules undergo high-low temperature cycling. Modules are powered on and operate in high-power mode continuously at 70°C to verify operational stability under stress.
- *Parameter adjustment*. Module parameters are fine-tuned through internal registers to ensure that the transmitter and receiver performance meet customer requirements.
- *Long-distance fiber transmission test*. Modules are subjected to long-distance optical fiber transmission tests to confirm performance integrity over extended links.
- *Final testing*. Modules undergo comprehensive final testing to verify that all technical parameters are met.

Production Facilities

As of the Latest Practicable Date, we had production facilities across Asia, Europe, Africa and the Americas. We are actively expanding new production lines and facilities globally, with a particular emphasis on adding high-layer-count PCB. Our diversified footprint enables us to serve local markets more effectively, navigate complex trade environments and reduce logistics and delivery costs. The following table sets forth certain information regarding each of our production centers as of the Latest Practicable Date.

Production facility	Year established	Primary product	Business segment	Total gross floor area (m^2)
Yancheng, PRC	2017	PCB, automotive component	Electronic circuits (PCBs), precision components	841,686
Suzhou, PRC	1998	PCB, automotive component, automotive displays	Electronic circuits (PCBs), precision components, touch panels and LCMs	584,592
Chon Buri, Thailand	2023	PCB	Electronic circuits (PCBs)	155,976
Zhuhai, PRC	1992	PCB	Electronic circuits (PCBs)	196,063
California, United States	2023	Automotive component	Precision components	24,967
Dongguan, PRC	2013	Telecommunications equipment component	Precision components	21,970
Monterrey, Mexico	2022	Automotive component	Precision components	13,818
Chengdu, PRC	2001	Telecommunication transceiver	Optical transceivers	32,782
Changzhou, PRC	2017	Telecommunication transceiver	Optical transceivers	30,084
Taiwan	1996	Telecommunication transceiver	Optical transceivers	27,345
Kunshan, PRC	2006	Automotive component	Precision components	3,107
Germany	2011	Automotive component	Precision components	24,704
France	1962	Automotive component	Precision components	201,445
Czech Republic	2020	Automotive component	Precision components	12,416
Morocco	2015	Automotive component	Precision components	56,968
Mexico	2018	Automotive component	Precision components	8,228
Portugal	2015	Automotive component	Precision components	44,494
Slovakia	1998	Automotive component	Precision components	34,258
Türkiye	2023	Automotive component	Precision components	5,550
Spain	2014	Automotive component	Precision components	3,305
Hungary	2005	Automotive component	Precision components	443,862

Set forth below are photos of our production centers.

The following table sets forth the production capacity and utilization rate for our main products for the periods indicated.

Product Category	Year ended December 31,						Six months ended June 30,	
	2023		2024		2025		2026[6]	
	Capacity[1][2] ('000 sq. m./ unit)	*Utilization[3] %*	*Capacity ('000 sq. m./unit)*	*Utilization %*	*Capacity ('000 sq. m./unit)*	*Utilization %*	*Capacity ('000 sq. m./unit)*	*Utilization %*
Electronic circuits (PCBs)	**5,495**	**71.9**	**7,150**	**78.0**	**8,488**	**82.2**	**4,341**	**87.2**
FPC	3,975	71.6	5,480	79.7	6,784	79.3	3,488	85.7
RPCB	1,330	77.8	1,480	77.6	1,604	94.4	803	94.1
Rigid-Flex	190	37.7	190	34.3	100	86.6	50	78.2
Precision components	**150,000**	**71.2**	**200,000**	**71.8**	**334,545**	**57.0**	**276,018**	**65.2**
Automotive component	140,500	72.7	190,500	72.9	325,045	57.6	271,268	65.7
Telecommunications equipment components	9,500	49.3	9,500	49.5	9,500	36.9	4,750	35.3
Touch panels and LCMs	**59,800**	**44.2**	**53,000**	**58.7**	**53,000**	**51.8**	**27,860**	**48.6**
Touch panel	14,500	28.4	12,000	38.0	12,000	45.1	6,000	43.5
LCD & OLED module	45,300	49.2	41,000	64.8	41,000	53.7	21,860	50.0
Optical transceivers[4]	**N/A[5]**	**N/A**	**N/A**	**N/A**	**3,354**	**85.7**	**6,600**	**85.8**
Data center transceiver	N/A	N/A	N/A	N/A	1,152	83.1	3,277	88.8
Telecommunications transceiver	N/A	N/A	N/A	N/A	2,202	87.0	3,323	82.9

Notes:

(1) Production capacity assumptions for our products are based on each business line's operating schedule, depending on its working hours and working days.

(2) Production capacity is measured using the following units for each product category: PCBs are measured in square meters (m^2), representing the total area of PCB products produced; precision components, touch panels and LCMs and optical transceivers are measured in units, representing the total number of finished components or assemblies.

(3) Utilization rate is calculated by dividing the actual production volume produced in the year by the production capacity of the year.

(4) The production capacity and utilization rate in 2025 represents those for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

(5) "N/A" indicates not applicable, as Source Photonics was consolidated into the Group since October 1, 2025.

(6) Results for the six months ended June 30, 2026 are presented on a period basis and are not annualized.

During the Track Record Period, the utilization rates of certain segments or production lines decreased, most notably within our precision component segment, primarily due to softer demand for telecommunications equipment components. We strategically scaled back this business in response to a slowdown in global 5G infrastructure spending and sourcing shifts by certain overseas customers away from China due to supply chain considerations. As a result, production volumes for telecommunications equipment components declined and capacity was not fully utilized, leading to lower utilization rates in this segment. The utilization rates of touch panels and LCMs were relatively low during the Track Record Period, primarily due to industry-wide destocking throughout 2023 following a demand pull-forward in 2021 and 2022 driven by elevated remote-working demand during the COVID-19 pandemic. While consumer electronics demand has gradually recovered in 2024 and 2025 and capacity utilization has improved progressively, it has not yet returned to pre-pandemic peak levels. At the same time, in response to market demand trends and evolving customer requirements, we also strategically scaled back the production of small-sized display modules and shifted towards large-sized OLED modules mainly to support the need of a strategic customer, which required production line reconfiguration and impacted overall utilization rates.

In addition, our disclosed production capacity is determined based on assumptions of full utilization of available equipment time, including relatively high assumptions on working hours and working days. In practice, we may from time to time arrange production based on order mix and operational scheduling, including adjusting shift patterns, operating hours and working days, as well as undertaking routine maintenance, changeovers and production line balancing. As a result, actual output in a given period may be lower than the theoretical capacity calculated under such assumptions, which may result in relatively lower utilization rates. As confirmed by CIC, the methodologies adopted by the Group for calculating production capacity and utilization rates are consistent with prevailing market practice.

The following table sets forth the production capacity and utilization rate for Source Photonics' products for the periods indicated.

Product Category	Year ended December 31,				Nine months ended September 30,	
	2023		2024		2025	
	Capacity[1] ('000 unit)	*Utilization[2] %*	*Capacity ('000 unit)*	*Utilization %*	*Capacity ('000 unit)*	*Utilization %*
Data center transceiver	291	84.9	1,447	86.6	2,745	86.2
Telecommunications transceiver	6,024	64.5	6,455	67.4	6,158	84.0

Notes:

(1) Production capacity assumptions for the products are based on each business line's operating schedule, depending on its working hours and working days.

(2) Utilization rate is calculated by dividing the actual number of units produced in the period by the production capacity of the period.

Intelligent Manufacturing

We have successfully integrated intelligent manufacturing across multiple aspects of our production processes for different products, leading to significant improvements in efficiency, product yields and overall operational performance. Our intelligent manufacturing system incorporates automated production, automated logistics and digitized management. It enables us to achieve competitive production yields, ensure the timely fulfillment of customer orders, and reduce production costs. Key aspects of our intelligent manufacturing include:

Process Automation

We have implemented extensive process automation across our production lines, integrating connected equipment, system-level orchestration and dynamic scheduling. Our fully automated test lines use advanced machine vision to optimize SMT processes, reduce labor requirements and continuously improve production cycle efficiency. In quality control, an AI-driven vision system creates a loop of detection, analysis and optimization, improving automated defect detection. We have also upgraded production management with centralized control centers that coordinate shop floor operations, enhancing the standardization of site management and workers' safety.

Intelligent Warehousing

Our warehousing operations are driven by digital and automated systems that ensure real-time data exchange with our manufacturing and logistics. Our efficient inventory management, automated material handling and flexible warehouse scheduling have improved throughput, accuracy, and cost efficiency throughout our supply chain.

We have implemented a combined WMS and WCS to strengthen inventory control, automate material handling and support the efficient scheduling and routing of warehouse activities. This system has enhanced our throughput, inventory accuracy and supply chain efficiency. In addition, our EAM system enables centralized management and maintenance of key assets across warehousing and production facilities. By facilitating real-time monitoring and scheduled maintenance of equipment, the EAM system promotes operational reliability and reduces unplanned downtime and contributes to the overall effectiveness of our supply chain management. Through continuous process optimization, we remain at the forefront of intelligent manufacturing, enhancing the production efficiency and quality of products to customers worldwide.

Production Planning

We typically plan our production on a monthly basis based on the forecasted demand for our customers and the anticipated market trends. We continuously review our production plans and utilization rates and update our production plans at least on a weekly basis, or more frequently, on a daily basis if required, pursuant to the utilization rate of our factories in the preceding week and the rolling forecasts of customer

orders and expected utilization rates. We also strategically plan our production in advance to prepare for seasonal increases in customer orders.

Equipment and Machinery

Major equipment and machinery used in our production processes include: (i) laser drilling machine, pressing machine, etching machine and plating lines for our PCB products; (ii) high-speed optical alignment machines, AOI equipment, fiber splicing tools, wire bonding machines, and electrical/optical functional testers for our optical transceivers; (iii) ANEX-150 high-speed precision press, 8,200-ton stamping line, UBE die casting machine and HPC650 horizontal machining center for our precision components; and (iv) automated laminators, vacuum laminating machines, screen printing machines, ACF attach equipment and hot presses for our touch panels and LCMs.

We generally purchase the equipment from qualified suppliers. We work with and require our suppliers to provide equipment that meets our requirements and quality standards. We regularly inspect and maintain the material equipment and machinery used in our production processes and replace worn consumable parts and components. Our major production equipment and machinery have an estimated average useful life of approximately 5-10 years.

Inventory Management

Our inventories mainly include raw materials, work-in-progress, finished goods and goods in transit. Based on our forecasted orders, we conduct a monthly check and update of our inventory level and plans our procurement accordingly. We generally maintain raw materials inventory for planned production activities. We also conduct inventory aging analysis periodically to reduce the risk of inventory obsolescence and employ our warehousing system to track and manage our inventory aging status.

As of December 31, 2023, 2024, 2025 and June 30, 2026, our inventories amounted to RMB6,293.9 million, RMB6,152.7 million, RMB8,928.9 million and RMB11,418.0 million, and our inventory turnover days in 2023, 2024, 2025 and the six months ended June 30, 2026 are 77 days, 69 days, 70 days and 82 days.

Logistics

Our products are usually stored in our own warehouses located in our production centers before they are delivered to our customers. We primarily use third-party logistics service providers for the delivery of finished goods from our production centers and warehouses to locations specified by our customers. We set strict standards for the transportation of our products that these third-party logistics service providers are required to follow, and we evaluate the third-party logistics service providers periodically on their performance and compliance with our requirements to ensure smooth delivery of products to customers. We usually enter into agreements with our logistics service providers on a biennial basis. Our logistics service providers bear the risks associated with the transportation of our products.

WARRANTY, PRODUCT RETURN AND AFTER SALES SERVICES

Our warranty periods generally range from six months to seven years for our PCBs, depending primarily on the surface treatment applied and product type. Specifically, we provide a one-year warranty for PCBs with electroless nickel immersion gold, electroplated gold or electroless nickel electroless palladium immersion gold surface treatments, and a six-month warranty for PCBs with organic solderability preservative, immersion silver or immersion tin surface treatments. Our warranty periods generally range from 2 to 3 years for optical transceivers, 1.5 to 3 years for touch panel and LCM products for consumer electronics, 3 to 5 years for automotive components. For certain PCB and precision component products, no warranty is provided. According to CIC, this is in line with prevailing industry practice. Our warranties cover replacement or return of products if they do not meet the contractually agreed standards, including drawings, specifications and the Company's standards. We make provisions for warranties based on our best estimate of the expected claims under our sales agreements. In 2023, 2024, 2025 and the six months

ended June 30, 2026, we recorded warranty provisions of RMB30.2 million, RMB30.5 million, RMB21.4 million and RMB21.0 million, respectively.

We have devised a standard operating procedure for customer service. We collect and record customer feedback and complaints from different channels and make timely responses in order to achieve customer satisfaction.

We accept returns of our products for defects. We believe our return policy is consistent with the relevant PRC laws and regulations governing product quality and consumer rights and interests. We have not received any requests for returns during the Track Record Period which individually or in aggregate had a material adverse effect on our business and financial condition. In addition, during the Track Record Period and up to the Latest Practicable Date, we had not experienced any product recall that adversely impacted on our reputation, business operations or financial condition.

QUALITY CONTROL

We believe that product quality is the cornerstone of our business operations and sustainable growth. We are committed to delivering products that meet the highest industry standards and exceeding customer expectations. Our comprehensive quality control and quality assurance systems are integrated into every stage of our production process, ensuring consistent and reliable production and delivery of high-quality products.

We have established a quality management system certified under ISO 9001:2015 and IATF 16949:2016. In addition, we have obtained other internationally recognized certifications, including IECQ QC 080000:2017, ISO 14001:2015, ISO 27001:2022, ANSI/ESD S20.20:2021, TISAX Level 3, ISO 45001:2018 and ISO 50001:2018. We conduct regular internal audits and management reviews of our quality control systems to promptly identify and address potential issues, ensuring continuous improvement and refinement of our quality control systems. To ensure product quality, we have a quality control department dedicated to implementing quality control measures throughout the entire production cycle, including raw material inspection, in-process quality control and final product inspection.

Our quality control procedures and processes cover our entire production process to ensure that our product quality meets the expectations and we impose requirements after each critical process. Yield rate is the critical indicator we monitor during each of our critical production processes.

INTELLECTUAL PROPERTY

Our research and development efforts have produced 899 patents, 66 registered trademarks, 172 software copyrights and seven domain names and one copyright as of June 30, 2026 based on the intellectual property held by the Company and its major PRC subsidiaries in the Chinese mainland. See "Appendix IV—Statutory and General Information — Further Information about the Business — Intellectual Property." These intellectual properties cover our production processes as well as the design of our products.

We rely on a combination of intellectual property protection laws and contractual arrangements (including confidentiality provisions) to establish and protect our proprietary technologies, know-how and other intellectual property rights. Our subsidiaries, organized by business line, are primarily responsible for protecting our intellectual property in their respective areas. We proactively manage and expand our intellectual property portfolio and use confidentiality and non-compete agreements to protect our intellectual property and trade secrets.

During the Track Record Period and up to the Latest Practicable Date, we did not experience any material infringement of our intellectual property rights. Neither our Group nor any of our intellectual properties was the subject of, or to the best of the Directors' knowledge, is expected to be subject to, any disputes or litigation in relation to the infringement of any intellectual property rights during the Track Record Period.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE MATTERS

ESG is integral to our strategy and daily operations as part of our sustainable growth efforts. We have adopted a set of ESG policies and identified a number of material ESG issues that are closely related to our

business, including product quality and safety, business ethics and anti-corruption, information security and privacy protection, labor and human rights management, climate change response and sustainable supply chain management. In response to these issues, we have formulated corresponding policies and systems and strengthened the management of metrics and targets to ensure stable and compliant business operations. During the Track Record Period and up to the Latest Practicable Date, we were in compliance with the relevant laws and regulations in all material respects in the jurisdictions where we operate, and we were not subject to any material claims, penalties or incidents arising from non-compliance with ESG-related laws and regulations.

ESG Governance Structure

We have established a comprehensive ESG governance framework to continuously strengthen ESG management and implementation. Our Board is ultimately responsible for ESG matters, with its Strategy and ESG Committee providing assistance and guidance and monitoring for those matters. Our Board is primarily responsible for (i) reviewing and approving ESG strategic plans, objectives and policies, as well as making decisions on material matters relating to sustainable development; (ii) assessing ESG-related risks and opportunities, as well as the adaptability of our strategies and business models to sustainability-related impacts, risks and opportunities; and (iii) supervising, evaluating and reviewing the progress of ESG targets. We have established the Sustainability Management Committee at the management level to coordinate the day-to-day management and information disclosure. The ESG Working Group is responsible for executing ESG work plans and conducting regular reviews and progress reporting of ESG targets.

ESG Risk Identification, Assessment and Response Summary

We continuously enhance our risk management system and improve our materiality assessment process to systematically identify, assess, manage and monitor ESG-related risks and opportunities. We have identified certain material issues relevant to our operations and formulated corresponding measures to address them, which primarily include the following:

Material Issues	Analysis of Risks and Opportunities	Response Measures
Response to Climate Change	Physical and transition risks arising from climate change may lead to asset losses, increased costs and changes in market preferences; meanwhile, green transition and evolving market demands create opportunities for new product solutions.	We seek to adopt new technologies, processes and materials in a timely manner, actively deploy low-carbon technologies and more environmentally friendly products and set emission reduction targets and strategies to enhance our green competitiveness.
Emission and Waste Management	Inadequate emission and waste management will lead to environmental pollution. The increasingly stringent hazardous waste management standards and regulatory requirements have raised companies' compliance and operational costs. Promoting the circular economy will help companies reduce long-term costs, enhance efficiency and build compliance advantages.	We will continuously improve the emission and waste management and control procedures, establish a full-process electronic ledger, implement source control and strengthen monitoring to ensure compliance with emission standards; we will also actively explore pathways for emission and waste reduction, and steadily increase the comprehensive utilization rate of solid waste.

Material Issues	Analysis of Risks and Opportunities	Response Measures
Product Quality and Safety	Failure to manage design and R&D risks, production process risks and compliance risks effectively may result in regulatory non-compliance or market access challenges.	We integrate stringent standards across the entire business chain from product design, R&D, procurement and production to sales and after-sales service. We leverage our intelligent manufacturing system to achieve efficient and precise quality control.
Labor Management	Risk of inadequate occupational health and safety conditions may lead to compliance risks and higher employee turnover.	We strictly comply with international human rights standards and applicable laws and regulations in the jurisdictions where we operate, establish sound labor and human rights management procedures and strengthen relevant training and inspections.
Sustainable Supply Chain	Risks such as raw material shortages, rising costs, delivery delays and conflict minerals may affect business continuity and market competitiveness; strengthening supply chain collaboration supports technological adoption and corporate transformation.	We establish a supplier management system incorporating ESG considerations into supplier admission, procurement and evaluation processes, conducting regular supplier reviews, providing feedback and improvement support.
Business Ethics and Anti-corruption	Ineffective management of anti-fraud, anti-bribery, fair competition and anti-monopoly practices may lead to significant economic costs, business risks and reputational impact.	We extend business ethics and anti-corruption requirements to our Board members, all employees and our supply chain, conduct regular business ethics audits and training and enhance whistleblowing management processes.

Environmental Indicators and Management

Environmental Management

We strictly comply with the Environmental Protection Law of the PRC and other applicable laws and regulations and have established internal policies such as the EHS Management System and the EHS System Management Standards. We continue to improve the system by enhanced monitoring, audits and training, with targets of zero environmental incidents, full emissions compliance and continuous carbon reduction to ensure effective implementation. As of June 30, 2026, our major production facilities had obtained ISO 14001 environmental management system certifications. During the Track Record Period and up to the Latest Practicable Date, we were not subject to any material administrative penalties imposed by environmental authorities for violations of environmental protection laws, regulations or related requirements.

Indicator	Targets	Measures
Air emissions management	• 100% compliance rate for air emissions	• Continuously optimize environmental protection treatment processes, strengthen the upgrading

Indicator	Targets	Measures
	• With 2024 as the base year, a 5% reduction in particulate matter (PM) emission intensity and a 5% reduction in volatile organic compounds (VOCs) emission intensity by 2030	and renovation of air-emission control systems and gradually increase the pollutant removal rate to over 90%
Waste management	• 100% compliance rate for the disposal of hazardous and non-hazardous waste • With 2024 as the base year, a 3% reduction in solid waste generation intensity and a solid waste comprehensive utilization rate of over 85% by 2030	• Continuously improve process technologies to reduce solid waste generation at the source • Gradually expand the coverage of UL 2799 Zero Waste to Landfill certification to enhance the comprehensive utilization rate of solid waste
Energy management	• With 2024 as the base year, a 6% reduction in electricity consumption intensity by 2030	• All newly procured equipment shall meet at least the Grade 2 energy efficiency standard • Strengthen energy management in accordance with ISO 50001, and optimize energy usage strategies by establishing an intelligent energy online monitoring system and installing interlocking start-stop devices
Water resource management	• With 2024 as the base year, a 5% reduction in water consumption intensity by 2030	• Conduct water balance analysis, deploy water-saving facilities such as closed cooling towers, and strengthen the intelligent management of water resources • Actively promote water recycling technologies
Greenhouse gas emission reduction	• With 2024 as the base year, an 8% reduction in GHG emission intensity (Scope 1 and Scope 2) by 2030	• On the basis of strengthening energy management and energy conservation and emission reduction, steadily increase the proportion of clean energy utilization through measures such as photovoltaic power generation and green power procurement to reduce GHG emissions • Gradually expand the coverage of certifications such as "Near-Zero Carbon Factory" and "Green Factory"

Emissions

We comply with the Prevention and Control of Water Pollution Law of the PRC, Prevention and Control of Environmental Pollution by Solid Waste Law of the PRC and other relevant laws, regulations and local discharge standards. We have established comprehensive control procedures for exhaust gas, wastewater, solid waste and noise across all business units, with a focus on source control and regular monitoring to ensure compliance. Meanwhile, we have been adhering to the principles of "reduction,

recycling and harmless treatment" and actively exploring various ways to reduce emissions and waste. Our subsidiary, MFLEX Suzhou, has obtained the UL 2799 Zero Waste to Landfill Platinum Level certification.

The emission and waste generation data during the Track Record Period are as follows:

Classification	Unit	Year ended December 31, 2023	2024	2025	Six months ended June 30, 2026[5]
Volatile Organic Compounds (VOCs) Emissions	tonnes	23.07	24.25	14.41	5.58
VOCs Emission Density	tonnes/RMB million revenue	0.0007	0.0007	0.0004[1]	–
Particulate Matter (PM) Emissions	tonnes	4.57	8.94	12.57	3.83
PM Emission Density	tonnes/RMB million revenue	0.0001	0.0002	0.0003[2]	–
Non-hazardous Waste	tonnes	26,283.18	41,554.93	38,506.07	23,425.05
Non-hazardous Waste Density	tonnes/RMB million revenue	0.78	1.13[3]	0.96	–
Hazardous Waste	tonnes	24,484.55	31,851.18[4]	35,506.72	19,661.06
Hazardous Waste Density	tonnes/RMB million revenue	0.73	0.87	0.88	–

Notes:

(1) (2) In 2025, the statistical scope was expanded to include Source Photonics (October–December 2025). Meanwhile, affected by product structure optimization and capacity expansion in certain business segments, the data exhibited reasonable fluctuations in line with business changes.

(3) With the continuous improvement of our environmental management system, the statistical process for non-hazardous waste data at each production facility has become more standardized and comprehensive in scope.

(4) In 2024, certain business segments of ours expanded production capacity, and due to the upgrade and renovation of pollution control facilities in early 2024, a small amount of hazardous waste originally deposited on the inner walls of the equipment was thoroughly cleaned up and recorded in the 2024 waste transfer manifests in accordance with applicable regulations resulting in a moderate year-on-year increase in the total volume and density of hazardous waste.

(5) Due to the time lag between production capacity ramp-up and revenue recognition in the six months ended June 30, 2026, the corresponding density indicators are not available.

Resource Consumption

Energy Management

In accordance with the requirements of the ISO 50001 energy management system, we have been gradually improving the energy management framework across our business segments by formulating energy management procedures and targets and by establishing monitoring and evaluation systems for energy conservation and emission reduction. We continue to promote energy efficiency from management measures, technological upgrades and energy structure optimization.

Water Resource Management

We have formulated standardized policies such as Water Resource Management Procedures in each of our business segments to stipulate specific management requirements for water use. We have also established water-saving teams in key production facilities to conduct water balance analysis, formulate water conservation plans and implementation schemes and promote the sustainable utilization of water resources. We have adopted water-efficient facilities and equipment, and certain production facilities are equipped with intelligent water-saving devices and online monitoring systems to ensure precise management of water resources. In addition, we actively promote water recycling technologies by collecting, treating and reusing wastewater generated during production. We have also upgraded or constructed rainwater collection and treatment facilities within our production and operation areas to strengthen the reuse of rainwater resources.

Classification	Unit	Year ended December 31, 2023	2024	2025	Six months ended June 30, 2026[2]
Purchased Electricity	MWh	927,995.10	915,239.60	932,930.76	414,542.04
Electricity Consumption Density	MWh/RMB million revenue	27.58	24.89	23.25	–
Total Water Consumption	tonnes	2,062,631.52	2,448,769.54	2,907,396.72	1,056,392.65
Water Consumption Density	tonnes / RMB million revenue	61.29	66.60	72.46[1]	–

(1) In 2025, the statistical scope was expanded to include Source Photonics (October–December 2025). Meanwhile, affected by product structure optimization and capacity expansion in certain business segments, the data exhibited reasonable fluctuations in line with business changes.

(2) Due to the time lag between production capacity ramp-up and revenue recognition in the first half of 2026, the corresponding density indicators are not available.

Response to Climate Change

To more effectively respond to climate change, we have identified climate-related potential risks and opportunities and incorporated them into our strategic decision-making. While advancing green transformation, we practice low-carbon operations and strengthen climate resilience, and gradually advance carbon accounting and verification across our business segments.

Classification	Unit	Year ended December 31, 2023	2024	2025	Six months ended June 30, 2026
Scope 1	Metric tonnes of carbon dioxide equivalent	7,826.96	15,525.31	18,767.79	9,896.74
Scope 2	Metric tonnes of carbon dioxide equivalent	497,962.17	491,117.57	568,714.59	252,704.83
Scope 3[1]	Metric tonnes of carbon dioxide equivalent	197,769.87	216,466.20	229,395.53	–
Greenhouse Gas Emissions Density (Scope 1 and Scope 2)[2]	Metric tonnes of carbon dioxide equivalent/ RMB million revenue	15.03	13.78	14.64	–

Notes:

(1) The calculation methodology for Scope 3 greenhouse gas emissions refers to the GHG Protocol, with emission factors referencing the China Product Life Cycle Greenhouse Gas Emission Factor Database and the National Greenhouse Gas Emission Factor Database. For 2023, the data cover MFLEX Suzhou, Mutto Optronics and Multek; and for 2024 and 2025, the data cover MFLEX Suzhou, MFLEX Yancheng, Mutto Optronics and Multek, and include Category 1 (purchased goods and services), Category 4 (upstream transportation and distribution), Category 5 (waste generated in operations), Category 6 (business travel), Category 7 (employee commuting) and Category 9 (downstream transportation and distribution). As the statistical compilation and independent third-party verification of Scope 3 emissions are performed on an annual basis, the relevant quantitative metrics for the first half of 2026 are not available.

(2) Due to the time lag between production capacity ramp-up and revenue recognition in the first half of 2026, the greenhouse gas emissions density (Scope 1 and Scope 2) is not available.

Social Indicators and Management

Employment Responsibility

We respect and protect the lawful rights and interests of all employees. Each of our business segments has established comprehensive systems that set out requirements relating to working hours management, paid leave, prohibition of child labor, compensation and benefits and anti-discrimination and anti-harassment, and expressly prohibit any conduct that infringes upon or violates labor rights. Our major operating bases have obtained ISO 45001 certification for occupational health and safety management systems. During the Track Record Period, there were zero work-related fatalities.

We align our talent development strategy with our corporate strategy and business development plans. We have established clear managerial and professional development pathways and provided a systematic

and diversified training system for all employees. We actively promote inclusive employment for persons with disabilities. Through dedicated support programs and inclusive hiring initiatives, we expand their career opportunities and help them gain social recognition and self-realization.

Product Liability

We are committed to continuously creating value for customers through high-quality products, innovative solutions and excellent services. We have established comprehensive quality management systems across each business segment in line with ISO 9001, IATF 16949, VDA 6.3, and ISO 9004 and aligned with customer requirements. These systems cover R&D management, raw material and product inspections, non-conformance handling, corrective and preventive actions, customer complaint handling, and product recalls. We integrate customer needs and high-standard quality requirements into the full business process from product design, R&D, procurement, production and sales to after-sales service. As of June 30, 2026, our major production facilities have obtained certification under the ISO 9001 quality management system.

Business Ethics and Anti-Corruption

We have formulated a series of policies and procedures such as the Business Ethics and Integrity Management System and the Detailed Rules for Anti-Corruption Management and require all employees to sign the Commitment against Fraud and Commercial Bribery. We regularly conduct anti-fraud and anti-corruption training and integrity and ethics education. We have established a Misconduct Reporting Mechanism and Handling Measures, continuously improved our whistleblowing process, and ensured all employees understand reporting channels and procedures through training and on-site communications. During the Track Record Period, we were not involved in any litigation cases related to bribery, corruption or unfair competition.

DATA PRIVACY AND CYBERSECURITY

In recent years, data privacy and cybersecurity have emerged as critical governance priorities for companies worldwide. In particular, the PRC legislative and government authorities regularly introduce new cybersecurity, data security and privacy laws and regulations. Consequently, our practices regarding the collection, process and transfer of various types of data may come under increased administrative scrutiny.

We collect and store business data, management data and transaction data generated during or in connection with our business operations, including data related to our business and transactions with our customers, suppliers and other relevant parties. We generally do not collect or process individual customers' personal information since our customers are brand companies rather than individuals.

We have established a comprehensive data compliance system that consists of organizational structure and internal policies. Our data security policies have been certified under ISO/IEC 27001:2022. In addition, we conduct annual trial runs of data breach incidents to test our data protection mechanism and provide various data security trainings to our employees (including trainings during their on-boarding process) to ensure that our employees are well aware of our data security policies and their responsibilities in terms of data protection. We require our employees to pass our data security tests before they can commence working for us.

Our Information Security Committee, under our senior management's oversight, is responsible for developing and implementing our policies and procedures relating to cybersecurity and data security.

As advised by our PRC Legal Advisor, during the Track Record Period and up to the latest Practicable Date, we had complied with applicable laws and regulations related to cybersecurity and data protection in all material aspects.

INFORMATION TECHNOLOGY

Our information technology systems are essential to our business operations. We have developed or employ various information technology systems covering all material aspects of our operations, including

sales, supply chain management, inventory management, production and quality control. Our information technology department is responsible for developing and maintaining information technology systems to support our business operations and growth. Our Customer Relationship Management (CRM) system manages client data and sales processes, while the Enterprise Resource Planning (ERP) system provides a unified platform for cross-departmental collaboration and data-driven decisions. We optimize our supply chain with a Supplier Relationship Management (SRM) system and ensure product standards are met using a Quality Management System (QMS) to monitor for and resolve defects early.

The capabilities and the stability of our IT infrastructure are vital to our business operations. The IT department performs system checks, data back-ups, system maintenance and other activities to secure the continual operation of the critical IT systems and facilities. During the Track Record Period and up to the Latest Practicable Date, we did not experience any material failure or general breakdown of our IT systems which had resulted in a material adverse impact on our overall business operations.

PROPERTIES

As of the Latest Practicable Date, we operated our business through 15 owned properties and 31 leased properties in China. We primarily use our owned and leased properties as our production centers and office premises.

As of the Latest Practicable Date, we had no single property with a carrying amount of 15% or more of our total assets, and on this basis, we are not required by Rule 5.01A of the Listing Rules to include any valuation report in this prospectus. Pursuant to section 6(2) of the Companies (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice, this prospectus is exempted from compliance with the requirements of section 342(1)(b) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance in relation to paragraph 34(2) of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance, which requires a valuation report with respect to all of our interests in land or buildings.

As of the Latest Practicable Date, we owned 29 properties with a gross floor area of approximately 1,127.8 thousand sq. m. in the Chinese mainland, the United States, Thailand, France, Portugal, Germany, Slovakia, Mexico and Morocco. We mainly use these properties as our production centers and office premises.

As of the Latest Practicable Date, we leased 118 properties with a gross floor area of 1,885.0 thousand sq. m. in the Chinese mainland, Taiwan, Macau, the United States, Singapore, Thailand, India, France, Germany, the Czech Republic, Romania, Slovakia, Turkey, Spain, Hungary, Mexico and Morocco, mainly as our production centers, employee dormitory, offices and warehouses.

As of the Latest Practicable Date, 15 lease agreements of us and our PRC major subsidiaries mainly used for office, production or storage had not been registered with the relevant local real estate administration bureaus as required under PRC laws and regulations. Such non-compliance was primarily because under the relevant PRC housing lease regulations, the lessors are generally the primary responsible parties for completing lease registration procedures, and in these cases the lessors had not made the registration due to their own reasons. The maximum aggregate administrative penalty that may be imposed on us in respect of such non-compliance would be RMB150,000. We are in the process of coordinating with the relevant lessors to submit the required registration. Our PRC Legal Advisor is of the view that the failure to complete registration and filing procedures for the aforementioned leased premises does not affect the legal validity of the relevant lease contracts.

As of the Latest Practicable Date, the lessors of a small portion of the leased premises used by the Company and our PRC major subsidiaries, primarily for office, production or storage purposes, had not provided valid property ownership certificates. The aggregate gross floor area of such premises accounted for approximately 3.0% of the total gross floor area of our aforementioned leased premises in the PRC. Such title defects were primarily because (i) certain leased premises are self-constructed properties located in rural villages, and the lessors had not obtained valid property ownership certificates; and (ii) certain lessors are property managers and were unable to obtain valid property ownership certificates from the relevant property owners; and (iii) certain lessor is in the process of obtaining the property ownership certificate. As advised by

our PRC Legal Advisor, where lessors fail to provide valid property ownership certificates or other title documents, it may not be possible to ascertain whether the relevant leased premises were constructed with all requisite approvals. As a result, the relevant lease agreements may be subject to the risk of being determined invalid, and the relevant premises may be subject to demolition orders by the authorities. Rectification of such title defects depends on the relevant lessors or property owners obtaining or providing the requisite title certificates or other supporting documents. We will continue to communicate with the relevant parties and request that they provide supporting documents where practicable. For the self-constructed premises, the relevant village committee has issued certificates confirming the private ownership of the relevant premises. For certain premises managed by property managers, the relevant subdistrict office has issued certificates confirming the property managers' authority to manage and lease the relevant premises. For the premises in Chengdu for which the lessor is in the process of obtaining the property ownership certificate, the lessor has issued a written consent confirming that they expect no substantive obstacles to obtain the property ownership certificate. For the premises in Suzhou for which the lessor is in the process of obtaining the property ownership certificate, the property ownership certificate is expected to be obtained in the near future according to the confirmation of the Company. Considering the above, and given that (i) the aggregate gross floor area of the relevant premises accounted for only a small portion of the total gross floor area of our leased premises in the PRC; (ii) we are not materially dependent on such premises and are able to identify alternative properties within a short period of time if necessary; and (iii) we have mitigated the relevant risks by including corresponding contractual protections and liability for breach in the relevant lease agreements, our PRC Legal Advisor is of the view that the likelihood of potential penalties is remote and such title defects would not have a material adverse effect on our business operations.

Furthermore, a small portion of the properties owned by our PRC major subsidiaries had not obtained the relevant ownership certificates as of the Latest Practicable Date. Such properties were constructed in the early years of the Group's operations, and the relevant ownership certificates had not been obtained due to historical issues. The aggregate gross floor area of such properties accounted for approximately 1.0% of the total gross floor area of properties owned by us and our major PRC subsidiaries in the PRC. As advised by our PRC Legal Advisor, properties for which ownership certificates have not been obtained may not be transferred. However, the relevant PRC laws and regulations do not prescribe specific penalties for failure to complete property ownership registration. Up to the Latest Practicable Date, we have not received any notice from the relevant authorities requiring us to vacate such properties. Based on the foregoing, our PRC Legal Advisor is of the view that the absence of ownership certificates for the aforementioned properties would not have a material adverse impact on our business operations. We remain in the process of preparing the application for the relevant ownership certificates and expect to complete the relevant procedures by the end of 2026. In light of the foregoing, we have not made any provision for these property-related non-compliances.

See "Risk Factors — Risks Relating to Our Business and Industry — We are subject to risks in relation to our properties."

EMPLOYEES

We believe that our long-term growth depends on the expertise, experience and development of our employees. As of the Latest Practicable Date, we had 50,116 full-time employees. The following table sets forth a breakdown of our full-time employees by function as of the Latest Practicable Date.

	As of the Latest Practicable Date	
Function	**Number**	**%**
Production	39,174	78.2%
Sales and marketing	637	1.3%
Technical	8,373	16.7%
Finance	251	0.5%
Administrative	536	1.1%
Management	1,145	2.3%
Total	**50,116**	**100.0%**

We provide our employees with certain benefits including social insurance coverage and retirement benefits. We enter into individual employment contracts with our employees to cover matters such as wages, employee benefits, confidentiality and grounds for termination. Our employees' compensation is determined with reference to their job positions, technical skills, job performance and competition. We have various employee training programs that aim to enhance our employees' technical skills and innovation capability.

Some of our employees are represented by a union or covered by collective bargaining agreements. Our Directors consider that our Group has maintained a good relationship with our employees. During the Track Record Period and up to the Latest Practicable Date, there was no material dispute between our Group and our employees, and we did not experience any strikes, work stoppages, labor disputes or actions which had a material adverse effect on our business and operations.

COMPETITION

According to CIC, the markets in which we operate are highly competitive, and the competitive landscape differs across our key product lines: (i) PCBs: the global PCB market was US$85.2 billion in 2025 and is fragmented, with the top 10 players accounting for 37.4% of total market share, and we ranked third with sales revenue of US$3,615.3 million, or 4.2%; (ii) precision components and optoelectronic displays: the global precision component and optoelectronic display markets were US$538.1 billion and US$200.3 billion, respectively, in 2025; (iii) optical transceivers: the global optical transceiver market was US$24.5 billion in 2025 and is highly concentrated, with the top 10 suppliers accounting for 68.1%, and, following our acquisition of Source Photonics in September 2025, we ranked seventh based on Source Photonics' revenue of US$714.5 million, representing a market share of 2.9%, and sixth in optical chip production volume, or 8.6%. See "Industry Overview" for further details of the competitive landscape of each of our key markets. To maintain and grow our business, we must continue to meet our customers' requirements and deliver differentiated, high-performance products that meet their evolving needs.

AWARDS AND RECOGNITION

The following table sets out a summary of the major awards and recognition we have received since 2019.

No.	Year	Awards or Recognition
1	2019	Jiangsu Provincial IIoT Benchmark Factory
2	2019, 2024	Jiangsu Provincial Intelligent Manufacturing Demonstration Workshop
3	2020, 2023	Jiangsu Provincial Green Factory
4	2021	Jiangsu Provincial Industrial Internet Development Demonstration Enterprise (Benchmark Factory category)
5	2022	Sample Enterprise of China's Foreign Trade Export Leading Index
6	2023	5G Factory Certification (Jiangsu Provincial)
7	2023	National Intelligent Manufacturing Demonstration Factory
8	2024	5G Factory Certification (MIIT)
9	2024	Intelligent Manufacturing Demonstration Factory of the Year
10	2025	Jiangsu Provincial Advanced-level Intelligent Factory
11	2025	Excellence-tier Smart Factory

INSURANCE

We maintain insurance policies to cover product liability and employer liability. In addition, we have purchased a number of property-related insurance policies covering our facilities, machinery, equipment, inventories and other assets. We review our insurance policies from time to time to assess the adequacy and breadth of coverage. We believe that our existing insurance coverage is adequate for our business operations and is in line with industry standards in the countries in which we operate. Nevertheless, we may be exposed to claims and liabilities which exceed our insurance coverage. See "Risk Factors — Risks Relating to Our Business and Industry — Our insurance coverage may be insufficient to cover all of our potential losses" for details.

During the Track Record Period and up to the Latest Practicable Date, we had not made, and were not the subject of, any insurance claims which are material to our business or financial condition.

RISK MANAGEMENT AND INTERNAL CONTROL

Our future operating performance may be affected by risks relating to our business. Some of these risks are specific to us while others relate to economic conditions and the general industry in which we operate. See "Risk Factors" for a discussion of these risks.

The Board of Directors and our senior management are responsible for establishing and maintaining adequate risk management and internal control systems. Risk management is the process designed to identify potential events that may affect us and to manage risks to be within our risk appetite. Internal control is the process designed to provide reasonable assurance regarding achievement of objectives related to effectiveness and efficiency of operations, reliability of financial reporting and compliance with applicable laws and regulations.

Risk Management and Internal Control Policies

We have implemented or will adopt upon Listing a number of policies and measures to manage our risks and set up proper internal controls. These policies cover areas such as (i) the duties and roles of the Directors, the Board and our senior management; (ii) social and environmental matters, including policies on diversity; (iii) financial reporting; (iv) whistleblowing; (v) prevention of market misconduct and (vi) compliance with the Listing Rules.

Under our risk management and internal control policies, the Board oversees risk management and internal control systems on an ongoing basis and reviews the effectiveness of these systems.

In October 2025, we engaged an independent consulting firm to perform an initial and follow-up review of our internal control. The key areas of inspection include sales, accounts receivable and collection, procurement, accounts payable and payment, inventory and logistics management, production and cost, human resources and payroll, fixed assets and intangible assets management, cash and treasury management, investment management, financial reporting and disclosure controls, tax management process, expense management process, contract management process, IT general controls, IT application controls, information system development, testing and implementation, research and development management, and insurance management.

Historical Non-compliance

During the Track Record Period and up to the Latest Practicable Date, we had not experienced any non-compliance incident which, individually or taken as a whole, in the opinion of our Directors, is likely to have a material and adverse effect on our business, financial condition or results of operations. Our Directors believe that below incidents did not and will not likely have any material adverse impact on our business operations or financial performance.

Social Insurance and Housing Provident Funds

During the Track Record Period, we and certain of our PRC subsidiaries did not make adequate contributions to social insurance and housing provident funds for employees as required by relevant PRC laws and regulations. As advised by our PRC Legal Advisor, under the Regulation on the Administration of Housing Provident Fund, if we fail to pay by the due date or underpay housing provident fund contributions, we may be ordered to make the payment within a stipulated deadline; if we fail to pay housing provident fund contributions within the prescribed deadlines, compulsory enforcement by the court can be applied; further, under the PRC Social Insurance Law, for outstanding social insurance fund contributions that we did not promptly pay in full, the relevant PRC authorities may demand that we pay the outstanding social insurance contributions within a stipulated deadline and we may be liable for a late payment fee equal to 0.05% of the outstanding contribution amount for each day of delay; if we fail to make such payments within the stipulated deadline, we may be liable to a fine of one to three times the outstanding contribution amount. See "Risk Factors — Risks Relating to Our Business and Industry — Failure to comply with the PRC Social Insurance Law and the Regulation on the Administration of Housing Provident Funds or other PRC labor related regulations may subject us to fines and other legal or administrative sanctions." At the same time, the New Judicial Interpretation was enacted by the Supreme People's Court on July 31, 2025 and effective as of September 1, 2025. See "Regulatory Overview — Regulations on Employment and Social Welfare" for details. As advised by the PRC Legal Advisor, the New Judicial Interpretation does not expand penalty exposure or repeal existing laws, and the likelihood that the relevant competent authorities would collectively seek to recover the historically unpaid social insurance and housing provident funds from us and/or impose administrative penalties on us remains remote. Considering the shortfall in social insurance and housing provident fund contributions was insignificant compared to our total revenue throughout the Track Record Period, we have not made relevant provisions. We have formulated a rectification plan to further strengthen our compliance with the applicable requirements relating to social insurance and housing provident fund contributions, including (i) progressively align the contribution base for our employees with their actual salaries, (ii) designate our human resources department to oversee the calculation and payment of such contributions, (iii) maintain regular communication with the competent local authorities regarding the applicable requirements and local implementation practices, (iv) take appropriate remedial actions within the prescribed time limit where required by the competent authorities. We will strengthen our compliance by (i) enhancing administration procedures and internal controls over social insurance and housing provident fund contributions; (ii) implementing periodic compliance review procedures; and (iii) maintaining communication with the relevant regulatory authorities regarding the applicable requirements, procedures and local implementation practices for social insurance and housing provident fund contributions.

INTRA-GROUP TRANSACTIONS

In our ordinary course of business, we conduct certain intra-group transactions and transferred raw materials or products between the Group entities during the Track Record Period. Specifically, in both 2023 and 2024, one group entity (the "**Product-supplying Entity**") sold products of the Group to another affiliated entity (the "**Service-providing Entity**"), which in turn sold such products to third-party customers on behalf of the Product-supplying Entity. Under this arrangement, the Service-providing Entity undertakes invoicing and customer support functions to facilitate the Product-supplying Entity's sales activities, without assuming any commercial risks associated with the transactions. Accordingly, these product purchase and sale transactions were recorded as pass-through transactions, and the Service-providing Entity received a service fee from the Product-supplying Entity in consideration of the support services rendered. Also in both 2023 and 2024, the Service-providing Entity rendered invoicing and customer support services to the Product-supplying Entity in connection with the Product-supplying Entity's sales of the Group's products through the Service-providing Entity.

In addition, in 2023, an overseas group entity (the "Procurement Entity") purchased the Group's products from two manufacturing entities located in the Chinese mainland (the "Manufacturing Entities"), which were responsible for producing and selling such products to the Procurement Entity. In addition, the

Procurement Entity sold products purchased from one of the Manufacturing Entities to an overseas distribution entity of the Group (the "Distribution Entity"), which in turn sold such products to third-party customers in the U.S. market.

Given our global operations involving cross-border related-party transactions, we are subject to the relevant laws and regulations of the jurisdictions in which we operate. To ensure compliance with such regulatory requirements, we have established internal control procedures to govern the pricing and documentation of our intra-group transactions. We have also engaged an independent transfer pricing consultant to conduct a review of our key intra-group transactions during the Track Record Period, with a focus on material and recurring transactions. The consultant reviewed information provided by us, including financial figures and activities performed by relevant Group entities and performed benchmark studies. The consultant assessed the reasonableness of the relevant transfer pricing transactions and arrangements by applying appropriate transfer pricing methods primarily using the interquartile range approach. The objective was to evaluate whether the relevant pricing of intra-group transactions was in line with the arm's length principle and would not give rise to material tax exposure.

Based on the foregoing, the Directors are of the view that all the Group's intra-group transactions were consistent with the arm's length principle and our transfer pricing practice did not have any material non-compliance issues.

LICENSES, PERMITS AND APPROVALS

We are required to obtain or maintain various licenses, permits and approvals in order to operate our business. We believe we have all material licenses, permits and approvals necessary in order to operate our business. We continually monitor our compliance with these requirements in order to ensure that we have all such approvals, licenses and permits as are necessary to operate our business.

As confirmed by our PRC Legal Advisor, the material licenses and permits obtained by the Group remained in full force and effect during the Track Record Period and up to the Latest Practicable Date. We had not experienced any material difficulties in renewing material licenses, permits or approvals during the Track Record Period and do not expect there to be any material difficulties in renewing them upon their expiry.

The following table sets forth our key licenses, approvals and permits. As confirmed by our PRC Legal Advisor, the following licenses and permits are all valid.

Holder	Name of license, approval and permit	Effective date	Expiry date
The Company	Pollutant Discharge Registration for Stationary Sources	April 21, 2026	April 20, 2031
The Company	Pollutant Discharge Registration for Stationary Sources	August 12, 2025	August 11, 2030
The Company	Pollutant Discharge Registration for Stationary Sources	June 5, 2024	June 4, 2029

LEGAL PROCEEDINGS

We may from time to time become a party to various legal, arbitral or administrative proceedings arising in the ordinary course of our business. As of the Latest Practicable Date, there was no litigation, arbitration or administrative proceedings pending or threatened against us or any of our Directors that could have a material and adverse effect on our financial condition or results of operations.

During the Track Record Period and up to the Latest Practicable Date, there were no material breaches or violations of laws or regulations applicable to us which are expected to have a material adverse effect on our business, financial condition or results of operations.

TRADE RESTRICTIONS, TARIFF POLICIES AND INTERNATIONAL SANCTIONS

U.S. Outbound Investment Security Program

On January 2, 2025, the Outbound Investment Security Program, implemented by the U.S. Treasury under the Outbound Investment Rule, became effective. The Outbound Investment Security Program prohibits or requires notification of certain outbound investment transactions by "U.S. persons" involving "covered foreign persons" that are engaged in "covered activities" relating to certain sensitive technologies and products in the (i) semiconductors and microelectronics, (ii) quantum information technologies, and (iii) AI sectors.

Based on the advice of our legal advisor as to international sanctions, the Group is not engaged in any "covered activities" (as defined in 31 CFR § 850.208) under the Outbound Investment Rule. In particular, although Source Photonics designs and produces certain optical and laser-based semiconductor components, such products are discrete optoelectronic devices rather than integrated circuits for purposes of the Outbound Investment Rule. In certain cases, to meet customer demand for higher-speed pluggable optical transceivers, Source Photonics sources PICs from third-party vendors. In these arrangements, the vendors design and fabricate the PICs, and Source Photonics fits the externally sourced PICs as the photonic engine within its optical transceiver products. Accordingly, as advised by the Company's legal adviser as to international sanctions, Source Photonics' optical transceiver production does not involve the design, fabrication or packaging of PICs or any other integrated circuits for the purposes of the Outbound Investment Rule, and therefore does not constitute a "covered activity" thereunder. In addition, under 31 CFR § 850.209(a), based on our audited consolidated financial statements for the year ended December 31, 2025, Source Photonics did not contribute 50% or more of the Company's consolidated revenue, net income, operating expenses or capital expenditure. Accordingly, based on the advice of our legal advisor as to international sanctions, even under a conservative assumption that Source Photonics were deemed to engage in covered activities, such activities would not have resulted in the Group being classified as a "covered foreign person" under the Outbound Investment Rule. Accordingly, U.S. persons purchasing H Shares in the Global Offering will not be engaging in a prohibited or notifiable transaction under the Outbound Investment Security Program. In addition, we believe that purchases of our H Shares in the Global Offering and subsequent secondary market trading by U.S. persons should fall within the publicly traded securities exception under the current Outbound Investment Rule and applicable U.S. Treasury guidance.

Our Directors further confirm that the Outbound Investment Rule has not had any material adverse impact on our operations or financial condition, and we do not anticipate any such adverse impacts on the Listing or the Global Offering. However, the Outbound Investment Security Program is a relatively new regulatory regime, which is subject to changes and interpretations. On December 18, 2025, the U.S. Comprehensive Outbound Investment National Security Act of 2025 (the "**COINS Act**"), which will supersede the Outbound Investment Security Program, became law. The COINS Act is subject to a rulemaking process, which is required to be completed by March 2027, and there is substantial uncertainty regarding how the new law will be implemented. We will continue evaluating and monitoring developments with respect to these laws and regulations. Investors, including those that are U.S. persons or are subsidiaries of U.S. persons, should consult their own legal counsel regarding the applicability of the Outbound Investment Rule, the COINS Act or similar laws and regulations to this Global Offering and any potential obligations and exceptions thereunder. For associated risks, see "Risk Factors — Risks Relating to Our Business and Industry — U.S. outbound investment regulations and other foreign laws and regulations could have a negative impact on our future ability to access capital".

International Sanctions and Export Control

The United States and other jurisdictions or organizations, have, through executive order, legislation or other governmental means, implemented measures that impose economic sanctions against certain countries and other jurisdiction, targeted industry sectors, companies and persons. Most notably, these include U.S. economic sanctions as implemented by the OFAC.

In addition to economic sanctions, in recent years, the United States has expanded export controls restrictions on China through the EAR administered by the BIS. These include controls on items exported from the United States, items of U.S. origin (wherever located), and, under the EAR's "de minimis rules," on certain non-U.S.-made items that incorporate controlled U.S.-origin items or incorporate or are bundled with U.S.-origin software or technology. Also, under the FDPR, the EAR applies to items manufactured outside the United States that are the direct product of certain controlled U.S.-origin technology or software when exported, reexported or transferred to specific destinations and end-users.

In addition to the restrictions introduced above, the BIS also maintains lists of persons that are subject to enhanced export control restrictions. One such list, the Entity List includes a list of foreign persons on which certain trade restrictions are imposed. In recent years, the United States has placed an increasing number of entities, including hundreds of entities in China, on the Entity List and other restricted or prohibited party lists. In addition to naming additional persons to these lists, BIS has imposed complex and restrictive rules applicable to doing business with persons on them. The restrictions applicable to Entity List parties include licensing requirements for exports, re-exports or transfers of items on lists of controlled items maintained by the U.S. government, which prevents these named entities from receiving essentially any item subject to U.S. export controls, including, in some cases, through the application of the EAR's foreign direct product rules, items produced wholly outside the United States. In addition, on September 29, 2025, the BIS issued the Affiliates Rule; however, following the leaders' meeting on October 30, 2025, the United States suspended implementation of the Affiliates Rule for one year beginning November 10, 2025. As a result, this extension of Entity List restrictions is not expected to apply during the suspension period unless BIS issues implementing rules to the contrary or the suspension is modified or revoked.

We screen our counterparties to determine if they are subject to applicable economic sanctions or export control restrictions and have not identified any sales that involve such sanctioned parties or jurisdictions. During the Track Record Period, two customers of ours, both of which are providers of networking and telecommunications equipment, were included on the BIS Entity List. Revenue generated from the relevant customers in the aggregate accounted for 1.0%, 1.6%, 1.7% and 1.3% of our total revenue in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. Revenue generated from the relevant customers of Source Photonics in the aggregate accounted for 6.0%, 6.2% and 8.1% of Source Photonics' total revenue in 2023, 2024 and the nine months ended September 30, 2025, respectively. The Company and Source Photonics mainly sold communications equipment and optical transceivers to those customers, respectively, during the Track Record Period. As advised by our legal advisor as to international sanctions, (i) none of the items we sold to Entity List-designated customers involve the transfer, export or reexport of items subject to the EAR, including through the FDPR, and (ii) such customers and the relevant transactions did not involve sanctioned parties or jurisdictions subject to sanctions administered by the OFAC. We intend to continue transactions with these customers under the Group's existing compliance framework to ensure compliance with applicable export control and sanctions laws and regulations. We will suspend transactions or seek relevant licenses, as appropriate, in the event of regulatory changes that would require such actions.

At the same time, our core products are not subject to the EAR. Except for certain items manufactured in the U.S. and sold exclusively to U.S.-based customers, the Company's products are not manufactured in the United States and, in the ordinary course of business, are not located in, shipped from, or routed through the United States. Accordingly, such products are generally not treated as U.S.-origin items for U.S. export control purposes. Therefore, the current U.S. export control regime has not had, and is not expected to have, a material impact on our business operations or financial performance.

To ensure full compliance with applicable sanctions and export control regulations, we have implemented a robust internal control process designed to prevent potential violations. Manufacturing for customers subject to enhanced compliance procedures is conducted exclusively at the Group's facilities in the Chinese mainland. The Group also maintains controls to ensure that no U.S.-origin controlled items, software, or technology are used in the design or production of products supplied for such customers under such procedures. In addition, the Group maintains detailed procurement and usage records and conducts

regular compliance reviews to confirm adherence to export control requirements. We also conduct counterparty screening and escalation reviews for higher risk transactions and consult external legal advisers where appropriate. Based on these controls, we seek to ensure that our relevant transactions are conducted in compliance with applicable sanctions and export control requirements.

Given the complexity of these regulations and the sudden and unpredictable nature of changes to them, it is difficult to predict developments in this area and we have no ability to influence such determinations. For associated risks, see "Risk Factors — Risks Relating to Our Business and Industry — We are subject to governmental export and import controls and economic sanctions, which could affect our ability to compete in certain markets or expose us to liability in certain jurisdictions."

Procurement from the United States

We procure certain raw materials and components from suppliers in the United States. During the Track Record Period, the raw materials and components procured from suppliers in the United States primarily comprised metal materials, mechanical components, electronic components, functional consumables and adhesives, thermal materials, and coating and surface-treatment materials. Our procurement costs from suppliers in the United States amounted to approximately RMB304.3 million, RMB206.0 million, RMB167.7 million and RMB105.9 million in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively, representing less than 1.5% of our total raw material procurement costs in each respective year/period. These items fall outside the scope of restrictions under the EAR and were not restricted at the time of procurement. At the same time, save for Source Photonics as discussed below, we do not use U.S.-origin controlled technology in our manufacturing processes. As a result, our products generally do not incorporate controlled U.S.-origin commodities, are not bundled with controlled U.S.-origin software, and are not "direct products" of U.S.-origin technology or software in a manner that would cause them to be subject to the EAR under the de minimis or FDPR. Accordingly, our products, other than those of Source Photonics, are not subject to the EAR.

With respect to Source Photonics, certain product lines use both U.S.-origin and PRC-origin materials and technology. As these product lines incorporate U.S.-origin items, they could be subject to the EAR. Source Photonics therefore maintains a rigorous compliance framework to assess EAR applicability and, where relevant, implement appropriate controls to keep the product lines that could be subject to the EAR separate from those supplied to regulated customers. Products supplied to customers designated on the Entity List (i) do not contain any U.S.-origin controlled content, (ii) are not produced using U.S.-origin controlled technology or software, (iii) and are manufactured exclusively at our facilities in the Chinese mainland. Accordingly, as advised by our legal adviser as to international sanctions, our Directors confirm that the products supplied to customers designated on the Entity List are not subject to the EAR.

Tariff Policies

There is currently significant uncertainty about the tariff policies in the United States and certain other countries. Currently, the applicable U.S. import tariff rates on our principal products are as follows: LCD & OLED module is subject to a tariff rate of 45%; PCBs, touch panel and telecommunication equipment are each subject to a tariff rate of 35%; automotive component is subject to a tariff rate of 27.5%; and data center transceiver and telecommunication transceiver are subject to a tariff rate of 7.5%. We believe that the Additional U.S. Tariffs and other tariff measures adopted by other jurisdictions will not have a material impact on our business and results of operations. Under most circumstances, our products are delivered into special supervision territories in China and are further processed or assembled by downstream manufacturers before being incorporated into end products, such as smartphones. Customers taking delivery in such special supervision territories, which are physically located in China, are the parties that are generally responsible for any import duties and tariffs imposed by the destination countries upon importation, including the Additional U.S. Tariffs if the products are subsequently exported to the United States, instead of us. Given that most large-scale manufacturing bases for leading consumer electronics brands, including those for Customer A, are located outside the United States, our products are rarely exported directly to the United States. During the Track Record Period, our revenue attributable to the United States based on incorporation place of customers amounted to RMB19,333.7 million, RMB18,953.0 million, RMB20,386.5 million and RMB12,784.8 million in 2023, 2024,

2025 and the six months ended June 30, 2026, respectively, representing approximately 57.5%, 51.5%, 50.8% and 46.1% of our total revenue for the corresponding years/periods respectively, and therefore constituted a decreasing portion of our total revenue.

During the Track Record Period and up to the Latest Practicable Date, we did not experience any material order cancellations, pricing pressure or loss of customers attributable to tariff policies. However, such tariffs could have an indirect impact on us. To the extent our customers' end products are subject to increased U.S. tariffs, their overall costs may rise and demand in the U.S. market may weaken, which could lead to adjustments in production planning, order volumes and product mix, increased pricing pressure on upstream suppliers or supply chain reconfiguration. Any such developments could, in turn, adversely affect our sales, margins and utilization rates, even where our products are not directly exported to the United States. In light of the foregoing, and given the limited revenue contribution from direct sales into the United States, the Directors are of the view that the U.S. tariffs did not have, and are not expected to have, a material adverse impact on the Group's business operations or financial performance.

You should note that we began consolidating Source Photonics' results into our consolidated financial statements from October 2025. As a result, the historical operating results and financial condition of our Group for the years ended December 31, 2023 and 2024 do not reflect the financial information of Source Photonics, while those for the year ended December 31, 2025 reflect the financial information of Source Photonics only for the period from October 2025 onwards. Please see "History, Development and Corporate Structure" for more information on the acquisition of Source Photonics. To follow applicable regulations and disclosure requirements and for the purpose of presenting necessary key data to assess the financial impacts of the Source Photonics, this prospectus includes the audited historical financial information of Source Photonics for the years ended December 31, 2023, 2024 and nine months ended September 30, 2025, and unaudited historical financial information of Source Photonics for the nine months ended September 30, 2024 (see "Appendix IB — Accountants' Report of the Source Photonics Group") and the discussion and analysis on the historical financial information of Source Photonics for the years ended December 31, 2023, 2024 and the nine months ended September 30, 2024 and 2025 in this section.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and the related notes included in Appendix IA and IB to this prospectus. Our consolidated financial statements have been prepared in accordance with IFRS.

The following discussion and analysis contain forward-looking statements that involve risks and uncertainties. These statements are based on assumptions and analysis made by us in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. You should not place undue reliance on any such statements. Our actual future results and timing of selected events could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under "Risk Factors," "Forward-Looking Statements" and elsewhere in this prospectus.

For the purpose of this section, unless the context otherwise requires, references to the years of 2023, 2024 and 2025 refer to the years ended December 31, 2023, 2024 and 2025, respectively.

OVERVIEW

We are a manufacturer primarily focused on PCBs, precision components, touch panels and LCMs and optical transceivers, with a global presence and operating footprint. Our products are widely used in consumer electronics, automobiles, data centers, telecommunications equipment and industrial control devices, ultimately enabling the connection of people, devices and infrastructure. In September 2025, we entered the optical transceiver business through our acquisition of Source Photonics, thereby expanding our product portfolio to include optical transceivers.

During the Track Record Period, we generated revenue from five operating segments, namely electronic circuits (PCBs), precision components, touch panels and LCMs, optical transceivers and others. We provide distinctive and comprehensive solutions by leveraging technological innovation and advanced manufacturing and creating synergies across product, R&D, technology, supply chain and sales.

In 2023, 2024, 2025 and the six months ended June 30, 2026, our revenue amounted to RMB33,651.2 million, RMB36,770.4 million, RMB40,124.9 million and RMB27,797.7 million, respectively. In 2023, 2024, 2025 and the six months ended June 30, 2026, our profit for the year/period amounted to RMB1,965.1 million, RMB1,085.1 million, RMB1,393.0 million and RMB2,984.6 million, respectively.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business, results of operations and financial condition are affected by a number of general factors influencing the overall performance of the industry where we operate. These factors include macroeconomic trends, industry development and competitive landscape in the market. Any adverse development can have a negative impact on our results of operations.

End-Market Dynamics and Product Applications

Our products are used in a broad range of end applications, including AI computing, consumer electronics, automotive, telecommunications and other industrial applications. Demand for our products stems from the performance of these markets for these applications and the commercial success of our customers' products. These markets are highly competitive, evolve rapidly and are influenced by changes in the macroeconomic environment and end users' preferences, which could impact our business and results of operations.

Ongoing innovation in these end products increases the technical requirements for our PCBs, precision components, touch panels and LCMs, and optical transceivers. For example, the growing popularity of edge AI devices and ultra-slim or foldable smartphones is driving greater demand for high-density and thin FPCs with tighter routing and higher process precision. Meanwhile, the rise of AI computing has created a significant demand for RPCBs supporting high-speed, low-latency data transmission. Similar trends in automotive and telecommunications equipment require components with stricter reliability, signal integrity and thermal performance standards. In response, we have developed advanced FPCs, high-layer-count PCBs, high-build-up HDIs and other products to meet these needs and invested in product development and process upgrades to address these requirements. However, the timing and pace of customer end product ramps may materially affect our revenue and margins.

Our performance is also sensitive to broader macroeconomic conditions. Changes in regional and global economic conditions and consumer spending could affect the demand for consumer electronics and automobiles, which would in turn impact the sales of our PCBs, precision components, touch panels and LCMs, and optical transceivers. Data center spending is also influenced by cloud and hyperscale capital expenditure cycles, and telecommunications demand depends on carrier rollout plans and, in some cases, regulatory or policy factors. The pace and trajectory of these cycles could significantly impact our operating results.

Product Mix

Our revenue and profitability are affected by the mix of products we sell across various applications. We currently offer (i) PCBs, including FPC, RPCB and Rigid-Flex, (ii) precision components, including automotive components and telecommunications equipment components, (iii) touch panels and LCMs, including touch panels and LCD and OLED modules and (iv) optical transceivers, including data center transceivers and telecommunications transceivers. Our product mix changes over time with market conditions, customer preferences and technology developments in end products that incorporate our products.

These categories carry different selling prices and margin profiles, reflecting variations in technical complexity, production processes, customer specifications, competitive intensity, raw material exposure and product positioning. For example, in 2025, our PCB products recorded a gross margin of 16.7% and Source Photonics' data center transceivers recorded a gross margin of 39.5%, while our touch panel and LCM products recorded a gross margin of 4.5% in the same year, which is below our overall gross margin due to stronger pricing pressure in the end markets. Furthermore, different products within the same category may have different selling prices and profit margins as well. In 2025, within precision components, our automotive components recorded a gross margin of 9.5%, while our telecommunications equipment components recorded a gross loss margin of 7.0% in the same year. In addition, the gross profit margin of optical transceivers increased from 27.8% for the nine months ended September 30, 2025 to 36.8% for the fourth quarter of 2025, primarily due to a shift in product mix toward higher-end products. As a result, the mix of our products sold in a given year significantly impacts our financial condition and profitability.

We aim to optimize our product mix toward higher-margin, value-added offerings. As we strengthen relationships with existing customers and solidify our position in target markets, we seek to increase the proportion of higher-margin products supplied to them. As such, our ability to effectively manage our product portfolio, respond to changing customer requirements or appropriately price our products is expected to continue to impact our profitability.

Customer Base

We serve the AI computing, consumer electronics, automotive and telecommunications markets through our PCBs, precision components, touch panels and LCMs and optical transceivers, where rapid

product cycles require customers to launch or upgrade offerings quickly. These industries are characterized by intense competition and sometimes price reduction pressures in recent years. Consequently, our customers are under constant pressure to introduce new products at competitive prices. This trend requires us to continuously upgrade our production processes to support our customers' evolving specifications and improve our ability to consistently deliver high-quality products on schedule, which directly affects our success in deepening existing relationships and securing design-ins for subsequent collaborations.

Moreover, the global production of PCBs, precision components, touch panels and LCMs is concentrated in China, but an increasing number of manufacturers are establishing facilities outside of China to enhance supply chain resilience and meet localization requirements. In order to maintain and grow our business, we plan to continue meeting the delivery and localization requirements of leading global customers as we plan new production lines and facilities worldwide.

In addition to strengthening relationships with existing customers, our performance also depends on our ability to win new customers. We seek to expand our customer base by offering solutions tailored to customized technical requirements across our product lines and by demonstrating reliable execution through qualification and ramp-up. Our ability to attract new customers is influenced by our technical capabilities, pricing and service levels, our marketing activities and the broader competitive dynamics of the global PCB, precision manufacturing, optoelectronic display and optical transceiver markets.

Raw Material and Supply Chain Volatility

Our results of operations are affected by the availability and pricing of key raw materials, such as copper foil, high-grade aluminum alloys and copper alloys, which together account for a significant portion of our product costs. At the same time, each product category relies on different raw materials and therefore has a different raw material cost structure. For example, in 2023, 2024, 2025 and the six months ended June 30, 2026, direct raw material costs represented approximately 56.4%, 56.0%, 56.0% and 54.7% of our revenue for PCBs, respectively; in contrast, for the same year, direct raw material costs represented approximately 84.0%, 81.5%, 82.2% and 81.4% of our revenue for touch panels and LCMs. As a result, these differences in cost structure also affect the margin profile of different products. Our selling prices do not always track raw material costs, or do so on the same timeline, which can also lead to fluctuations in margins and results.

The prices and supply of these materials are closely linked to international commodity markets and global supply and demand. If we encounter tight supply or sharp price increases and cannot offset them through technological improvements, process efficiencies, procurement initiatives or timely price adjustments, we may experience supply constraints or margin compression. While we seek to mitigate these risks through multi-sourcing, longer term supply arrangements, inventory planning and commodity hedging, sustained volatility could negatively impact our production efficiency, profitability and overall financial performance.

Research and Development Capabilities

Research and development is critical to our long-term competitiveness and sustainable growth. We work closely with customers to co-develop products tailored to their requirements and the competitive market dynamic drives our customers, and by extension, us, to continuously enhance our research and development capabilities to deliver innovative products that meet their ever-changing requirements. Therefore, the ability to meet these needs depends on our research, development and implementation of new technologies. We have been investing, and expect to continue investing, in R&D. In 2023, 2024, 2025 and the six months ended June 30, 2026, our R&D expenses were RMB1,161.2 million, RMB1,266.8 million, RMB1,417.2 million and RMB784.3 million, representing 3.5%, 3.4%, 3.5% and 2.8% of total revenue for the same years/periods, respectively.

Our R&D efforts are aligned with strategic priorities to reinforce our market position in advanced PCB technologies, with a focus on emerging industries and high-growth applications such as AI servers, data centers, optical transceivers, automotive and telecommunications. R&D outcomes affect our business in

multiple ways, including whether we can maintain and deepen relationships with existing customers and win new customers, whether we can broaden our portfolio of products and services and whether we can improve production efficiency through process optimization and greater automation. R&D timing and commercialization outcomes can also affect margins and cash flows as yield and cycle-time improvements may be realized over time.

Foreign Exchange Fluctuations

Our reporting currency is the RMB. However, a substantial portion of our sales are quoted in USD, and a portion of our procurement is also settled in USD. Certain subsidiaries of ours also conduct transactions in foreign currencies and have cash and bank balances, trade receivables, other receivables, trade payables, other payables and borrowings denominated in foreign currencies, exposing us primarily to USD exchange rate risk. As such, the USD to RMB exchange rate not only has an impact on our revenues but also our profit margins.

In 2023, 2024, 2025 and the six months ended June 30, 2026, we recorded financial assets denominated in USD of RMB10,111.6 million, RMB9,886.0 million, RMB8,658.3 million and RMB9,296.4 million, respectively. During the same years/periods, we recorded financial liabilities denominated in USD of RMB3,650.1 million, RMB3,308.4 million, RMB3,288.2 million and RMB2,826.8 million, respectively. As a result, changes in exchange rates also have an impact on our consolidated financial information through both realized and unrealized gains or losses.

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. In 2023 and 2024, we recorded net foreign exchange gains of RMB129.9 million and RMB294.7 million, respectively. In 2025 and the six months ended June 30, 2026, we recorded net foreign exchange losses of RMB27.4 million and RMB436.6 million. See Note 3.1(a) to "Appendix IA — Accountants' Report of the Group" for further details regarding the carrying amounts of our monetary assets and liabilities denominated in foreign currencies and the effect of foreign currency fluctuations on our results of operations.

THE ACQUISITION OF SOURCE PHOTONICS HOLDINGS (CAYMAN) LIMITED

We began consolidating Source Photonics' results into our consolidated financial statements from October 2025. For details of the transaction, see "History, Development and Corporate Structure."

BASIS OF PRESENTATION

Our and Source Photonics' historical financial information has been prepared in accordance with all applicable International Financial Reporting Standards ("**IFRS**") issued by the International Accounting Standards Board ("**IASB**"). The historical financial information has been prepared under the historical cost convention, as modified by the revaluation of financial assets and liabilities measured at fair value through profit or loss and financial assets measured at fair value through other comprehensive income. See Note 2 to "Appendix IA — Accountants' Report of the Group," and "Appendix IB — Accountants' Report of the Source Photonics Group" for further details.

To comply with the requirements of Rules 4.04 and 4.05A of the Listing Rules, as well as to present material information necessary for investors to assess our business, this prospectus includes (i) audited historical financial information of the Group for the years ended December 31, 2023, 2024, 2025 and the six months ended June 30, 2026, and unaudited historical financial information of the Group for the six months ended June 30, 2025 (see "Appendix IA — Accountants' Report of the Group"); (ii) audited historical financial information of Source Photonics for the years ended December 31, 2023 and 2024 and nine months ended September 30, 2025, and unaudited historical financial information of Source Photonics for the nine months ended September 30, 2024 (see "Appendix IB — Accountants' Report of the Source Photonics Group"); (iii) a discussion and analysis of the historical financial information of Source Photonics for the years ended December 31, 2023, 2024 and the nine months ended September 30, 2024 and 2025 (see "— Financial Information of Source Photonics").

MATERIAL ACCOUNTING POLICIES AND ESTIMATES

Notes 4 of "Appendix IA — Accountants' Report of the Group" and "Appendix IB — Accountants' Report of the Source Photonics Group" to this prospectus set forth critical accounting estimates and key judgments, which are important for understanding our financial condition and results of operations.

Some of our accounting policies require us to apply estimates and assumptions as well as complex judgments relating to accounting items. The estimates and assumptions we use and the judgments we make in applying our accounting policies have a significant impact on our financial position and results of operations. Our management continually evaluates such estimates, assumptions and judgments based on past experiences and other factors, including industry practices and expectations of future events that are believed to be reasonable under the circumstances. There has not been any material deviation between our management's estimates or assumptions and actual results, and we have not made any material changes to these estimates or assumptions during the Track Record Period. We do not expect any material changes in these estimates and assumptions in the foreseeable future.

Impairment Tests for Goodwill

Goodwill is not subject to amortization and is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets.

The carrying amounts of goodwill allocated to the cash generating units or group of cash generating units ("**CGUs**") are as follows:

(i) The goodwill is generated from business combination of MFLEX Delaware, Inc ("MFLEX"). Management regards MFLEX as a separate CGU and reviews the business performance and monitors the goodwill on the individual CGU basis.

(ii) The goodwill is generated from business combination of Multek Hong Kong Limited ("Multek"). Management regards Multek as a separate CGU and reviews the business performance and monitors the goodwill on the individual CGU basis.

(iii) The goodwill is generated from business combination of Mutto Optronics Technology Co., Ltd. ("Mutto Optronics"). Management regards Mutto Optronics as a separate CGU and reviews the business performance and monitors the goodwill on the individual CGU basis.

(iv) The goodwill is generated from business combination of Suzhou RF Top Electric Communications Co., Ltd ("Suzhou RF"). Management regards Suzhou RF as a separate CGU and reviews the business performance and monitors the goodwill on the individual CGU basis.

(v) The goodwill is generated from business combination of Source Photonics Holdings (Cayman) Limited ("Source Photonics"). Management regards Source Photonics as a separate CGU and reviews the business performance and monitors the goodwill on the individual CGU basis.

The following table sets out the key assumptions for these CGUs that have goodwill allocated to them, where the Group used five-year period as the projection period for the cash flow forecast.

Year ended December 31, 2023

	MFLEX	Multek	Mutto Optronics	Suzhou RF
Revenue annual growth rates	0.10% to 1.19%	-0.76% to 4.06%	1.50% to 8.73%	-1.34% to 24.14%
Operating profit margin	16.19% to 17.30%	16.49% to 17.45%	6.42% to 7.12%	18.00% to 24.69%
Perpetual annual growth rates	0.00%	0.00%	0.00%	0.00%
Pre-tax discount rates	11.68%	10.99%	10.84%	12.46%

Year ended December 31, 2024

	MFLEX	Multek	Mutto Optronics	Suzhou RF
Revenue annual growth rates	0.13% to 1.00%	0.99% to 2.09%	-19.66% to 2%	-1.34% to 27.80%
Operating profit margin	16.23% to 17.57%	17.22% to 18.00%	7.38% to 7.62%	7.54% to 19.23%
Perpetual annual growth rates	0.00%	0.00%	0.00%	0.00%
Pre-tax discount rates	13.83%	11.55%	9.49%	12.40%

Year ended December 31, 2025

	MFLEX	Multek	Mutto Optronics	Suzhou RF	Source Photonics
Revenue annual growth rates	0.00% to 0.40%	0.32% to 7.73%	6.00% to 6.00%	5.03% to 71.83%	1.85% to 16.03%
Operating profit margin	9.24% to 10.44%	9.74% to 11.63%	5.51% to 7.02%	12.79% to 17.48%	26.02% to 28.39%
Perpetual annual growth rates	0.00	0.00%	0.00%	0.00%	0.00%
Pre-tax discount rates	12.73%	12.50%	9.30%	14.20%	16.70%

Six months ended June 30, 2026

	MFLEX	Multek	Suzhou RF	Source Photonics
Revenue annual growth rates	0.00% to 0.14%	0.00% to 5.60%	4.80% to 51.62%	0.84% to 118.70%
Operating profit margin	16.25% to 17.55%	20.67% to 22.24%	13.23% to 16.10%	27.56% to 34.97%
Perpetual annual growth rates	0.00%	0.00%	0.00%	0.00%
Pre-tax discount rates	12.70%	13.89%	14.50%	19.10%

Management has determined the values assigned to each of the above key assumptions as follows:

Assumption	Approach used to determine values
Revenue annual growth rates	Revenue annual growth rate is estimated over the five-year forecast period. The management of the Group used a five-year period as the projection period for the cash flow forecast, which was in line with the period length used in the corresponding strategic planning and long-term budgeting purpose.
Operating profit margin	Based on past performance and management's expectations for the future.
Perpetual annual growth rates	This is the weighted average growth rate used to extrapolate cash flows beyond the forecast period. The rates are determined after making reference to long-term inflation rate of the countries in which they operate. The perpetual annual growth rates remained stable which was due to the fact that the long-term inflation rates of the relevant countries were relatively stable during the Track Record Period.
Pre-tax discount rates	Estimated by using the weighted average cost of capital ("WACC") method. The WACC was calculated by referring to public market data including risk free rate, market return, beta of comparable public companies etc. and the specific risk of the business.

Based on management's assessment on the recoverable amounts, the headroom of these CGUs was as follows:

The Group

Subsidiary	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
MFLEX	7,674,174	4,396,518	7,807,868	7,622,453
Multek	195,185	246,458	282,723	537,080
Mutto Optronics	—	—	—	—
Suzhou RF	22,513	—	—	8,412
Source Photonics	—	—	386,108	4,180,273

Sensitivity analysis has been performed based on the assumptions that revenue annual growth rates, operating profit margin and pre-tax discount rates have been changed. Had the estimated key assumptions during the forecast period been changed as shown below, while other parameters remain constant, the headroom of the CGUs would be as follows:

For MFLEX CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	7,594,174	4,326,518	7,647,868	7,422,453
Operating profit margin decreased by 0.5%	6,734,174	3,576,518	6,907,868	6,722,453
Pre-tax discount rate increased by 0.5%	7,034,174	3,956,518	7,207,868	7,022,453

For Multek CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	185,185	226,458	246,723	513,080
Operating profit margin decreased by 0.5%	35,185	86,458	94,723	332,080
Pre-tax discount rate increased by 0.5%	85,185	136,458	136,723	334,080

For Suzhou RF CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	3,513	(57,830)	(84,795)	(3,588)
Operating profit margin decreased by 0.5%	3,513	(57,830)	(84,795)	(3,588)
Pre-tax discount rate increased by 0.5%	5,513	(50,830)	(104,795)	3,412

For Mutto Optronics CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	(2,000)	(1,000)	(11,652)	—
Operating profit margin decreased by 0.5%	(139,000)	(131,000)	(12,652)	—
Pre-tax discount rate increased by 0.5%	(19,000)	(16,000)	(7,252)	—

For Source Photonics CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	—	—	376,108	3,820,273
Operating profit margin decreased by 0.5%	—	—	326,108	3,980,273
Pre-tax discount rate increased by 0.5%	—	—	186,108	3,860,273

The recoverable amounts of the CGUs would equal their carrying amounts if the key assumptions were to change as follows:

For MFLEX CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
Revenue annual growth rates	(45.98)%	(31.40)%	(25.25)%	(24.22)%
Operating profit margin	(4.10)%	(2.69)%	(4.34)%	(4.15)%
Pre-tax discount rates	10.92%	7.10%	11.35%	10.49%

For Multek CGU

	As at December 31,			As at June 30,
	2023	2024	2025	2026
Revenue annual growth rates	(10.24)%	(9.00)%	(3.93)%	(11.25)%
Operating profit margin	(0.80)%	(0.77)%	(0.75)%	(1.31)%
Pre-tax discount rates	1.35%	1.25%	1.00%	1.42%

For Suzhou RF CGU

	As at December 31,			As at June 30,
	2023	2024	2025	2026
Revenue annual growth rates	(0.59)%	0.86%	3.63%	(0.36)%
Operating profit margin	(0.59)%	0.86%	3.63%	(0.36)%
Pre-tax discount rates	0.65%	(1.10)%	(4.84)%	0.89%

For Source Photonics CGU

	As at December 31,			As at June 30,
	2023	2024	2025	2026
Revenue annual growth rates	—	—	(10.99)%	(27.60)%
Operating profit margin	—	—	(3.39)%	(10.51)%
Pre-tax discount rates	—	—	6.00%	9.37%

PRINCIPAL COMPONENTS OF RESULTS OF OPERATIONS

Revenue

During the Track Record Period, we generated revenue from the following operating segments:

- Electronic circuits (PCBs), including FPCs, RPCBs and Rigid-Flexes;
- Precision components, including automotive components and telecommunications equipment components;
- Touch panels and LCMs, including touch panels and LCD and OLED modules;
- Optical transceivers, including data center transceiver and telecommunications transceiver; and
- Others, which primarily include the sales of LED display products, raw and scrap materials and other ancillary businesses.

Note:

(1) Revenue in 2025 represents the revenue for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

During the Track Record Period, electronic circuits were our largest revenue contributor. As we continue to capitalize on our unique capability in providing PCBs for edge-to-cloud AI applications from data centers to the edge, we expect the sales of PCBs will continue to grow and remain a key revenue contributor. We also provide precision components, touch panels and LCMs and optical transceivers to address customers' diverse needs and have maintained strong relationships with our key customers.

Others comprises LED display products and scrap materials. Our LED display business was engaged in the packaging of LED display components used mainly in fine-pitch, high-definition LED display screens for indoor and outdoor applications. Scrap materials are generated in the production processes of our four main business segments. They mainly comprise metal offcuts such as aluminum and stainless steel, scrapped boards, metals recovered from sludge and spent chemical solutions, residual materials from optical chip, as well as general production scrap.

During the Track Record Period, our LED display business recorded gross losses from 2023 to 2025, as industry-wide prices of LED display components continued to decline. From 2025, we implemented a series of measures to improve its profitability, including restructuring our manufacturing system to reduce production costs, shifting our product mix towards higher-margin products and engaging suppliers that offered more competitive prices. However, given intense industry competition and weak market demand, we decided to further scale back the business and dispose of the relevant assets, while maintaining a very limited level of business with existing customers.

Notes:

* Information about our revenue from customers is presented based on customers' place of incorporation. The shipping destination of the relevant downstream end-customers mainly included the Chinese mainland, Special supervision territory in China, the United States, and Europe.

(1) Special supervision territory in China refers to a specific geographical area in China, including geographically enclosed areas such as bonded zones and free trade zones. Sales conducted in the Special Supervision Territory are subject to preferential customs and tax treatment. Such sales are presented separately from sales in the Chinese mainland due to its distinct regulatory framework and customs clearance rules that differ from those applicable to other regions of China. Sales to the special supervision territory are treated as exports under applicable laws and regulations.

During the Track Record Period, a majority of our revenue was from customers outside the Chinese mainland. As we continue to serve a global customer base, we expect sales to customers outside the Chinese mainland to remain a key revenue contributor going forward.

Telecommunications transceiver	–	–	–	–	1,896.5	120.2	–	–	2,835.6	138.9

Notes:

(1) Sales volume is measured using the following units for each product category: electronic circuit products are measured by the aggregate area of specific product types in square meters (m^2), representing the total area of PCBs sold; precision component, touch panel and LCM and optical transceiver products are measured in units, representing the total number of finished components or assemblies.

(2) Average selling price is calculated by dividing the revenue in a given product category by the corresponding sales volume.

(3) Sales volume and average selling price in 2025 represent those for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

The sales volume of electronic circuits increased throughout the Track Record Period, mainly driven by the strong downstream demand in consumer and automotive electronics. The sales volume of precision components increased throughout the Track Record Period, mainly attributable to increased orders and capacity expansion, as well as a broader product portfolio, for automotive components.

Cost of Sales

Our cost of sales primarily consists of (i) raw materials costs, (ii) labor costs and (iii) depreciation and amortization. During the Track Record Period, our cost structure remained stable, with raw material costs constituting the largest component.

	Year Ended December 31,						Six months ended June 30,

Notes:

(1) The overall gross margin is calculated as gross profit for the year/period divided by revenue for the corresponding year and multiplied by 100%.

(2) Gross profit and gross profit margin in 2025 represents those for the period from October 1, 2025 to December 31, 2025, as Source Photonics was consolidated into our financial statements in October 2025.

Our gross profit and gross profit margin increased from the six months ended June 30, 2025 to the six months ended June 30, 2026, primarily due to increases in revenue from acquisition of Source Photonics, which carries higher gross margins, increase in sales of electronic circuits and precision components with margin improvement as well as margin improvement in touch panels and LCMs.

Our gross profit and gross profit margin increased from 2024 to 2025, primarily due to increases in revenue from acquisition of Source Photonics and sales of RPCBs and Rigid-Flexes with higher gross margins and margin improvement in touch panels and LCMs.

Our gross profit and gross profit margin decreased from 2023 to 2024, primarily due to a decline in gross profit from electronic circuits, mainly driven by higher manufacturing costs associated with the ramp-up of certain new product types and higher raw material prices, as well as higher losses in others that were mainly attributable to LED display products.

General and Administrative Expenses

Our administrative expenses primarily include (i) employee benefit expenses, including salaries and other compensations for personnel engaging in the general and administrative function, (ii) tax and surcharges, (iii) depreciation and amortization and (iv) office expenses and business development fees.

	Year Ended December 31,						Six months ended June 30,

Notes:

(1) Consulting services fees mainly include fees paid to third-party professional service providers in connection with our corporate and administrative matters.

(2) Others mainly include property insurance expenses, travel expenses and security and cleaning expenses.

Selling and Marketing Expenses

Our selling and marketing expenses primarily include (i) employee benefit expenses, including salaries and other compensations for personnel engaging in the sales and marketing function, (ii) sales service fees and (iii) travel and business development expenses. Our sales service fees increased from 2023 to 2024 and from the six months ended June 30, 2025 to the six months ended June 30, 2026, primarily due to (i) higher sample-related costs incurred in providing FPC product samples to customers for evaluation and testing, with the goal of securing more orders and expanding our market share and (ii) increased employee benefit expenses and other related selling expenses following the consolidation of the newly acquired businesses.

Notes:

(1) Sales service fees mainly include commissions incurred to promote sales of our products.
(2) Others mainly include short-term lease expenses and advertising and promotional expenses.

Research and Development Expenses

Our research and development expenses primarily comprise (i) employee benefit expenses, including salaries and other compensations for personnel engaging in the research and development function and (ii) raw material costs.

	Year Ended December 31,						Six months ended June 30,			
	2023		2024		2025		2025		2026

Note:

(1) Others mainly include technical consulting fees, and inspection and testing fees.

Net Impairment Losses on Financial Assets

Our impairment losses under the expected credit loss model, net of reversal, represent net impairment losses recognized on trade receivables, notes receivables and other receivables. In 2023, 2024, 2025 and the six months ended June 30, 2026, our provision of impairment loss amounted to RMB39.4 million, RMB44.1 million, RMB63.7 million and RMB13.8 million, respectively.

Other Income

Our other income consists of (i) government grants, (ii) additional deduction for VAT and tax refund and (iii) others. The Group's government grants mainly comprise asset-related grants and income-related grants. Asset-related government grants were generally investment-incentive subsidies provided by government authorities that are directly linked to the construction or acquisition of specific long-term assets. Eligibility criteria and conditions vary by grant program and region, but generally require the applicant to be a qualifying industrial enterprise operating within the relevant location and meeting minimum fixed asset investment thresholds. Income-related grants were generally one-off policy incentive subsidies provided in recognition of qualifying activities such as technological upgrades and contributions to local economic development.

Other Gains, Net

Our other gains primarily consist of (i) net gains/(losses) on disposal and holding of financial instruments, (ii) net fair value gains/(losses) on financial assets and liabilities at FVTPL, (iii) net foreign exchange differences and (iv) net losses on disposal of property, plant and equipment and other long-term assets.

Our net fair value gains/(losses) on financial assets and liabilities at FVTPL increased significantly from RMB2.5 million in the six months ended June 30, 2025 to RMB490.7 million in the six months ended June 30, 2026, primarily due to fair value gains of RMB487.2 million on our investments in two companies, which we subscribed for as a strategic investor in their initial public offerings.

Finance Costs, Net

Our finance costs, net primarily consists of (i) interest expenses on borrowings, (ii) interest expenses on lease liabilities and (iii) net exchange losses on foreign currency borrowings. Our finance income primarily derives from interest income from financial assets held for cash management purposes.

Income Tax Expense

Our income tax expenses comprise current tax and deferred tax. We are subject to income tax on an entity basis on profits arising in or derived from the tax jurisdictions in which the members of our Company are domiciled and operate. Entities established in the PRC were subject to the PRC corporate income tax rate of 25% during the Track Record Period. Certain subsidiaries of ours have obtained High and New Technology Enterprises certification and thus they are entitled to a preferential corporate income tax rate of 15% for certain years during the Track Record Period. The provision for Hong Kong Profits Tax for the Track Record Period was calculated at 16.5% of the estimated assessable profits for the periods. The provision for Singapore Profits Tax for the Track Record Period was calculated at 17.0% of the estimated assessable profits for the periods; one subsidiary of ours in Singapore is eligible for concessionary corporate income tax rate under the Development and Expansion Incentive administered by Singapore's Economic Development Board. France profits tax has been provided for at the rate of 25.83% on the estimated assessable profits for the eight months in the period from November 1, 2025 to June 30, 2026. See Note 12 to "Appendix IA — Accountants' Report of the Group" for tax rates in other jurisdictions in which we operate.

We recorded income tax expenses of RMB226.0 million, RMB382.7 million, RMB297.4 million and RMB503.8 million in 2023, 2024, 2025 and the six months ended June 30, 2026, respectively. During the Track Record Period and up to the Latest Practicable Date, we had fulfilled all our tax obligations and did not have any unresolved tax disputes.

Note:

* "–" indicates not applicable, as Source Photonics was consolidated into the Group since October 1, 2025.

Electronic Circuits (PCBs)

FPC

Our revenue from the sales of FPCs increased by 9.3% from RMB9,277.6 million in the six months ended June 30, 2025 to RMB10,137.3 million in the six months ended June 30, 2026, primarily due to an increase in sales volume from 1,871.1 thousand square meters in the six months ended June 30, 2025 to 2,328.9 thousand square meters in the six months ended June 30, 2026, driven by increased demand in automotive and consumer electronics supported by the continued growth of the intelligent driving market, partially offset by a decrease in average selling price from RMB4,958.4 per square meter in the six months ended June 30, 2025 to RMB4,352.8 per square meter in the six months ended June 30, 2026, mainly attributable to a shift in product mix toward automotive products, which typically command lower unit

prices due to fewer components per unit and lower circuit density per unit area, as well as lower pricing for consumer electronics FPCs reflecting changes in product specifications in response to customer requirements.

RPCB

Our revenue from the sales of RPCBs increased by 34.0% from RMB1,543.3 million in the six months ended June 30, 2025 to RMB2,067.9 million in the six months ended June 30, 2026, primarily due to (i) an increase in sales volume from 718.6 thousand square meters in the six months ended June 30, 2025 to 757.1 thousand square meters in the six months ended June 30, 2026, driven by increased customer demand for AI and high-performance computing applications, and (ii) an increase in average selling price from RMB2,147.7 per square meter in the six months ended June 30, 2025 to RMB2,731.3 per square meter in the six months ended June 30, 2026, driven by changes in product mix toward higher-layer-count RPCBs, which generally commanded higher prices due to greater design complexity and more stringent process requirements.

Rigid-Flex

Our revenue from the sales of Rigid-Flexes increased by 36.1% from RMB238.4 million in the six months ended June 30, 2025 to RMB324.5 million in the six months ended June 30, 2026, primarily due to an increase in average selling price from RMB5,608.7 per square meter in the six months ended June 30, 2025 to RMB7,913.5 per square meter in the six months ended June 30, 2026, driven by changes in product mix toward more advanced Rigid-Flexes with greater design complexity and process requirements, which had higher prices per square meter. The sales volume of our Rigid-Flexes remained relatively stable.

Precision Components

Automotive Component

Our revenue from the sales of automotive components increased by 205.9% from RMB2,037.0 million in the six months ended June 30, 2025 to RMB6,231.9 million in the six months ended June 30, 2026, primarily due to (i) an increase in sales volume from 79.4 million units in the six months ended June 30, 2025 to 161.3 million units in the six months ended June 30, 2026, and (ii) an increase in average selling price from RMB25.7 per unit in the six months ended June 30, 2025 to RMB38.6 per unit in the six months ended June 30, 2026, both primarily attributable to the acquisition of GMD, which expanded our presence into the European market and broadened our product portfolio toward higher-priced automotive components.

Telecommunications Equipment Component

Our revenue from the sales of telecommunications equipment components increased by 7.4% from RMB324.9 million in the six months ended June 30, 2025 to RMB348.8 million in the six months ended June 30, 2026, mainly due to an increase in sales volume from 1.5 million units in the six months ended June 30, 2025 to 1.6 million units in the six months ended June 30, 2026, primarily attributable to strategic shift toward customers with a more favorable margin profile. The average selling price of our telecommunications equipment components remained relatively stable.

Touch Panels and LCMs

Touch Panel

Our revenue from the sales of touch panels decreased by 18.1% from RMB1,301.6 million in the six months ended June 30, 2025 to RMB1,065.8 million in the six months ended June 30, 2026, primarily due to (i) a decrease in sales volume from 2.9 million units in the six months ended June 30, 2025 to 2.6 million units in the six months ended June 30, 2026 and (ii) a decrease in average selling price from

RMB451.5 per unit in the six months ended June 30, 2025 to RMB413.0 per unit in the six months ended June 30, 2026, primarily due to supply chain challenges faced by certain downstream customers, attributable to tight supply and price increases of memory chips driven by capacity allocation toward AI infrastructure applications.

LCD & OLED Module

Our revenue from the sales of LCD & OLED modules decreased by 5.1% from RMB1,747.4 million in the six months ended June 30, 2025 to RMB1,657.7 million in the six months ended June 30, 2026, primarily due to a decrease in average selling price from RMB169.4 per unit in the six months ended June 30, 2025 to RMB154.3 per unit in the six months ended June 30, 2026, partially offset by an increase in sales volume from 10.3 million units to 10.7 million units.

Others

The revenue of other products increased by 26.4% from RMB485.0 million in the six months ended June 30, 2025 to RMB612.9 million in the six months ended June 30, 2026, mainly attributable to a 125.9% increase in revenue from sales of scrap materials from RMB199.2 million to RMB449.8 million, driven by increased overall production volumes in our existing businesses and the consolidation of Source Photonics and GMD. This increase was partially offset by a 43.0% decrease in revenue from sales of LED display products from RMB285.9 million to RMB163.1 million, due to intensified market competition.

Cost of Sales

	Six Months Ended June 30,		
	2025	**2026**	**% Change**
	(in RMB thousands, except for percentages)		
Raw material costs	11,093,016	16,069,103	44.9
Labor costs	1,536,569	2,898,269	88.6
Depreciation and amortization	981,306	1,413,033	44.0
Utility costs	250,759	577,667	130.4
Others	878,024	1,436,132	63.6
Total	**14,739,674**	**22,394,204**	**51.9**
as % of total revenue	*86.9*	*80.6*	

Our cost of sales increased by 51.9% from RMB14,739.7 million in the six months ended June 30, 2025 to RMB22,394.2 million in the six months ended June 30, 2026, primarily due to (i) a 44.9% increase in raw material costs, (ii) an 88.6% increase in labor costs, (iii) a 44.0% increase in depreciation and amortization, (iv) a 130.4% increase in utility costs and (v) a 63.6% increase in others, mainly attributable to the acquisition of Source Photonics and GMD.

Electronic Circuits (PCBs)

FPC

Our gross profit from the sales of FPCs increased by 13.9% from RMB1,514.5 million in the six months ended June 30, 2025 to RMB1,724.5 million in the six months ended June 30, 2026 primarily due to (i) a 9.3% increase in revenue from sales of FPC, and (ii) an increase of the gross profit margin of our FPCs from 16.3% in the six months ended June 30, 2025 to 17.0% in the six months ended June 30, 2026, mainly attributable to economies of scale from higher sales volume and improved capacity utilization.

RPCB

Our gross profit from the sales of RPCBs increased by 43.2% from RMB270.5 million in the six months ended June 30, 2025 to RMB387.4 million in the six months ended June 30, 2026, primarily due to (i) a 34.0% increase in revenue from sales of RPCBs and (ii) an increase of the gross profit margin of our RPCBs from 17.5% in the six months ended June 30, 2025 to 18.7% in the six months ended June 30, 2026, mainly attributable to a higher proportion of sales of high-layer-count RPCBs for AI computing applications, which carried higher profit margins.

Rigid-Flex

Our gross profit from the sales of Rigid-Flexes increased by 14.2% from RMB76.4 million in the six months ended June 30, 2025 to RMB87.2 million in the six months ended June 30, 2026, primarily due to a 36.1% increase in revenue from sales of Rigid-Flexes, partially offset by a decrease in gross profit margin from 32.1% in the six months ended June 30, 2025 to 26.9% in the six months ended June 30, 2026 mainly because we benefited from lower-cost raw material inventory purchased prior to the increase in raw material and selling prices in the six months ended June 30, 2025, resulting in a comparatively higher gross profit margin in that period relative to the six months ended June 30, 2026.

Precision Components

Automotive Component

Our gross profit from the sales of automotive components increased by 325.3% from RMB176.4 million in the six months ended June 30, 2025 to RMB750.2 million in the six months ended

June 30, 2026, primarily due to (i) a 205.9% increase in revenue from sales of automotive components and (ii) an increase in gross profit margin from 8.7% in the six months ended June 30, 2025 to 12.0% in the six months ended June 30, 2026, mainly attributable to the sales of GMD's products in Europe and Africa, where products generally commanded higher margins.

Telecommunications Equipment Component

Our gross profit from the sales of telecommunications equipment components increased by 53.0% from RMB8.9 million in the six months ended June 30, 2025 to RMB13.7 million in the six months ended June 30, 2026, primarily due to (i) a 7.4% increase in revenue from sales of telecommunications equipment components and (ii) an increase in gross profit margin from 2.7% in the six months ended June 30, 2025 to 3.9% in the six months ended June 30, 2026, mainly attributable to our cost control measures in response to business downsizing.

Touch Panels and LCMs

Touch Panel

Our gross profit from the sales of the touch panels decreased by 3.5% from RMB55.3 million in the six months ended June 30, 2025 to RMB53.4 million in the six months ended June 30, 2026, primarily due to an 18.1% decrease in revenue from sales of touch panels, partially offset by an increase in gross profit margin from 4.3% in the six months ended June 30, 2025 to 5.0% in the six months ended June 30, 2026, mainly attributable to lower depreciation and amortization charges on touch panel production equipment.

LCD & OLED Module

Our gross profit from the sales of LCD & OLED modules increased by 10.3% from RMB96.7 million in the six months ended June 30, 2025 to RMB106.7 million in the six months ended June 30, 2026, primarily due to an increase in gross profit margin from 5.5% in the six months ended June 30, 2025 to 6.4% in the six months ended June 30, 2026, as we continued to shift towards large form factor OLED modules, which commanded higher margins, partially offset by a 5.1% decrease in revenue from sales of LCD & OLED modules.

Others

Our gross profit from the sales of other products increased by 996.3% from RMB16.7 million in the six months ended June 30, 2025 to RMB183.1 million in the six months ended June 30, 2026, mainly attributable to (i) an increase in gross profit from scrap material from RMB70.3 million to RMB182.9 million, driven by a 125.9% increase in revenue from sales of scrap materials and an increase in gross profit margin from 35.3% to 40.7% and (ii) a turnaround of our LED display products from a gross loss of RMB53.6 million in the six months ended June 30, 2025, with a gross loss margin of 18.8%, to a gross profit RMB0.2 million in the six months ended June 30, 2026, with a gross profit margin of 0.2%, following the substantial completion of the disposal of the relevant inventories and fixed assets.

We disposed of the relevant inventories and fixed assets of our LED display business at a loss. As the disposal of our LED display assets is now substantially complete, we do not expect significant further losses from these products. Combined with the relatively stable gross profit margin of our scrap materials, we expect the gross profit of our other products to remain broadly stable in the long term.

General and Administrative Expenses

Our general and administrative expenses increased by 62.6% from RMB620.9 million in the six months ended June 30, 2025 to RMB1,009.3 million in the six months ended June 30, 2026, primarily due to (i) an increase of RMB154.7 million in consulting service fees, (ii) an increase of RMB114.2 million in employee benefit expenses and (iii) an increase of RMB45.3 million in depreciation and amortization. As a percentage of our total revenue, our general and administrative expenses remained stable at 3.7% in the six months ended June 30, 2025 and 3.6% in the six months ended June 30, 2026.

Selling and Marketing Expenses

Our selling and marketing expenses increased by 69.8% from RMB157.9 million in the six months ended June 30, 2025 to RMB268.1 million in the six months ended June 30, 2026, primarily due to (i) an increase of RMB47.8 million in employee benefit expenses and (ii) an increase of RMB46.3 million in sales service fees. As a percentage of our total revenue, our selling and marketing expenses remained stable.

Research and Development Expenses

Our research and development expenses increased by 34.9% from RMB581.5 million for the six months ended June 30, 2025 to RMB784.3 million in the six months ended June 30, 2026, primarily due to (i) an increase of RMB104.2 million in employee benefit expenses, (ii) an increase of RMB71.9 million in others attributable to testing, repair and consultation fees as a result of acquisition of Source Photonics and our increased investment in product development for high-end PCBs and automotive products and (iii) an increase of RMB13.5 million in depreciation and amortization. As a percentage of our total revenue, our research and development expenses decreased from 3.4% in the six months ended June 30, 2025 to 2.8% in the six months ended June 30, 2026, primarily reflecting our continued improvement in R&D efficiency following our recent acquisitions.

Net Impairment Losses on Financial Assets

Our impairment losses under the expected credit loss model shifted from a net reversal of impairment losses of RMB3.8 million in the six months ended June 30, 2025 to a net impairment loss of RMB13.8 million in the six months ended June 30, 2026, primarily due to increased provisions on trade receivables attributable to the acquisition of Source Photonics.

Other Income

Our other income increased by 21.4% from RMB141.3 million in the six months ended June 30, 2025 to RMB171.6 million in the six months ended June 30, 2026, due to (i) an increase of RMB24.5 million in government grants and (ii) an increase of RMB5.1 million in additional deduction for VAT and tax refund.

Other Gains, Net

Our other gains, net increased by 10.4% from RMB62.4 million in the six months ended June 30, 2025 to RMB68.9 million in the six months ended June 30, 2026, primarily due to (i) an increase of RMB488.2 million in net fair value gains on financial assets and liabilities at FVTPL, (ii) an increase of RMB12.0 million in net gains on disposal and holding of financial instruments and (iii) a decrease of RMB10.1 million in net losses on disposal of property, plant and equipment and other long-term assets, partially offset by a decrease of RMB514.8 million in net foreign exchange differences.

Finance Costs, Net

Our net finance costs decreased by 22.2% from RMB98.1 million in the six months ended June 30, 2025 to RMB76.3 million in the six months ended June 30, 2026, primarily due to (i) an increase in net exchange gains on foreign currency borrowings of RMB146.9 million and (ii) an increase in interest income from financing component of RMB9.9 million, partially offset by (i) an increase in interest expenses on borrowings of RMB95.3 million and (ii) a decrease in interest income from financial assets held for cash management purposes of RMB37.4 million.

Income Tax Expense

Our income tax expenses increased by 149.5% from RMB201.9 million in the six months ended June 30, 2025 to RMB503.8 million in the six months ended June 30, 2026, primarily due to a statutory tax

calculated at the PRC rate of the Company from RMB240.1 million to RMB872.1 million, which is in line with our increased profit for the period, partially offset by a reduction in the overall effective tax rate at the Group level.

Profit for the Period

As a result of the foregoing, our profit for the period increased by 293.5% from RMB758.6 million in the six months ended June 30, 2025 to RMB2,984.6 million in the six months ended June 30, 2026 and our net profit margin increased from 4.5% in the six months ended June 30, 2025 to 10.7% in the six months ended June 30, 2026.

Electronic Circuits (PCBs)

FPC

Our revenue from the sales of FPCs increased by 1.3% from RMB21,589.4 million in 2024 to RMB21,875.5 million in 2025, primarily due to an increase in sales volume from 4,314.1 thousand square meters in 2024 to 5,128.8 thousand square meters in 2025, driven by strong demand in automotive and consumer electronics. The effect of such increase was partially offset by a decrease in average selling price from RMB5,004.4 per square meter in 2024 to RMB4,265.2 per square meter in 2025, primarily attributable to increased orders for automotive products with lower unit prices due to fewer components per unit and lower circuit density per unit area, as well as adjustments in product specifications in response to our customers' needs in consumer electronics.

RPCB

Our revenue from the sales of RPCBs increased by 13.6% from RMB2,843.0 million in 2024 to RMB3,228.8 million in 2025, primarily due to an increase in sales volume from 1,163.9 thousand square meters in 2024 to 1,481.4 thousand square meters in 2025, driven by increased customer demand in AI computing and consumer electronics sectors. The effect of such increase was partially offset by a decrease in average selling price from RMB2,442.6 per square meter in 2024 to RMB2,179.5 per square meter in 2025, driven by overall market price reductions.

Rigid-Flex

Our revenue from the sales of Rigid-Flexes increased by 40.1% from RMB368.4 million in 2024 to RMB516.0 million in 2025, primarily due to (i) an increase in sales volume from 66.3 thousand square meters in 2024 to 83.3 thousand square meters in 2025, driven by strong downstream demand from the consumer electronics and (ii) the increase in average selling price, primarily attributable to our products' increased design complexity and more sophisticated manufacturing processes.

Precision Components

Automotive Component

Our revenue from the sales of automotive components increased by 57.0% from RMB3,290.0 million in 2024 to RMB5,166.7 million in 2025, primarily due to (i) an increase in sales volume from 137.1 million units in 2024 to 180.2 million units in 2025 and (ii) an increase in average selling price from RMB24.0 to RMB28.7 per unit, both primarily attributable to the acquisition of GMD, which further expanded our market presence and our product portfolio.

Telecommunications Equipment Component

Our revenue from the sales of telecommunications equipment components decreased by 38.9% from RMB1,250.3 million in 2024 to RMB763.5 million in 2025, primarily due to a decrease in sales volume from 5.7 million units in 2024 to 3.5 million units in 2025, primarily attributable to our strategic scaling back of the business driven by a slowdown in global 5G infrastructure investments due to supply chain considerations. The average selling price of our telecommunications equipment components remained relatively stable.

Touch Panels and LCMs

Touch Panel

Our revenue from the sales of touch panels increased by 10.6% from RMB2,211.7 million in 2024 to RMB2,445.0 million in 2025, primarily due to an increase in sales volume from 4.9 million units in 2024 to 5.4 million units in 2025, primarily driven by increasing penetration of touch-enabled laptops, which led to increased deliveries. The average selling price of our touch panel remained relatively stable.

LCD & OLED Module

Our revenue from the sales of LCD & OLED modules decreased by 14.9% from RMB4,158.2 million in 2024 to RMB3,540.6 million in 2025, primarily due to a decrease in sales volume from 26.9 million units in 2024 to 22.1 million units in 2025, as we scaled back our small form factor display modules and shifted towards large form factor OLED modules. For the same reason, our average selling price increased from RMB154.5 per unit in 2024 to RMB160.6 per unit in 2025.

Others

Our revenue from sales of other products increased by 8.9% from RMB1,059.3 million in 2024 to RMB1,153.2 million in 2025, attributable to a 65.2% increase in revenue from sales of scrap materials from RMB291.2 million to RMB481.1 million as a result of increased overall production volumes, partially offset by a 12.5% decrease in revenue from sales of LED display products from RMB768.1 million to RMB672.0 million, due to intensified market competition.

Cost of Sales

	Year ended December 31,		
	2024	**2025**	**% Change**
	(in RMB thousands, except for percentages)		
Raw material costs	24,609,326	26,073,628	6.0
Labor costs	3,066,899	3,699,332	20.6
Depreciation and amortization	1,750,630	2,216,798	26.6
Utility costs	447,675	541,117	20.9
Others	2,679,166	2,629,696	(1.8)
Total	**32,553,696**	**35,160,571**	**8.0**
as % of total revenue	*88.5*	*87.6*	

Our cost of sales increased by 8.0% from RMB32,553.7 million in 2024 to RMB35,160.6 million in 2025, largely in line with our revenue growth. In particular, our depreciation and amortization costs increased by 26.6% primarily because certain of our new production lines were in ramp-up stage.

Gross Profit and Gross Profit Margin

	Year ended December 31,			
	2024		2025

Others	(849,035)	(80.1)	(539,627)	(46.8)
Total/Overall	**4,216,678**	**11.5**	**4,964,288**	**12.4**

Electronic Circuits (PCBs)

FPC

Our gross profit from the sales of FPCs decreased by 7.7% from RMB3,831.0 million in 2024 to RMB3,536.6 million in 2025, primarily due to a decrease in gross profit margin from 17.7% in 2024 to 16.2% in 2025, mainly attributable to an increase in revenue contribution from FPCs used in automotive electronics, which generally carried lower gross profit margins than those used in consumer electronics.

RPCB

Our gross profit from the sales of RPCBs increased by 13.8% from RMB520.8 million in 2024 to RMB592.6 million in 2025, primarily due to a 13.6% increase in revenue from sales of RPCBs driven by strong downstream demand. The gross profit margin of our RPCBs remained stable.

Rigid-Flex

Our gross profit from the sales of Rigid-Flexes increased by 57.4% from RMB88.6 million in 2024 to RMB139.4 million in 2025, primarily due to (i) a 40.1% increase in revenue from sales of Rigid-Flexes and (ii) an increase in gross profit margin from 24.0% in 2024 to 27.0% in 2025. The higher margin mainly reflected improved capacity utilization driven by increased production volume, which generated economies of scale.

Precision Components

Automotive Component

Our gross profit from the sales of automotive components increased by 8.3% from RMB451.5 million in 2024 to RMB489.1 million in 2025, primarily due to a 57.0% increase in revenue from sales of automotive components, partially offset by a decrease in gross profit margin from 13.7% in 2024 to 9.5% in 2025, mainly due to lower capacity utilization during the ramp-up phase following our capacity expansion, particularly at our facilities in Suzhou and Yancheng, China, which were completed in August 2024 and December 2024, respectively.

Telecommunications Equipment Component

We recorded a gross profit from the sales of telecommunications equipment components of RMB30.7 million in 2024 and a gross loss of RMB53.4 million in 2025, primarily due to (i) a 38.9% decrease in revenue from sales of telecommunications equipment components and (ii) the swing from a gross profit margin of 2.5% in 2024 to a gross loss margin of 7.0% in 2025, mainly attributable to lower capacity utilization resulting from our strategic scaling back of the business.

Touch Panels and LCMs

Touch Panel

Our gross profit from the sales of the touch panels increased by 61.2% from RMB54.0 million in 2024 to RMB87.0 million in 2025, primarily due to (i) an increase in gross profit margin from 2.4% for 2024 to 3.6% for 2025, and (ii) a 10.6% increase in revenue from the sales of touch panels. These are the result of stronger demand of touch-enabled laptops, which drove higher sales volumes, improved capacity utilization and reduced unit costs.

LCD & OLED Module

Our gross profit from the sales of LCD & OLED modules increased by 107.5% from RMB89.1 million in 2024 to RMB184.9 million in 2025, primarily due to an increase in gross profit margin from 2.1% in 2024 to 5.2% in 2025, as we scaled back our small form factor display modules and shifted towards large form factor OLED modules, partially offset by a 14.9% decrease in revenue from sales of LCD & OLED modules.

Others

The gross loss from the sales of other products improved by 36.4% from a loss of RMB849.0 million in 2024 to a loss of RMB539.6 million in 2025, mainly attributable to (i) an increase in gross profit from scrap materials from RMB60.3 million to RMB162.4 million, due to a 65.2% increase in revenue from sales of scrap materials and the gross profit margin increasing from 20.7% to 33.8% and (ii) a decrease in gross loss from LED display products from RMB909.4 million to RMB702.1 million, due to a 12.5% decrease in revenue from sales of LED display products, while the gross loss margin improved from 118.4% to 104.5%, as the one-off write-off of the previously written-down LED display assets recorded in 2024 did not recur in 2025.

General and Administrative Expenses

Our general and administrative expenses increased by 19.1% from RMB1,312.5 million in 2024 to RMB1,562.6 million in 2025, primarily due to (i) an increase of RMB99.2 million in employee benefit expenses, (ii) an increase of RMB81.5 million in consulting service fees and (iii) an increase of RMB107.7 million in others, partially offset by a decrease of RMB52.6 million in tax and surcharges. As a percentage of our total revenue, our general and administrative expenses increased from 3.6% in 2024 to 3.9% in 2025.

Selling and Marketing Expenses

Our selling and marketing expenses decreased by 2.0% from RMB454.0 million in 2024 to RMB445.1 million in 2025, primarily due to a decrease of RMB15.4 million in sales service fees. As a percentage of our total revenue, our selling and marketing expenses remained relatively stable at 1.2% in 2024 and 1.1% in 2025.

Research and Development Expenses

Our research and development expenses increased by 11.9% from RMB1,266.8 million in 2024 to RMB1,417.2 million in 2025, primarily due to (i) an increase of RMB119.3 million in employee benefit expenses and (ii) an increase of RMB26.1 million in depreciation and amortization. As a percentage of our total revenue, our research and development expenses remained stable at 3.4% in 2024 and 3.5% in 2025 for the same reasons.

Net Impairment Losses on Financial Assets

Our impairment losses under the expected credit loss model, net of reversal, increased from a loss of RMB44.1 million in 2024 to a loss of RMB63.7 million in 2025, primarily due to higher impairment losses on trade receivables, mainly driven by specific provisions made for certain receivables in the LED segment following strategic adjustments and additional impairment provisions arising from the consolidation of GMD and Source Photonics.

Other Income

Our other income decreased by 30.7% from RMB523.3 million in 2024 to RMB362.8 million in 2025, due to (i) a decrease of RMB31.3 million in additional deduction for VAT and tax refund, (ii) a decrease of RMB130.3 million in government grants partially offset by an increase of RMB1.1 million in others.

Other Gains, Net

Our other gains, net increased by 800.4% from RMB8.5 million in 2024 to RMB76.3 million in 2025, primarily due to (i) an increase of RMB470.7 million in gains on business combination and (ii) a decrease of RMB20.9 million in net losses on disposal of subsidiaries and associates, partially offset by (i) an increase of RMB136.2 million in net losses on disposal of property, plant and equipment and other long-term assets, and (ii) a decrease of RMB322.0 million in net foreign exchange differences.

Finance Costs, Net

Our net finance costs increased by 10.1% from RMB202.8 million in 2024 to RMB223.4 million in 2025, primarily due to (i) a decrease of RMB42.2 million in interest income from financial assets held for cash management purposes and (ii) an increase of RMB41.6 million in interest expenses on lease liabilities, partially offset by a decrease of RMB56.2 million in interest expenses on borrowings.

Income Tax Expense

Our income tax expenses decreased by 22.3% from RMB382.7 million in 2024 to RMB297.4 million in 2025, primarily due to the negative goodwill arising from the acquisition of GMD in 2025, which was income not subject to tax. In addition, the consolidation of Source Photonics contributed to a reduction in the overall effective tax rate at the Group level.

Profit for the Year

As a result of the foregoing, our profit for the year increased by 28.4% from RMB1,085.1 million in 2024 to RMB1,393.0 million in 2025 and our net profit margin increased from 3.0% in 2024 to 3.5% in 2025.

Electronic Circuits (PCBs)

FPC

Our revenue from the sales of FPCs increased by 7.4% from RMB20,103.6 million in 2023 to RMB21,589.4 million in 2024, due to an increase in sales volume from 2.9 million square meters in 2023 to 4.3 million square meters in 2024, primarily as a result of increased orders from both new customers in the automotive sector and existing customers in the consumer electronics, partially offset by a decrease in average selling price from RMB6,987.0 per square meter in 2023 to RMB5,004.4 per square meter in 2024, primarily as a result of increased orders in automotive products, which generally have lower unit prices due to fewer components and lower circuit density per unit area, as well as adjustments in product specifications in response to our customers' needs.

RPCB

Our revenue from the sales of RPCBs decreased by 0.1% from RMB2,845.8 million in 2023 to RMB2,843.0 million in 2024, due to a decrease in average selling price from RMB2,755.1 per square meter in 2023 to RMB2,442.6 per square meter in 2024, primarily driven by a change in product mix, with a lower proportion of sales of higher-priced RPCB products and price adjustments for certain large customers, partially offset by an increase in sales volume from 1.0 million square meters in 2023 to 1.2 million square meters in 2024, primarily driven by consistent demand from consumer electronics.

Rigid-Flex

Our revenue from the sales of Rigid-Flexes increased by 18.1% from RMB312.0 million in 2023 to RMB368.4 million in 2024, due to an increase in average selling price from RMB4,541.6 per square meter in 2023 to RMB5,553.9 per square meter in 2024, primarily attributable to adjustments in product specifications that increased the number of components and interconnections per unit area, resulting in higher design complexity and processing requirements, which enabled us to command higher pricing per square meter. It is partially offset by a decrease in sales volume from 68.7 thousand square meters in 2023 to 66.3 thousand square meters in 2024.

Precision Components

Automotive Component

Our revenue from the sales of automotive components increased by 11.8% from RMB2,942.2 million in 2023 to RMB3,290.0 million in 2024, due to an increase in sales volume from 101.8 million units in 2023 to 137.1 million units in 2024, primarily as a result of the ramp-up to mass production of our structural components for EV with higher shipments to leading customers, partially offset by a decrease in average selling price from RMB28.9 per unit in 2023 to RMB24.0 per unit in 2024, primarily as a result of a shift in product mix toward structural parts for batteries, which have lower unit prices.

Telecommunications Equipment Component

Our revenue from the sales of telecommunications equipment components increased by 2.5% from RMB1,220.0 million in 2023 to RMB1,250.3 million in 2024, due to an increase in sales volume from 4.5 million units in 2023 to 5.7 million units in 2024, primarily driven by slightly higher shipments in response to customer needs, partially offset by a decrease in average selling price from RMB270.0 per unit in 2023 to RMB219.2 per unit in 2024, primarily due to pricing pressure driven by a slowdown in global 5G infrastructure spending.

Touch Panels and LCMs

Touch Panel

Our revenue from the sales of touch panels increased by 34.3% from RMB1,646.3 million in 2023 to RMB2,211.7 million in 2024, due to an increase in sales volume from 4.1 million units in 2023 to 4.9 million units in 2024 and an increase in average selling price from RMB400.5 per unit in 2023 to RMB453.4 per unit in 2024, primarily as a result of stronger demand from the consumer electronics sector.

LCD & OLED Module

Our revenue from the sales of LCD & OLED modules increased by 29.3% from RMB3,215.6 million in 2023 to RMB4,158.2 million in 2024, due to an increase in sales volume from 22.6 million units in 2023 to 26.9 million units in 2024 and an increase in average selling price from RMB142.6 per unit in 2023 to RMB154.5 per unit in 2024, primarily as a result of increased orders and shipments driven by stronger demand for automotive cockpits with larger screens and flexible display.

Others

Our revenue from sales of other products decreased by 22.4% from RMB1,365.7 million in 2023 to RMB1,059.3 million in 2024, mainly attributable to a 35.5% decrease in revenue from sales of LED display products from RMB1,190.5 million to RMB768.1 million, as intensified industry competition led to significant price reduction in LED display products, partially offset by a 66.2% increase in revenue from sales of scrap materials from RMB175.2 million to RMB291.2 million, in line with the growth in our production volumes.

Cost of Sales

	Year Ended December 31,		
	2023	**2024**	**% Change**
	(in RMB thousands, except for percentages)		
Raw material costs	22,000,279	24,609,326	11.9
Labor costs	2,781,864	3,066,899	10.2
Depreciation and amortization	1,464,854	1,750,630	19.5
Utility costs	430,961	447,675	3.9
Others	2,293,040	2,679,166	16.8
Total	**28,970,998**	**32,553,696**	**12.4**
as % of total revenue	*86.1*	*88.5*	

Our cost of sales increased by 12.4% from RMB28,971.0 million in 2023 to RMB32,553.7 million in 2024, primarily due to (i) an 11.9% increase in raw material costs, (ii) a 19.5% increase in depreciation and amortization, (iii) a 10.2% increase in labor costs and (iv) a 16.8% increase in others. Such increases were mainly driven by ramp up for new capacity, as well as costs associated with LED display business.

Total/Overall	**4,680,207**	**13.9**	**4,216,678**	**11.5**

Electronic Circuits (PCBs)

FPC

Our gross profit from the sale of FPCs decreased by 6.1% from RMB4,079.2 million in 2023 to RMB3,831.0 million in 2024, primarily due to a decrease in gross profit margin from 20.3% in 2023 to 17.7% in 2024, mainly attributable to the ramp-up of certain new type of products for consumer electronics leading to yield variability and higher manufacturing costs, partially offset by a 7.4% increase in revenue from FPCs.

RPCB

Our gross profit from the sale of RPCBs decreased by 7.9% from RMB565.4 million in 2023 to RMB520.8 million in 2024, primarily due to a decrease in gross profit margin from 19.9% in 2023 to 18.3% in 2024, mainly attributable to higher commodity prices.

Rigid-Flex

Our gross profit from the sale of Rigid-Flexes increased by 24.0% from RMB71.4 million in 2023 to RMB88.6 million in 2024, primarily due to (i) an 18.1% increase in revenue from Rigid-Flexes and (ii) an increase in gross profit margin from 22.9% in 2023 to 24.0% in 2024, driven by a higher proportion of high-end Rigid-Flexes in our product mix.

Precision Components

Automotive Component

Our gross profit from the sale of automotive components increased by 40.0% from RMB322.4 million in 2023 to RMB451.5 million in 2024, primarily due to (i) an 11.8% increase in revenue from sales of automotive components and (ii) an increase in gross profit margin from 11.0% in 2023 to 13.7% in 2024, mainly attributable to improved capacity utilization from 72.7% to 72.9% and corresponding manufacturing efficiency, which lowered unit costs.

Telecommunications Equipment Component

Our gross profit from the sale of telecommunications equipment components decreased by 57.1% from RMB71.7 million in 2023 to RMB30.7 million in 2024, primarily due to a decrease in gross profit margin from 5.9% in 2023 to 2.5% in 2024, mainly attributable to pricing pressure, partially offset by a 2.5% increase in revenue from telecommunications equipment components.

Touch Panels and LCMs

Touch Panel

We recorded a gross loss of RMB130.9 million from the sales of touch panels in 2023 and a gross profit of RMB54.0 million in 2024, primarily due to (i) a 34.3% increase in revenue from sales of touch panel and (ii) a change in gross margin from a gross loss margin of 7.9% in 2023 to a gross profit margin of 2.4% in 2024, mainly due to higher volumes that improved capacity utilization attributable to the recovery in consumer electronics demand and increased sales to new customers. The gross loss recorded in 2023 was primarily attributable to the challenging market conditions in the consumer electronics industry, which was undergoing a prolonged inventory destocking cycle that resulted in significant pricing pressure and a substantial decline in average selling prices of our touch panel products, compounded by low capacity utilization rates that drove up unit fixed costs.

LCD & OLED Module

Our gross profit from the sales of LCD & OLED modules increased by 522.7% from RMB14.3 million in 2023 to RMB89.1 million in 2024, primarily due to (i) a 29.3% increase in revenue from sales of LCD &

OLED modules and (ii) an increase in gross profit margin from 0.4% in 2023 to 2.1% in 2024, mainly attributable to synergies following our acquisition of Suzhou Display and a higher proportion of high-end products in our product mix. Such synergies were realized through the expansion of our customer base, improved utilization rates from 49.2% to 64.8% and enhanced labor productivity, which collectively contributed to improved overall manufacturing efficiency.

Others

Our gross loss from other products increased by 171.0% from RMB313.3 million in 2023 to RMB849.0 million in 2024, mainly attributable to an increase in gross loss from LED display products from RMB372.0 million to RMB909.4 million, mainly due to a 35.5% decrease in revenue from sales of LED display products and an increase in gross loss margin from 31.3% to 118.4%, because weaker demand resulted in lower capacity utilization and higher fixed costs per unit, and we also recorded one-off write-downs to reflect the impairment of the relevant assets. This was partially offset by an increase in gross profit from scrap materials from RMB58.8 million to RMB60.3 million, mainly due to a 66.2% increase in revenue from sales of scrap materials, with the gross profit margin decreasing from 33.5% to 20.7% due to a shift in the mix of scrap materials sold in 2024, which may vary based on our production activities in each period.

General and Administrative Expenses

Our general and administrative expenses increased by 16.7% from RMB1,124.7 million in 2023 to RMB1,312.5 million in 2024, primarily due to (i) an increase of RMB120.4 million in employee benefit expenses, mainly as a result of a one-off charge related to the consolidation of production facilities, (ii) an increase of RMB33.7 million in tax and surcharges and (iii) an increase of RMB22.0 million in others. Our general and administrative expenses as a percentage of our total revenue increased from 3.3% in 2023 to 3.6% in 2024.

Selling and Marketing Expenses

Our selling and marketing expenses increased by 25.4% from RMB362.1 million in 2023 to RMB454.0 million in 2024, primarily due to (i) an increase of RMB46.0 million in sales service fees, (ii) an increase of RMB34.0 million in employee benefit expenses and (iii) an increase of RMB8.0 million in travel and business development expenses, in line with our business growth. As a percentage of our revenue, our selling and marketing expenses have remained relatively stable at 1.1% in 2023 and 1.2% in 2024.

Research and Development Expenses

Our research and development expenses increased by 9.1% from RMB1,161.2 million in 2023 to RMB1,266.8 million in 2024, due to (i) an increase of RMB71.2 million in raw material costs, (ii) an increase of RMB11.9 million in depreciation and amortization, (iii) an increase of RMB11.5 million in employee benefit expenses and (iv) an increase of RMB11.0 million in others, in line with our business growth and sustained commitment in R&D. Our research and development expenses as a percentage of our total revenue remained relatively stable at 3.5% in 2023 and 3.4% in 2024.

Net Impairment Losses on Financial Assets

Our impairment losses under the expected credit loss model, net of reversal, increased from RMB39.4 million in 2023 to RMB44.1 million in 2024, primarily due to an increased balance of trade receivables as of December 31, 2024 compared to December 31, 2023.

Other Income

Our other income increased by 109.4% from RMB249.9 million in 2023 to RMB523.3 million in 2024, primarily due to (i) an increase in government grants amounting to RMB252.6 million and (ii) an increase of RMB21.6 million in additional deduction for VAT and tax refund, partially offset by a decrease of RMB0.8 million in others.

Other Gains, Net

Our other gains, net decreased by 96.5% from RMB243.2 million in 2023 to RMB8.5 million in 2024, primarily due to (i) an increase of RMB216.7 million in net losses on disposal of property, plant and equipment and other long-term assets, (ii) a decrease of RMB134.8 million in gains on business combination relating to our acquisition of Suzhou Display and (iii) an increase of RMB25.9 million in net losses on disposal of subsidiaries, partially offset by an increase of RMB164.8 million in net foreign exchange gains.

Finance Costs, Net

Our finance costs decreased by 26.1% from RMB274.6 million in 2023 to RMB202.8 million in 2024, primarily due to (i) a decrease of RMB28.8 million in net exchange losses on foreign currency borrowings and (ii) a decrease of RMB23.6 million in interest expenses on lease liabilities due to lease expiries, partially offset by an increase of RMB22.1 million in interest expenses on borrowings driven by expanded borrowings.

Income Tax Expense

Our income tax expenses increased by 69.3% from RMB226.0 million in 2023 to RMB382.7 million in 2024, primarily due to (i) a change from a deferred income tax benefit of RMB241.2 million in 2023 to a deferred income tax expense of RMB181.0 million in 2024, as unused tax losses were not recognized as deferred tax assets, and (ii) a decrease in deduction effect of RMB257.7 million to RMB121.3 million, mainly attributable to variations between the statutory tax rates applicable to certain subsidiaries and the parent company's tax rate.

Profit for the Year

As a result of the foregoing, our profit for the year decreased by 44.8% from RMB1,965.1 million in 2023 to RMB1,085.1 million in 2024, and our net margin decreased from 5.8% in 2023 to 3.0% in 2024.

Property, Plant and Equipment

Property, plant, and equipment primarily consisted of property and buildings, land, machinery, transportation vehicle, electronic equipment, construction in progress and leasehold improvement. The following table sets forth the breakdown of our property, plant, and equipment as of the dates indicated:

	As of December 31,			As of June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Buildings	2,907,307	3,560,257	4,810,546	4,776,883
Machinery equipment	9,182,196	9,753,385	11,422,734	11,998,692
Motor vehicles	27,402	37,821	25,880	27,537
Other equipment	298,346	243,728	327,601	384,603
Freehold land	193,543	206,623	243,464	326,269
Construction in progress	1,842,525	2,575,154	2,345,985	4,514,260
Leasehold improvement	858,182	895,903	983,995	1,018,324
Total	**15,309,501**	**17,272,871**	**20,160,205**	**23,046,568**

Property, plant, and equipment increased from RMB15,309.5 million as of December 31, 2023 to RMB17,272.9 million as of December 31, 2024 primarily due to increase in construction in progress and buildings, which reflected the further expansion of our production capacity to meet the increasing demand. It further increased to RMB20,160.2 million as of December 31, 2025, primarily due to an increase in machinery equipment and buildings resulting from the acquisition of Source Photonics and GMD. Property, plant, and equipment increased from RMB20,160.2 million as of December 31, 2025, to RMB23,046.6 million as of June 30, 2026, primarily due to our capacity expansion for optical transceivers and PCBs for AI in response to increased customer orders as a result of downstream demand from AI data centers. For details on our production facilities, see "Business — Production and Manufacturing — Production Facilities."

Inventories

Our inventories include raw materials, finished goods, and work in progress. The table below sets forth the breakdown of our inventories as of the dates indicated.

	As of December 31,			As of June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Raw materials	1,137,853	1,654,515	2,758,783	4,074,064
Work in progress	891,175	1,003,085	2,333,780	3,624,082
Finished goods	4,974,174	4,503,261	4,985,685	4,860,643
Consumable materials	9,967	2,516	100,292	97,688
Less: provision for impairment	(719,290)	(1,010,721)	(1,249,596)	(1,238,480)
Total	**6,293,879**	**6,152,656**	**8,928,944**	**11,417,997**

Our inventories decreased from RMB6,293.9 million as of December 31, 2023 to RMB6,152.7 million as of December 31, 2024, primarily due to (i) a decrease in finished goods from RMB4,974.2 million as of December 31, 2023 to RMB4,503.3 million as of December 31, 2024, (ii) an increase in provision for impairment from RMB719.3 million as of December 31, 2023 to RMB1,010.7 million as of December 31, 2024 and (iii) a decrease of consumable materials from RMB10.0 million as of December 31, 2023 to RMB2.5 million as of December 31, 2024, partially offset by (i) an increase in raw materials from RMB1,137.9 million as of December 31, 2023 to RMB1,654.5 million as of December 31, 2024 as our operational scale continued to grow and the unit prices of certain finished goods rose and (ii) an increase in work in progress from RMB891.2 million as of December 31, 2023 to RMB1,003.1 million as of December 31, 2024, driven by higher production.

Our inventories increased from RMB6,152.7 million as of December 31, 2024 to RMB8,928.9 million as of December 31, 2025, primarily due to (i) an increase in work in progress from RMB1,003.1 million as of December 31, 2024 to RMB2,333.8 million as of December 31, 2025 and (ii) an increase in raw materials from RMB1,654.5 million as of December 31, 2024 to RMB2,758.8 million as of December 31, 2025. These increases were primarily driven by higher production resulting from the acquisition of Source Photonics and GMD, partially offset by an increase in provision for impairment from RMB1,010.7 million as of December 31, 2024 to RMB1,249.6 million as of December 31, 2025.

Our inventories increased from RMB8,928.9 million as of December 31, 2025 to RMB11,418.0 million as of June 30, 2026, primarily due to (i) an increase in raw materials from RMB2,758.8 million as of December 31, 2025 to RMB4,074.1 million as of June 30, 2026 and (ii) an increase in work in progress from RMB2,333.8 million as of December 31, 2025 to RMB3,624.1 million as of June 30, 2026. These increases were primarily attributable to the continued growth and expansion of optical module business in 2026, partially offset by (i) a decrease in finished goods from RMB4,985.7 million as of December 31, 2025 to RMB4,860.6 million as of June 30, 2026 and (ii) a decrease in consumable materials from RMB100.3 million as of December 31, 2025 to RMB97.7 million as of June 30, 2026.

The table below sets forth an aging analysis of our inventory as of the dates indicated.

	As of December 31,			As of June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Within one year	6,607,641	6,711,719	9,407,505	11,742,908
Over one year	405,529	451,658	771,035	913,569
Total	7,013,170	7,163,377	10,178,540	12,656,477

The table below sets forth the turnover days of our inventories for the years/period indicated.

	Year Ended December 31,			Six Months Ended June 30,
	2023	2024	2025	2026
Inventory turnover days*	77	69	70	82

Note:

* Inventory turnover days for each year/period equals the average of the beginning and weighted average ending balances of inventory for that year/period divided by cost of sales for that year/period and multiplied by 360 days for 2023, 2024 and 2025, and 180 days for the six months ended June 30, 2026.

During the Track Record Period, our inventory turnover days decreased from 2023 to 2024, in line with our growth. Our inventory turnover days remained relatively stable at 69 and 70 in 2024 and 2025. Our inventory turnover days further increased to 82 days in the six months ended June 30, 2026, primarily due to the strategic build-up of electrical chips following the acquisition of Source Photonics to support its production needs.

As of August 31, 2026, 72.9% of our total inventories as of June 30, 2026, or RMB9,232.1 million, were utilized or sold. Based on our assessments during the Track Record Period, we have made adequate provisions for our inventories to account for potential uncertainties.

Trade and Notes Receivables

Trade and notes receivables mainly arise from sales of our products on credit. We periodically conduct credit evaluations of customers who trade on credit. We usually grant credit periods based on their credit risk characteristics, which is consistent with industry practice.

The table below sets forth the breakdown of our trade and notes receivables as of the dates indicated.

	As of December 31,			As of June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Trade receivables	8,194,146	7,960,638	10,482,511	11,108,543
Notes receivables	3,425	9,083	–	86
Less: credit loss allowance	(480,999)	(297,226)	(409,479)	(252,673)
Total	**7,716,572**	**7,672,495**	**10,073,032**	**10,855,956**

Our trade and notes receivables decreased from RMB7,716.6 million as of December 31, 2023 to RMB7,672.5 million as of December 31, 2024, mainly due to improved customer collections and the write-off of receivables assessed as uncollectible. It increased to RMB10,073.0 million as of December 31, 2025, resulting from the acquisition of Source Photonics and GMD. Our trade and notes receivables remained relatively stable at RMB10,073.0 million as of December 31, 2025 and RMB10,856.0 million as of June 30, 2026.

The table below sets forth an aging analysis of our trade receivables as of the dates indicated.

	As of December 31,			As of June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Within 6 months	7,444,151	7,558,742	9,816,164	10,571,998
7 to 12 months	78,620	111,118	145,140	320,876
1 to 2 years	285,296	30,428	230,589	56,122
2 to 3 years	16,989	42,084	26,777	47,310
Over 3 years	369,090	218,266	263,841	112,237
Total	**8,194,146**	**7,960,638**	**10,482,511**	**11,108,543**

For further details, see Note 24 to "Appendix IA — Accountants' Report of the Group."

The table below sets forth the turnover days of our trade and notes receivables for the years/period indicated.

	Year Ended December 31,			Six Months Ended June 30,
	2023	2024	2025	2026
Trade and notes receivables turnover days[(1)]	79	75	71	68

Note:

(1) Trade and notes receivables turnover days for each year/period equals the average of the beginning and weighted average ending balances of trade and notes receivables for that year/period divided by revenue for that year/period and multiplied by 360 days for 2023, 2024 and 2025 and 180 days for the six months ended June 30, 2026.

During the Track Record Period, our trade and notes receivables turnover days continued to decrease, primarily due to the short collection cycle of receivables from customers.

As of August 31, 2026, 77.6% of our total trade and notes receivables as of June 30, 2026, or RMB8,623.3 million, were settled.

Trade and Notes Payables

Our trade and notes payables primarily represent outstanding amounts owed to third parties, including payables for raw materials and equipment. Our suppliers usually grant us a credit period ranging from 30 to 90 days from invoice date.

The table below sets forth the breakdown of our trade and notes payables as of the dates indicated.

	As of December 31,			As of June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Trade payables	8,039,107	9,659,269	13,043,137	15,735,506
Notes payables	909,171	935,581	1,002,813	616,706
Total	**8,948,278**	**10,594,850**	**14,045,950**	**16,352,212**

During the Track Record Period, our trade and notes payables increased by 18.4% from RMB8,948.3 million as of December 31, 2023 to RMB10,594.9 million as of December 31, 2024, as a result of increased purchases, in line with our business expansion. Our trade and notes payables increased by 32.6% from RMB10,594.9 million as of December 31, 2024 to RMB14,046.0 million as of December 31, 2025 resulting from the acquisition of Source Photonics and GMD. Our trade and notes payables increased by 16.4% from RMB14,046.0 million as of December 31, 2025 to RMB16,352.2 million as of June 30, 2026, primarily due to increased payables for raw materials and production equipment as we expanded our operations and production capacity for optical modules and AI PCBs.

The table below sets forth the aging analysis of the trade payables.

	As of December 31,			As of June 30,
	2023	2024	2025	2026
		(in RMB thousands)		
Within 1 year	7,691,012	9,271,713	12,455,037	14,697,092
1 to 2 years	254,469	282,433	351,898	807,371
2 to 3 years	34,364	50,757	102,999	123,976
Over 3 years	59,262	54,366	133,203	107,067
Total	**8,039,107**	**9,659,269**	**13,043,137**	**15,735,506**

The table below sets forth the turnover days for the trade and notes payables for the years/period indicated.

	Year Ended December 31,			Six Months Ended June 30,
	2023	2024	2025	2026
Trade and notes payables turnover days*	105	108	117	122

Note:

* Trade and notes payables turnover days for each year/period equals the average of the beginning and weighted average ending balances of trade and notes payables for that year/period divided by cost of sales for that year/period and multiplied by 360 days for 2023, 2024 and 2025 and 180 days for the six months ended June 30, 2026.

During the Track Record Period, our trade and notes payable turnover days remained stable from 2023 to 2024. Our trade and notes payable turnover days increased to 117 days in 2025, primarily due to a higher balance of payables for Source Photonics, which carry longer credit terms. Our trade and notes payable turnover days remained stable at 122 days for the six months ended June 30, 2026.

As of August 31, 2026, 53.5% of our trade and notes payables outstanding as of June 30, 2026, or RMB8,755.1 million, were settled.

Goodwill

	As of December 31,			As of June 30,
	2023	2024	2025	2026
		(in RMB thousands)		
Carrying values	2,162,697	2,077,474	4,769,258	4,682,691

Goodwill acquired in a business combination of MFLEX, Multek, Mutto Optronics, Suzhou RF Top Electric Communications Co., Ltd ("**Suzhou RF**") and Source Photonics is tested for impairment annually. For the purposes of impairment testing, goodwill has been allocated to CGU that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units.

Our management conducted impairment testing on the goodwill according to IAS 36 Impairment of assets, which requires the Company to allocate the goodwill to the CGU and compare the unit's carrying amount with its recoverable amount. The goodwill allocated to the MFLEX CGU is RMB1,770.8 million, RMB1,770.8 million, RMB1,770.8 million and RMB1,770.8 million as of December 31, 2023, 2024 and 2025 and June 30, 2026, respectively. The goodwill represented to the CGU attributed from Multek is RMB179.3 million and RMB179.3 million, RMB179.3 million and RMB179.3 million as of December 31, 2023, 2024 and 2025 and June 30, 2026, respectively. The goodwill represented to the CGU attributed from Mutto Optronics is RMB86.5 million, RMB38.1 million, nil and nil as of December 31, 2023, 2024 and 2025 and June 30, 2026 respectively. The goodwill represented to the CGU attributed from Suzhou RF is RMB126.1 million, RMB89.3 million, RMB20.1 million and RMB20.1 million as of December 31, 2023, 2024 and 2025 and June 30, 2026, respectively. The goodwill represented to the CGU attributed from Source Photonics is RMB2,799.0 million and RMB2,712.5 million in 2025 and the six months ended June 30, 2026, respectively.

Restricted Cash and Term Deposits

We had restricted cash and term deposits of RMB1,545.5 million, RMB1,828.7 million and RMB1,545.6 million and RMB1,845.2 million as of December 31, 2023, 2024, 2025 and June 30, 2026, primarily related to term deposits and security deposits for bank's acceptance.

LIQUIDITY AND CAPITAL RESOURCES

During the Track Record Period, we financed our operations primarily through a combination of cash generated from operations and borrowings. As of June 30, 2026, we had cash and cash equivalents of RMB6,947.5 million. Going forward, we believe our liquidity requirements will be satisfied by using funds from a combination of cash generated from operations and net proceeds from the Global Offering.

Taking into account the financial resources available to us, including anticipated cash flows from our operating activities, existing cash and cash equivalents, new borrowings and the estimated net proceeds from the Global Offering, our Directors believe that we have sufficient working capital to meet our present and future cash requirements for at least the next 12 months from the date of publication of this Prospectus.

Cash Flows

The table below sets forth our cash flows for the years/period indicated.

	Year Ended December 31,			Six Months Ended June 30,	
	2023	**2024**	**2025**	**2025**	**2026**
	(in RMB thousands)			*(Unaudited)*	
Cash flows from operating activities					
Cash generated from operations	5,077,989	4,979,671	4,968,075	2,357,157	2,589,141
Interest received	210,139	243,072	200,834	113,967	86,442
Income tax paid	(247,460)	(244,094)	(266,579)	(241,245)	(407,047)
Net cash generated from operating activities	**5,040,668**	**4,978,649**	**4,902,330**	**2,229,879**	**2,268,536**
Net cash used in investing activities	(4,707,153)	(4,086,316)	(7,878,380)	(1,716,078)	**(5,367,178)**

	(in RMB thousands)			*(Unaudited)*	
Cash and cash equivalents at beginning of the year	5,457,027	5,644,487	5,343,600	5,343,600	6,104,723
Effects of exchange rate changes on cash and cash equivalents	96,491	126,148	(12,222)	35,784	(198,223)
Cash and cash equivalents at end of the year/period	**5,644,487**	**5,343,600**	**6,104,723**	**7,416,578**	**6,947,526**

Operating Activities

In the six months ended June 30, 2026, we had net cash generated from operating activities of RMB2,268.5 million, primarily consisting of our profit before income tax of RMB3,488.5 million, adjusted from items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB1,605.2 million, (b) finance cost of RMB296.1 million and (c) impairment provision for inventories of RMB198.1 million and (ii) changes in working capital, primarily comprising (a) an increase in inventories of RMB2,522.8 million, (b) an increase in receivables of RMB1,567.0 million and (c) an increase in payables of RMB1,193.1 million.

In 2025, we had net cash generated from operating activities of RMB4,902.3 million. This was primarily attributable to our profit before income tax of RMB1,690.4 million, adjusted for items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB2,519.4 million, (b) impairment provision for inventories of RMB580.7 million and (c) finance cost of RMB443.5 million, and (ii) changes in working capital, primarily comprising (a) an increase in receivables of RMB3,142.8 million, (b) an increase in payables of RMB3,540.7 million and (c) an increase in inventories of RMB504.5 million.

In 2024, we had net cash generated from operating activities of RMB4,978.6 million. This was primarily attributable to our profit before income tax of RMB1,467.7 million, adjusted for items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB2,558.7 million, (b) impairment provision for inventories of RMB454.7 million and (c) net foreign exchange gains of RMB294.7 million, and (ii) changes in working capital, primarily comprising (a) an increase in receivables of RMB446.0 million, (b) an increase in inventories of RMB463.4 million and (c) an increase in payables of RMB706.3 million.

In 2023, we had net cash generated from operating activities of RMB5,040.7 million. This was primarily attributable to our profit before income tax of RMB2,191.1 million, adjusted for items mainly including (i) non-operating and non-cash items, primarily comprising (a) depreciation and amortization of non-current assets of RMB2,249.4 million, (b) finance cost of RMB464.9 million and (c) net foreign exchange gains of RMB129.9 million and (ii) changes in working capital, primarily comprising (a) an increase in payables of RMB401.5 million, (b) a decrease in receivables of RMB268.3 million and (c) an increase in inventories of RMB528.2 million.

Investing Activities

In the six months ended June 30, 2026, we had net cash used in investing activities of RMB5,367.2 million, primarily consisting of (i) payments for purchase of property, plant, and equipment, intangible assets and other non-current assets of RMB5,253.4 million and (ii) placement of term deposits and wealth management products of RMB2,416.0 million, partially offset by (i) withdrawal of term deposits and wealth management products of RMB2,220.9 million and (ii) proceeds of deposits for purchase of investments of RMB435.4 million.

In 2025, we had net cash used in investing activities of RMB7,878.4 million, primarily consisting of (i) payments for purchase of property, plant and equipment, intangible assets and other non-current assets of RMB4,383.3 million and (ii) net outflow of cash from the acquisition of subsidiaries of RMB3,383.3 million, partially offset by (i) withdrawal of term deposits and wealth management products of RMB1,330.1 million and (ii) proceeds of deposits for purchase of investments of RMB505.3 million, and (iii) government grant received in relation to assets of RMB404.8 million.

In 2024, we had net cash used in investing activities of RMB4,086.3 million, primarily consisting of (i) payments for purchase of property, plant and equipment, intangible assets of RMB3,792.1 million and (ii) placement of term deposits and wealth management products of RMB1,593.0 million, partially offset by (i) withdrawal of term deposits and wealth management products of RMB986.2 million and (ii) proceeds of deposits for purchase of investments of RMB230.2 million.

In 2023, we had net cash used in investing activities of RMB4,707.2 million, primarily consisting of (i) payments for purchase of property, plant and equipment, intangible assets of RMB3,466.9 million and (ii) placement of term deposits and wealth management products of RMB1,182.2 million, partially offset by withdrawal of term deposits and wealth management products of RMB1,003.2 million.

Financing Activities

In the six months ended June 30, 2026, we had net cash generated from financing activities of RMB4,139.7 million, primarily consisting of (i) proceeds from borrowings of RMB14,484.2 million and (ii) proceeds from share schemes of RMB119.7 million, partially offset by repayments of borrowings of RMB9,895.1 million.

In 2025, we had net cash generated from financing activities of RMB3,749.4 million, primarily consisting of (i) proceeds from borrowings of RMB12,749.1 million and (ii) capital contributions from the Company's shareholders of RMB1,391.6 million, partially offset by repayments of borrowings of RMB9,508.2 million.

In 2024, we had net cash used in financing activities of RMB1,319.4 million, primarily consisting of (i) repayment of borrowings of RMB10,035.3 million and (ii) principal elements of lease payments of RMB644.3 million, partially offset by proceeds from borrowings of RMB10,128.6 million.

In 2023, we had net cash used in financing activities of RMB242.5 million, primarily consisting of (i) repayment of borrowings of RMB13,925.4 million and (ii) interest paid of RMB379.6 million, partially offset by proceeds from borrowings of RMB14,094.9 million.

Net Current Assets

The table below sets forth our current assets and liabilities as of the dates indicated.

	As of December 31,			As of June 30,	As of August 31,
	2023	2024	2025	2026	2026
		(in RMB thousands)			*(unaudited)*
Current assets:					
Inventories	6,293,879	6,152,656	8,928,944	11,417,997	12,851,678
Prepayments and other receivables	438,493	578,312	939,991	1,477,958	1,958,033

Net current assets	**4,418,532**	**3,559,715**	**174,839**	**3,162,162**	**3,320,842**

Comparison between August 31, 2026 and June 30, 2026

Our net current assets increased from RMB3,162.2 million as of June 30, 2026 to RMB3,320.8 million as of August 31, 2026, primarily due to (i) an increase in inventories from RMB11,418.0 million to RMB12,851.7 million, (ii) an increase in prepayments and other receivables from RMB1,478.0 million to RMB1,958.0 million, (iii) an increase in trade and notes receivables from RMB10,664.3 million to RMB11,051.0 million and (iv) an increase in financial assets at fair value through profit or loss from RMB747.9 million to RMB1,035.2 million, partially offset by an increase in trade and notes payables from RMB16,352.2 million to RMB17,600.2 million.

Comparison between June 30, 2026 and December 31, 2025

Our net current assets increased from RMB174.8 million as of December 31, 2025 to RMB3,162.2 million as of June 30, 2026, primarily due to (i) an increase in inventories from RMB8,928.9 million to RMB11,418.0 million, (ii) an increase in trade and notes receivables from RMB9,792.7 million to RMB10,664.3 million, (iii) an increase in cash and cash equivalents from RMB6,104.7 million to RMB6,947.5 million and (iv) an increase in financial assets at fair value through profit or loss from RMB136.4 million to RMB747.9 million and (iii) an increase in cash and cash equivalents from RMB6,104.7 million to RMB6,947.5 million, partially offset by (i) an increase in trade and notes payables from RMB14,046.0 million to RMB16,352.2 million and (ii) an increase in borrowings from RMB10,970.8 million to RMB12,327.2 million.

Comparison between December 31, 2025 and December 31, 2024

Our net current assets decreased from RMB3,559.7 million as of December 31, 2024 to RMB174.8 million as of December 31, 2025, primarily due to (i) an increase in borrowings from RMB7,138.1 million to RMB10,970.8 million, (ii) an increase in trade and notes payables from RMB10,594.9 million to RMB14,046.0 million and (iii) an increase in accruals and other payables from RMB772.1 million to RMB1,856.8 million, partially offset by (i) an increase in inventories from RMB6,152.7 million to RMB8,928.9 million and (ii) an increase in trade and notes receivables from RMB7,672.5 million to RMB9,792.7 million, in each case arising primarily from the acquisition of Source Photonics and GMD.

Comparison between December 31, 2024 and December 31, 2023

Our net current assets decreased from RMB4,418.5 million as of December 31, 2023 to RMB3,559.7 million as of December 31, 2024, primarily due to an increase in trade and note payables from RMB8,948.3 million to RMB10,594.9 million, partially offset by (i) a decrease in borrowings from RMB7,623.1 million to RMB7,138.1 million, (ii) an increase in other current assets from RMB370.1 million to RMB771.2 million, (iii) an increase in restricted cash and term deposits from RMB1,545.5 million to RMB1,828.7 million and (iv) a decrease in accruals and other payables from RMB931.9 million to RMB772.1 million, mainly attributable to the settlement of most of the equity consideration primarily in connection with the acquisition of Suzhou Display.

INDEBTEDNESS

The table below sets forth the indebtedness as of the dates indicated.

	As of December 31,			As of June 30	As of August 31,
	2023	2024	2025	2026	2026

Borrowings

As of December 31, 2023, 2024 and 2025 and June 30, 2026 and August 31, 2026 we had borrowings of RMB12,329.4 million, RMB12,427.3 million, RMB17,345.9 million, RMB21,767.8 million and RMB23,140.8 million, respectively. The table below sets forth the categories of our borrowings as of the dates indicated.

	As of December 31,			As of June 30	As of August 31,
	2023	2024	2025	2026	2026
	(in RMB thousands)				*(unaudited)*
Current Portion					
Bank borrowings					
– Secured	2,881,081	2,517,842	5,728,534	5,555,219	3,756,638

Subtotal	4,706,280	5,289,188	6,375,079	9,440,527	10,378,073
Total	**12,329,399**	**12,427,288**	**17,345,850**	**21,767,774**	**23,140,786**

During the Track Record Period, our borrowings were obtained from commercial banks and financial institutions, with the effective interest rates ranging from 0.01% to 6.10%, 0.01% to 6.00%, 1.33% to 5.10% and 1.33% to 4.04%, as of December 31, 2023, 2024 and 2025 and June 30, 2026, respectively. Our bank borrowings agreements contain standard terms, conditions and covenants that are customary for commercial bank loans. For details, see Note 30 to "Appendix IA —Accountants' Report of the Group."

As of August 31, 2026, our total committed banking facilities amounted to RMB35,969.5 million, of which RMB27,106.8 million had been utilized and RMB8,862.7 million remained unutilized.

Lease Liabilities

Our lease liabilities, including current and non-current portions, were primarily in relation to our lease of land use rights and buildings used in its operations.

As of December 31, 2023, 2024, 2025 and June 30, 2026, the balance of our lease liabilities, including both current and non-current portions, was RMB1,872.5 million, RMB1,483.4 million, RMB2,291.0 million and RMB2,195.3 million, respectively. As of August 31, 2026, the balance of our lease liabilities, including both current and non-current portions was RMB2,258.0 million. These fluctuations primarily reflect the expansion of our facilities in line with business growth, as well as adjustments to our leasing portfolio over time, including the termination or renewal of certain leases, addition of new leased spaces, and modifications to lease terms.

CONTINGENT LIABILITIES

As of June 30, 2026, we did not have any material contingent liabilities. During the Track Record Period and up to the Latest Practicable Date, save as disclosed above, we did not have any bank and other loans, or any issued and outstanding or agreed to be issued loan capital, bank overdrafts, borrowings or similar indebtedness, liabilities under acceptances (other than ordinary trade bills), acceptance credits, debentures, mortgages, charges, hire purchase commitments or finance lease commitments, guarantees or other material contingent liabilities. We also did not experience any difficulties in obtaining additional debt or equity financing as a result of any covenant breaches during the Track Record Period and up to the Latest Practicable Date.

Our Directors confirm that there has not been any material change in our indebtedness since June 30, 2026 and up to the Latest Practicable Date. Our Directors confirm that during the Track Record Period and up to the Latest Practicable Date, we did not have any material defaults or breaches of covenants in repayment of indebtedness.

CAPITAL COMMITMENTS

Capital Expenditure

The table below sets forth the capital expenditure for the years/period indicated.

	For the year ended December 31,			For the six months ended June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Payments for purchase of property, plant and equipment, intangible assets	3,466,866	3,792,145	4,383,255	5,253,358
Total	**3,466,866**	**3,792,145**	**4,383,255**	**5,253,358**

During the Track Record Period, our capital expenditure was primarily for purchase of property, plant and equipment used in our production. Our capital expenditure increased from RMB3,466.9 million in 2023 to RMB3,792.1 million in 2024, primarily due to the construction of the manufacturing facility in Thailand as we expanded production capacity in our PCB segment. Our capital expenditure increased from RMB3,792.1 million in 2024 to RMB4,383.3 million in 2025 and further increased to RMB5,253.4 million in the six months ended June 30, 2026, primarily due to our continued capacity expansion initiatives in connection with optical modules and PCB products.

We plan to continue capital expenditures to support our business growth and expansion strategy. See "Future Plans and Use of Proceeds — Use of Proceeds." We intend to fund these expenditures with available financial resources, including cash generated from operations, net proceeds from the Global Offering, and potential future equity or debt financing.

Capital Commitments

The table below sets forth the capital commitments as of the dates indicated.

	As of December 31,			As of June 30
	2023	2024	2025	2026
	(in RMB thousands)			
Property, plant and equipment and intangible assets commitments:				
-Contracted, but not provided for	259,478	246,858	2,974,064	6,077,582
Total	**259,478**	**246,858**	**2,974,064**	**6,077,582**

Our capital commitments increased from RMB246.9 million as of December 31, 2024 to RMB2,974.1 million as of December 31, 2025 primarily due to the expansion of our optical chip and optical module production capacity across key manufacturing stages, including component packaging and module assembly, as well as our investments in connection with the new production facilities for Multek in Zhuhai for our PCB business. Our capital commitments further increased to RMB6,077.6 million as of June 30, 2026, primarily due to the continued expansion of the production capacity for optical chips and modules and investments in the production facilities for Multek in Zhuhai.

KEY FINANCIAL RATIOS

	Year Ended/As of December 31,			Six months ended/ As of June 30,
	2023	2024	2025	2026
	%	%	%	
Gross margin[(1)]	13.9	11.5	12.4	19.4
Net profit margin[(2)]	5.8	3.0	3.5	10.7
Debt ratio[(3)]	58.5	58.6	64.0	64.5

Notes:

(1) Gross margin was calculated as gross profit for the year/period divided by revenue for the corresponding year/period and multiplied by 100%.

(2) Net profit margin was calculated as net profit for the year/period divided by revenue for the corresponding year/period and multiplied by 100%.

(3) Debt ratio was total liabilities divided by total assets as of the relevant date and multiplied by 100%.

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT FINANCIAL RISK

The main risks arising from our financial instruments are foreign currency risk, interest rate risk, price risk, credit risk and liquidity risk. See Note 3 to "Appendix IA — Accountants' Report of the Group."

Currency Risk

Foreign exchange risk arises when future commercial transactions or recognized assets and liabilities are denominated in a currency that is not the respective functional currency of a company and its subsidiaries. We have certain cash and bank balances, trade receivables, other receivables, trade payables, other payables and borrowings denominated in foreign currencies, which exposes us to currency risk. We manage our foreign exchange risk by performing regular reviews of our net foreign exchange exposures and try to minimize these exposures through buying and selling foreign currencies at market rate, wherever possible.

Interest Rate Risk

Interest rate risk primarily arises from interest-bearing borrowings. We are exposed to cash flow interest rate risk in relation to borrowings issued at floating rates and fair value interest rate risk in relation to borrowings issued at fixed rates. We determine the proportion of borrowings issued at floating rates and fixed rates based on the market environment and maintains an appropriate combination of financial instruments through regular review and monitoring. We monitor the level of interest rates and regularly review our strategy on interest rate risk management in the light of the prevailing market condition.

Price Risk

Price risk refers to the risk of fluctuations in the fair value of financial instruments due to changes in market prices, whether caused by factors specific to individual instruments or general market movements. We are mainly exposed to equity price risk arising from investments held by us that are classified either as FVTPL or FVOCI. Specifically, if prices of the respective instruments held by us had been 5% higher/lower as at December 31, 2023, 2024 and 2025 and June 30, 2026, profit before tax for the year/period would have been approximately RMB2,098,000, RMB(239,000), RMB4,494,000 and RMB30,752,000 higher/lower as a result of gains/losses on financial instruments classified as at FVTPL, other comprehensive income before tax would have been approximately RMB28,432,000 and RMB29,313,000, RMB36,413,000 and RMB50,846,000 higher/lower as a result of fair value changes on financial instruments classified as at FVOCI. Sensitivity analysis is performed by the management to assess the exposure of our financial results to equity price risk of FVTPL and FVOCI at the end of each Track Record Period.

Credit Risk

Credit risk refers to the risk that our counterparties may default on their contractual obligations resulting in financial losses to us. It arises from cash and cash equivalents, restricted cash and term deposits, as well as trade and notes receivables, other receivables and financial assets at FVOCI. Our maximum exposure to credit risk in relation to the corresponding class of financial assets is the carrying amount of the respective recognized assets as stated in the consolidated statements of financial position.

Liquidity Risk

Liquidity risk is the risk that we may encounter difficulty in meeting financial obligations due to shortage of funds. To manage our liquidity risk, we maintain adequate liquid assets such as cash and cash equivalents and term deposits or retain adequate financing arrangements to meet our liquidity requirements.

Capital Management

The primary objectives of our capital management are to safeguard our ability to continue as a going concern and to maintain healthy capital ratios in order to support our business and maximize shareholders' value. Our overall strategy remains unchanged throughout the Track Record Period.

We manage our capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, we may issue new shares, sell assets to reduce debt or raise additional funding from shareholders or banks as and when necessary. We are not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during 2023, 2024 and 2025 and the six months ended June 30, 2026. See Note 3 to "Appendix IA — Accountants' Report of the Group."

OFF-BALANCE SHEET ARRANGEMENTS

We have not entered into, nor do we expect to enter into, any off-balance sheet arrangements. We also have not entered into any financial guarantees or other commitments to guarantee the payment obligations of manufacturing partners. In addition, we have not entered into any derivative contracts that are indexed to our equity interests and classified as owners' equity. We do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing or hedging or research and development services with us.

FINANCIAL INFORMATION OF SOURCE PHOTONICS

The financial information contained and discussed in this subsection presents the historical financial information of Source Photonics for the years ended December 31, 2023, 2024 and the nine months ended September 30, 2025.

The net loss in 2023 for Source Photonics was primarily attributable to lower revenue from the sales of telecommunications transceivers. This was primarily due to a slowdown in global 5G infrastructure investment, which reduced market demand and intensified competition, resulting in significant pricing pressure in telecommunications transceiver product and a considerable decline in average selling prices during the year.

PRINCIPAL COMPONENTS OF RESULTS OF OPERATIONS

Revenue

During the periods presented, Source Photonics mainly generated revenue from the sales of (i) data center transceiver and (ii) telecommunications transceiver. The following table sets forth a breakdown of Source Photonics' revenue for the periods indicated.

	Year ended December 31,				Nine months ended September 30,			
	2023		2024		2024		2025	
	RMB	*%*	*RMB*	*%*	*RMB*	*%*	*RMB*	*%*
	(in thousands, except for percentages)				*(unaudited)*			
Data center transceiver	460,061	35.2	1,940,435	65.9	1,194,932	63.2	3,007,239	82.9
Telecommunications transceiver	826,037	63.3	971,225	33.0	673,315	35.6	599,577	16.5
Others*	19,047	1.5	33,672	1.1	21,829	1.2	20,699	0.6
Total	**1,305,145**	**100.0**	**2,945,332**	**100.0**	**1,890,076**	**100.0**	**3,627,515**	**100.0**

Note:

* Others mainly consist of income from the sale of materials.

During the periods presented, telecommunications transceiver was Source Photonics' largest revenue contributor in 2023. Driven by robust downstream demand, Source Photonics started to derive increasingly significant revenue from the sales of data center transceiver in 2024 and for the nine months ended September 30, 2025. Going forward, with the proliferation of AI computing and data center needs, data center transceivers are expected to continue to be a major contributor to Source Photonics' total revenue.

Total	**1,305,145**	**100.0**	**2,945,332**	**100.0**	**1,890,076**	**100.0**	**3,627,515**	**100.0**

Note:

* Information about revenue of Source Photonics from customers is presented based on customers' place of incorporation

During the periods presented, a majority of revenue of Source Photonics was from customers outside the Chinese mainland. Customers outside the Chinese mainland primarily included customers in the United States. We expect sales to customers outside the Chinese mainland to remain a key revenue contributor going forward.

Sales Volume and Average Selling Prices

	Year Ended December 31,				Nine months ended September 30,			
	2023		2024		2024		2025	
	Sales volume	Average selling price	Sales volume	Average selling price	Sales volume	Average selling price	Sales volume	Average selling price
	(Units'000)	*(RMB)*	*(Units'000)*	*(RMB)*	*(Units'000)*	*(RMB)*	*(Units'000)*	*(RMB)*
Data center transceiver	1,158	397.3	1,609	1,206.0	1,072	1,115.0	2,411	1,247.0
Telecommunications transceiver	5,693	145.1	9,698	100.1	7,154	94.0	5,469	110.0

Notes:

(1) Sales volume is measured in units, representing the total number of finished components or assemblies.
(2) Average selling price is calculated by dividing the revenue in a given product category by the corresponding sales volume.

Throughout the periods presented, the sales volume and average selling price of data center transceiver has consistently increased, primarily due to strong downstream demand from AI and data center applications.

Cost of Sales

Cost of sales of Source Photonics primarily consists of (i) raw material costs, (ii) labor costs and (iii) depreciation and amortization. During the periods presented, raw materials constituted the largest component of the cost of sales.

	Year ended December 31,				Nine months ended September 30,

Note:

(1) The overall gross margin is calculated as gross profit for the year/period divided by revenue for the corresponding year and multiplied by 100%.

General and Administrative Expenses

General and administrative expenses of Source Photonics primarily include (i) employee benefit expenses for personnel engaging in the general and administrative function, (ii) depreciation and amortization, (iii) consulting service fees, (iv) office expenses, (v) tax and surcharges, (vi) auditor's services and (vii) others.

	Year ended December 31,				Nine months ended September 30,

Net Impairment Losses on Financial Assets

Net impairment losses under the expected credit loss model, net of reversal of Source Photonics represent net impairment losses recognized on trade receivables and other receivables. In 2023, 2024 and the nine months ended September 30, 2025, provision of impairment loss of Source Photonics amounted to RMB0.9 million, RMB1.3 million and RMB1.4 million, respectively.

Other Income

Other income of Source Photonics consists of (i) government grants and (ii) others.

	Year ended December 31,				Nine months ended September 30,

Income Tax Expenses

Source Photonics' tax expenses comprise current tax and deferred tax. It is subject to income tax on an entity basis on profits arising in or derived from the tax jurisdictions in which the members of Source Photonics are domiciled and operate. Entities established in the PRC were subject to the PRC corporate income tax rate of 25% in 2023, 2024 and the nine months ended September 30, 2025. Certain subsidiaries have obtained High and New Technology Enterprises certification and thus they are entitled to a preferential corporate income tax rate of 15% for certain years. The provision for Taiwan Profits Tax was calculated at 20% of the estimated assessable profits for the periods. See Note 12 to "Appendix IB — Accountants' Report of the Source Photonics Group" for tax rates in other jurisdictions in which Source Photonics operates.

Source Photonics recorded income tax expenses of RMB4.4 million, RMB82.8 million and RMB85.5 million in 2023, 2024 and the nine months ended September 30, 2025, respectively. During the Track Record Period and up to the Latest Practicable Date, Source Photonics had fulfilled all tax obligations and did not have any unresolved tax disputes.

PERIOD-TO-PERIOD COMPARISON OF RESULTS OF OPERATIONS

Period Ended September 30, 2025 Compared to Period Ended September 30, 2024

Revenue

	Nine months ended September 30,		
	2024	2025	% Change
	(in RMB thousands, except for percentages) *(unaudited)*		
Data center transceiver	1,194,932	3,007,239	151.7
Telecommunications transceiver	673,315	599,577	(11.0)
Others*	21,829	20,699	(5.2)
Total	1,890,076	3,627,515	91.9

Note:

* Others mainly consist of income from the sale of materials.

Sales Volume and Average Selling Price

	Nine months ended September 30,			
	2024		2025	
	Sales volume	Average selling price	Sales volume	Average selling price
	(Units'000)	*(RMB)*	*(Units'000)*	*(RMB)*
Data center transceiver	1,072	1,115.0	2,411	1,247.0
Telecommunications transceiver	7,154	94.0	5,469	110.0

Data Center Transceiver

Source Photonics' revenue from the sales of data center transceiver increased by 151.7% from RMB1,194.9 million for the nine months ended September 30, 2024 to RMB3,007.2 million for the nine months ended September 30, 2025, due to (i) an increase in sales volume from 1,072 thousand units for the nine months ended September 30, 2024 to 2,411 thousand units for the nine months ended September 30, 2025, primarily due to strong downstream demand in AI and data centers and (ii) an increase in average selling price from RMB1,115.0 per unit for the nine months ended September 30, 2024 to RMB1,247.0 per unit for the nine months ended September 30, 2025, mainly due to a shift in product mix toward high-end data center transceivers, which carry higher selling prices.

Telecommunications Transceivers

Source Photonics' revenue from the sales of telecommunications transceiver decreased by 11.0% from RMB673.3 million for the nine months ended September 30, 2024 to RMB599.6 million for the nine months ended September 30, 2025, due to a decrease in sales volume from 7,154 thousand units for the nine months ended September 30, 2024 to 5,469 thousand units for the nine months ended September 30, 2025, primarily as a result of a decrease in market demand, partially offset by an increase in average selling price from RMB94.0 per unit for the nine months ended September 30, 2024 to RMB110.0 per unit for the nine months ended September 30, 2025, mainly due to a more favorable product mix in 2025, as Source Photonics sold a relatively large volume of lower-priced products in the nine months ended September 30, 2024, which lowered the overall average selling price for the period.

Others

Source Photonics' revenue from the sales of other products decreased by 5.2% from RMB21.8 million for the nine months ended September 30, 2024 to RMB20.7 million for the nine months ended September 30, 2025, primarily due to lower resales of raw materials and sales of scrap materials.

Cost of Sales

	Nine months ended September 30,		
	2024	**2025**	**% Change**
	(in RMB thousands, except for percentages) *(unaudited)*		
Raw material costs	1,117,170	2,147,591	92.2
Labor costs	166,228	283,698	70.7
Depreciation and amortization	53,973	80,698	49.5
Utility costs	14,533	20,373	40.2
Others	49,082	85,321	73.8
Total	1,400,986	2,617,681	86.8
as % of total revenue	*74.1*	*72.2*	

Cost of sales of Source Photonics increased by 86.8% from RMB1,401.0 million for the nine months ended September 30, 2024 to RMB2,617.7 million for the nine months ended September 30, 2025, primarily due to (i) a 92.2% increase in raw material costs, (ii) a 70.7% increase in labor costs and (iii) a 73.8% increase in others, in line with higher production of data center transceivers.

Gross Profit and Gross Margin

	Nine months ended September 30,			
	2024		**2025**	
	Gross Profit	**Gross Margin**	**Gross Profit**	**Gross Margin**
	RMB	*%*	*RMB*	*%*
	(in RMB thousands, except for percentages) *(unaudited)*			
Data center transceiver	336,528	28.2	890,907	29.6
Telecommunications transceiver	138,643	20.6	107,713	18.0
Others	13,919	63.8	11,214	54.2
Total/Overall	**489,090**	**25.9**	**1,009,834**	**27.8**

Data center Transceiver

Source Photonics' gross profit from the sales of data center transceiver increased by 164.7% from RMB336.5 million for the nine months ended September 30, 2024 to RMB890.9 million for the nine

months ended September 30, 2025, primarily due to (i) a 151.7% increase in revenue from the sales of data center transceiver and (ii) an increase in gross profit margin from 28.2% for the nine months ended September 30, 2024 to 29.6% for the nine months ended September 30, 2025, mainly attributable to improved capacity utilization and manufacturing efficiency as well as declines in raw material prices, which lowered unit costs.

Telecommunications Transceiver

Source Photonics' gross profit from the sales of telecommunications transceiver decreased by 22.3% from RMB138.6 million for the nine months ended September 30, 2024 to RMB107.7 million for the nine months ended September 30, 2025, primarily due to (i) a decrease of 11.0% in revenue from the sales of telecommunications transceiver and (ii) a decrease in gross profit margin from 20.6% for the nine months ended September 30, 2024 to 18.0% for the nine months ended September 30, 2025, mainly attributable to lower selling prices for 100G optical modules due to intensified market competition.

Others

Source Photonics' gross profit from other products decreased by 19.4% from RMB13.9 million for the nine months ended September 30, 2024 to RMB11.2 million for the nine months ended September 30, 2025, mainly due to lower resale prices for raw materials and scrap materials.

General and Administrative Expenses

General and administrative expenses of Source Photonics increased by 71.4% from RMB71.3 million for the nine months ended September 30, 2024 to RMB122.3 million for the nine months ended September 30, 2025, primarily due to (i) an increase of RMB13.6 million in employee benefit expenses, (ii) an increase of RMB7.6 million in depreciation and amortization, and (iii) an increase of RMB5.8 million in consulting service fees. As a percentage of total revenue, Source Photonics' general and administrative expenses decreased from 3.8% for the nine months ended September 30, 2024 to 3.4% for the nine months ended September 30, 2025, mainly attributable to the growth in revenue.

Selling and Marketing Expenses

Selling and marketing expenses of Source Photonics increased by 18.3% from RMB27.5 million for the nine months ended September 30, 2024 to RMB32.6 million for the nine months ended September 30, 2025, primarily due to (i) an increase of RMB5.5 million in employee benefit expenses and (ii) an increase of RMB0.3 million in advertising expense. As a percentage of total revenue, Source Photonics' selling and marketing expenses decreased from 1.5% for the nine months ended September 30, 2024 to 0.9% for the nine months ended September 30, 2025, mainly attributable to the growth in revenue.

Research and Development Expenses

Research and development expenses of Source Photonics increased by 93.7% from RMB80.6 million for the nine months ended September 30, 2024 to RMB156.1 million for the nine months ended September 30, 2025, primarily due to (i) an increase of RMB45.3 million in raw materials costs, (ii) an increase of RMB13.6 million in others and (iii) an increase of RMB11.1 million in employee benefit expenses, in line with Source Photonics' increased investment in R&D in data center transceivers. As a percentage of total revenue, Source Photonics' research and development expenses remained stable at 4.3% for the nine months ended September 30, 2024 and for the nine months ended September 30, 2025, mainly attributable to the growth in revenue.

Net Impairment Losses on Financial Assets

Impairment losses of Source Photonics under the expected credit loss model, net of reversal, increased from RMB0.2 million for the nine months ended September 30, 2024 to RMB1.4 million for the nine months ended September 30, 2025, primarily due to an increase in trade receivables as of September 30, 2025, compared to September 30, 2024.

Other Income

Other income of Source Photonics increased by 92.4% from RMB7.4 million for the nine months ended September 30, 2024 to RMB14.2 million for the nine months ended September 30, 2025, primarily due to an increase in government grants of RMB6.4 million.

Other Gains/(Losses), Net

Other gains/(losses), net of Source Photonics decreased by 121.0% from RMB616.6 million for the nine months ended September 30, 2024 to a net loss of RMB129.6 million for the nine months ended September 30, 2025. The change was primarily due to (i) a decrease of RMB648.1 million in gain on modification of terms in Preferred Shares, (ii) an increase of RMB41.6 million in compensation expense in connection with convertible bond and (iii) an increase of RMB58.0 million in fair value losses on financial liabilities at FVTPL, partially offset by a decrease of RMB1.9 million in net foreign exchange losses.

Finance Costs, Net

Finance costs, net of Source Photonics increased by 11.7% from RMB19.2 million for the nine months ended September 30, 2024 to RMB21.4 million for the nine months ended September 30, 2025, primarily due to an increase of RMB7.4 million in interest expenses on borrowings, partially offset by (i) an increase of RMB4.6 million in interest income and (ii) a decrease of RMB0.9 million in net exchange losses on foreign currency borrowings.

Income Tax Expenses

Income tax expenses of Source Photonics increased by 151.6% from RMB34.0 million for the nine months ended September 30, 2024 to RMB85.5 million for the nine months ended September 30, 2025, primarily due to an increase of RMB50.9 million in current income tax and an increase of RMB0.6 million in deferred income tax.

Profit for the Period

As a result of the foregoing, Source Photonics' profit for the period decreased by 46.0% from RMB880.3 million for the nine months ended September 30, 2024 to RMB475.3 million for the nine months ended September 30, 2025, and its net margin decreased from 46.6% for the nine months ended September 30, 2024 to 13.1% for the nine months ended September 30, 2025.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

Revenue

	Year ended December 31,		
	2023	**2024**	**% Change**
	(in RMB thousands, except for percentages)		
Data center transceiver	460,061	1,940,435	321.8
Telecommunications transceiver	826,037	971,225	17.6
Others*	19,047	33,672	76.8
Total	**1,305,145**	**2,945,332**	**125.7**

Note:

* Others mainly consist of income from the sale of materials.

Sales Volume and Average Selling Price

	Year ended December 31,			
	2023		**2024**	
	Sales volume	**Average selling price**	**Sales volume**	**Average selling price**
	(Units'000)	*(RMB)*	*(Units'000)*	*(RMB)*
Data center transceiver	1,158	397.3	1,609	1,206.0
Telecommunications transceiver	5,693	145.1	9,698	100.1

Data Center Transceiver

Source Photonics' revenue from the sales of data center transceiver increased by 321.8% from RMB460.1 million in 2023 to RMB1,940.4 million in 2024, due to (i) an increase in sales volume from 1,158 thousand units in 2023 to 1,609 thousand units in 2024, primarily as a result of strong downstream demand in AI and data centers and (ii) an increase in average selling price from RMB397.3 per unit in 2023 to RMB1,206.0 per unit in 2024, primarily as a result of a shift in product mix toward high-end data center transceivers, which carry higher selling prices, primarily driven by strong and sustained capital expenditure by end customers on computing infrastructure.

Telecommunications Transceiver

Source Photonics' revenue from the sales of telecommunications transceiver increased by 17.6% from RMB826.0 million in 2023 to RMB971.2 million in 2024, due to an increase in sales volume from 5,693 thousand units in 2023 to 9,698 thousand units in 2024, primarily as a result of higher shipments in response to customer needs, partially offset by a decrease in average selling price from RMB145.1 per unit in 2023 to RMB100.1 per unit in 2024, mainly due to a shift in product mix toward lower-priced optical transmission products, primarily driven by increased shipments of lower-priced optical transceivers for broadband applications and softer demand for high-speed products as telecommunications operators allocated more resources to computing infrastructure.

Others

Source Photonics' revenue from the sales of other products increased by 76.8% from RMB19.0 million in 2023 to RMB33.7 million in 2024, primarily due to higher resales of raw materials and increased sales of scrap materials.

Cost of Sales

	Year ended December 31,		
	2023	**2024**	**% Change**
	(in RMB thousands, except for percentages)		
Raw material costs	758,583	1,679,562	121.4
Labor costs	171,997	222,977	29.6
Depreciation and amortization	71,757	79,314	10.5
Utility costs	16,232	20,479	26.2
Others	38,177	63,917	67.4
Total	**1,056,746**	**2,066,249**	**95.5**
as % of total revenue	*81.0*	*70.2*	

Cost of sales of Source Photonics increased by 95.5% from RMB1,056.7 million in 2023 to RMB2,066.2 million in 2024, primarily due to (i) a 121.4% increase in raw material costs, (ii) a 29.6% increase in labor costs and (iii) a 67.4% increase in others, in line with higher production of data center transceivers.

Gross Profit and Gross Margin

	Year ended December 31,			
	2023		**2024**	
	Gross Profit	**Gross Margin**	**Gross Profit**	**Gross Margin**
	RMB	*%*	*RMB*	*%*
	(in thousands, except for percentages)			
Data center transceiver	70,269	15.3	629,723	32.5
Telecommunications transceiver	162,452	19.7	227,572	23.4
Others	15,678	82.3	21,788	64.7
Total/Overall	**248,399**	**19.0**	**879,083**	**29.8**

Data Center Transceiver

Source Photonics' gross profit from data center transceiver increased by 796.2% from RMB70.3 million in 2023 to RMB629.7 million in 2024, primarily due to (i) an increase of 321.8% in revenue from the sales of data center transceiver and (ii) an increase in gross profit margin from 15.3% in 2023 to 32.5% in 2024, mainly attributable to larger production scale, ongoing design optimizations and annual price reductions of supplier, which lowered unit costs.

Telecommunications Transceiver

Source Photonics' gross profit from telecommunications transceiver increased by 40.1% from RMB162.5 million in 2023 to RMB227.6 million in 2024, primarily due to (i) an increase 17.6% in revenue from the sales of telecommunications transceiver and (ii) an increase in gross profit margin from 19.7% in 2023 to 23.4% in 2024, mainly attributable to Source Photonics' cost optimization measures, including scaling production to capture economies of scale and optimizing the vendor base.

Others

Source Photonics' gross profit from other products increased by 39.0% from RMB15.7 million in 2023 to RMB21.8 million in 2024, mainly due to higher resale prices for raw materials and scrap materials.

General and Administrative Expenses

General and administrative expenses of Source Photonics increased by 49.0% from RMB112.9 million in 2023 to RMB168.2 million in 2024, primarily due to (i) an increase of RMB57.5 million in employee benefit expenses and (ii) an increase of RMB7.1 million in others, partially offset by a decrease of RMB16.5 million in consulting service. As a percentage of total revenue, Source Photonics' general and administrative expenses decreased from 8.7% in 2023 to 5.7% in 2024, mainly attributable to the significant growth in revenue.

Selling and Marketing Expenses

Selling and marketing expenses of Source Photonics increased by 37.9% from RMB29.8 million in 2023 to RMB41.0 million in 2024, primarily due to (i) an increase of RMB8.5 million in employee benefit expenses, (ii) an increase of RMB0.9 million in advertising expense and (iii) an increase of RMB0.9 million in others. As a percentage of total revenue, Source Photonics' selling and marketing expenses decreased from 2.3% in 2023 to 1.4% in 2024, mainly attributable to the significant growth in revenue.

Research and Development Expenses

Research and development expenses of Source Photonics increased by 46.6% from RMB108.9 million in 2023 to RMB159.7 million in 2024, primarily due to (i) an increase of RMB38.1 million in raw materials costs and (ii) an increase of RMB15.8 million in employee benefit expenses, partially offset by a decrease of RMB2.6 million in depreciation and amortization. As a percentage of total revenue, Source Photonics research and development expenses decreased from 8.3% in 2023 to 5.4% in 2024, mainly attributable to the significant growth in revenue.

Net Impairment Losses on Financial Assets

Impairment losses on Source Photonics under the expected credit loss model, net reversal, increased from RMB0.9 million in 2023 to RMB1.3 million in 2024, primarily due to an increased balance of trade receivables.

Other Income

Other income of Source Photonics decreased by 16.0% from RMB20.4 million in 2023 to RMB17.2 million in 2024, primarily due to a decrease in government grants amounting to RMB3.3 million, partially offset by an increase of RMB0.1 million in others.

Other Gains/(Losses), Net

Other gains/(losses), net of Source Photonics shifted from a loss of RMB50.2 million in 2023 to a gain of RMB634.8 million in 2024, primarily due to (i) an increase of RMB648.1 million in gain on modification of terms in Preferred Shares, (ii) a decrease of RMB49.1 million in fair value losses on financial liabilities at FVTPL, and (iii) an increase of RMB1.8 million in net foreign exchange gains, partially offset by an increase of RMB10.3 million in net losses on disposal of property, plant and equipment and other long-term assets.

Finance Costs, Net

Finance costs, net of Source Photonics decreased by 46.9% from RMB52.1 million in 2023 to RMB27.7 million in 2024, primarily due to a decrease of RMB21.5 million in interest expenses on borrowings that mainly attributable to the repayment of certain loans with higher interest rates during 2023.

Income Tax Expenses

Income tax expenses of Source Photonics increased by 1,773.4% from RMB4.4 million in 2023 to RMB82.8 million in 2024, primarily because the company incurred a loss in 2023.

Profit/(loss) for the year

As a result of the foregoing, Source Photonics recorded a profit of RMB1,050.5 million in 2024, compared with a loss of RMB90.4 million in 2023, and its net margin improved from a net loss margin of 6.9% in 2023 to a net profit margin of 35.7% in 2024.

DISCUSSION OF SELECTED ITEMS FROM CONSOLIDATED STATEMENTS OF FINANCIAL POSITION

	As of December 31,		As of September 30,
	2023	2024	2025

Inventories

Source Photonics' inventories include raw materials, finished goods and work in progress. The table below sets forth the breakdown of its inventories as of the dates indicated.

	As of December 31,		As of September 30,
	2023	2024	2025
	(in RMB thousands)		
			(unaudited)
Raw materials	318,934	328,555	556,250
Work in progress	261,602	448,821	528,857
Finished goods	59,569	60,332	168,064
Materials on consignment	11,246	30,422	52,298
Goods in transit	22,417	106,432	66,162
Less: provision for impairment	(148,146)	(130,405)	(123,425)
Total	**525,622**	**844,157**	**1,248,206**

Source Photonics' inventories increased from RMB525.6 million as of December 31, 2023 to RMB844.2 million as of December 31, 2024, primarily due to (i) an increase in work in progress from RMB261.6 million as of December 31, 2023 to RMB448.8 million as of December 31, 2024 and (ii) an increase in goods in transit from RMB22.4 million as of December 31, 2023 to RMB106.4 million as of December 31, 2024.

Source Photonics' inventories increased from RMB844.2 million as of December 31, 2024 to RMB1,248.2 million as of September 30, 2025, primarily due to (i) an increase in raw materials from RMB328.6 million as of December 31, 2024 to RMB556.3 million as of September 30, 2025 and (ii) an increase in finished goods from RMB60.3 million as of December 31, 2024 to RMB168.1 million as of September 30, 2025, partially offset by a decrease in goods in transit from RMB106.4 million as of December 31, 2024 to RMB66.2 million as of September 30, 2025.

Source Photonics estimates the net realizable value of its inventories based on contracted prices or, for raw materials and work in progress, on manufacturing cycles, production forecasts, estimated conversion costs and selling prices. It wrote off inventory provisions of RMB16.8 million, RMB29.8 million and RMB31.5 million in 2023, 2024 and the nine months ended September 30, 2025, respectively, relating to obsolete inventories that were scrapped, disposed of or subsequently reused for other purposes.

Aging Analysis

The table below sets forth an aging analysis of inventories of Source Photonics as of the dates indicated.

	As of December 31,		As of September 30,
	2023	**2024**	**2025**
	(in RMB thousands)		
Within one year	534,523	834,383	1,217,037
One to two years	31,936	54,049	83,755
Two to three years	27,489	11,292	11,934
Over three years	79,820	74,838	58,905
Total	**673,768**	**974,562**	**1,371,631**

The table below sets forth the turnover days of Source Photonics' inventories for the years/period indicated.

	Year Ended December 31,		Nine Months Ended September 30,
	2023	**2024**	**2025**
Inventory turnover days[(1)]	160	119	108

Note:

(1) Inventory turnover days for each year equals the average of the beginning and ending carrying amount of inventory for that period divided by cost of sales for that year and multiplied by 360 days for 2023, and 2024, and by 270 days for the nine months ended September 30, 2025.

During the periods presented, Source Photonics' inventory turnover days decreased from 2023 to 2024, in line with its business growth. Source Photonics' inventory turnover days remained stable between 2024 and as of September 30, 2025.

Trade Receivables

Trade receivables mainly arise from sales of products on credit. Source Photonics periodically conducts credit evaluations of customers who trade on credit. Source Photonics usually grant credit terms to customers ranging from 30 to 120 days from the date of billing.

The table below sets forth the breakdown of Source Photonics' trade receivables as of the dates indicated.

	As of December 31,		As of September 30,
	2023	**2024**	**2025**
	(in RMB thousands)		
Trade receivables	481,384	877,705	1,378,933
Less: credit loss allowance	(2,570)	(3,790)	(5,123)
Total	**478,814**	**873,915**	**1,373,810**

Source Photonics' trade receivables continued to increase during the periods presented, primarily due to an increase in the sales of its products, which was mainly attributable to revenue growth, particularly from overseas customers. As overseas customers were generally granted shorter credit terms than domestic customers, the increase in its trade receivables was lower than the increase in its revenue.

The table below sets forth an aging analysis of Source Photonics' trade receivables as of the dates indicated.

	As of December 31,		As of September 30,
	2023	2024	2025
	(in RMB thousands)		
Within one year	479,737	873,220	1,373,013
One to two years	249	3,105	4,543
Over two years	1,398	1,380	1,377
Total	**481,384**	**877,705**	**1,378,933**

For further details, see Note 21 to "Appendix IB — Accountants' Report of the Source Photonics Group."

The table below sets forth the turnover days of Source Photonics' trade receivables for the years/period indicated.

	Year Ended December 31,		Nine Months Ended September 30,
	2023	2024	2025
Trade receivables turnover days[(1)]	123	83	84

Note:

(1) Trade receivables turnover days for each year equals the average of the beginning and ending balances of trade receivables for that year divided by revenue for that year and multiplied by 360 days for 2023, and 2024, and by 270 days for the nine months ended September 30, 2025.

During the periods presented, Source Photonics' trade receivables turnover days decreased from 2023 to 2024 and remained relatively stable for the nine months ended September 30, 2025, mainly due to an increase in overseas customers, who generally have shorter settlement cycles.

Trade Payables

Source Photonics' trade payables primarily represent outstanding amounts owed to third parties, including payments for materials, construction and equipment and operating expenses.

The table below sets forth the breakdown of Source Photonics' trade payables as of the dates indicated.

	As of December 31,		As of September 30,
	2023	2024	2025
	(in RMB thousands)		
Payments for materials	479,224	854,289	1,300,518
Payments for construction and equipment	16,215	43,353	156,035
Payments for operating expenses	21,586	18,728	36,751
Total	**517,025**	**916,370**	**1,493,304**

Source Photonics' trade payables increased by 77.2% from RMB517.0 million as of December 31, 2023 to RMB916.4 million as of December 31, 2024, primarily due to (i) an increase in payments for materials from RMB479.2 million as of December 31, 2023 to RMB854.3 million as of December 31, 2024 and (ii) an increase in payments for construction and equipment from RMB16.2 million as of December 31, 2023 to

RMB43.4 million as of December 31, 2024. Source Photonics' trade payables increased from RMB916.4 million as of December 31, 2024 to RMB1,493.3 million as of September 30, 2025, primarily due to (i) an increase in payments for materials from RMB854.3 million as of December 31, 2024 to RMB1,300.5 million as of September 30, 2025 and (ii) an increase in payments for construction and equipment from RMB43.4 million as of December 31, 2024 to RMB156.0 million as of September 30, 2025.

The table below sets forth the aging analysis of the trade payables.

	As of December 31,		As of September 30,
	2023	2024	2025
	(in RMB thousands)		
Within 1 year	515,157	913,392	1,490,648
Between 1 and 2 years	760	1,826	1,537
Between 2 and 3 years	241	240	228
Over 3 years	867	912	891
Total	**517,025**	**916,370**	**1,493,304**

The table below sets forth the turnover days for the trade payables for the years/period indicated.

	Year Ended December 31,		Nine Months Ended September 30,
	2023	2024	2025
Trade payables turnover days[(1)]	160	125	124

Note:

(1) Trade payables turnover days for each year equals the average of the beginning and ending balances of trade payables for that year divided by cost of sales for that year and multiplied by 360 days for 2023, and 2024, and by 270 days for the nine months ended September 30, 2025.

During the periods presented, Source Photonics' trade payables turnover days decreased in 2023, 2024 and the nine months ended September 30, 2025, primarily due to accelerated payments to secure supplies and increased purchases of raw materials with shorter credit terms due to strong downstream demands.

Restricted Cash and Term Deposits

Source Photonics had restricted bank deposits of RMB50.4 million, RMB40.3 million and RMB53.9 million as of December 31, 2023 and 2024 and as of September 30, 2025, primarily related to international trade financing borrowings, with fluctuations mainly due to the expiration of existing arrangements and the signing of new contracts.

Cash Flows

The table below sets forth Source Photonics' cash flows for the years/period indicated.

	Year Ended December 31,		Nine Months Ended September 30,
	2023	**2024**	**2025**
	(in RMB thousands)		
Cash flows from operating activities			
Cash generated from operations	90,731	351,786	470,441
Interest received	863	710	5,469
Income tax paid	(13,810)	(33,660)	(66,756)
Net cash generated from operating activities	**77,784**	**318,836**	**409,154**
Net cash used in investing activities	(186,335)	(195,376)	(400,188)
Net cash generated from/(used in) financing activities	195,015	(111,579)	43,847
Net increase in cash and cash equivalents	**86,464**	**11,881**	**52,813**
Cash and cash equivalents at beginning of the year	186,812	213,914	252,047
Effects of exchange rate changes on cash and cash equivalents	(59,362)	26,252	(29,129)
Cash and cash equivalents at end of the year	**213,914**	**252,047**	**275,731**

Operating Activities

For the nine months ended September 30, 2025, Source Photonics had net cash generated from operating activities of RMB409.2 million, primarily comprising Source Photonics' profit before income tax of RMB560.8 million, adjusted for non-operating and non-cash items mainly including (i) depreciation and amortization of non-current assets of RMB119.4 million, (ii) finance costs of RMB26.9 million and (iii) net foreign exchange losses of RMB9.9 million. This amount was further affected by changes in working capital, including (i) an increase in inventories of RMB397.1 million and (ii) an increase in receivables of RMB557.6 million, partially offset by an increase in payables of RMB598.9 million.

In 2024, Source Photonics had net cash generated from operating activities of RMB318.8 million, primarily comprising Source Photonics' profit before income tax of RMB1,133.2 million, adjusted for non-operating and non-cash items mainly including (i) depreciation and amortization of non-current assets of RMB115.1 million, (ii) finance costs of RMB28.4 million, partially offset by (iii) net foreign exchange gains of RMB20.6 million. This amount was further affected by changes in working capital, including (i) an increase in payables of RMB431.1 million, partially offset by (ii) an increase in receivables of RMB414.2 million and (iii) an increase in inventories of RMB329.1 million.

In 2023, Source Photonics had net cash generated from operating activities of RMB77.8 million, primarily comprising Source Photonics' loss before income tax of RMB86.0 million, adjusted for non-operating and non-cash items mainly including (i) depreciation and amortization of non-current assets of RMB106.3 million, (ii) finance costs of RMB52.9 million, partially offset by (iii) net foreign exchange gains of RMB18.8 million. The amount was further affected by changes in working capital, including (i) an increase in payables of RMB142.6 million, partially offset by (ii) an increase in receivables of RMB94.1 million and (iii) an increase in inventories of RMB114.1 million.

Investing Activities

For the nine months ended September 30, 2025, Source Photonics had net cash used in investing activities of RMB400.2 million, primarily comprising (i) payments for purchase of property, plant and equipment, intangible assets and other non-current assets of RMB400.4 million and (ii) placement of wealth management products of RMB38.0 million, partially offset by withdrawal of wealth management products of RMB40.0 million.

In 2024, Source Photonics had net cash used in investing activities of RMB195.4 million, primarily comprising (i) payments for purchase of property, plant, and equipment, intangible assets and other non-current assets of RMB264.7 million and (ii) placement of wealth management products of RMB223.5 million , partially offset by withdraw of wealth management products of RMB290.5 million.

In 2023, Source Photonics had net cash used in investing activities of RMB186.3 million, primarily comprising (i) payments for purchase of property, plant, and equipment, intangible assets and other non-current assets of RMB125.2 million and (ii) placement of wealth management products of RMB81.0 million, partially offset by government grant received in relation to assets of RMB15.4 million.

Financing Activities

For the nine months ended September 30, 2025, Source Photonics had net cash generated from financing activities of RMB43.8 million, primarily comprising proceeds from borrowings of RMB797.2 million, partially offset by repayments of borrowings of RMB687.5 million and payments for repurchase of convertible bonds of RMB357.7 million.

In 2024, Source Photonics had net cash used in financing activities of RMB111.6 million, primarily consisting of (i) repayment of borrowings of RMB833.1 million and (ii) payments for repurchase of convertible bonds of RMB142.2 million, partially offset by (i) proceeds from borrowing of RMB714.5 million and (ii) proceeds from issuance of convertible bonds of RMB177.6 million.

In 2023, Source Photonics had net cash generated from financing activities of RMB195.0 million, primarily consisting of (i) proceeds from borrowings of RMB998.0 million and (ii) proceeds from issuance of convertible bonds of RMB356.1 million, partially offset by (i) repayment of borrowings of RMB1,037.6 million.

Net Current Assets/Liabilities

The table below sets forth current assets and liabilities of Source Photonics as of the dates indicated.

	As of December 31,		As of September 30,
	2023	**2024**	**2025**
	(in RMB thousands)		
Current assets:			
Inventories	525,622	844,157	1,248,206
Prepayments and other receivables	33,703	62,136	74,504
Trade receivables	478,814	873,915	1,373,810
Financial assets at fair value through profit or loss	81,000	14,020	12,035
Financial assets at fair value through other comprehensive income	28,217	6,022	4,918
Restricted cash and term deposits	50,388	40,344	53,861
Cash and cash equivalents	213,914	252,047	275,731
Other current assets	9,306	22,422	19,837
Total current assets	**1,420,964**	**2,115,063**	**3,062,902**
Current liabilities:			
Borrowings	581,045	461,575	558,618
Trade payables	517,025	916,370	1,493,304
Contract liabilities	117	1,232	259
Lease liabilities	20,391	20,722	15,651
Current income tax liabilities	5,583	29,577	151,931
Convertible bonds	321,304	374,483	–
Other financial liabilities at fair value through profit or loss	2,625,085	–	–

	As of December 31,		As of September 30,
	2023	2024	2025
	(in RMB thousands)		
Accruals and other payables	63,776	173,100	94,993
Provisions	3,215	2,353	2,776
Total current liabilities	**4,137,541**	**1,979,412**	**2,317,532**
Net current (liability)/assets	**(2,716,577)**	**135,651**	**745,370**

Comparison between September 30, 2025 and December 31, 2024

Source Photonics' net current assets increased from RMB135.7 million as of December 31, 2024 to RMB745.4 million as of September 30, 2025, primarily due to (i) an increase in trade receivables from RMB873.9 million to RMB1,373.8 million, (ii) an increase in inventories from RMB844.2 million to RMB1,248.2 million, (iii) a decrease in convertible bonds from RMB374.5 million to nil, (iv) a decrease in lease liabilities from RMB20.7 million to RMB15.7 million and (v) an increase in prepayments and other receivables from RMB62.1 million to RMB74.5 million, mainly attributable to the increase in the balance of prepayments for goods not yet received, partially offset by an increase in trade payables from RMB916.4 million to RMB1,493.3 million and an increase in current income tax liabilities from RMB29.6 million to RMB151.9 million, mainly attributable to the increase in taxable profit during the period.

Comparison between December 31, 2024 and December 31, 2023

Source Photonics' net current liabilities of RMB2,716.6 million as of December 31, 2023 turned into net current assets of RMB135.7 million as of December 31, 2024, primarily due to (i) a decrease in financial liabilities at fair value through profit or loss from RMB2,625.1 million to nil, (ii) an increase in trade receivables from RMB478.8 million to RMB873.9 million, (iii) an increase in inventories from RMB525.6 million to RMB844.2 million and (iv) a decrease in borrowings from RMB581.0 million to RMB461.6 million, partially offset by an increase in trade payables from RMB517.0 million to RMB916.4 million.

INDEBTEDNESS

The table below sets forth the indebtedness as of the dates indicated.

	As of December 31,		As of September 30,
	2023	2024	2025
	(in RMB thousands)		
Current			
Borrowings	581,045	461,575	558,618
Lease liabilities	20,391	20,722	15,651
Subtotal	601,436	482,297	574,269
Non-current			
Borrowings	11,766	–	10,000
Lease liabilities	126,323	107,039	97,738
Subtotal	138,089	107,039	107,738
Total	**739,525**	**589,336**	**682,007**

Borrowings

As of December 31, 2023 and 2024 and as of September 30, 2025, Source Photonics had borrowings of RMB592.8 million, RMB461.6 million and RMB568.6 million, respectively. The table below sets forth the categories of borrowings of Source Photonics as of the dates indicated.

	As of December 31,		As of September 30,
	2023	2024	2025
	(in RMB thousands)		
Within 1 year	581,045	461,575	558,618
Between 1 and 2 years	11,766	–	10,000
Between 2 and 5 years	–	–	–
Total	**592,811**	**461,575**	**568,618**

Lease Liabilities

Lease liabilities of Source Photonics, including current and non-current portions, were primarily in relation to Source Photonics' lease of land use rights and buildings used in its operations.

As of December 31, 2023, and 2024, and September 30, 2025, the balance of Source Photonics' lease liabilities, including both current and non-current portions, was RMB146.7 million, RMB127.8 million and RMB113.4 million, respectively. These decreases primarily reflect the termination of certain leases.

CONTINGENT LIABILITIES

As of September 30, 2025, Source Photonics did not have any material contingent liabilities. During the Track Record Period and up to the Latest Practicable Date, save as disclosed above, Source Photonics did not have any bank and other loans, or any issued and outstanding or agreed to be issued loan capital, bank overdrafts, borrowings or similar indebtedness, liabilities under acceptances (other than ordinary trade bills), acceptance credits, debentures, mortgages, charges, hire purchase commitments or finance lease commitments, guarantees or other material contingent liabilities. Source Photonics also did not experience any difficulties in obtaining additional debt or equity financing as a result of any covenant breaches during the Track Record Period and up to the Latest Practicable Date.

Directors of Source Photonics confirm that there has not been any material change in Source Photonics' indebtedness since September 30, 2025 and up to the Latest Practicable Date. Directors of Source Photonics confirm that during the Track Record Period and up to the Latest Practicable Date, Source Photonics did not have any material defaults or breaches of covenants in repayment of indebtedness.

KEY FINANCIAL RATIOS

	Year Ended/As of December 31,		Nine Months Ended September 30,
	2023	2024	2025
	%	%	%
Gross margin[(1)]	19.0	29.8	27.8
Net profit margin[(2)]	(6.9)	35.7	13.1
Debt ratio[(3)]	188.6	68.3	66.1

Notes:

(1) Gross margin was calculated as gross profit for the year/period divided by revenue for the corresponding year and multiplied by 100%.

(2) Net profit margin was calculated as net profit for the year/period divided by revenue for the corresponding year and multiplied by 100%.

(3) Debt ratio was total liabilities divided by total assets as of the relevant date and multiplied by 100%.

DIVIDEND POLICY

Subject to PRC laws and regulations, including the PRC Company Law (《中華人民共和國公司法》) and the No. 3 Guideline for the Supervision of Listed Companies – Cash Dividend Distribution of Listed Companies (2025 Revision) (《上市公司監管指引第3號 －上市公司現金分紅(2025年修訂)》), and the Articles of Association, we are required to pay cash dividends of no less than 10% of the distributable profits recorded in the fiscal year. We have adopted a Three-Year Shareholder Return Plan (2024–2026) setting out our dividend policy for this period. Under the plan, we shall distribute profits annually in any year in which we have both reported a net profit and have a positive balance of distributable profits. The proportion of cash dividends in the distribution shall be no less than 20%, subject to adjustment by the Board. The specific payout ratio for each year will be determined by the Board considering our annual earnings and future capital requirements, and the resulting profit distribution plan will be submitted to shareholders for approval by way of special resolution at a general meeting.

During the Track Record Period, we declared dividends as follows:

	For the Year Ended December 31,			For the six months ended June 30,
	2023	2024	2025	2026
	(in RMB thousands)			
Final cash dividends in respect of the previous year, declared and paid during the year/period	187,313	425,319	118,795	—

Future profit distributions may be carried out in the form of cash dividends or stock dividends or a combination of cash dividends and stock dividends. Any proposed distribution of dividends is subject to the discretion of our Board and the approval at our Shareholders' meetings. Our Board may recommend a distribution of dividends in the future after taking into account our results of operations, financial condition, operating requirements, capital requirements, shareholders' interests and any other conditions that our Board may deem relevant.

DISTRIBUTABLE RESERVE

As of June 30, 2026, our consolidated retained profit amounted to RMB132.9 million, which is available for distribution to our Shareholders.

DISCLOSURE REQUIRED UNDER RULES 13.13 TO 13.19 OF THE LISTING RULES

Except as otherwise disclosed in this prospectus, our Directors confirm that, as of the Latest Practicable Date, they were not aware of any circumstances that would give rise to a disclosure requirement under Rules 13.13 to Rules 13.19 of the Listing Rules.

UNAUDITED PRO FORMA FINANCIAL INFORMATION

Please refer to Appendix II — Unaudited Pro Forma Financial Information for details.

LISTING EXPENSES

Our listing expenses are estimated to be approximately HK$156.0 million (including underwriting commission), accounting for 1.5% of the gross proceeds of the Global Offering (assuming an Offer Price of HK$93.80 per H Share, being the maximum Offer Price stated in this prospectus, and no exercise of the Over-allotment Option and the Offer Size Adjustment Option). Among our listing expenses, approximately HK$144.2 million is directly attributable to the issuance of H Shares and will be charged to equity upon completion of the Listing, and approximately HK$11.8 million has been or will be charged to our consolidated statements of profit or loss and other comprehensive income, of which HK$1.6 million has

been charged during the Track Record Period and approximately HK$10.2 million is expected to be charged after the Track Record Period. The listing expenses we expect to incur would consist of approximately HK$79.5 million underwriting-related expenses and fees (including but not limited to commissions and fees), approximately HK$57.8 million non-underwriting-related expenses and fees of the Joint Sponsors, legal advisors and reporting accountant and approximately HK$18.7 million for other non-underwriting-related fees and expenses.

NO MATERIAL ADVERSE CHANGE AND RECENT DEVELOPMENTS

Our Directors confirmed that, as of the date of this prospectus, there has been no material adverse change in our financial position since June 30, 2026, and there has been no event since June 30, 2026 that would materially affect the information as set out in the Accountants' Report in Appendix IA and IB to this prospectus. For the nine months ended September 30, 2026, our revenue and net profit for the nine months ended September 30, 2026 increased compared with the same period in 2025, primarily due to the increase in revenue from sales of PCBs, precision components and optical transceivers. This was mainly attributable to the consolidation of Source Photonics and GMD, as well as strong market demand and increased customer orders for our products.

OVERVIEW

As of the Latest Practicable Date, the voting rights (excluding treasury shares with no voting rights) of our Company were controlled directly as to approximately 16.59% by Mr. Yuan Yonggang (袁永剛), approximately 13.56% by Mr. Yuan Yongfeng (袁永峰, the elder brother of Mr. Yuan Yonggang) and approximately 3.22% by Mr. Yuan Fugen (袁富根, the father of Mr. Yuan Yonggang and Mr. Yuan Yongfeng), who were collectively entitled to exercise approximately 33.37% of the voting rights at general meetings of the Company (excluding treasury shares with no voting rights). For biographical details of Mr. Yuan Yonggang and Mr. Yuan Yongfeng, see "Directors and Senior Management". For a simplified corporate structure chart of our Group before the Listing, see "History, Development and Corporate Structure" in this Prospectus.

Accordingly, immediately following the completion of the Global Offering (assuming the Over-allotment Option is not exercised), Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen will in aggregate control approximately 31.41% of the voting rights at general meetings of the Company (excluding treasury shares with no voting rights). As such, in light of the familial relationship, the Company considers that Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen will together constitute the Controlling Shareholders upon Listing under the Listing Rules.

DELINEATION OF BUSINESS BETWEEN US AND THE CONTROLLING SHAREHOLDERS

Principal Business of the Group

The principal business of the Group includes designing, manufacturing and selling PCBs, precision components, touch panels and LCMs, and optical transceivers. By leveraging synergies across R&D, engineering, supply chain and operations, we deliver comprehensive solutions and offer an extensive multi-product portfolio to leading global technology companies. For details, see "Business – Our Products."

Principal Business of the Controlling Shareholders

In addition to their interest in our Group, as of the Latest Practicable Date, the Controlling Shareholders and their close associates were also actively involved in businesses set forth below. There is a clear business delineation between these other businesses of the Controlling Shareholders and the Group's operations.

Anhui Landun Photoelectron Co., Ltd. (安徽藍盾光電子股份有限公司, "**Anhui Landun**") was held as to 23.61% by Mr. Yuan Yonggang as of the Latest Practicable Date. Mr. Yuan Yonggang has also served as a director at Anhui Landun since January 2019. Anhui Landun was incorporated in the PRC in December 2001 and listed on the Shenzhen Stock Exchange in August 2020 with stock code 300862.SZ. Anhui Landun primarily engages in development and production of analytical measuring instruments and system integration used for ecological and environmental monitoring (air quality, water quality, solid waste, noise, etc.), traffic management, and meteorological observation, and manufacturing of chemical raw materials and chemical products. As Anhui Landun primarily engages in research, development and production of instruments and meters for ecological and environmental monitoring, with scarce connection to the PCB industry, we conclude that its business is clearly delineated from the Company's business. For the six months ended June 30, 2026, the revenue of Anhui Landun represented less than 1% of the Company's revenue for the same period.

Shanghai Corkuna New Material Technologies Co., Ltd. (上海科谷納新材料科技有限公司, "**Shanghai Corkuna**") was held as to 35.96% by Mr. Yuan Yonggang, who is also Shanghai Corkuna's chairman of the board, as of the Latest Practicable Date. Incorporated in June 2019 in the PRC, Shanghai Corkuna primarily engages in the design, development, formulation, and production of adhesive products, in particular, (i) nano-coated products, (ii) electronic adhesives, (iii) 3C electronic adhesive tapes, (iv) automotive electronic tapes and (v) waterproof and breathable films. As Shanghai Corkuna is an upstream supplier of adhesive products, the Directors are of the view that the Company's principal business is clearly delineated from Shanghai Corkuna's major business. For the six months ended June 30, 2026, the revenue of Shanghai Corkuna represented less than 1% of the Company's revenue for the same period.

Anhui Anfu Battery Technology Co., Ltd. (安徽安孚電池科技股份有限公司, "**Anhui Anfu**") was held as to approximately 27.35% by Shenzhen Qianhai Glory Capital Management Co., Ltd. (深圳市前海榮耀資本管理有限公司, "**Qianhai Glory**") and its acting-in-concert parties as of the Latest Practicable Date. Qianhai Glory is ultimately controlled by Mr. Yuan Yonggang and his spouse, Ms. Wang Wenjuan (王文娟). Anhui Anfu was incorporated in the PRC in May 1995 and listed on the Shanghai Stock Exchange in August 2016 with stock code 603031.SH. Anhui Anfu primarily engages in the production and sale of small batteries primarily used for household appliances, with scarce connection to the industries in which the Company operates. Therefore, we conclude that its business is clearly delineated from the Company's business. For the six months ended June 30, 2026, the revenue of Anhui Anfu represented less than 10% of the Company's revenue for the same period.

To the best knowledge of the Directors, the Company does not have overlapping customers or suppliers with each of Anhui Landun, Shanghai Corkuna and Anhui Anfu during the Track Record Period and as of the Latest Practicable Date. Further, each of Anhui Landun, Shanghai Corkuna and Anhui Anfu operates on a significantly smaller scale than the Company.

Each of the member of the Controlling Shareholders confirms that, as of the Latest Practicable Date, he did not have any interest in a business, apart from the business of our Group, which competes or is likely to compete, directly or indirectly, with our business that would require disclosure under Rule 8.10 of the Listing Rules. With regard to the facts above, we conclude that there is not any overlap between the Controlled Entities and the Group in terms of product development, offerings, customers and suppliers.

DIRECTORS' INTEREST IN COMPETING BUSINESS

As at the Latest Practicable Date, none of our Directors had any interest in a business, apart from the business of the Group, which competes or is likely to compete, directly or indirectly, with the Group's business.

NON-COMPETE UNDERTAKINGS

For the purpose of the listing of our A Shares on the Shenzhen Stock Exchange, subsequent refinancings and in order to avoid any potential competition between our Group and the Controlling Shareholders, the Controlling Shareholders provided non-competition undertakings in favor of our Company on April 9, 2010, June 11, 2018 and May 18, 2024, respectively (the "**Non-competition Undertakings**"). Pursuant to the Non-competition Undertakings, each of the member of Controlling Shareholders has undertaken that:

(i) the Controlling Shareholders and their related parties shall not directly or indirectly engage in any business that substantially competes or may substantially compete with the business operated by the Group;

(ii) if competition arises between the companies controlled by the Controlling Shareholders and the Group, the Controlling Shareholders shall, upon request by the Company, dispose of all their interests in such companies and the Group is granted with the right of first refusal to acquire the relevant interests;

(iii) if the Controlling Shareholders and their related parties fail to comply with the relevant undertakings, they shall compensate the Group and the Shareholders for direct and indirect losses incurred therefrom.

INDEPENDENCE OF OUR CONTROLLING SHAREHOLDERS

Having considered the following factors, our Directors are satisfied that we are capable of carrying on our business independently from our Controlling Shareholders and their close associates after the Listing.

Management Independence

Our business is managed and conducted by our Board and senior management. Upon Listing, our Board will consist of eleven Directors comprising five executive Directors, two non-executive Directors and four independent non-executive Directors. For more information, see "Directors and Senior Management."

As of the Latest Practicable Date, except for Mr. Yuan Yonggang (our Chairman and non-executive Director) and Mr. Yuan Yongfeng (our Executive Director and general manager), there was no other Director and senior management who is a member of the Controlling Shareholders. Hence, we have sufficient Board and senior management team members who do not hold any position in and are not the member of Controlling Shareholders and/or their respective close associates. Our Directors consider that the Board and senior management of our Company are capable of functioning independently of our Controlling Shareholders for the following reasons:

(i) our daily management and operations are carried out by a senior management team, all of whom have substantial experience in the industry in which our Company is engaged, and will therefore be able to make business decisions that are in the best interest of the Group;

(ii) each Director is aware of her/his fiduciary duties as a director which require, among other things, that he/she must act for the benefit and in the interest of our Company and the Shareholders as a whole, and not allow any conflict between her/his duties as a Director and her/his personal interests;

(iii) the decision-making mechanism of our Board as specified in the Articles of Association has set out relevant provisions to avoid conflicts of interests, including requiring a Director to abstain from voting on any resolution approving any contract, transaction or arrangement in which such Director or any of his/her close associates have a material interest;

(iv) furthermore, Mr. Yuan Yonggang, as a non-executive Director, is responsible for overall strategies and development of the Company, and is mainly participating in our Company's management through attending board meetings. In addition, we have four independent non-executive Directors and our independent non-executive Directors individually and collectively possess the requisite knowledge and experience, and a majority of them have experiences as independent directors of listed companies and will be able to provide professional and experienced advice to our Company. In conclusion, the Directors believe that our independent non-executive Directors are able to bring impartial and sound judgment to the decision-making process of our Board and protect the interest of our Company and our Shareholders as a whole;

(v) as an A-share listed company, we have formulated and adopted a comprehensive internal control and management system in compliance with the relevant requirements of the rules of the Shenzhen Stock Exchange. Our Directors shall not vote in any Board resolution approving any contract or arrangement or any other proposal in which he/she or any of her/his close associates have a material interest and shall not be counted in the quorum present at the particular Board meeting; and

(vi) we have adopted a series of corporate governance measures to manage conflicts of interest, if any, between our Group and our Controlling Shareholders which would support our independent management. See "— Corporate Governance Measures" in this section for further information.

Based on the above, our Directors are satisfied that they are able to perform their managerial roles in our Company independently, and our Directors are of the view that we are capable of managing our business independently from the Controlling Shareholders after the Listing.

Operational Independence

We have full rights to make business decisions and to carry out our business independently from our Controlling Shareholders. We have complete production, research and development, management, purchasing and sales business systems, capable of conducting business independently in the market. On the basis of the following reasons, our Directors consider that our Company will continue to be operationally independent from our Controlling Shareholders and their respective close associates after the Listing:

(i) we have sufficient capital, facilities, equipment and employees to operate our business independently from our Controlling Shareholders;

(ii) we have independent access to our customers and suppliers;

(iii) we have our own administrative and corporate governance infrastructure, including our own accounting, legal and human resources departments; and

(iv) none of our Controlling Shareholders or their respective close associates have any interests in any business which competes or is likely to compete with the business of our Group.

Based on the above, our Directors believe that we are able to operate independently from our Controlling Shareholders.

Financial Independence

We have independent internal control and accounting systems. We also have an independent finance department and specialized personnel responsible for discharging the financial management, accounting, reporting, funding and treasury function of our Group. We are capable of obtaining financing from third parties, if necessary, without reliance on our Controlling Shareholders and their respective close associates. We have bank accounts independent of our Controlling Shareholders, and our Controlling Shareholders are not in position to interfere with the Group's disposal of funds.

As of the Latest Practicable Date, we did not have any outstanding loans granted or guaranteed by any of our Controlling Shareholders to us.

Based on the above, our Directors are of the view that we are capable of carrying on our business independently from, and do not place undue reliance on, our Controlling Shareholders and their respective close associates after the Listing.

CORPORATE GOVERNANCE MEASURES

Our Company and Directors recognize the importance of protecting the rights and interests of all Shareholders, including the rights and interests of our minority Shareholders.

We have adopted, among others, the following measures to ensure good corporate governance standards and to avoid potential conflicts of interest between our Group and our Controlling Shareholders:

(i) where a Shareholders' meeting is to be held for considering proposed transactions in which our Controlling Shareholders or any of their respective close associates have a material interest, the relevant Controlling Shareholders or close associates will not vote on the relevant resolutions;

(ii) our Company has established internal control mechanisms to identify connected transactions and related party transactions. Upon the Listing, if our Company enters into connected transactions or related party transactions with our Controlling Shareholders or any of their close associates, our Company will comply with the applicable laws and regulations, including Listing Rules;

(iii) the independent non-executive Directors will review, on an annual basis, whether there are any conflicts of interests between the Group and our Controlling Shareholders and provide impartial and professional advice to protect the interests of our minority Shareholders;

(iv) our Company will disclose decisions on matters reviewed by the independent non-executive Directors either in its annual reports or by way of announcements as required by applicable laws and regulations, including Listing Rules;

(v) where our Directors reasonably request the advice of independent professionals, such as financial advisors, the appointment of such independent professionals will be made at our Company's expense;

(vi) we have appointed Somerley Capital Limited as our Compliance Adviser to provide advice and guidance to us in respect of compliance with the applicable laws and regulations, as well as the Listing Rules, including various requirements relating to corporate governance; and

(vii) we have established the Audit Committee, the Nomination Committee, the Remuneration and Appraisal Committee and the Strategy and ESG Committee with written terms of reference in compliance with the Listing Rules and the Corporate Governance Code in Appendix C1 to the Listing Rules.

Based on the above, our Directors are satisfied that sufficient corporate governance measures have been put in place to manage conflicts of interest that may arise between our Group and our Controlling Shareholders, and to protect our minority Shareholders' interests after the Listing.

BEFORE THE GLOBAL OFFERING

As of the Latest Practicable Date, the total issued share capital of the Company was RMB1,831,607,532, comprising 1,831,607,532 A Shares of nominal value RMB1.00 each, all of which are listed on the main board of the Shenzhen Stock Exchange.

	Number of Shares	Approximately % of issued share capital
A Shares in issue[1]	1,831,607,532	100.00

UPON COMPLETION OF THE GLOBAL OFFERING

Immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised), the issued share capital of the Company will be as follows:

	Number of Shares	Approximately % of issued share capital
A Shares in issue[1]	1,831,607,532	94.15%
H Shares to be issued pursuant to the Global Offering	113,783,200	5.85%
Total	1,945,390,732	100.00%

Immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are exercised in full), the issued share capital of the Company will be as follows:

	Number of Shares	Approximately % of issued share capital
A Shares in issue[1]	1,831,607,532	92.41%
H Shares to be issued pursuant to the Global Offering	150,478,100	7.59%
Total	1,982,085,632	100.00%

Note:

(1) Including 6,046,200 repurchased A Shares held by the Company as treasury shares as of the Latest Practicable Date. According to the Company's PRC Legal Advisor, the treasury shares held by the Company did not carry any voting rights on all matters at Shareholders' meetings or enjoy any dividend rights.

THE SHARES

Upon the completion of the Global Offering, the Shares will consist of A Shares and H Shares. The A Shares and H Shares are all ordinary Shares in the share capital of the Company and are considered as one class of Shares. Apart from certain qualified domestic institutional investors in the Chinese mainland, the qualified investors in the Chinese mainland under the Shenzhen-Hong Kong Stock Connect (if the H Shares are eligible securities for that purpose) and other persons who are entitled to hold the H Shares pursuant to relevant PRC law or upon approvals of any competent authorities, H Shares generally cannot be subscribed for by or traded between legal or natural persons in the Chinese mainland.

Shenzhen-Hong Kong Stock Connect has established a stock connect mechanism between the Chinese mainland and Hong Kong. The A Shares can be traded by investors in the Chinese mainland, qualified foreign institutional investors or qualified foreign strategic investors and must be traded in Renminbi. As the A Shares are eligible securities under the Northbound Trading Link, they can also be traded by Hong Kong and other overseas investors pursuant to the rules and limits of the Shenzhen-Hong Kong Stock Connect. If the H Shares are eligible securities under the Southbound Trading Link, they can also be traded by investors in the Chinese mainland in accordance with the rules and limits of the Shenzhen-Hong Kong Stock Connect.

The A Shares and H Shares are generally neither interchangeable nor fungible, and the market prices of the A Shares and H Shares may be different after the Listing. The Guidelines on Application for "Full Circulation" of Domestic Unlisted Shares of H-share Companies (H股公司境內未上市股份申請「全流通」業務指引) announced by the CSRC are not applicable to companies dual listed in the PRC and on the Stock Exchange. As of the Latest Practicable Date, there were no relevant rules or guidelines from the CSRC providing that A Shareholders may convert A Shares held by them into H Shares for listing and trading on the Stock Exchange.

RANKING

The A Shares and H Shares are regarded as one class of Shares under the Articles of Association and shall rank *pari passu* with each other in all other respects and, in particular, will rank equally for dividends or distributions declared, paid or made after the date of this prospectus.

APPROVAL FROM A SHAREHOLDERS REGARDING THE GLOBAL OFFERING

The Company obtained its A Shareholders' approval to issue H Shares and seek the listing of H Shares on the Stock Exchange at the extraordinary general meeting of the Company held on November 3, 2025. Such approval is subject to the following conditions:

(i) *Size of the offer.* The proposed number of H Shares to be offered shall not exceed 10% of the total issued share capital enlarged by the H Shares to be issued pursuant to the Global Offering (before the exercise of the Over-allotment Option). The number of H Shares to be issued pursuant to the full exercise of the Over-allotment Option shall not exceed 15% of the total number of H Shares to be offered initially under the Global Offering.

(ii) *Method of offering.* The method of offering shall be by way of an international offering to institutional investors and a public offer for subscription in Hong Kong.

(iii) *Target investors.* The H Shares shall be issued to public investors in Hong Kong under the Hong Kong Public Offering and international investors, qualified domestic institutional investors in the Chinese mainland and other investors who are approved by mainland Chinese regulatory bodies to invest in the International Offering.

(iv) *Price determination basis.* The issue price of the H Shares will be determined, among others, after due consideration of the interests of existing Shareholders of the Company, acceptance of investors and the risks related to domestic and overseas capital market and the offering, according to international practice, through the demands for orders and book building process, subject to the domestic and overseas capital market conditions and by reference to the valuation level of comparable companies in domestic and overseas markets.

(v) *Validity period.* The issue of H Shares and listing of H Shares on the Stock Exchange shall be completed within 24 months from the date of the Shareholders' meeting which was held on November 3, 2025.

As of the Latest Practicable Date, there is no other approved offering plan for the Shares except the Global Offering.

GENERAL MEETINGS

For details of circumstance under which general meetings of the Company are required, see "Summary of the Articles of Association — Shareholders and Shareholders' General Meetings" in Appendix III to this prospectus.

So far as the Directors are aware, immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised), the following persons will have an interest or short position in the Shares and/or underlying Shares of the Company which would fall to be disclosed to the Company under the provisions of Divisions 2 and 3 of Part XV of the SFO, or will be, directly or indirectly, interested in 5% or more of the issued voting Shares of the Company.

		Shares held as of the Latest Practicable Date[1]		Voting rights as of the Latest Practicable Date[2]	Shares immediately following the Global Offering[3]		Voting rights immediately following the Global Offering[4]
Name of shareholders	Capacity and nature of interest	in A Shares	in total issued share capital		in A Shares	in total issued share capital	
Controlling Shareholders							
Mr. Yuan Yonggang[5][6]	Beneficial owner and interest of party acting in concert	33.26%	33.26%	33.37%	33.26%	31.31%	31.41%
Mr. Yuan Yongfeng[5][6]	Beneficial owner and interest of party acting in concert	33.26%	33.26%	33.37%	33.26%	31.31%	31.41%
Mr. Yuan Fugen[6]	Beneficial owner and interest of party acting in concert	33.26%	33.26%	33.37%	33.26%	31.31%	31.41%

Notes:

(1) The calculation is based on the total number of 1,831,607,532 Shares in issue as of the Latest Practicable Date (including treasury shares).

(2) The calculation is based on the total number of 1,825,561,332 Shares as of the Latest Practicable Date (excluding treasury shares with no voting rights).

(3) The calculation is based on the total number of 1,945,390,732 Shares in issue immediately following the completion of the Global Offering (including treasury shares and assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised).

(4) The calculation is based on the total number of 1,939,344,532 Shares immediately following the completion of the Global Offering (excluding treasury shares with no voting rights and assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised).

(5) As of the Latest Practicable Date, Mr. Yuan Yonggang pledged 104,828,000 A Shares, representing approximately 5.72% of the total issued share capital of the Company and Mr. Yuan Yongfeng pledged 46,583,800 A Shares, representing approximately 2.54% of the total issued share capital of the Company. For details, see "—Share Pledges by Mr. Yuan Yonggang and Mr. Yuan Yongfeng" of this section.

(6) Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen are parties acting in concert under the relevant A share listing rules and regulations and will together constitute the Controlling Shareholders upon Listing under the Listing Rules (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised). For more details, see "Relationship with Our Controlling Shareholders".

Except as disclosed above, our Directors are not aware of any other person who will, immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised), have any interest and/or short positions in the Shares or underlying shares of our Company which would fall to be disclosed to us pursuant to the provisions of Divisions 2 and 3 of Part XV of the SFO, or, will be, directly or indirectly, interested in 5% or more of the nominal value of any class of our share capital carrying rights to vote in all circumstances at general meetings of our Company.

SHARE PLEDGES BY MR. YUAN YONGGANG AND MR. YUAN YONGFENG

Mr. Yuan Yonggang and Mr. Yuan Yongfeng have from time to time pledged the A Shares they owned to certain PRC securities companies regulated by the CSRC as collateral in order to obtain financing for their own capital needs. As of the Latest Practicable Date, Mr. Yuan Yonggang pledged 104,828,000 A Shares, representing approximately 5.72% of the total issued share capital of the Company and Mr. Yuan Yongfeng pledged 46,583,800 A Shares, representing approximately 2.54% of the total issued share capital of the Company.

To the best knowledge of our Directors having made all reasonable enquiries, there has not been any adverse credit records against Mr. Yuan Yonggang or Mr. Yuan Yongfeng in respect of any breach of repayment obligations under its indebtedness.

Each of Mr. Yuan Yonggang and Mr. Yuan Yongfeng has confirmed that, if there is a risk of default or other circumstances that may give rise to the enforcement of the pledged A Shares, Mr. Yuan Yonggang and Mr. Yuan Yongfeng shall take all necessary actions, such as provision of additional collaterals and repayment of loans, to avoid such enforcement.

The Group has assigned dedicated staff to closely monitor any changes in any pledge, disposal or creation of encumbrance over shares held by the Controlling Shareholders. The Controlling Shareholders shall also inform the Company of (i) the number of shares pledged, (ii) the loan balance, margin ratio and covenant status, and (iii) any risk triggers (e.g., market price declines or covenant breaches) immediately after such occasions for monitoring and ensuring compliance with Rule 10.07 of the Listing Rules. The Company also closely monitors the daily updates on share pledge provided by China Securities Depository and Clearing Corporation Limited to ensure compliance with relevant laws and regulations.

OVERVIEW

The Board consists of eleven Directors, comprising five executive Directors, two non-executive Directors and four independent non-executive Directors. The Directors are appointed for a term of three years and are eligible for re-election upon expiry of their term of office. The independent non-executive Directors shall not hold office for more than six consecutive years pursuant to the relevant PRC laws and regulations.

DIRECTORS

The following table sets forth the information about the Directors:

Name	Age	Position	Time of joining the Group	Date of appointment as a Director	Roles and responsibilities	Relationship with other Directors and senior management
Mr. Yuan Yonggang (袁永剛)	46	Chairman and non-executive Director	October 1998	December 14, 2007	Responsible for overall strategies and development of the Company	Younger brother of Mr. Yuan Yongfeng

Dr. Xu Weidong (徐維東)	45	Independent non-executive Director	November 2025	November 3, 2025	Supervising and providing independent opinion and judgment to the Board	None

Save as disclosed above, none of the Directors and senior management of the Company is related to the other Directors or senior management of the Company. Save as disclosed in this section, (i) none of the Directors held any directorships in public companies, the securities of which are listed on any securities market in Hong Kong or overseas in the last three years immediately preceding the date of this prospectus; (ii) to the best knowledge, information and belief of the Directors having made all reasonable inquiries, there were no other matters with respect to the appointment of the Directors that need to be brought to the attention of the Shareholders and there was no information relating to the Directors that is required to be disclosed pursuant to Rule 13.51(2) of the Listing Rules.

Executive Directors and Non-executive Directors

Mr. Yuan Yonggang (袁永剛), aged 46, is the chairman of the Board and a non-executive Director of the Company. Mr. Yuan has been the chairman of the Board and a Director since December 2007. He successively served as the director of marketing division of the Company, a deputy manager of the Company and the deputy chairman of the Board from October 1998 to December 2007. He is also currently a director of several subsidiaries of the Group. Mr. Yuan was redesignated as a non-executive Director on November 3, 2025, with effect from the Listing Date. He is primarily responsible for overall strategies and development of the Company.

Mr. Yuan is also currently the vice president of Jiangsu Chamber of Commerce (江蘇省總商會), the vice president of Suzhou Federation of Industry and Commerce (蘇州市工商業聯合會), a representative of the Seventeenth Suzhou Municipal People's Congress (蘇州市第十七屆人民代表大會) and the chairman of Suzhou Chamber of Commerce for International Economic Cooperation (蘇州市民營經濟國際合作商會).

Mr. Yuan has also been a director of Anhui Landun Photoelectron Co., Ltd., (安徽藍盾光電子股份有限公司, a company listed on the Shenzhen Stock Exchange, stock code 300862.SZ) since January 2019.

Mr. Yuan obtained his bachelor's degree in information engineering from University of Hull in Great Britain in July 2006.

Mr. Yuan Yongfeng (袁永峰), aged 49, is an executive Director and the general manager of the Company. Mr. Yuan joined our Group in October 1998 and has been a Director and the general manager of the Company since December 2007. Previously, he successively served as a director of manufacturing division and the supervisor of the Company from October 1998 to November 2007. He is also a director of several subsidiaries within the Group. Mr. Yuan was redesignated as an executive Director on November 3, 2025, with effect from the Listing Date. He is primarily responsible for overall operation and development of the Company.

In addition, Mr. Yuan is currently a member of the Suzhou Wuzhong District Committee of the CPPCC (政協蘇州市吳中區委員會), and the head of Suzhou Dongshan Town Chamber of Commerce (蘇州市東山鎮商會).

Previously, Mr. Yuan served as a director of Suzhou Toprun Electric Equipment Co., Ltd. (蘇州騰冉電氣設備股份有限公司, a company listed on the National Equities Exchange and Quotations, stock code 832117.NQ, "**Suzhou Toprun**") from October 2014 to December 2024.

Mr. Yuan obtained his college diploma in public finance and taxation from Jiangsu Open University (江蘇開放大學, formerly known as Jiangsu Radio and Television University (江蘇廣播電視大學)) in the PRC in July 1998.

Mr. Zhao Xiutian (趙秀田), aged 62, is the deputy Chairman of the Board and a non-executive Director of the Company. Mr. Zhao joined the Company in December 2009 and served as a deputy general manager from December 2010 to May 2020. He has been the deputy Chairman of the Board since May 2020 and a Director of the Company since December 2010. He was redesignated as a non-executive Director on November 3, 2025 with effect from the Listing Date. Mr. Zhao is primarily responsible for overseas business, strategic investment and merger and acquisitions of the Company.

From March 1993 to November 2009, Mr. Zhao has worked at multiple US-based corporations, equipping himself with rich experience in the industry.

Mr. Zhao obtained his bachelor's degree in Science from Sun Yat-sen University (中山大學) in the PRC in July 1985 and he obtained his master's degree in Science from Old Dominion University in the United States in May 1992.

Mr. Shan Jianbin (單建斌), aged 50, is an executive Director and the executive president of the Company. Mr. Shan joined the Company in 2016. He has been serving as a Director since January 2017 and the executive president since May 2020. Mr. Shan is also serving as a director of several subsidiaries of the Company. He was redesignated as an executive Director on November 3, 2025 with effect from the Listing Date. He is primarily responsible for execution of business management of the Company.

Prior to joining the Company, Mr. Shan served as section chief, head of the division and director general successively at Mektec Manufacturing Corporation (Zhuhai), Ltd. (珠海紫翔電子科技有限公司) from July 1998 to October 2015 and is currently the chief supervisor of China Printed Circuit Association (中國電子電路行業協會).

Mr. Shan obtained his bachelor's degree in machinery design and manufacture from Jiangnan University (江南大學, formerly known as Wuxi University of Light Industry (無錫輕工大學)) in the PRC in June 1998.

Mr. Wang Xu (王旭), aged 44, is an executive Director, a senior vice president of the Company and the chief financial officer of the Company. Mr. Wang has served as a Director since January 2017, a senior vice president of the Company since December 2021, a deputy general manager from December 2013 to December 2021 and the chief financial officer of the Company since October 2013. Currently, Mr. Wang is also holding directorship in several subsidiaries of the Company. He was redesignated as an executive Director on November 3, 2025 with effect from the Listing Date. Previously, he was the deputy finance director of the Company from April 2013 to September 2013. He is primarily responsible for the Company's financial operation.

Prior to joining the Company, Mr. Wang served at Kunshan Fengrui United Accounting Firm (昆山豐瑞聯合會計師事務所) from June 2002 to June 2006, and as the deputy manager, the manager of accounting division, an assistant to the director of the finance department and the deputy director of the finance department of Suzhou Good-ark Electronics Co., Ltd. (蘇州固鍀電子股份有限公司, a company listed on the Shenzhen Stock Exchange, stock code 002079.SZ) from March 2007 to March 2013.

Mr. Wang has been serving as a director of Suzhou Leigete Intelligent Technology Co., Ltd. (蘇州雷格特智能設備股份有限公司, a company listed on the National Equities Exchange and Quotations, stock code 836812.NQ) since February 2010. He is also currently an external supervisor for master's programs in accounting and/or auditing at Dongwu Business School of Soochow University (蘇州大學東吳商學院), Business School of Jiangsu Normal University (江蘇師範大學商學院), and Business School of Nanjing University of Information Science and Technology (南京信息工程大學商學院).

Mr. Wang obtained his college diploma in Accounting from Nanjing University of Finance and Economics (南京經濟學院) in the PRC in June 2001 and he obtained his master's degree in business administration from Xiamen University (廈門大學) in the PRC in June 2016. Mr. Wang has been a Fellow of CPA Australia since September 2026. He has also been qualified as a member of the Chinese Institute of Certified Public Accountants since December 2009.

Ms. Mao Xiaoyan (冒小燕), aged 46, is an executive Director, secretary of the Board and deputy general manager of the Company. She has been serving as a Director since July 2013, a deputy general manager and the secretary of the Board since August 2012 and was redesignated as an executive Director on November 3, 2025 with effect from the Listing Date. Ms. Mao served as an assistant to the chairman of the Board and the representative of security affairs of the Company from August 2010 to July 2012. Besides, Ms. Mao is also serving as a director or a supervisor in several companies within the Group. She is primarily responsible for security affairs and investor relations of the Company.

Prior to joining the Company, Ms. Mao served as the secretary to the chairman of the board of Suzhou Huacheng Group Co., Ltd. (蘇州華成集團有限公司, formerly known as Suzhou Huacheng Automobile

Trading Group Co., Ltd. (蘇州華成汽車貿易集團有限公司)) from August 2003 to August 2004 and the vice director of the board secretary's office at JiangSu WuZhong Pharmaceutical Development Co., Ltd. (江蘇吳中醫藥發展股份有限公司, formerly known as JiangSu WuZhong Industrial Co., Ltd. (江蘇吳中實業股份有限公司)) from January 2005 to July 2010.

Ms. Mao obtained her bachelor's degree in information management and information system from Nanjing University of Science and Technology (南京理工大學) in the PRC in July 2003 and she obtained her master's degree in business administration from China Europe International Business School (中歐國際工商學院) in the PRC in November 2024.

Mr. Ma Liqiang (馬力強), aged 45, is an executive Director, employee representative Director, Chief Executive Officer and Chinese president of Multek business division. He was designated as an executive Director on November 3, 2025 with effect from the Listing Date. Previously, he was chairman of the board of supervisors of the Company from January 2017 to November 2025. He joined the Company in October 2006 and is primarily responsible for overall operation and management of touch display business division and Multek business division. Mr. Ma is also serving as a director or the general manager of several subsidiaries of the Company.

Mr. Ma has worked at Suzhou Jinhua Shengzhiye Co., Ltd. (蘇州金華盛紙業有限公司) from June 2005 to January 2006 and Dongshan Optoelectronics (Suzhou) Co., Ltd. (東山光電（蘇州）有限公司) from April 2006 to September 2006.

Mr. Ma obtained his college diploma in human resource management from Soochow University (蘇州大學) in the PRC in December 2003.

Independent Non-Executive Directors

Dr. Wang Leigang (王雷剛), aged 63, was appointed as an independent non-executive Director on May 15, 2026. He is primarily responsible for supervising and providing independent opinion and judgment to the Board.

Dr. Wang has been serving as a professor and doctoral supervisor of the Department of Materials Forming and Process Technologies affiliated to the School of Materials Science & Engineering at Jiangsu University (江蘇大學材料科學與工程學院材料成型及控制工程系) since July 2004. Besides, he has been serving as an independent director of Jiangyin Hengrun Heavy Industries Co., Ltd. (江陰市恆潤重工股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 603985) from August 2011 to August 2017 and since May 2024 and Jiangsu Rongtai Industry Co., Ltd. (江蘇嶸泰工業股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 605133) since November 2024. Dr. Wang also successively served as a lecturer, associate professor, professor, doctoral supervisor of Hefei University of Technology (合肥工業大學) from June 1989 to June 2004.

Dr. Wang obtained his doctorate degree in engineering from Yanshan University (燕山大學) in the PRC in September 2001 and a bachelor's degree in engineering from Hefei University of Technology (合肥工業大學) in the PRC in June 1986.

Mr. Poon Wing Shing Anthony (潘永誠), aged 53, was appointed as an independent non-executive Director on May 15, 2026. He is primarily responsible for supervising and providing independent opinion and judgment to the Board.

Mr. Poon has been serving as an independent non-executive director of Shanghai Sunmi Technology Co., Ltd. (上海商米科技集團股份有限公司, a company listed on the Stock Exchange, stock code: 06810) since May 2025 and an external expert of China Resources Longdation Company Limited (華潤隆地有限公司) since January 2025. Mr. Poon also successively served as a legal consultant, the deputy director and the senior deputy general manager of the legal and compliance department of China Resources (Holdings) Company Limited (華潤（集團）有限公司) from November 2006 to December 2024, a legal advisor of Pacific Century Premium Developments Limited (盈科大衍地產發展有限公司, a company listed on the Stock Exchange, stock code: 00432) from August 2005 to November 2006, a senior associate of Allen & Overy from March 2000 to July 2005 and an associate of Gallant (何耀棣律師事務所) from July 1996 to February 2000.

Mr. Poon obtained his bachelor's degree in economics and statistics concentration from the University of Western Ontario in Canada in August 1994. He was admitted as a solicitor in Hong Kong in August 1998 and in England and Wales in April 1999.

Mr. Cai Weihua (蔡衛華), aged 46, was appointed as an independent non-executive Director on May 15, 2026. He is primarily responsible for supervising and providing independent opinion and judgment to the Board.

Mr. Cai has been serving as a partner of Gongzheng Tianye Certified Public Accountants, SGP (公證天業會計師事務所（特殊普通合夥）) since November 2023; a partner of Jonten Certified Public Accountants (Special General Partnership) (中天運會計師事務所（特殊普通合夥）) Jiangsu Branch from January 2018 to October 2023 and a project manager, a senior manager and a salaried partner of Tianheng Certified Public Accountants (Special General Partnership) (天衡會計師事務所（特殊普通合夥）) successively from June 2007 to January 2018. In addition, Mr. Cai served as the financial director of Nanjing Nanfang Gaoke Communications & Digital Products Sales Co., Ltd. (南京南方高科通信數碼產品銷售有限公司) from May 2005 to March 2007, a managing accountant of Nanjing SHARP Electronics Co., Ltd. (南京夏普電子有限公司) from April 2004 to April 2005 and a project manager of Nanjing Sanlian Certified Public Accountants Co., Ltd. (南京三聯會計師事務所有限公司) from July 2000 to December 2003.

Previously, Mr. Cai served as an independent director of multiple listed companies, including: Nanjing Vishee Medical Technology Co., Ltd. (南京偉思醫療科技股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 688580) from August 2019 to February 2026, Jiangsu Times Textile Technology Co., Ltd. (江蘇泰慕士針紡科技股份有限公司, a company listed on the Shenzhen Stock Exchange, stock code: 001234) from October 2019 to October 2025, Jiangsu Maixinlin Aviation Science And Technology Corp. (江蘇邁信林航空科技股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 688685) from October 2017 to July 2023 and Jiangsu Liba Enterprise Joint-Stock Co., Ltd. (江蘇立霸實業股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 603519) from February 2017 to February 2023.

Mr. Cai obtained his master's degree in accounting from Nanjing University (南京大學) in the PRC in December 2014 and a bachelor's degree in arts from Nanjing Normal University (南京師範大學) in the PRC in July 2010. He has been qualified as a member of the Chinese Institute of Certified Public Accountants (中國注冊會計師協會) since September 2007.

Dr. Xu Weidong (徐維東), aged 45, is an independent non-executive Director of the Company. Dr. Xu was appointed as an independent Director on November 3, 2025. He is primarily responsible for supervising and providing independent opinion and judgment to the Board.

Dr. Xu was also a lecturer at Zhejiang University School of Management (浙江大學管理學院) from February 2011 to December 2012; subsequently, he has served as associate professor at the same school since January 2013. Dr. Xu served as an independent non-executive Director at Zhejiang Jiemei Electronic And Technology Co., Ltd. (浙江潔美電子科技股份有限公司, a company listed on the Shenzhen Stock Exchange, stock code 002859.SZ) since December 2022.

Dr. Xu obtained his bachelor's degree in mathematics from Ningxia University (寧夏大學) in June 2004 in the PRC and his master's degree in mathematics from Shanghai Jiao Tong University (上海交通大學) in March 2007 in the PRC, where he also obtained his doctoral degree in management in March 2011.

Dr. Li has been serving as an independent director of SeeYA Technology Corp. (視涯科技股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 688781) since September 2023 and Verisilicon Microelectronics (Shanghai) Co., Ltd. (芯原微電子(上海)股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 688521) from July 2025. He was also an independent director of Shanghai Zhangjiang Hi-Tech Park Development Co., Ltd. (上海張江高科技園區開發股份有限公司, a company listed on the Shanghai Stock Exchange, stock code: 600895) from June 2021 to August 2024.

Previously, Dr. Li served as a technology representative of Lucent Technologies, Inc. from April 1998, the head of Shanghai Branch and a senior director of Qualcomm Technologies, Inc. (a company listed on the NASDAQ, symbol: QCOM) from August 2002 to May 2010 and the vice president and general manager of Chinese region of Marvell Technology, Inc. (a company listed on the NASDAQ, symbol: MRVL) from June 2010 to July 2013. In addition, from July 2013, Dr. Li also successively served as the senior vice president of global sales and president of Greater China of Broadcom Inc. (a company listed on the NASDAQ, symbol: AVGO), the vice president of sales and president of North America and Europe of Goertek Inc. (歌爾股份有限公司, a company listed on the Shenzhen Stock Exchange, stock code: 002241) and the global senior vice president and chairman of Greater China area of NXP Semiconductors (Shanghai) Co., Ltd. (恩智浦半導體（上海）有限公司).

Dr. Li obtained his doctorate degree in physics from Leiden University in the Netherlands in December 1995. In addition, he attained a master's degree in science from Shanghai Institute of Metallurgy, Chinese Academy of Sciences (中國科學院上海冶金研究所, now known as Shanghai Institute of Microsystem and Information Technology, Chinese Academy of Sciences (中國科學院上海微系統與信息技術研究所)) in the PRC in September 1988 and a bachelor's degree in science from Shanghai Jiao Tong University (上海交通大學) in the PRC in July 1982.

JOINT COMPANY SECRETARIES

Ms. Mao Xiaoyan (冒小燕), is an executive Director, secretary of the Board, deputy general manager and a joint company secretary of the Company. For her biography, see "— Directors — Executive Directors and Non-executive Directors".

Mr. TSANG Chun Ho (**曾俊豪**), is a joint company secretary of the Company. Mr. TSANG is a manager of Company Secretarial Services of Tricor Services Limited (a member of Vistra Group), a global professional services provider specializing in integrated business, corporate and investor services. Mr. TSANG is responsible for provision of corporate secretarial and compliance services to listed company clients. He has over twelve years of experience in the company secretarial field.

He obtained a master's degree of business administration from the Hong Kong Metropolitan University in November 2021. Mr. TSANG is an associate member of both The Hong Kong Chartered Governance Institute and The Chartered Governance Institute in the United Kingdom.

OTHER INFORMATION

Rule 3.09D of the Listing Rules

Each of the Directors confirms that he or she (i) has obtained the legal advice referred to under Rule 3.09D of the Listing Rules in November 2025, and (ii) understands his or her obligations as a director of a listed issuer under the Listing Rules.

Rule 3.13 of the Listing Rules

Each of the independent non-executive Directors has confirmed (i) his or her independence as regards each of the factors referred to in Rules 3.13(1) to (8) of the Listing Rules, (ii) he or she had no past or present financial or other interest in the business of the Company or its subsidiaries or any connection with any core connected person of the Company under the Listing Rules as of the Latest Practicable Date, and (iii) that there were no other factors that may affect his or her independence at the time of his/her appointments.

Rule 8.10(2) of the Listing Rules

Each of the Directors (other than the independent non-executive Directors) confirms that as of the Latest Practicable Date, he or she was not interested in any business, apart from the Group's business, which competes or is likely to compete, either directly or indirectly, with the Group's business under Rule 8.10(2) of the Listing Rules.

MANAGEMENT AND CORPORATE GOVERNANCE

Board Committees

Audit Committee

The Board has established the Audit Committee with written terms of reference in compliance with Rule 3.21 of the Listing Rules and the Corporate Governance Code. The primary duties of the Audit Committee are to review and supervise both internal and external auditing process, review financial reports, supervise and assess internal controls system of the Group and provide advice and comments to the Board. The Audit Committee comprises Mr. Cai Weihua, Dr. Xu Weidong, Mr. Poon Wing Shing Anthony, Mr. Yuan Yonggang and Mr. Zhao Xiutian, with Mr. Cai Weihua (being an independent non-executive Director with appropriate professional qualifications) as the chairperson.

Nomination Committee

The Board has established the Nomination Committee with written terms of reference in compliance with Rules 3.27A of the Listing Rules and the Corporate Governance Code. The primary duties of the Nomination Committee are to make recommendations to the Board on the appointment and removal of Directors and members of senior management. The Nomination Committee comprises Dr. Wang Leigang, Mr. Cai Weihua, Dr. Xu Weidong, Mr. Yuan Yonggang and Ms. Mao Xiaoyan, with Dr. Wang Leigang as the chairperson.

Remuneration and Appraisal Committee

The Board has established the Remuneration and Appraisal Committee with written terms of reference in compliance with Rule 3.25 of the Listing Rules and the Corporate Governance Code. The primary duties of the Remuneration and Appraisal Committee are to establish and review policies on remuneration packages payable to the Directors and other senior management and to formulate and amend policies on share incentive plans and employee stock ownership plans. The Remuneration and Appraisal Committee comprises Dr. Xu Weidong, Dr. Wang Leigang, Mr. Poon Wing Shing Anthony, Mr. Yuan Yongfeng and Mr. Wang Xu, with Dr. Xu Weidong (being an independent non-executive Director) as the chairperson.

Strategy and ESG Committee

The Board has established the Strategy and ESG Committee with written terms of reference. The primary duties of the Strategy and ESG Committee are to make recommendations to the Board on the Group's long-term development strategies, and advise on major financing plans, capital operation and asset management projects which are subject to the Board's approval. It is also primarily responsible for advising on the Company's strategic goals and policies related to ESG and reviewing the Company's annual ESG reports. The Strategy and ESG Committee comprises Mr. Yuan Yonggang, Dr. Wang Leigang, Dr. Xu Weidong, Mr. Cai Weihua and Mr. Shan Jianbin, with Mr. Yuan Yonggang as the chairperson.

Corporate Governance Code

The Company is committed to achieving high standards of corporate governance with a view to safeguarding the interests of the Shareholders. To accomplish this, the Company intends to comply with the code provisions in Part 2 of the Corporate Governance Code after the Listing.

Board Diversity

The Company has adopted a board diversity policy which sets out the approach to achieve diversity of the Board. The Company recognizes and embraces the benefits of having a diverse Board and sees increasing diversity at the Board level, including gender diversity, as an essential element in maintaining its competitive advantage and enhancing its ability to attract, retain and motivate employees from the widest possible pool of available talent. In reviewing and assessing suitable candidates to serve as a Director, the Nomination Committee will consider a number of aspects, including, but not limited to, gender, age, cultural and educational background, professional qualifications, skills, knowledge, and industry and regional experience.

Upon Listing, the Board would consist of one female and ten male Directors ranging from 44 to 63 years old with a balanced mix of knowledge and skills, including, but not limited to, overall management and strategic development, accounting and corporate governance in addition to relevant industry experience. They obtained degrees in various majors including machinery design and manufacture, accounting, finance and business administration. Taking into account the Group's existing business model and specific needs, as well as the diverse background of the Directors, the composition of the Board satisfies the board diversity policy.

The Nomination Committee is responsible for reviewing the structure and diversity of the Board and selecting individuals to be nominated as Directors. The Nomination Committee will monitor and evaluate the implementation of the board diversity policy from time to time to ensure its ongoing effectiveness, and will propose any necessary amendments as required, recommending such amendments to the Board for consideration and approval. The Nomination Committee will also include a summary of the board diversity policy in the annual reports.

REMUNERATION

The Directors and senior management of the Company receive their remuneration in the form of basic annual payments and performance-related annual payments, including fees, salaries, share-based compensation and other benefits in kind.

For the years ended December 31, 2023, 2024, 2025 and the six months ended June 30, 2026, the total remuneration paid to the Directors amounted to RMB18.3 million, RMB18.7 million, RMB20.0 million and RMB13.8 million, respectively. None of the Directors waived or agreed to waive any emolument during the Track Record Period.

Under the arrangements in force as of the date of this prospectus, the Company estimates the total remuneration payable to, and benefits in kind receivable by, the Directors by the Group for the year ending December 31, 2026 to be approximately RMB24.4 million.

The five highest paid individuals of the Group for the years ended December 31, 2023, 2024, 2025 and the six months ended June 30, 2026 included 4, 4, 5 and 5 Directors, respectively. During the same year/period, the aggregate amount of remuneration of the five highest paid individuals was RMB16.9 million, RMB17.2 million, RMB18.1 million and RMB11.2 million, respectively.

During the Track Record Period, no remuneration was paid to, or received by, the Directors or the five highest paid individuals as an inducement to join or upon joining the Group. No compensation was paid to, or received by, the Directors, former Directors or the five highest paid individuals for the loss of office as a director of any member of the Group or of any other office in connection with the management of the affairs of any member of the Group.

Save as disclosed above, no other payments have been made or are payable by the Group to the Directors in respect of the Track Record Period.

COMPLIANCE ADVISOR

The Company has appointed Somerley Capital Limited as the Compliance Advisor pursuant to Rule 3A.19 of the Listing Rules. The Compliance Advisor will provide the Company with guidance and advice as to compliance with the requirements under the Listing Rules and applicable Hong Kong laws. Pursuant to Rule 3A.23 of the Listing Rules, the Compliance Advisor will, amongst other things, advise the Company in the following circumstances:

(i) before the publication of any regulatory announcement, circular or financial report;

(ii) where a transaction, which might be a notifiable or connected transaction, is contemplated, including share issues, sales or transfers of treasury shares and share repurchases;

(iii) where the Group proposes to use the proceeds of the Global Offering in a manner different from that detailed in this prospectus or where the business activities, development or results of the Group deviate from any forecast, estimate, or other information in this prospectus; and

(iv) where the Stock Exchange makes an inquiry of the Company under Rule 13.10 of the Listing Rules.

The term of appointment of the Compliance Advisor shall commence on the Listing Date and is expected to end on the date on which the Company complies with Rule 13.46 of the Listing Rules in respect of its financial results for the first full financial year commencing after the Listing Date.

THE CORNERSTONE PLACING

The Company has entered into cornerstone investment agreements (each a "**Cornerstone Investment Agreement**", and together the "**Cornerstone Investment Agreements**") with the cornerstone investors set out below (each a "**Cornerstone Investor**", and together the "**Cornerstone Investors**"), pursuant to which the Cornerstone Investors have agreed to, subject to certain conditions, subscribe, or cause their designated entities to subscribe, at the Offer Price, for such number of Offer Shares (rounded down to the nearest whole board lot of 100 H Shares) that may be purchased for an aggregate amount of approximately US$680.0 million (or approximately HK$5,336.6 million, calculated based on an exchange rate of US$1.00 to HK$7.8479) and exclusive of brokerage fee, the SFC transaction levy, the AFRC transaction levy and the Stock Exchange trading fee (the "**Cornerstone Placing**").

Based on the Offer Price of HK$93.80 per Offer Share, being the maximum Offer Price, the total number of Offer Shares to be subscribed for by the Cornerstone Investors would be 56,891,600 H Shares. The table below reflects the shareholding percentage immediately after the completion of the Global Offering assuming there is no other change made to the issued share capital of the Company between the Latest Practicable Date and the Listing.

Assuming the Offer Size Adjustment Option is not exercised				Assuming the Offer Size Adjustment Option is exercised in full			
Assuming the Over-allotment Option is not exercised		Assuming the Over-allotment Option is exercised in full		Assuming the Over-allotment Option is not exercised		Assuming the Over-allotment Option is exercised in full	
Approximate % of the Offer Shares	Approximate % of the total issued share capital	Approximate % of the Offer Shares	Approximate % of the total issued share capital	Approximate % of the Offer Shares	Approximate % of the total issued share capital	Approximate % of the Offer Shares	Approximate % of the total issued share capital
50.00%	2.92%	43.48%	2.90%	43.48%	2.90%	37.81%	2.87%

The Company believes that the Cornerstone Placing demonstrates the Cornerstone Investors' confidence in the Company and its business prospects, and that the Cornerstone Placing will help raise the profile of the Company. The Company became acquainted with each of the Cornerstone Investors in its ordinary course of operation through the Group's business network or through introduction by the Company's business partners or the Underwriters.

The Cornerstone Placing will form part of the International Offering, and, save as otherwise obtained consent from the Stock Exchange, the Cornerstone Investors and their respective close associates will not subscribe for any Offer Shares under the Global Offering other than pursuant to the Cornerstone Investment Agreements. The Offer Shares to be subscribed by the Cornerstone Investors will rank *pari passu* in all respects with the fully paid H Shares in issue following the Global Offering and will be counted towards the public float of the Company under Rule 8.08 of the Listing Rules. Immediately following the completion of the Global Offering, the Cornerstone Investors or their close associates will not, by virtue of their cornerstone investments, have any Board representation in the Company, and none of the Cornerstone Investors and their close associates will become a substantial Shareholder. Other than a guaranteed allocation of the relevant Offer Shares at the final Offer Price, the Cornerstone Investors do not have any preferential rights under each of their respective Cornerstone Investment Agreements, as compared with other public Shareholders. There are no side arrangements or agreements between the Company and the Cornerstone Investors or any benefit, direct or indirect, conferred on the Cornerstone Investors by virtue of or in relation to the Listing, other than a guaranteed allocation of the relevant Offer Shares at the final Offer Price, following the principles as set out in Chapter 4.15 of the Guide for New Listing Applicants.

Among the Cornerstone Investors, JPMAMAPL, Foresight Funds and Orient Asset Management are either existing minority Shareholders or their respective close associates. Each of such Cornerstone Investors (and/or their close associates) respectively held less than 1% of the total issued share capital of the Company as of the Latest Practicable Date. The Stock Exchange has granted a waiver from strict compliance with the requirements under Rule 10.04 and consent under Paragraph 1C(2) of the Appendix F1

to the Listing Rules to permit H Shares in the International Offering to be placed to certain existing minority Shareholders and/or their close associates. For further details, see "— Waivers from Strict Compliance with the Listing Rules — Waiver in respect of Allocation of H Shares to Existing Minority Shareholders and/or Their Close Associates."

To the best knowledge and belief of the Company, save for certain Cornerstone Investors who are our existing Shareholders or their respective close associates as disclosed in this section, (i) each of the Cornerstone Investors is an Independent Third Party; (ii) none of the Cornerstone Investors is accustomed to taking instructions from the Company, the Directors, chief executive, substantial Shareholders, existing Shareholders or any of their respective subsidiaries or their respective close associates in relation to the acquisition, disposal, voting or other disposition of the Offer Shares; (iii) none of the subscription of the relevant Offer Shares by any of the Cornerstone Investors is financed by the Company, the Directors, chief executive, substantial Shareholders, existing Shareholders or any of their respective subsidiaries or their respective close associates; (iv) each Cornerstone Investor will be utilizing its internal financial resources, financial resources of its shareholders or (in the case of Cornerstone Investors which are funds or investment managers) the assets managed for its investors as its source of funding for the subscription of the Offer Shares, and each Cornerstone Investor has sufficient funds to settle its respective investment under the Cornerstone Placing; and (v) each of the Cornerstone Investors has confirmed that all necessary approvals have been obtained with respect to the Cornerstone Placing and that no specific approval from any stock exchange (if relevant) is required for the relevant Cornerstone Placing. In addition, to the best knowledge of the Company, save as otherwise disclosed, each of the Cornerstone Investors is independent from each other and makes independent investment decisions.

The Cornerstone Investors have agreed to pay for the relevant Offer Shares that they have subscribed for before dealings in the H Shares commence on the Stock Exchange. Some of the Cornerstone Investors have agreed that, the Company, the Joint Sponsors and the Overall Coordinators may at their sole discretion defer the delivery of all or part of the Offer Shares they will subscribe for on a date later than the Listing Date. Where delayed delivery takes place, each of such Cornerstone Investors that may be affected by such delayed delivery has agreed that it shall nevertheless pay for the relevant Offer Shares before the Listing. Accordingly, there will be no deferred settlement of the Offer Shares to be subscribed by the Cornerstone Investors.

Details of the actual number of Offer Shares to be allocated to the Cornerstone Investors will be disclosed in the allotment results announcement of the Company to be published on or around Tuesday, October 27, 2026.

To the best knowledge of the Company and the Overall Coordinators, and based on the indicative interest of investment of the Cornerstone Investors and/or their close associates as of the date of this prospectus, certain Cornerstone Investors and/or their close associates may participate in the International Offering as placees and subscribe for further Offer Shares in the Global Offering. The Company will seek the Stock Exchange's consent and/or waiver to allow the Cornerstone Investors and/or their close associates to participate in the International Offering as placees pursuant to Chapter 4.15 of the Guide for New Listing Applicants. Whether such Cornerstone Investors and/or their close associates will place orders in the International Offering are uncertain and will be subject to the final investment decisions of such investors and the terms and conditions of the Global Offering.

THE CORNERSTONE INVESTORS

The table below sets forth details of the Cornerstone Placing based on the Offer Price of HK$93.80, being the maximum Offer Price:

			Assuming the Offer Size Adjustment Option is not exercised				Assuming the Offer Size Adjustment Option is exercised in full			
			Assuming the Over-allotment Option is not exercised		Assuming the Over-allotment Option is exercised in full		Assuming the Over-allotment Option is not exercised		Assuming the Over-allotment Option is exercised in full

Notes:

(1) Exclusive of brokerage, the SFC transaction levy, the Stock Exchange trading fee and the AFRC transaction levy, and to be converted to Hong Kong dollars based on the exchange rate as disclosed in this prospectus.

(2) Rounded down to the nearest whole board lot of 100 H Shares.

(3) The subscription amount of Yonglian Investment is US$87,999,000 and has been subject to rounding adjustments in the above chart.

(4) The total subscription amount of the Cornerstone Investors is US$679,999,000 and has been subject to rounding adjustments in the above chart.

The information about the Cornerstone Investors set forth below has been provided by the Cornerstone Investors in connection with the Cornerstone Placing.

Aurora SF

Aurora SF will hold the Offer Shares in connection with an arrangement (collectively, the "**Arrangement**"), whereby Oversea-Chinese Banking Corporation Limited ("**OCBC Singapore**") has subscribed for the entire participating interest in the shares of the class of Aurora SF, OCBC Singapore and OCBC Bank Limited ("**OCBC China**") enter into a cross-border total return swap (the "**OCBC Swap**") with an ultimate client (the "**Aurora SF Ultimate Client**") and Aurora SF Ultimate Client invests in a structured deposit product issued by OCBC China. Pursuant to the terms and conditions under the Arrangement, Aurora SF will hold the legal title to the Offer Shares on a non-discretionary basis to hedge the OCBC Swap while the economic risks and returns of the underlying Offer Shares are passed to the Aurora SF Ultimate Client, subject to customary fees and commissions. The Arrangement will be fully funded by the Aurora SF Ultimate Client. Under the Arrangement, the Aurora SF Ultimate Client bears the full economic return and loss of Aurora SF. Concurrently, OCBC China entered into a total return swap with OCBC Singapore whereby OCBC China receives the full economic return and loss of the Aurora SF. OCBC Singapore then subscribed for the participating shares of Aurora SF. All economic returns of the Offer Shares subscribed by Aurora SF will be passed to the Aurora SF Ultimate Client and all economic loss shall be borne by the Aurora SF Ultimate Client through the Arrangement, and Aurora SF will not take part in any economic return or bear any economic loss in relation to the Offer Shares. Notwithstanding that Aurora SF will hold the legal title of the Offer Shares, the decision to exercise the voting rights of the Offer Shares will be determined by an investment committee comprising of the investment manager and representatives of the Aurora SF Ultimate Client. To the best of Aurora SF's knowledge having made all reasonable inquiries, the Aurora SF Ultimate Client is an independent third party of Aurora SF.

Aurora SF is a sub-fund of EasternGate Investments VCC, a Singapore variable capital company which is managed and controlled by a Singapore capital markets services licensed investment manager, Fairshore Asset Management Company Pte Ltd ("**Fairshore**"). Fairshore was established in 2014 and is ultimately controlled by Gary Wee and Adam Bauer, both of whom are Independent Third Parties. Fairshore manages multiple funds across a diverse range of strategies and industry sectors, with assets under management exceeding S$2.0 billion as of December 31, 2025. The investment objective of Aurora SF is to target investment opportunities through direct or indirect investments in a diversified portfolio of fixed income, equity and externally managed funds with rebalancing allowed by Fairshore within the stipulated guidelines from time to time.

The Aurora SF Ultimate Client is Jiangsu Yonggang Group Co., Ltd. (江蘇永鋼集團有限公司) ("**Yonggang Group**"), which is an Independent Third Party. Yonggang Group is principally engaged in iron and steel smelting, processing and sales. Yonggang Group is owned as to approximately 33.68% by Everrising Holdings Co., Ltd. (永卓控股有限公司). Neither Everrising Holdings Co., Ltd. nor Yonggang Group has an ultimate beneficial owner holding 30% or more of its equity interests.

Yonglian Investment

HK Yonglian Investment Development Co., Limited ("**Yonglian Investment**") is an investment company incorporated in Hong Kong. Yonglian Investment is owned by Everrising Holdings Co., Ltd. (永卓控股有限公司) , the principal operating entities of which have gradually developed into a large diversified enterprise group since their establishment in 1984, with industrial manufacturing as its core business and operations spanning new energy, new materials, industrial investment, artificial intelligence and other sectors. Yongzhuo Holding Co., Ltd. ranked 47th among the Top 500 Chinese Private Enterprises and 165th among the Top 500 Chinese Enterprises in 2025. Neither Everrising Holdings Co., Ltd. nor Yonglian Investment has an ultimate beneficial owner holding 30% or more of its equity interests.

JPMAMAPL

JPMorgan Asset Management (Asia Pacific) Limited ("**JPMAMAPL**"), a company incorporated in Hong Kong in November 1974, has entered into a cornerstone investment agreement with the Company and the Joint Sponsors, in its capacity as the investment advisor or investment manager for and on behalf of the following fund(s): (i) JPMorgan China Growth and Income PLC; (ii) JPMorgan Funds — China Fund; (iii) JPMorgan China Pioneer A-Share Fund; (iv) JPMorgan China A-Share Opportunities Fund; (v) JPMorgan Funds-China A-Share Opportunities Fd; (vi) JPMorgan Funds — Greater China Fund; (vii) JPMorgan SAR Greater China Fund; and (viii) certain other pooled funds, segregated accounts and mandates.

To the best of JPMAMAPL's knowledge, no single ultimate beneficial owner holds 30% or more interest in those funds.

JPMAMAPL is a wholly owned subsidiary of JPMorgan Asset Management (Asia) Inc., an investment management company, which is ultimately wholly owned by JPMorgan Chase & Co. ("**JPMC**"), which is a company organized under United States, Delaware law as a corporation that has issued shares of common stock to investors. JPMC's shares are listed on the New York Stock Exchange (stock code: JPM).

JPMAMAPL is licensed by the Securities and Futures Commission (SFC) Hong Kong SAR.

Alibaba Investment

Alibaba Investment Limited ("**Alibaba Investment**") is a limited liability company incorporated in the British Virgin Islands and a wholly owned subsidiary of Alibaba Group Holding Limited, a company listed on the New York Stock Exchange (symbol: BABA) and the Stock Exchange (Stock Code: 9988 (HKD Counter) and 89988 (RMB Counter)). Alibaba Investment is a holding company for Alibaba's strategic investments.

CPE Bodhi

CPE Bodhi Investment Limited ("**CPE Bodhi**") is a business company incorporated under the laws of the BVI and its primary business activity is investment holding. It is controlled by CPE Global Opportunities Fund II, L.P. ("**CPE GOF II**"), an exempted limited partnership formed under the laws of the Cayman Islands. Apart from CPE GOF II, no other shareholder holds 30% or more interest in CPE Bodhi. The general partner of CPE GOF II is CPE GOF GP Limited, a company incorporated in the Cayman Islands with limited liability. CPE GOF GP Limited is directly and wholly owned by CPE Management International Limited, which is in turn wholly owned by CPE Management International II Limited, both of which are companies incorporated in the Cayman Islands with limited liability. CPE Management International II Limited is owned by a number of shareholders that are natural persons who are Independent Third Parties and none of whom holds 30% or more interest in CPE Management International II Limited. CPE GOF II's investor base comprises both corporate and entrepreneurial investors, and none of the limited partners holds 30% or more interest in CPE GOF II.

LMR

LMR Multi-Strategy Master Fund Limited ("**LMR Master Fund**") is established in the Cayman Islands and managed by LMR Partners LLP ("**LMR Partners**", together with its affiliates, "**LMR**"), a global multi-strategy investment firm founded in 2009, specializing in liquid, market-neutral trading strategies with a focus on relative value. LMR employs both systematic and discretionary approaches to construct a diversified portfolio designed to generate uncorrelated returns. LMR currently manages over US$11 billion in assets on behalf of a global institutional client base. LMR has over 350 employees across offices in London, New York, Hong Kong, Zurich, Dubai, Dublin, and Glasgow. Mr. Benjamin Levine, who is an Independent Third Party, is the only individual that owns more than a 30% interest in LMR Partners. There is no individual underlying investor that has 30% or more beneficial ownership in the LMR Master Fund.

Foresight Funds

Foresight Global Superior Choice SPC — Global Superior Choice Fund 1 SP ("**GSC Fund 1**"), Foresight Global Superior Choice SPC — Vision Fund 1 SP ("**Vision Fund 1**"), Foresight Global Superior Choice SPC — Vision Fund 3 SP ("**Vision Fund 3**"), Foresight Global Superior Choice SPC — Horizon Fund 1 SP ("**Horizon Fund 1**") and Foresight Global Superior Choice SPC — Horizon Next Fund SP ("**Horizon Next Fund**", together with GSC Fund 1, Vision Fund 1, Vision Fund 3, and Horizon Fund 1, the "**Foresight Funds**") are all sub funds of Foresight Global Superior Choice SPC, which was incorporated in the Cayman Islands on October 17, 2016. The capital markets investments team is based in Hong Kong and consists of seasoned investment professionals with strong focus on and understanding of company fundamentals. The team focuses on and invests extensively across the Asia Pacific region. Jump Trading is controlled by two revocable trusts. No single ultimate beneficial owner holds 30% or more interests in Jump Trading. Each of Jump Trading and Jump Trading Group is an Independent Third Party.

V-Capital

V-Capital International Holding Co., Limited is a company incorporated in Hong Kong with limited liability and is an indirect wholly-owned subsidiary of V-Capital Co., Ltd. ("**V-Capital**").

V-Capital is a China-based asset management company principally engaged in investment and M&A. Adopting an "M&A plus industrial investment" business model, V-Capital focuses on sectors including artificial intelligence and future industries, healthcare, new energy and smart manufacturing, semiconductors, enterprise digitalization and carbon neutrality. Its investment activities cover M&A transactions, acquisition of unlisted companies, management buyouts, privatization of overseas listed companies and alternative investments. As at June 30, 2026, the V-Capital had assets under management of over RMB30 billion.

V-Capital is controlled by Wuxi Guolian Industrial Investment Private Equity Fund Management Co., Ltd., and is ultimately controlled by the State-owned Assets Supervision and Administration Commission of Wuxi Municipal People's Government.

Mr. LUO Zhongli

Mr. LUO Zhongli (羅仲立) is an individual investor and an Independent Third Party. He is the founder of Portever Shipping Ltd (港興國際物流集團有限公司) and possesses nearly 30 years of experience in financial investment.

CLOSING CONDITIONS

The obligation of each Cornerstone Investor to subscribe for the Offer Shares under the respective Cornerstone Investment Agreement is subject to, among other things, the following closing conditions:

(i) the Underwriting Agreements for the Hong Kong Public Offering and the International Offering being entered into and having become effective and unconditional (in accordance with their respective original terms or as subsequently waived or varied by agreement of the parties thereto) by no later than the time and date as specified in the Underwriting Agreements, and neither of the aforesaid Underwriting Agreements having been terminated;

(ii) the Offer Price having been agreed according to the Underwriting Agreements and price determination agreement among the parties thereto in connection with the Global Offering;

(iii) the Stock Exchange having granted the approval for the listing of, and permission to deal in, the H Shares (including the H Shares to be subscribed for by the Cornerstone Investors) as well as other applicable waivers and approvals, and such approval, permission or waiver having not been revoked prior to the commencement of dealings in the H Shares on the Stock Exchange;

(iv) no laws shall have been enacted or promulgated by any governmental authorities which prohibits the consummation of the transactions contemplated in the Global Offering or in the respective Cornerstone Investment Agreements, and there shall be no orders or injunctions from a court of competent jurisdiction in effect precluding or prohibiting consummation of such transactions; and

(v) the respective agreements, representations, warranties, undertakings, confirmations and acknowledgements of the relevant Cornerstone Investor under the respective Cornerstone Investment Agreement are accurate and true in all respects and not misleading and that there is no material breach of the Cornerstone Investment Agreement on the part of the relevant Cornerstone Investor.

RESTRICTIONS ON THE CORNERSTONE INVESTORS

Each of the Cornerstone Investors has agreed that it will not, whether directly or indirectly, at any time during the period of six months from (and inclusive of) the Listing Date (the "**Lock-up Period**"), dispose of, in any way, any of the Offer Shares or any interest in any company or entity holding such Offer Shares that they have purchased pursuant to the relevant Cornerstone Investment Agreement, save for certain limited circumstances, such as transfers to any of its wholly-owned subsidiaries who will be bound by the same obligations of such Cornerstone Investor, including the Lock-up Period restriction.

FUTURE PLANS

For a detailed description of our future plans, see "Business — Our Growth Strategies."

USE OF PROCEEDS

Assuming a maximum Offer Price of HK$93.80 per H Share, we estimate that we will receive net proceeds of approximately HK$10,516.9 million from the Global Offering after deducting the underwriting commissions and other estimated expenses paid and payable by us in connection with the Global Offering (assuming that the Offer Size Adjustment Option and the Over-allotment Option are not exercised). In line with our strategies, we intend to use our net proceeds for the purposes and in the amounts set forth below.

- Approximately 64.5%, or approximately HK$6,783.4 million, is expected to be used to construct new facilities and upgrade our existing production facilities and lines, including:
    - Approximately 27.0%, or approximately HK$2,839.6 million, is expected to be used to support capacity expansion across both high-speed EML chips and optical modules for our production facilities in the Chinese mainland in order to capture market demand driven by the build-out of AI infrastructure. Specifically, approximately 16.5%, or approximately HK$1,735.3 million, is expected to be used for the purchase of equipment for optical module production, targeting an annual production capacity of approximately 24 million units; approximately 9.5%, or approximately HK$999.1 million, is expected to be used for the purchase of equipment for optical chip production, targeting an annual production capacity of approximately 1 billion units; and approximately 1.0%, or approximately HK$105.2 million, is expected to be used for factory construction and renovation works. Through capital support for our optical transceiver business, we will strengthen its business operations and supply chain, enhance its capacity build-out and large-scale delivery capabilities, and consolidate its leading position in the high-end optical module market.
    - Approximately 25.0%, or approximately HK$2,629.2 million, is expected to be used to construct new production facilities for Multek in Zhuhai focusing on high-end PCBs. We expect to purchase new manufacturing equipment for our infrastructure enhancement effort, primarily including drilling machines, exposure machines and plating machines, to support the manufacturing of advanced PCBs. The investment is expected to be deployed by approximately 50% in each year over a two-year period. We expect to complete the rollout of the additional capacity in two phases, with phase I having commenced production in September 2026 and phase II in the second quarter of 2027. Based on current orders from key customers, as well as our assessment of market demand, we expect the new capacity to achieve a 100% utilization rate upon reaching full ramp-up.

      This investment will address supply gaps and further enhance our portfolio by growing the proportion of advanced PCBs such as high-layer-count RPCB and high-build-up HDI, consistent with our commitment to high-end manufacturing capabilities. We believe this will enable us to satisfy medium- to long-term market demand and customers' needs in high-density, high-speed PCBs and optimize our product portfolio to satisfy the increasing demand for AI computing.

      We have obtained the approvals required for the project and are in compliance with applicable industry regulatory requirements. Phase I has commenced production in September 2026 and Phase II has obtained all key approval documents in accordance with all applicable laws and regulations. As of the Latest Practicable Date, we have invested approximately HK$837.7 million in the land acquisition, factory construction and equipment procurement for Phase I of the project and approximately HK$1,957.4 million for Phase II of the project.

- Approximately 12.5%, or approximately HK$1,314.6 million, is expected to be used to upgrade and enhance our production facilities in China. Specifically, we plan to improve our manufacturing execution and quality management systems and implement additional software upgrades to support our intelligent manufacturing system in production facilities in China.

  We expect to purchase smart CNC machine tools, industrial robots, vision inspection systems and 5G industrial modules, to further improve our manufacturing efficiency and level of automation for high-layer-count RPCB. Specifically, approximately 65.0%, or approximately HK$854.5 million, is expected to be used for hardware upgrades, including production equipment, data collection systems and infrastructure facilities; approximately 35.0%, or approximately HK$460.1 million, is expected to be used for software and service investments, including core software, technical services and supporting services. We expect to deploy these investments over a two-year period on a phased basis, using approximately 70.0% of the total amount in the first year and approximately 30.0% in the second year. Based on our current assessment of market demand, we expect these initiatives to further increase our production capacity and manufacturing capabilities in AI PCBs. These improvements will enable greater data integration throughout production, increase operational efficiency and improve yield management. Ultimately, these initiatives will strengthen supply chain resilience and enhance our service capabilities.

  These investments will enable us to stay aligned with customer needs, expand our portfolio in step with AI-driven demand by concentrating resources on high-growth products and secure positions in tier-one global customers' supply chains. Upon completion of the full investment and achievement of full ramp-up, our PCB production is expected to reach a designed annual production capacity of approximately 636.0 thousand square meters.

- Approximately 20.0%, or approximately HK$2,103.4 million, is expected to be used for potential strategic investments or acquisitions to strengthen our technological leadership and leading market position in our core businesses. We may selectively pursue equity investments or acquisitions across the value chain in the PCB, precision component and optical transceiver industries. In assessing potential targets, we would primarily focus on factors including: (i) strategic fit with our core product lines and end markets and the extent to which the target can enhance our key capabilities; (ii) the existence of strong technical moats, including proprietary know-how, differentiated process capabilities, patents or other barriers to entry; (iii) clear product-market fit supported by a competitive and scalable product roadmap; (iv) demonstrable and sustainable customer demand, evidenced by established customer relationships or validated qualification status with reputable customers, which is expected to facilitate cross-selling and deepen our customer penetration; (v) operational quality and scalability, including manufacturing maturity, yield and quality systems, supply chain resilience and capacity expansion potential; (vi) integration feasibility and execution risk, including cultural fit, management depth and the ease of integrating operations, systems and governance; (vii) market size and growth potential, with a preference for targets operating in end markets with a total addressable market of at least US$10 billion and a track record of stable growth; and (viii) financial sustainability and return profile, including positive operating cash flows over the most recent three financial years sufficient to cover maintenance capital expenditure, projected cash flows over the next five years adequate to service and repay indebtedness, and an expected investment payback period of no more than five years. The financial criteria set out above may be adjusted in respect of targets that we consider to be of significant strategic importance to our long-term development. According to CIC, approximately 100-150 potential acquisition targets are available as of the Latest Practicable Date. CIC identified companies across the PCB, precision component and optical transceiver industries using industry association statistics and publicly available business registration records, grouped those companies by annual revenue, and screened them against the acquisition evaluation

criteria. Through interviews with senior industry experts, cross-verification across the supply chain and consultations with industry associations, CIC confirmed that the remaining companies demonstrate genuine strategic synergy with the Group's core businesses, possess defensible technological barriers and are potentially acquirable.

As of the Latest Practicable Date, we have not identified any specific targets nor entered into any definitive agreements.

- Approximately 5.5%, or approximately HK$578.4 million, is expected to be used for repayment of a portion of our existing indebtedness, including:
    - outstanding balance of RMB330.0 million under a loan used to finance Phase I construction of Yancheng Dongchuang's precision component production facility in Yancheng, with a maturity date of December 20, 2027 and an interest rate of one-year LPR minus 45 basis points per annum;
    - outstanding balance of RMB317.0 million under a loan used to finance the Phase II construction of Yancheng Dongchuang's precision component manufacturing production facility in Yancheng, with a maturity date of December 21, 2028 and an interest rate of one-year LPR minus 45 basis points per annum;
    - outstanding balance of RMB440.0 million under a loan used to finance the Phase I construction of Suzhou Dongyue's precision manufacturing facility in Suzhou, with a maturity date of April 6, 2030 and an interest rate of over-five-year LPR minus 100 basis points per annum; and
    - outstanding balance of RMB293.0 million under a loan used to finance the Phase II construction of Suzhou Dongyue's precision manufacturing production facility in Suzhou, with a maturity date of June 4, 2034 and an interest rate of over-five-year LPR minus 110 basis points per annum.
- Approximately 10.0%, or approximately HK$1,051.7 million, is expected to be used for working capital and general corporate purposes.

The additional net proceeds that we would receive if the Offer Size Adjustment Option and the Over-allotment Option were exercised in full would be HK$3,414.2 million. To the extent that the net proceeds from the Global Offering (including the net proceeds from the exercise of the Offer Size Adjustment Option and the Over-allotment Option) are either more or less than expected, we may adjust our allocation of the net proceeds for the above purposes on a pro rata basis.

In the event that certain parts of our development plans are hindered due to factors such as changes in government policies or force majeure events, our directors will carefully evaluate the situation and may reallocate the net proceeds from the Global Offering. Should there be any significant changes to the intended use of proceeds, we will make appropriate disclosures in accordance with the Hong Kong Listing Rules.

To the extent that the net proceeds from the Global Offering are not immediately used for the above purposes, we will only deposit such funds in short-term interest-bearing accounts at licensed commercial banks and/or other authorized financial institutions (as defined under the Securities and Futures Ordinance or applicable laws and regulations in other jurisdictions). In such event, we will comply with the appropriate disclosure requirements under the Hong Kong Listing Rules.

UNDERWRITING

This prospectus is published solely in connection with the Hong Kong Public Offering. The Hong Kong Public Offering is fully underwritten by the Hong Kong Underwriters on a conditional basis. The International Offering is expected to be fully underwritten by the International Underwriters.

The Global Offering comprises the Hong Kong Public Offering of initially 11,378,400 Hong Kong Offer Shares and the International Offering of initially 102,404,800 International Offer Shares, subject to, in each case, reallocation on the basis as described in the section headed "Structure of the Global Offering" as well as to the Offer Size Adjustment Option and the Over-allotment Option (in the case of the International Offering).

UNDERWRITING ARRANGEMENTS

Hong Kong Public Offering

Hong Kong Underwriting Agreement

We have entered into the Hong Kong Underwriting Agreement with, among others, the Hong Kong Underwriters on October 16, 2026. Pursuant to the Hong Kong Underwriting Agreement, we are offering the Hong Kong Offer Shares for subscription by the public in Hong Kong at the Offer Price on, and subject to, the terms and conditions set out in this prospectus, the Hong Kong Underwriting Agreement and on the designated website at **www.hkeipo.hk**.

Subject to (a) the Listing Committee granting listing of, and permission to deal in, our H Shares in issue and to be issued pursuant to the Global Offering (including additional H Shares which may be issued pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option) and the listing and permission not having been revoked; and (b) certain other conditions set out in the Hong Kong Underwriting Agreement, the Hong Kong Underwriters have agreed severally (but not jointly) to subscribe for, or procure subscribers for, their respective applicable proportions of the Hong Kong Offer Shares being offered but which are not taken up under the Hong Kong Public Offering, on the terms and conditions set out in this prospectus, the Hong Kong Underwriting Agreement and on the designated website at **www.hkeipo.hk**.

If, for any reason, the Offer Price is not agreed between us and the Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters) by 12:00 noon on Monday, October 26, 2026, the Global Offering will not proceed.

The Hong Kong Underwriting Agreement is conditional upon and subject to, among other things, the International Underwriting Agreement having been entered into, becoming unconditional and not having been terminated.

Grounds for Termination

The obligations of the Hong Kong Underwriters to subscribe or procure subscribers for the Hong Kong Offer Shares under the Hong Kong Underwriting Agreement are subject to termination. If at any time prior to 8:00 a.m. on the Listing Date:

(a) there develops, occurs, exists or comes into force:

(i) any new law or regulation or any change or development involving a prospective change or any event or series of events or circumstances likely to result in a change or a development involving a prospective change in existing laws or regulations, or the interpretation or application thereof by any court or any competent Authority in or affecting Hong Kong, the PRC, the United States, the UK, the European Union (or any member thereof), Japan, Singapore, Thailand, Mexico, Morocco, Macau, Türkiye, Taiwan, or other jurisdictions relevant to our Group or the Global Offering (each a **"Relevant Jurisdiction"** and collectively, the **"Relevant Jurisdictions"**); or

(ii) any change or development involving a prospective change, or any event or series of events or circumstances likely to result in a change or prospective change, in any local, national, regional or international financial, political, military, industrial, economic, fiscal, legal, regulatory, currency, credit or market conditions or sentiments, taxation, equity securities or currency exchange rate or controls or any monetary or trading settlement system, or foreign investment regulations (including, without limitation, a devaluation of the Hong Kong dollar, United States dollar or RMB against any foreign currencies, a change in the system under which the value of the Hong Kong dollar is linked to that of the United States dollar or the RMB is linked to any foreign currency or currencies) or other financial markets (including, without limitation, conditions and sentiments in stock and bond markets, money and foreign exchange markets, the inter-bank markets and credit markets) in or affecting any Relevant Jurisdictions, or affecting an investment in the Offer Shares; or

(iii) any event or series of events, or circumstances in the nature of force majeure (including, without limitation, any acts of government, declaration of a regional, national or international emergency or war, calamity, crisis, economic sanctions, strikes, labor disputes, other industrial actions, lock-outs, fire, explosion, flooding, tsunami, earthquake, volcanic eruption, civil commotion, riots, rebellion, public disorder, paralysis in government operations, acts of war, epidemic, pandemic, outbreak or escalation, mutation or aggravation of diseases, accident or interruption or delay in transportation, local, national, regional or international outbreak or escalation of hostilities (whether or not war is or has been declared), act of God or act of terrorism (whether or not responsibility has been claimed)) in or affecting any of the Relevant Jurisdictions; or

(iv) the imposition or declaration of any moratorium, suspension or limitation (including without limitation, any imposition of or requirement for any minimum or maximum price limit or price range) on (A) the trading in shares or securities generally on the Hong Kong Stock Exchange, the Beijing Stock Exchange, the Shanghai Stock Exchange, the Shenzhen Stock Exchange, the Tokyo Stock Exchange, the Singapore Stock Exchange, the New York Stock Exchange, the NASDAQ Global Market or the London Stock Exchange; or (B) the trading in any securities of our Company listed or quoted on a stock exchange or an over-the-counter market; or

(v) the imposition or declaration of any general moratorium on banking activities in or affecting any of the Relevant Jurisdictions or any disruption in commercial banking or foreign

exchange trading or securities settlement or clearing services, procedures or matters in or affecting any of the Relevant Jurisdictions; or

(vi) the issue or requirement to issue by our Company of a supplement or amendment to this prospectus or other documents in connection with the offer and sale of the Offer Shares pursuant to the Companies (Winding up and Miscellaneous Provisions) Ordinance or the Hong Kong Listing Rules, the CSRC Rules, the PRC Securities Law or the Trading Rules of the Shenzhen Trading Rules or upon any requirement or request of the Hong Kong Stock Exchange, the SFC, the CSRC and/or the Shenzhen Stock Exchange; or

(vii) the commencement by any Authority or other regulatory or political body or organization of any public action or investigation against a member of our Group or a director or a senior management member of the Company named in this prospectus or announcing an intention to take any such action; or

(viii) the imposition of sanctions or export controls in whatever form, directly or indirectly, on any member of our Group or by or on any Relevant Jurisdiction, or the withdrawal of trading privileges which existed on the date of the Hong Kong Underwriting Agreement, in whatever form, directly or indirectly, by, or for, any Relevant Jurisdiction; or

(ix) any valid demand by creditors for payment or repayment of indebtedness of any member of our Group or in respect of which any member of our Group is liable prior to its stated maturity; or

(x) an order or petition is presented for the winding-up or liquidation of any member of our Group (other than our Company), or any member of our Group (other than our Company) makes any composition or arrangement with its creditors or enters into a scheme of arrangement or any resolution is passed for the winding-up of any member of our Group (other than our Company) or a provisional liquidator, receiver or manager is appointed over all or part of the assets or undertaking of any member of our Group or anything analogous thereto occurs in respect of any member of our Group (other than our Company); or

(xi) any non-compliance with this prospectus (or any other documents used in connection with the contemplated offering, allotment, issue, subscription or sale of any of the Offer Shares), the CSRC Filings (as defined in the Hong Kong Underwriting Agreement) or any aspect of the Global Offering with the Hong Kong Listing Rules or any other applicable Laws; or

(xii) any litigation, dispute, legal action or claim or regulatory or administrative investigation or action being threatened, instigated or announced against any member of our Group or any Controlling Shareholder or any Director or senior management members as named in this prospectus; or

(xiii) any contravention by any member of our Group or any Director of the Hong Kong Listing Rules or applicable laws; or

(xiv) any change or prospective change, or a materialization of, any of the risks set out in "Risk Factors" in this prospectus,

which, in any such case individually or in the aggregate, in the sole and absolute opinion of the Joint Sponsors and the Sponsor-Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters):

(A) has or will or may have a material adverse effect, whether directly or indirectly, on the assets, liabilities, business, management, prospects, shareholders' equity, profits, losses, results of operations, position or condition, financial or otherwise, or performance of our Company or our Group as a whole;

(B) has or will or may have a material adverse effect on the success of the Global Offering or the level of applications under the Hong Kong Public Offering or the level of indications of interest under the International Offering; or

(C) makes or will make or may make it impracticable, inadvisable, inexpedient or incapable for any material part of the Hong Kong Underwriting Agreement, the Hong Kong Public Offering or the Global Offering to be performed or implemented as envisaged, or for the Hong Kong Public Offering and/or the Global Offering to proceed, or to market the Global Offering, or the delivery or distribution of the Offer Shares on the terms and in the manner contemplated by the Offering Documents (as defined in the Hong Kong Underwriting Agreement); or

(D) has or will or may have the effect of making any material part of the Hong Kong Underwriting Agreement (including underwriting) incapable of performance in accordance with its terms or preventing the processing of applications and/or payments pursuant to the Global Offering or pursuant to the underwriting thereof; or

(b) there has come to the notice of the Joint Sponsors and the Sponsor-Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) that:

(i) any statement contained in any of the Offering Documents, the CSRC Filings and/or any notices, announcements, advertisements, communications or other documents issued or used by or on behalf of our Company in connection with the Hong Kong Public Offering (including any supplement or amendment thereto) but excluding information relating to the Underwriters as provided by them expressly and specifically for inclusion therein) (the **"Global Offering Documents"**) was, when it was issued, or has become untrue, incorrect, inaccurate in any material respect or misleading; or that any estimate, forecast, expression of opinion, intention or expectation contained in any such documents, was, when it was issued, or has become unfair or misleading in any respect or based on untrue, dishonest or unreasonable assumptions; or

(ii) any matter has arisen or has been discovered which would, had it arisen or been discovered immediately before the date of this prospectus, constitute a material omission or misstatement in any Global Offering Document; or

(iii) any breach of, or any event or circumstance rendering untrue or incorrect or misleading in any respect, any of the representations, warranties and undertakings given by our Company in the Hong Kong Underwriting Agreement or the International Underwriting Agreement; or

(iv) any event, act or omission which gives rise or is likely to give rise to any liability of our Company pursuant to the indemnities in the Hong Kong Underwriting Agreement; or

(v) any material breach of any of the obligations or undertakings imposed upon our Company or any Controlling Shareholder; or

(vi) there is any change or development involving a prospective change, constituting or having a material adverse effect; or

(vii) that the Chairman of our Board, any Director or any member of senior management of our Company named in this prospectus seeks to retire, or is removed from office or vacating his/her office; or

(viii) any Director (other than the independent non-executive Directors) or any member of senior management of our Company named in this prospectus is being charged with an indictable offence or prohibited by operation of law or otherwise disqualified from taking part in the management or taking directorship of a company; or

(ix) our Company withdraws this prospectus (and/or any other documents used in connection with the subscription or sale of any of the Offer Shares pursuant to the Global Offering) or the Global Offering; or

(x) that the approval by the Listing Committee of the listing of, and permission to deal in, the H Shares to be issued pursuant to the Global Offering (including pursuant to any exercise of

the Offer Size Adjustment Option and the Over-allotment Option) is refused or not granted, other than subject to customary conditions, on or before the Listing Date, or if granted, the approval is subsequently withdrawn, cancelled, qualified (other than by customary conditions), revoked or withheld; or

(xi) any person has withdrawn its consent to the issue of this prospectus with the inclusion of its reports, letters and/or legal opinions (as the case may be) and references to its name included in the form and context in which it respectively appears; or

(xii) any prohibition on our Company for whatever reason from offering, allotting, issuing or selling any of the Offer Shares pursuant to the terms of the Global Offering; or

(xiii) an order or petition is presented for the winding-up or liquidation of our Company, or our Company makes any composition or arrangement with its creditors or enters into a scheme of arrangement or any resolution is passed for the winding-up of our Company or a provisional liquidator, receiver or manager is appointed over all or part of the assets or undertaking of our Company or anything analogous thereto occurs in respect of our Company; or

(xiv) (A) the notice of acceptance of the CSRC Filings issued by the CSRC and/or the results of the CSRC Filings published on the website of the CSRC is rejected, withdrawn, revoked or invalidated; or (B) other than with the prior written consent of the Joint Sponsors and the Sponsor-Overall Coordinators, the issue or requirement to issue by our Company of a supplement or amendment to the CSRC Filings pursuant to the CSRC Rules (as defined in the Hong Kong Underwriting Agreement) or upon any requirement or request of the CSRC; or

(xv) that (A) a material portion of the orders placed or confirmed in the bookbuilding process or (B) any investment commitment made by any cornerstone investors under the Cornerstone Investment Agreements signed with such cornerstone investors, have been withdrawn, terminated or cancelled, or with respect to which the payment of the relevant orders and/or investment commitment has not been received or settled in the stipulated time and manner or otherwise,

then, in each case, the Joint Sponsors and the Sponsor-Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) may, acting unanimously and in their sole and absolute discretion and upon giving notice in writing to our Company, terminate the Hong Kong Underwriting Agreement with immediate effect.

Indemnity

We have agreed to indemnify the Hong Kong Underwriters for certain losses which they may suffer or incur, including losses arising from their performance of their obligations under the Hong Kong Underwriting Agreement and any breach by us of the Hong Kong Underwriting Agreement.

The Hong Kong Underwriters' Interests in Us

Save for their respective obligations under the Hong Kong Underwriting Agreement, as of the Latest Practicable Date, none of the Hong Kong Underwriters was interested directly or indirectly in any Shares or any securities of any member of our Group or had any right or option (whether legally enforceable or not) to subscribe for or purchase, or to nominate persons to subscribe for or purchase, any Shares or any securities of any member of our Group.

The Hong Kong Underwriters and their affiliates may, subject to applicable laws and regulations and in their ordinary and usual course of business, (i) provide financing in connection with the subscription for, or purchase of, our securities with security interests over all or part of such securities subscribed or purchased, and/or (ii) participate in or facilitate the subscription for, or purchase of, our securities.

Lock Up Arrangement

Undertakings to the Hong Kong Stock Exchange pursuant to the Listing Rules

(A) Undertakings by our Company

Pursuant to Rule 10.08 of the Listing Rules, we have undertaken to the Hong Kong Stock Exchange that we will not exercise our power to issue further Shares, or securities convertible into Shares (whether or not of a class already listed), or form the subject of any agreement involving the issuance of such Shares or securities within six months from the Listing Date (whether or not such issue of Shares or securities will be completed within six months from the Listing Date) except the Offer Shares to be issued pursuant to the Global Offering (including any additional Shares which may be issued pursuant to any exercise of the Offer Size Adjustment Option and the Over-allotment Option), or under any other applicable circumstances provided under Rule 10.08 of the Listing Rules.

(B) Undertakings by our Controlling Shareholders

Pursuant to Rule 10.07 of the Listing Rules, each of our Controlling Shareholders has undertaken to the Hong Kong Stock Exchange and us that, except pursuant to the Global Offering, the shareholder will not and will procure that the relevant registered holder(s) will not (without the prior written consent of the Hong Kong Stock Exchange or unless otherwise in compliance with the applicable requirements of the Listing Rules):

(i) in the period commencing on the date by reference to which disclosure of the shareholder's holding of Shares is made in this prospectus and ending on the date which is six months from the Listing Date, directly or indirectly dispose of, nor enter into any agreement to dispose of or otherwise create any options, rights, interests or encumbrances in respect of, any of our Shares (or our other securities) in respect of which the shareholder is shown in this prospectus to be the beneficial owner; and

(ii) in the period of a further six months commencing on the date on which the period referred to in paragraph (i) above expires, either directly or indirectly, dispose of, nor enter into any agreement to dispose of or otherwise create any options, rights, interests or encumbrances in respect of, any of the securities referred to in paragraph (i) above if, immediately following such disposal or upon the exercise or enforcement of such options, rights, interests or encumbrances, it would cease to be a Controlling Shareholder of our Company.

The above lock up undertakings do not apply to the existing pledges of Shares by Mr. Yuan Yonggang and Mr. Yuan Yongfeng that are in effect as of the date of this prospectus. For further details, of the share pledges, please see "Substantial Shareholders — Share Pledges by Mr. Yuan Yonggang and Mr. Yuan Yongfeng."

In addition, pursuant to Note 3 to Rule 10.07(2) of the Listing Rules, each of our Controlling Shareholders has undertaken to the Hong Kong Stock Exchange and us that, within the period commencing on the date by reference to which disclosure of the shareholder's holding of our Shares is made in this prospectus and ending on the date which is 12 months from the Listing Date, the shareholder will and will procure that the relevant registered holder(s) will:

(i) when the shareholder pledges or charges any Shares (or our other securities) beneficially owned by the shareholder in favor of an authorized institution (as defined in the Banking Ordinance (Chapter 155 of the Laws of Hong Kong)) for a bona fide commercial loan, immediately inform us of such pledge or charge together with the number of Shares (or other securities of our Company) so pledged or charged; and

(ii) when the shareholder receives indications, either verbal or written, from the pledgee or chargee of Shares (or our other securities) that any pledged or charged Shares (or other securities of our Company), including the Shares subject to the pledges created by Mr. Yuan Yonggang and Mr. Yuan Yongfeng that remained in effect as of the date of this prospectus, will be disposed of, immediately inform us of the indications.

We will inform the Hong Kong Stock Exchange as soon as we have been informed of the above matters by the Controlling Shareholders and disclose those matters by way of an announcement as required under the Listing Rules.

Undertakings by our Company pursuant to the Hong Kong Underwriting Agreement

Pursuant to the Hong Kong Underwriting Agreement, our Company hereby undertakes to each of the Joint Sponsors, the Sponsor-Overall Coordinators, the Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers, the Capital Market Intermediaries and the Hong Kong Underwriters that except pursuant to the Global Offering (including pursuant to the Over-allotment Option), at any time after the date of the Hong Kong Underwriting Agreement up to and including the date falling six months after the Listing Date (the "**First Six Month Period**"), it will not, without the prior written consent of the Joint Sponsors and the Sponsor-Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) and unless in compliance with the requirements of the Hong Kong Listing Rules:

(i) allot, issue, sell, accept subscription for, offer to allot, issue or sell, contract or agree to allot, issue or sell, assign, mortgage, charge, pledge, hypothecate, lend, grant or sell any option, warrant, contract or right to subscribe for or purchase, grant or purchase any option, warrant, contract or right to allot, issue or sell, or otherwise transfer or dispose of or create an Encumbrance (as defined in the Hong Kong Underwriting Agreement) over, or agree to transfer or dispose of or create an Encumbrance over, either directly or indirectly, conditionally or unconditionally, any legal or beneficial interest in the share capital or any other securities of our Company or any interest in any of the foregoing (including, without limitation, any securities convertible into or exchangeable or exercisable for or that represent the right to receive, or any warrants or other rights to purchase any share capital or other securities of our Company, as applicable), or deposit any share capital or other securities of our Company, as applicable, with a depositary in connection with the issue of depositary receipts; or

(ii) enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership (legal or beneficial) of our Shares or any other securities of our Company, or any interest in any of the foregoing (including, without limitation, any securities convertible into or exchangeable or exercisable for or that represent the right to receive, or any warrants or other rights to purchase, any Shares or any other securities of our Company); or

(iii) enter into any transaction with the same economic effect as any transaction described in paragraph (i) or (ii) above; or

(iv) offer to or agree to do any of the foregoing specified in paragraph (i), (ii) or (iii) or announce any intention to do so,

in each case, whether any of the foregoing transactions is to be settled by delivery of share capital or such other securities, in cash or otherwise (whether or not the issue of such share capital or other securities will be completed within the First Six Month Period). Our Company further agrees that, in the event our Company is allowed to enter into any of the transactions described in paragraph (i), (ii) or (iii) above or offers to or agrees to or announces any intention to effect any such transaction during the period of six months commencing on the date on which the First Six Month Period expires (the "**Second Six Month Period**"), it will take all reasonable steps to ensure that such an issue or disposal will not create a disorderly or false market for any Shares or other securities of our Company.

International Offering

International Underwriting Agreement

In connection with the International Offering, we expect to enter into the International Underwriting Agreement with, among others, the International Underwriters on the Price Determination Date. Under the International Underwriting Agreement and subject to the Offer Size Adjustment Option and the Over-allotment Option, the International Underwriters would, subject to certain conditions, severally (but not

jointly) agree to purchase or procure purchasers for the International Offer Shares initially offered pursuant to the International Offering. It is expected that the International Underwriting Agreement may be terminated on grounds similar to those contained in the Hong Kong Underwriting Agreement. See the subsection headed "Structure of the Global Offering — The International Offering" for further details.

Offer Size Adjustment Option

We intend to grant to the International Underwriters the Offer Size Adjustment Option, exercisable in whole or in part, at the sole and absolute discretion of the Sponsor-Overall Coordinators for themselves and on behalf of the International Underwriters on or before the second Business Day prior to the Listing Date and will lapse immediately thereafter, pursuant to which our Company may be required to issue up to an aggregate of 17,067,400 additional H Shares, representing approximately 15.0% of the Offer Shares initially being offered under the Global Offering at the Offer Price to cover any excess demand in the International Offering. The Offer Size Adjustment Option provides flexibility to increase the number of Offer Shares available for purchase under the International Offering to cover additional market demand in the International Offering. See "Structure of the Global Offering — Offer Size Adjustment Option" for further details.

Over-allotment Option

We intend to grant to the International Underwriters the Over-allotment Option, exercisable in whole or in part, at the sole and absolute discretion of the Sponsor-Overall Coordinators on behalf of the International Underwriters from the Listing Date until 30 days from the last day permitted for the making of applications under the Hong Kong Public Offering, pursuant to which our Company may be required to issue up to an aggregate of 17,067,400 H Shares, representing not more than approximately 15.0% of the number of Offer Shares initially available under the Global Offering, assuming the Offer Size Adjustment Option is not exercised, or up to an aggregate of 19,627,500 H Shares, representing not more than approximately 15.0% of the number of Offer Shares available under the Global Offering assuming the Offer Size Adjustment Option is exercised in full, at the Offer Price to cover over-allocations in the International Offering, if any. See the subsection headed "Structure of the Global Offering — Over-allotment Option" for details.

COMMISSION AND EXPENSES

The Capital Market Intermediaries will receive an underwriting commission of 0.6% of the aggregate Offer Price of all the Offer Shares (including any Offer Shares to be issued pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option). The Capital Market Intermediaries may receive a discretionary incentive fee of up to 0.2% of the aggregate Offer Price of all the Offer Shares (including any Offer Shares to be issued pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option). For unsubscribed Hong Kong Offer Shares reallocated to the International Offering, the underwriting commission will not be paid to the Hong Kong Underwriters but will instead be paid to the International Underwriters.

Assuming full payment of the discretionary incentive fee, the fixed fees and the discretionary fees payable to the Underwriters represent approximately 56.6% and 43.4%, respectively, of the aggregate fees payable to the Capital Market Intermediaries in total in connection with the Global Offering.

Assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised at all, and based on the maximum Offer Price of HK$93.80 per H Share, the aggregate commissions and fees (including the incentive fees and assuming full payment), together with the Stock Exchange listing fees, the SFC transaction levy, the AFRC transaction levy, the Hong Kong Stock Exchange trading fee, legal and other professional fees and printing and other expenses relating to the Global Offering to be borne by the Company are estimated to amount to approximately HK$156.0 million in aggregate.

JOINT SPONSORS' FEE

Pursuant to the engagement letters entered into between our Company and the Joint Sponsors, we have agreed to pay the Joint Sponsors a total fee of US$750,000 to act as the sponsors of our Company in connection with the proposed listing on the Stock Exchange.

JOINT SPONSORS' INDEPENDENCE

Each Joint Sponsor satisfies the independence criteria set out in Rule 3A.07 of the Listing Rules.

ACTIVITIES BY UNDERWRITERS

Each of the Underwriters and their respective affiliates may individually undertake a variety of activities which do not form part of the underwriting or stabilizing process.

The Underwriters and their respective affiliates are diversified financial institutions with relationships in countries around the world. These entities engage in a wide range of commercial and investment banking, brokerage, funds management, trading, hedging, investing and other activities for their own account and for the account of others. In the ordinary course of their business activities, the Underwriters and their respective affiliates may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers. These investment and trading activities may involve or relate to our assets, securities and/or instruments and/or persons and entities with relationships with us and may also include swaps and other financial instruments entered into for hedging purposes in connection with our loans and other debt.

In relation to our H Shares, the activities of the Underwriters and their respective affiliates may include acting as agent for buyers and sellers of our H Shares, entering into transactions with those buyers and sellers in a principal capacity, including as a lender to initial purchasers of our H Shares (whose financing may be secured by our H Shares) in the Global Offering, proprietary trading in our H Shares, and entering into over the counter or listed derivative transactions or listed or unlisted securities transactions (including issuing securities such as derivative warrants listed on a stock exchange) which have as their underlying assets, assets including our H Shares. Such transactions may be carried out as bilateral agreements or trades with selected counterparties. Those activities may require hedging activity by those entities involving, directly or indirectly, the buying and selling of our H Shares, which may have a negative impact on the trading price of our H Shares. All such activities may take place in Hong Kong and elsewhere in the world and may result in the Underwriters and their respective affiliates holding long and/or short positions in our H Shares, in baskets of securities or indices including our H Shares, in units of funds that may purchase our H Shares, or in derivatives related to any of the foregoing.

In relation to issues by the Underwriters or their respective affiliates of any listed securities having our H Shares as their underlying securities, whether on the Hong Kong Stock Exchange or on any other stock exchange, the rules of the stock exchange may require the issuer of those securities (or one of its affiliates or agents) to act as a market maker or liquidity provider in the security, and this will also result in hedging activity in our H Shares in most cases.

All these activities may occur both during and after the end of the stabilizing period described in the section headed "Structure of the Global Offering". Such activities may affect the market price or value of our H Shares, the liquidity or trading volume in our H Shares and the volatility of the price of our H Shares, and the extent to which this occurs from day to day cannot be estimated.

It should be noted that when engaging in any of these activities, the Underwriters and their respective affiliates will be subject to certain restrictions, including the following:

(a) the Underwriters and their respective affiliates (other than the Stabilizing Manager or any person acting for it) must not, in connection with the distribution of the Offer Shares, effect any transactions (including issuing or entering into any option or other derivative transactions relating

to the Offer Shares), whether in the open market or otherwise, with a view to stabilizing or maintaining the market price of any of the Offer Shares at levels other than those which might otherwise prevail in the open market; and

(b) the Underwriters and their respective affiliates must comply with all applicable laws and regulations, including the market misconduct provisions of the SFO, including the provisions prohibiting insider dealing, false trading, price rigging and stock market manipulation.

Some of the Underwriters or their respective affiliates have provided from time to time and are expected to provide to our Group investment banking and other services in the future for which the Underwriters or their respective affiliates have received or will receive customary fees and commissions.

In addition, the Underwriters or their respective affiliates may provide financing to investors to finance their subscriptions of Offer Shares in the Global Offering.

THE GLOBAL OFFERING

The Global Offering consists of (subject to reallocation and the Over-allotment Option as described below):

(a) the Hong Kong Public Offering of initially 11,378,400 H Shares (subject to reallocation) as described below under "— The Hong Kong Public Offering"; and

(b) the International Offering of initially 102,404,800 H Shares (subject to reallocation, the Offer Size Adjustment Option and the Over-allotment Option) outside the United States (including to professional and institutional investors in Hong Kong) in offshore transactions in reliance on Regulation S and in the United States solely to QIBs in reliance on Rule 144A or another exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act, as described below under the subsection headed "— The International Offering".

Investors may either apply for our H Shares under the Hong Kong Public Offering; or apply for or indicate an interest, if qualified to do so, for our H Shares under the International Offering, but may not do both.

Assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised, the 113,783,200 Offer Shares will represent approximately 5.8% of our enlarged share capital immediately after the completion of the Global Offering.

Assuming the Offer Size Adjustment Option is not exercised and the Over-allotment Option is fully exercised, the 130,850,600 Offer Shares will represent approximately 6.7% of our enlarged share capital immediately after the completion of the Global Offering.

Assuming the Offer Size Adjustment Option and the Over-allotment Option are fully exercised, the 150,478,100 Offer Shares will represent approximately 7.6% of our enlarged share capital immediately after the completion of the Global Offering.

References in this prospectus to applications, application monies or the procedure for application relate solely to the Hong Kong Public Offering.

The number of Offer Shares to be offered under the Hong Kong Public Offering and the International Offering, respectively, may be subject to reallocation as described in "— The Hong Kong Public Offering — Reallocation" below.

UNDERWRITING ARRANGEMENTS

The Hong Kong Public Offering is fully underwritten by the Hong Kong Underwriters under the terms of the Hong Kong Underwriting Agreement, subject to agreement on the Offer Price between us and the Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters) on or around the Price Determination Date and subject to the other conditions set out in the subsection headed "— Conditions of the Global Offering".

We expect to enter into the International Underwriting Agreement relating to the International Offering on or about the Price Determination Date.

The underwriting arrangements, the Hong Kong Underwriting Agreement and the International Underwriting Agreement are summarized in the section headed "Underwriting".

THE HONG KONG PUBLIC OFFERING

Number of H Shares Initially Offered

We are initially offering 11,378,400 H Shares at the Offer Price for subscription by the public in Hong Kong, representing approximately (i) 10.0% of the 113,783,200 H Shares initially made available under the Global Offering and (ii) 0.6% of the total Shares in issue immediately following the completion

of the Global Offering (in each case, subject to the reallocation of Offer Shares between the International Offering and the Hong Kong Public Offering and assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised).

The Hong Kong Public Offering is open to members of the public in Hong Kong as well as to institutional and professional investors. Professional investors generally include brokers, dealers, and companies (including fund managers) whose ordinary business involves dealing in shares and other securities, and corporate entities which regularly invest in shares and other securities.

Completion of the Hong Kong Public Offering is subject to the conditions as set forth in "— Conditions of the Global Offering" below.

Allocation

Allocation of H Shares to investors under the Hong Kong Public Offering will be based solely on the level of valid applications received under the Hong Kong Public Offering. The basis of allocation may vary, depending on the number of Hong Kong Offer Shares validly applied for by applicants. The allocation of Hong Kong Offer Shares could, where appropriate, consist of balloting, which would mean that some applicants may receive a higher allocation than others who have applied for the same number of Hong Kong Offer Shares, and those applicants who are not successful in the ballot may not receive any Hong Kong Offer Shares.

For allocation purposes only, the total number of Hong Kong Offer Shares available under the Hong Kong Public Offering (after taking into account any reallocation referred to below) will be divided equally (to the nearest board lot) into two pools: Pool A and Pool B (with any odd lots being allocated to pool A).

- **Pool A**: The Hong Kong Offer Shares in Pool A will be allocated on an equitable basis to valid applicants who have applied for Hong Kong Offer Shares with an aggregate subscription price of HK$5 million or less (excluding the brokerage fee, the SFC transaction levy, the AFRC transaction levy and the Hong Kong Stock Exchange trading fee).
- **Pool B**: The Hong Kong Offer Shares in Pool B will be allocated on an equitable basis to valid applicants who have applied for Hong Kong Offer Shares with an aggregate subscription price of more than HK$5 million and up to the total value of Pool B (excluding the brokerage fee, the SFC transaction levy, the AFRC transaction levy and the Hong Kong Stock Exchange trading fee).

For the purpose of the immediately preceding paragraph only, the "price" for the Hong Kong Offer Shares means the price payable on application. See the subsection headed "— Pricing — Price Payable on Application".

Applicants should be aware that applications in Pool A and Pool B are likely to receive different allocation ratios. If Hong Kong Offer Shares in one pool (but not both pools) are undersubscribed, the unsubscribed Hong Kong Offer Shares will be transferred to the other pool to satisfy demand in that other pool and be allocated accordingly.

Applicants can only receive an allocation of Hong Kong Offer Shares from either Pool A or Pool B but not from both pools. Multiple or suspected multiple applications and any application for more than 5,689,200 Hong Kong Offer Shares (being 50% of the H Shares initially made available under the Hong Kong Public Offering) will be rejected.

Reallocation

The Offer Shares to be offered in the Hong Kong Public Offering and the International Offering may, in certain circumstances, be reallocated as between these offerings at the discretion of the Sponsor-Overall Coordinators. Subject to the allocation cap described in the subsequent paragraph, the Sponsor-Overall Coordinators may in their discretion reallocate Offer Shares from the International Offering to the Hong Kong Public Offering to satisfy valid applications under the Hong Kong Public Offering in accordance with the guidance under Chapter 4.14 of the Guide for New Listing Applicants. In addition, if the Hong Kong

Public Offering is not fully subscribed, the Sponsor-Overall Coordinators will have the discretion (but shall not be under any obligation) to reallocate to the International Offering all or any unsubscribed Hong Kong Offer Shares in such amounts as they deem appropriate.

If: (i) the International Offer Shares are undersubscribed and the Hong Kong Offer Shares are fully subscribed or oversubscribed irrespective of the number of times; or (ii) the International Offer Shares are fully subscribed or oversubscribed and the Hong Kong Offer Shares are fully subscribed or oversubscribed irrespective of the number of times, up to 5,689,000 Offer Shares may be reallocated to the Hong Kong Public Offering from the International Offering, so that the total number of the Offer Shares available under the Hong Kong Public Offering following such reallocation will be increased to 17,067,400 Offer Shares, representing approximately 15.0% of the number of the Offer Shares initially available under the Global Offering (before exercise of the Offer Size Adjustment Option and the Over-allotment Option) in accordance with Chapter 4.14 of the Guide.

Given the initial allocation of the Offer Shares to the Hong Kong Public Offering and the International Offering follows Mechanism B set out under paragraph 2 of Chapter 4.14 of the Guide and the provision of Paragraph 4.2(b) of Practice Note 18 of the Listing Rules, no mandatory clawback or reallocation mechanism is required to increase the number of Offer Shares under the Hong Kong Public Offering to a certain percentage of the total number of Offer Shares offered under the Global Offering.

Details of any reallocation of Offer Shares between the Hong Kong Public Offering and the International Offering will be disclosed in the results announcement of the Global Offering, which is expected to be published on Tuesday, October 27, 2026.

Where the International Offer Shares are undersubscribed, if the Hong Kong Offer Shares are also undersubscribed, the Global Offering will not proceed unless the Underwriters would subscribe or procure subscribers for their respective applicable proportions of the Offer Shares being offered which are not taken up under the Global Offering on the terms and conditions of this prospectus and the Underwriting Agreements.

Applications

Each applicant under the Hong Kong Public Offering must give an undertaking and confirmation in the application submitted by that applicant that he/she/it and any person(s) for whose benefit the applicant is making the application have not applied for or taken up, or indicated an interest for, and will not apply for or take up, or indicate an interest for, any International Offer Shares under the International Offering, and that applicant's application under the International Offering is liable to be rejected if either or both of the undertaking and confirmation are breached or untrue (as the case may be).

THE INTERNATIONAL OFFERING

Number of H Shares Initially Offered

We are initially offering 102,404,800 H Shares at the Offer Price for subscription or sale under the International Offering (subject to reallocation, the Offer Size Adjustment Option and the Over-allotment Option), representing approximately 90.0% of the 113,783,200 H Shares initially made available under the Global Offering. Subject to the reallocation of the Offer Shares between the International Offering and the Hong Kong Public Offering, the number of H Shares initially offered under the International Offering will represent approximately 5.3% of the total Shares in issue immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised).

Allocation

The International Offering will include selective marketing of Offer Shares to QIBs in the United States in accordance with Rule 144A as well as institutional and professional investors and other investors anticipated to have a sizeable demand for the Offer Shares in Hong Kong and other jurisdictions

outside the United States in reliance on Regulation S. Professional investors generally include brokers, dealers, companies (including fund managers) whose ordinary business involves dealing in shares and other securities and corporate entities that regularly invest in shares and other securities.

Allocation of Offer Shares under the International Offering will be effected in accordance with the "book-building" process described in the subsection headed "— Pricing — Determining the Offer Price" and based on a number of factors, including the level and timing of demand, total size of the relevant investor's invested assets or equity assets in the relevant sector and whether or not it is expected that that investor is likely to buy further H Shares, and/or hold or sell its H Shares, after the Listing. This basis of allocation is intended to result in a distribution of the Offer Shares which is likely to lead to the establishment of a solid and stable professional and institutional shareholder base to the benefit of our Group and our Shareholders as a whole.

The Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters) may require an investor who has been offered (or has indicated an interest for) Offer Shares under the International Offering and who has made an application under the Hong Kong Public Offering to provide sufficient information to the Sponsor-Overall Coordinators so as to allow Sponsor-Overall Coordinators to identify the relevant applications under the Hong Kong Public Offering and to ensure that it is excluded from any allocation of Offer Shares under the International Offering.

Reallocation

The total number of Offer Shares to be issued or sold pursuant to the International Offering may change as a result of any reallocation of Offer Shares between the Hong Kong Public Offering and the International Offering as described in the subsection headed "— The Hong Kong Public Offering —Reallocation", and the exercise of the Offer Size Adjustment Option and the Over-allotment Option in whole or in part as described in the subsections headed "— Over-allotment Option" and "— Offer Size Adjustment Option", respectively.

PRICING

Determining the Pricing of the Offer Shares

Pricing for the Offer Shares for the purpose of the various offerings under the Global Offering will be fixed on the Price Determination Date, which is expected to be on or around Monday, October 26, 2026 and in any event at or before 12:00 noon on Monday, October 26, 2026, by agreement between us and the Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters) and the number of Offer Shares to be allocated under the various offerings will be determined shortly thereafter.

The Offer Price per Hong Kong Offer Share under the Hong Kong Public Offering will be identical to the Offer Price per International Offer Share under the International Offering based on the Hong Kong dollar price per International Offer Share under the International Offering, as determined by us and the Sponsor-Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters). The Offer Price per Hong Kong Offer Share under the Hong Kong Public Offering will be fixed at the Hong Kong dollar amount which, when increased by the brokerage fee of 1.0%, SFC transaction levy of 0.0027%, AFRC transaction levy of 0.00015%, and Stock Exchange trading fee of 0.00565% payable thereon, is (subject to any necessary rounding) effectively equivalent to the Hong Kong dollar price per International Offer Share under the International Offering. The SFC transaction levy, the AFRC transaction levy and the Stock Exchange trading fee otherwise payable by investors in the International Offering on International Offer Shares purchased by them will be paid by us.

We will determine the Offer Price by reference to, among other factors, the closing prices of our A Shares on the Shenzhen Stock Exchange on the last trading day on or before the Price Determination Date (which is accessible to our Shareholders and potential investors at **www.szse.cn/English/siteMarketData/siteMarketDatas/lookup/index.html?code=002384**), and the Offer Price will

not be more than HK$93.80. The historical prices of our A Shares and trading volume on the Shenzhen Stock Exchange are set out below.

Year ended December 31, 2023	33.00	16.13	25,643,651
Year ended December 31, 2024	37.38	11.01	66,096,016
Year ended December 31, 2025	91.04	21.62	71,983,620
Year ending December 31, 2026 (up to the Latest Practicable Date)	280.08	67.18	77,156,639

Note:

1. Average daily trading volume ("**ADTV**") represents daily average number of our A Shares traded over the relevant period rounded to the nearest share.

The final Offer Price, the level of indications of interest in the International Offering, the level of applications in the Hong Kong Public Offering, the basis of allocations of the Hong Kong Offer Shares and the results of allocations in the Hong Kong Public Offering are expected to be made available through a variety of channels in the manner described in "How to Apply for Hong Kong Offer Shares — Publication of Results".

Price Payable on Application

Applicants for Hong Kong Offer Shares may be required to pay, on application (subject to application channels), the maximum Offer Price per Hong Kong Offer Share plus the brokerage fee of 1.0%, the SFC transaction levy of 0.0027%, the AFRC transaction levy of 0.00015% and the Hong Kong Stock Exchange trading fee of 0.00565%, amounting to a total of HK$9,474.59 for one board lot of 100 H Shares.

If the Offer Price is less than the maximum Offer Price, appropriate refund payments (including the brokerage fee, the SFC transaction levy, the AFRC transaction levy and the Hong Kong Stock Exchange trading fee attributable to the surplus application monies) will be made to successful applicants (subject to application channels), without interest. See the subsection headed "How to Apply for Hong Kong Offer Shares — Despatch/Collection of H Share Certificates and Refund of Application Monies".

Reduction in Number of Offer Shares

The Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters) may, based on the level of interest expressed by prospective investors during the book-building process in respect of the International Offering, and with our consent, reduce the number of Offer Shares below that stated in this prospectus at any time on or before the morning of the last day for making applications under the Hong Kong Public Offering. In this case, we will as soon as practicable after the decision to make the reduction (and no later than the morning of the last day for making applications under the Hong Kong Public Offering) publish on the website of the Hong Kong Stock Exchange at **www.hkexnews.hk** and our website at **www.dsbj.com** notice of the reduction, the cancelation of the Global Offering and the relaunch of the Global Offering at the revised number of Offer Shares. This notice will also include confirmation or revision, as appropriate, of the working capital statement and the Global Offering statistics as set out in this prospectus, as well as any other financial information which may change as a result of the reduction.

We will, as soon as practicable following the decision to make the reduction, in addition to publishing the notice, issue a supplemental prospectus containing details in relation to the change in the number of Offer Shares being offered. The Global Offering will be canceled and subsequently relaunched on FINI pursuant to the supplemental prospectus.

Before making applications for the Hong Kong Offer Shares, applicants should have regard to the possibility that any announcement of a reduction in the number of Offer Shares may not be made until the day which is the last day for making applications under the Hong Kong Public Offering.

Announcement of the Offer Price and Basis of Allocations

The Offer Price, level of applications in the Hong Kong Public Offering, level of indications of interest in the International Offering, and basis of allocations of the Hong Kong Offer Shares are expected to be made available through a variety of channels in the manner described in the subsection headed "How to Apply for Hong Kong Offer Shares — Publication of Results".

OVER-ALLOCATION

Following any over-allocation of H Shares in connection with the Global Offering, the Stabilizing Manager (or any person acting for it) may cover the over-allocation by exercising the Over-allotment Option in full or in part, or by using H Shares purchased by the Stabilizing Manager (or any person acting for it) in the secondary market at prices that do not exceed the Offer Price or a combination of these means.

OFFER SIZE ADJUSTMENT OPTION

In order to provide flexibility to increase the number of Offer Shares available for purchase under the International Offering to cover additional market demand in the International Offering, the Company is expected to grant an Offer Size Adjustment Option to the International Underwriters, which is exercisable by the Sponsor-Overall Coordinators (for themselves and on behalf of the International Underwriters) on or before the second Business Day prior to the Listing Date and will lapse immediately thereafter, pursuant to which the Company may allot and issue up to an aggregate of 17,067,400 additional H Shares (representing approximately 15.0% of the Offer Shares initially being offered under the Global Offering) at the Offer Price to cover any excess demand in the International Offering. If the Offer Size Adjustment Option is exercised in full, the additional H Shares to be issued pursuant thereto will represent approximately 0.9% of our issued share capital immediately following the completion of the Global Offering (assuming the Over-allotment Option is not exercised).

In considering whether to exercise the Offer Size Adjustment Option, the Company and the Sponsor-Overall Coordinators will take into account a number of factors, including, among other things: (i) whether the level of interest expressed by prospective professional and institutional investors during the book-building process under the International Offering is sufficient to cover: (a) the total number of Offer Shares, which represents the aggregate of the Offer Shares initially available under the Global Offering and the additional Offer Shares upon any exercise of the Offer Size Adjustment Option; and (b) the corresponding number of Shares under the Over-allotment Option; (ii) the prices at which prospective professional and institutional investors have indicated they would be prepared to acquire the Offer Shares in the course of the book-building process; (iii) the quality of investors, with a view to establishing a solid professional institutional and investor shareholder base to the benefit of the Company and its Shareholders as a whole; and (iv) general market conditions.

The dilution effect of the Offer Size Adjustment Option (assuming the Over-allotment Option is not exercised) is set out below:

Number of H Shares issued under the Global Offering before the exercise of the Offer Size Adjustment Option (the "Original Subscribers")	Approximate percentage of total issued share capital held by the Original Subscribers before the exercise of the Offer Size Adjustment Option	Number of H Shares issued under the Global Offering after the full exercise of the Offer Size Adjustment Option	Approximate percentage of total issued share capital held by the Original Subscribers after the full exercise of the Offer Size Adjustment Option
113,783,200	5.8%	130,850,600	5.8%

The Offer Size Adjustment Option will not be used for price stabilization purposes and will not be subject to the provisions of the Securities and Futures (Price Stabilizing) Rules (Chapter 571W of the Laws of Hong Kong). The Offer Size Adjustment Option will be in addition to the Over-allotment Option. If the Offer Size Adjustment Option is exercised in full, the additional net proceeds received from the placing of the additional Shares allotted and issued will be allocated in accordance with the allocations as disclosed in

the section headed "Future Plans and Use of Proceeds" in this prospectus, on a pro rata basis. The Company will disclose in its allotment results announcement if and to what extent the Offer Size Adjustment Option has been exercised, or will confirm that if the Offer Size Adjustment Option has not been exercised by the second Business Day prior to the Listing Date, it will lapse and cannot be exercised at any future date.

OVER-ALLOTMENT OPTION

In connection with the Global Offering, we may grant the Over-allotment Option to the International Underwriters, exercisable by the Sponsor-Overall Coordinators in their sole and absolute discretion for themselves and on behalf of the International Underwriters.

Pursuant to the Over-allotment Option (if granted), the International Underwriters have the right, exercisable by the Sponsor-Overall Coordinators (in their sole and absolute discretion for themselves and on behalf of the International Underwriters) at any time from the Listing Date until 30 days from the last day for the making of applications under the Hong Kong Public Offering (being the last day for the exercise of the Over-allotment Option, which is Sunday, November 22, 2026), to require us to allot and issue up to an aggregate of 17,067,400 H Shares, representing not more than approximately 15.0% of the number of Offer Shares initially available under the Global Offering, assuming the Offer Size Adjustment Option is not exercised, or up to an aggregate of 19,627,500 H Shares, representing not more than approximately 15.0% of the total number of Offer Shares available under the Global Offering, assuming the Offer Size Adjustment Option is exercised in full, at the Offer Price, to cover over-allocations in the International Offering, if any.

If the Offer Size Adjustment Option is not exercised and the Over-allotment Option is exercised in full, the additional Offer Shares to be issued pursuant thereto will represent approximately 0.9% of the enlarged issued share capital of our Company immediately following the completion of the Global Offering. If the Offer Size Adjustment Option and the Over-allotment Option are exercised in full, the additional Offer Shares to be issued pursuant to the Over-allotment Option will represent approximately 1.0% of the total Shares in issue immediately following the completion of the Global Offering and the exercise of the Over-allotment Option. If the Over-allotment Option is exercised, an announcement will be made.

STABILIZATION

Stabilization is a practice used by underwriters in some markets to facilitate the distribution of securities. To stabilize, the underwriters may bid for, or purchase, the securities in the secondary market, during a specified period of time, to retard, and if possible, prevent a decline in the market price of the securities below the Offering Price. These transactions may be effected in jurisdictions where it is permitted to do so, in each case in compliance with all applicable laws and regulatory requirements, including those in Hong Kong. In Hong Kong, the price at which stabilization is effected cannot exceed the offer price of shares.

In connection with the Global Offering, the Stabilizing Manager (or any person acting for it), on behalf of the Underwriters, may over-allocate or effect short sales or any other stabilizing transactions with a view to stabilizing or maintaining the market price of our H Shares at a level higher than that which might otherwise prevail in the open market. However, there is no obligation on the Stabilizing Manager to conduct any stabilizing activity. Stabilizing actions, if taken, (a) will be conducted at the absolute discretion of the Stabilizing Manager (or any person acting for it) and in what the Stabilizing Manager reasonably regards as being in our best interest, (b) may be discontinued at any time and (c) is required to end within 30 days of the last day for making applications under the Hong Kong Public Offering.

Stabilizing activities permitted in Hong Kong pursuant to the Securities and Futures (Price Stabilizing) Rules (Chapter 571W of the Laws of Hong Kong) include (a) over-allocation for the purpose of preventing or minimizing any reduction in the market price of our H Shares, (b) selling or agreeing to sell our H Shares so as to establish a short position in them for the purpose of preventing or minimizing any reduction in the market price of our H Shares, (c) subscribing, or agreeing to subscribe, for our H Shares pursuant to the Over-allotment Option in order to close out any position established under (a) or (b), (d) purchasing, or agreeing to purchase, our H Shares for the sole purpose of preventing or minimizing any reduction in the

market price of our H Shares, (e) selling or agreeing to sell our H Shares to liquidate a long position held as a result of those purchases and (f) offering or attempting to do anything described in (b), (c), (d) or (e).

Specifically, applicants for and investors in the Offer Shares should note that:

(a) as a result of effecting transactions to stabilize or maintain the market price of our H Shares, the Stabilizing Manager (or any person acting for it) may maintain a long position in our H Shares;

(b) the size of the long position, and the period for which the Stabilizing Manager (or any person acting for it) will maintain the long position is at the discretion of the Stabilizing Manager and is uncertain;

(c) liquidation of any long position by the Stabilizing Manager (or any person acting for it) and selling in the open market may have an adverse impact on the market price of our H Shares;

(d) stabilizing action by the Stabilizing Manager (or any person acting for it) is not permitted to support the price of our H Shares for longer than the stabilizing period, which begins on the Listing Date and ends on Sunday, November 22, 2026 (being the 30th day after the last day for making applications under the Hong Kong Public Offering). As a result, demand for our H Shares, and their market price, may fall after the end of the stabilizing period;

(e) stabilizing activities by the Stabilizing Manager (or any person acting for it) may stabilize, maintain or otherwise affect the market price of our H Shares. This means the price of our H Shares may be higher than the price that otherwise might exist in the open market;

(f) there is no assurance that the price of our H Shares can stay at or above the Offer Price by the taking of any stabilizing action either during or after the stabilizing period; and

(g) bids for or market purchases of our H Shares by the Stabilizing Manager (or any person acting for it) may be made at a price at or below the Offer Price and therefore at or below the price paid for our H Shares by purchasers.

In order to effect stabilization actions, the Stabilizing Manager will arrange cover of up to an aggregate of 17,067,400 H Shares (assuming the Offer Size Adjustment Option is not exercised), or 19,627,500 H Shares (assuming the Offer Size Adjustment Option is exercised in full), each representing not more than approximately 15.0% of the number of Offer Shares initially available under the Global Offering, through delayed delivery arrangements with investors who have been allocated Offer Shares in the International Offering, in the event that the whole or part of the Offer Size Adjustment Option and/or the Over-allotment Option are exercised. The delayed delivery arrangements (if specifically agreed by an investor) relate only to the delay in the delivery of the Offer Shares to such investor and the Offer Price for the Offer Shares allocated to such investor will be paid on the Listing Date. Both the size of such cover and the extent to which the Over-allotment Option can be exercised will depend on whether arrangements can be made with investors such that a sufficient number of H Shares can be delivered on a delayed basis. If no investor in the International Offering agrees to the delayed delivery arrangements, no stabilizing actions will be undertaken by the Stabilizing Manager and the Over-allotment Option will not be exercised.

We will make an announcement in compliance with the Securities and Futures (Price Stabilizing) Rules (Chapter 571W of the Laws of Hong Kong) within seven days of the expiration of the stabilizing period.

CONDITIONS OF THE GLOBAL OFFERING

Acceptance of applications for the Hong Kong Offer Shares will be conditional on:

(a) the Listing Committee granting approval for the listing of, and permission to deal in, our H Shares in issue and to be issued pursuant to the Global Offering (including any additional H Shares which may be issued pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option) as described in this prospectus and the approval not having been revoked;

(b) the execution and delivery of the International Underwriting Agreement on or around the Price Determination Date;

(c) the Offer Price having been agreed between us and the Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters); and

(d) the obligations of the Underwriters under both the Hong Kong Underwriting Agreement and the International Underwriting Agreement having become unconditional and not having been terminated in accordance with their respective terms,

in each case on or before the dates and times specified in the respective Underwriting Agreements (unless and to the extent such conditions are waived on or before such dates and times) and in any event not later than Monday, October 26, 2026.

The consummation of each of the Hong Kong Public Offering and the International Offering is conditional upon, among others, the other becoming unconditional and not having been terminated in accordance with its terms.

If the above conditions are not fulfilled or waived before the dates and times specified, the Global Offering will not proceed and will lapse, and the Hong Kong Stock Exchange will be notified immediately. We will publish a notice of the lapse of the Hong Kong Public Offering on the website of the Hong Kong Stock Exchange at **www.hkexnews.hk** and our website at **www.dsbj.com** on the next Business Day following the lapse. In this case, all application monies will be returned, without interest, on the terms set out in the subsection headed "How to Apply for Hong Kong Offer Shares — Despatch/Collection of H Share Certificates and Refund of Application Monies". In the meantime, the application monies will be held in separate accounts with the receiving banks or other bank(s) in Hong Kong licensed under the Banking Ordinance (Chapter 155 of the Laws of Hong Kong).

If, for any reason, we and the Sponsor-Overall Coordinators (for themselves and on behalf of the Underwriters) are unable to reach agreement on the Offer Price by 12:00 noon on the Price Determination Date, the Global Offering will not proceed and will lapse.

H Share certificates for the Offer Shares are expected to be issued on Tuesday, October 27, 2026, but they will only become valid evidence of title at 8:00 a.m. on Wednesday, October 28, 2026, provided the Global Offering has become unconditional in all respects at or before that time.

DEALING ARRANGEMENTS

Assuming that the Hong Kong Public Offering becomes unconditional at or before 8:00 a.m. in Hong Kong on Wednesday, October 28, 2026, it is expected that dealings in our H Shares on the Hong Kong Stock Exchange will commence at 9:00 a.m. on Wednesday, October 28, 2026.

Our H Shares will be traded in board lots of 100 H Shares each and the stock code of our H Shares will be 2384.

IMPORTANT NOTICE TO INVESTORS OF HONG KONG OFFER SHARES
FULLY ELECTRONIC APPLICATION PROCESS

We have adopted a fully electronic application process for the Hong Kong Public Offering and below are the procedures for application.

This prospectus is available at the website of the Hong Kong Stock Exchange at www.hkexnews.hk under the *"HKEXnews > New Listings > New Listing Information"* section, and our website at www.dsbj.com.

The contents of this prospectus are identical to the prospectus as registered with the Registrar of Companies in Hong Kong pursuant to Section 342C of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

APPLICATIONS FOR THE HONG KONG OFFER SHARES

1. Who Can Apply

You can apply for Hong Kong Offer Shares if you or the person(s) for whose benefit you are applying:

- are 18 years of age or older;
- have a Hong Kong address *(for the **HK eIPO White Form** service only)*;
- are outside the United States (within the meaning of Regulation S), and are a person described in paragraph (h)(3) of Rule 902 of Regulation S; and
- are not a legal or natural person (except qualified domestic institutional investors) of the People's Republic of China.

Unless permitted by the Listing Rules and/or the Guide and waiver/consent has been granted by the Stock Exchange, you cannot apply for any Hong Kong Offer Shares if you or the person(s) for whose benefit you are applying for:

- are an existing holder or beneficial owner of our Shares and/or a substantial shareholder of any of our subsidiaries;
- are our director, supervisor or chief executive officer of ours and/or any of our subsidiaries;
- are a close associate of any of the above persons;
- are our connected person or will become our connected person immediately upon completion of the Global Offering; or
- have been allocated or have applied for any International Offer Shares or otherwise participate in the International Offering.

2. Application Channels

The Hong Kong Public Offering period will begin at 9:00 a.m. on Tuesday, October 20, 2026 and end at 12:00 noon on Friday, October 23, 2026 (Hong Kong time).

To apply for Hong Kong Offer Shares, you may use one of the following application channels:

Application Channel	Platform	Target Investors	Application Time
HK eIPO White Form service	**www.hkeipo.hk**	Investors who would like to receive a physical H Share certificate. Hong Kong Offer Shares successfully applied	From 9:00 a.m. on Tuesday, October 20, 2026 to 11:30 a.m. on Friday, October 23, 2026,

Application Channel	Platform	Target Investors	Application Time
		for will be allotted and issued in your own name.	Hong Kong time. The latest time for completing full payment of application monies will be 12:00 noon on Friday, October 23, 2026, Hong Kong time.
HKSCC EIPO channel	Your broker or custodian who is an HKSCC Participant will submit electronic application instructions on your behalf through HKSCC's FINI system in accordance with your instruction	Investors who would not like to receive a physical H Share certificate. Hong Kong Offer Shares successfully applied for will be allotted and issued in the name of HKSCC Nominees, deposited directly into CCASS and credited to your designated HKSCC Participant's stock account.	Contact your broker or custodian for the earliest and latest time for giving such instructions, as this may vary by broker or custodian.

The **HK eIPO White Form** service and the HKSCC EIPO channel are facilities subject to capacity limitations and potential service interruptions and you are advised not to wait until the last day of the application period to apply for Hong Kong Offer Shares.

For those applying through the **HK eIPO White Form** service, once you complete payment in respect of any application instructions given by you or for your benefit through the **HK eIPO White Form** service to make an application for Hong Kong Offer Shares, an actual application shall be deemed to have been made. If you are a person for whose benefit the electronic application instructions are given, you shall be deemed to have declared that only one set of electronic application instructions has been given for your benefit. If you are an agent for another person, you shall be deemed to have declared that you have only given one set of electronic application instructions for the benefit of the person for whom you are an agent and that you are duly authorized to give those instructions as an agent.

For the avoidance of doubt, giving an application instruction under the **HK eIPO White Form** service more than once and obtaining different application reference numbers without effecting full payment in respect of a particular reference number will not constitute an actual application.

If you apply through the **HK eIPO White Form** service, you are deemed to have authorized the **HK eIPO White Form** Service Provider to apply on the terms and conditions in this prospectus, as supplemented and amended by the terms and conditions of the **HK eIPO White Form** service.

By instructing your broker or custodian to apply for the Hong Kong Offer Shares on your behalf through the HKSCC EIPO channel, you (and, if you are joint applicants, each of you jointly and severally) are deemed to have instructed and authorized HKSCC to cause HKSCC Nominees (acting as nominee for the relevant HKSCC Participants) to apply for Hong Kong Offer Shares on your behalf and to do on your behalf all the things stated in this prospectus and any supplement to it.

For those applying through HKSCC EIPO channel, an actual application will be deemed to have been made for any application instructions given by you or for your benefit to HKSCC (in which case an application will be made by HKSCC Nominees on your behalf) provided such application instruction has not been withdrawn or otherwise invalidated before the closing time of the Hong Kong Public Offering.

HKSCC Nominees will only be acting as a nominee for you and neither HKSCC nor HKSCC Nominees shall be liable to you or any other person in respect of any actions taken by HKSCC or HKSCC Nominees on your behalf to apply for Hong Kong Offer Shares or for any breach of the terms and conditions of this prospectus.

Only one application may be made for the benefit of any person. If you are suspected of making more than one application through the **HK eIPO White Form** service or any other channel, all of your applications are liable to be rejected.

3. Information Required to Apply

You must provide the following information with your application:

For Individual/Joint Applicants

- Full name(s)(2) as shown on your identity document
- Identity document's issuing country or jurisdiction
- Identity document type, with order of priority:
  - i. HKID card; or
  - ii. National identification document; or
  - iii. Passport; and
- Identity document number

For Corporate Applicants

- Full name(s)(2) as shown on your identity document
- Identity document's issuing country or jurisdiction
- Identity document type, with order of priority:
  - i. LEI registration document; or
  - ii. Certificate of incorporation; or
  - iii. Business registration certificate; or
  - iv. Other equivalent document; and
- Identity document number

Notes:

(1) If you are applying through the **HK eIPO White Form** service, you are required to provide a valid e-mail address, a contact telephone number and a Hong Kong address. You are also required to declare that the identity information provided by you follows the requirements as described in Note 2 below. In particular, where you cannot provide a HKID number, you must confirm that you do not hold a HKID card. The number of joint applicants may not exceed four. If you are a firm, the applicant must be in the individual members' names.

(2) The applicant's full name as shown on their identity document must be used and the surname, given name, middle and other names (if any) must be input in the same order as shown on the identity document. If an applicant's identity document contains both an English and Chinese name, both English and Chinese names must be used. Otherwise, either English or Chinese names will be accepted. The order of priority of the applicant's identity document type must be strictly followed and where an individual applicant has a valid HKID card (including both Hong Kong Residents and Hong Kong Permanent Residents), the HKID number must be used when making an application to subscribe for shares in a public offer. Similarly for corporate applicants, a LEI number must be used if an entity has a LEI certificate.

(3) If the applicant is a trustee, the client identification data ("CID") of the trustee, as set out above, will be required. If the applicant is an investment fund (i.e. a collective investment scheme, or CIS), the CID of the asset management company or the individual fund, as appropriate, which has opened a trading account with the broker will be required, as above.

(4) The maximum number of joint applicants on FINI is capped at four in accordance with market practice.

(5) If you are applying as a nominee, you must provide: (i) the full name (as shown on the identity document), the identity document's issuing country or jurisdiction, the identity document type; and (ii), the identity document number, for each of the beneficial owners or, in the case(s) of joint beneficial owners, for each joint beneficial owner. If you do not include this information, the application will be treated as being made for your benefit.

(6) If you are applying as an unlisted company and (i) the principal business of that company is dealing in securities; and (ii) you exercise statutory control over that company, then the application will be treated as being for your benefit and you should provide the required information in your application as stated above.

"**Unlisted company**" means a company with no equity securities listed on the Stock Exchange or any other stock exchange.

"**Statutory control**" means you:

- control the composition of the board of directors of the company;
- control more than half of the voting power of the company; or
- hold more than half of the issued share capital of the company (not counting any part of it which carries no right to participate beyond a specified amount in a distribution of either profits or capital).

For those applying through HKSCC EIPO channel, and making an application under a power of attorney, we and the Sponsor-Overall Coordinators as our agent, have discretion to consider whether to accept it on any conditions we think fit, including evidence of the attorney's authority.

Failing to provide any required information may result in your application being rejected.

4. Permitted Number of Hong Kong Offer Shares for Application

Board lot size : 100 H Shares

Permitted Number of Hong Kong Offer Shares for application and amount payable on application/ successful allotment : Hong Kong Offer Shares are available for application in specified board lot sizes only. Please refer to the amount payable associated with each specified board lot size in the table below.

The maximum Offer Price is HK$93.80 per H Share.

If you are applying through the HKSCC EIPO channel, your broker or custodian may require you to pre-fund your application, in such amount as determined by the broker or custodian, based on the applicable laws and regulations in Hong Kong. You are responsible for complying with any such pre-funding requirement imposed by your broker or custodian with respect to the Hong Kong Offer Shares you applied for.

By instructing your broker or custodian to apply for the Hong Kong Offer Shares on your behalf through the HKSCC EIPO channel, you (and, if you are joint applicants, each of you jointly and severally) are deemed to have instructed and authorized HKSCC to cause HKSCC Nominees (acting as nominee for the relevant HKSCC Participants) to arrange payment of the final Offer Price, brokerage, SFC transaction levy, the Hong Kong Stock Exchange trading fee and the AFRC transaction levy by debiting the relevant nominee bank account at the designated bank for your broker or custodian.

If you are applying through the **HK eIPO White Form** service, you may refer to the table below for the amount payable for the number of H Shares you have selected. You must pay the respective maximum amount payable on application in full upon application for Hong Kong Offer Shares.

(1) Maximum number of Hong Kong Offer Shares you may apply for and this is 50% of the Hong Kong Offer Shares initially offered.

(2) The amount payable is inclusive of brokerage, SFC transaction levy, the Stock Exchange trading fee and AFRC transaction levy. If your application is successful, brokerage will be paid to the Exchange Participants (as defined in the Listing Rules) or to the **HK eIPO White Form** Service Provider (for applications made through the application channel of the **HK eIPO White Form** service) while the SFC transaction levy, the Stock Exchange trading fee and the AFRC transaction levy will be paid to the SFC, the Stock Exchange and the AFRC, respectively.

No application for any other number of the Hong Kong Offer Shares will be considered and any such application is liable to be rejected.

5. Multiple Applications Prohibited

You or your joint applicant(s) shall not make more than one application for your own benefit, except where you are a nominee and provide the information of the underlying investor in your application as required under the paragraph headed " — Applications for Hong Kong Offer Shares — 3. Information Required to Apply" in this section. If you are suspected of submitting or cause to submit more than one application, all of your applications will be rejected.

Multiple applications made either through (i) the **HK eIPO White Form** service, (ii) HKSCC EIPO channel, or (iii) both channels concurrently are prohibited and will be rejected. If you have made an application through the **HK eIPO White Form** service or HKSCC EIPO channel, you or the person(s) for whose benefit you have made the application shall not apply for any International Offer Shares.

The H Share Registrar would record all applications into its system and identify suspected multiple applications with identical names and identification document numbers according to the Best Practice Note on Treatment of Multiple / Suspected Multiple Applications ("**Best Practice Note**") issued by the Federation of Share Registrars Limited.

Since applications are subject to personal information collection statements, identification document numbers displayed are redacted.

6. Terms and Conditions of an Application

By applying for Hong Kong Offer Shares through the **HK eIPO White Form** service or HKSCC EIPO channel, you (or as the case may be, HKSCC Nominees will do the following things on your behalf):

(a) undertake to execute all relevant documents and instruct and authorize us and/or the Sponsor-Overall Coordinators (or its agents or nominees), as our agent, to execute any documents for you and to do on your behalf all things necessary to register any Hong Kong Offer Shares allocated to you in your name or in the name of HKSCC Nominees as required by the Articles of Association, and (if you are applying through the HKSCC EIPO channel) to deposit the allotted Hong Kong Offer Shares directly into CCASS for the credit of your designated HKSCC Participant's stock account on your behalf;

(b) confirm that you have read and understand the terms and conditions and application procedures set out in this prospectus and the designated website of the **HK eIPO White Form** service (or as the case may be, the agreement you entered into with your broker or custodian), and agree to be bound by them;

(c) (if you are applying through the HKSCC EIPO channel) agree to the arrangements, undertakings and warranties under the participant agreement between your broker or custodian and HKSCC and observe the General Rules of HKSCC and the HKSCC Operational Procedures for giving application instructions to apply for Hong Kong Offer Shares;

(d) confirm that you are aware of the restrictions on offers and sales of shares set out in this prospectus and they do not apply to you, or the person(s) for whose benefit you have made the application;

(e) confirm that you have read this prospectus and any supplement to it and have only relied on the information and representations contained therein in making your application (or as the case may be, causing your application to be made), and will not rely on any other information or representations, except those contained in any supplement to this prospectus;

(f) agree that none of us, the Relevant Persons, the H Share Registrar and HKSCC is or will be liable for any information and representations not contained in this prospectus (and any supplement to it);

(g) agree to disclose the details of your application and your personal data and any other personal data which may be required about you and the person(s) for whose benefit you have made the application to us, the Relevant Persons, receiving bank(s), the H Share Registrar, HKSCC, HKSCC Nominees, the Hong Kong Stock Exchange, the SFC and any other statutory regulatory or governmental bodies or otherwise as required by laws, rules or regulations, for the purposes under the paragraph headed " — Personal Data — Purposes" and " — Personal Data — Transfer of personal data" in this section;

(h) agree (without prejudice to any other rights which you may have once your application (or as the case may be, HKSCC Nominees' application) has been accepted) that you will not rescind it because of an innocent misrepresentation;

(i) agree that subject to Section 44A(6) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance, any application made by you or HKSCC Nominees on your behalf cannot be revoked once it is accepted, which will be evidenced by the notification of the result of the ballot by the H Share Registrar by way of publication of the results at the time and in the manner as specified in the paragraph headed " — Publication of Results" in this section;

(j) confirm that you are aware of the situations specified in the paragraph headed " — Circumstances in which You Will Not Be Allocated Hong Kong Offer Shares" in this section;

(k) agree that your application or HKSCC Nominees' application, any acceptance of it and the resulting contract will be governed by and construed in accordance with the laws of Hong Kong;

(l) agree to comply with the Companies Ordinance, Companies (Winding Up and Miscellaneous Provisions) Ordinance, the Articles of Association, the PRC Companies Law and laws of any other place that apply to your application, and that neither we nor the Relevant Persons will breach any law inside and/or outside Hong Kong as a result of the acceptance of your offer to purchase, or any action arising from your rights and obligations under the terms and conditions contained in this prospectus;

(m) confirm that (a) your application or HKSCC Nominees' application on your behalf is not financed directly or indirectly by the Company, any of the directors, chief executives, substantial Shareholder(s) or existing shareholder(s) of the Company or any of its subsidiaries or any of their respective close associates; and (b) you are not accustomed or will not be

accustomed to taking instructions from the Company, any of the directors, chief executives, substantial shareholder(s) or existing shareholder(s) of the Company or any of its subsidiaries or any of their respective close associates in relation to the acquisition, disposal, voting or other disposition of the H Shares registered in your name or otherwise held by you;

(n) warrant that the information you have provided is true and accurate;

(o) confirm that you understand that we, our Directors and the Sponsor-Overall Coordinators will rely on your declarations and representations in deciding whether or not to make any allotment of any of the Hong Kong Offer Shares to you and that you may be prosecuted for making a false declaration;

(p) agree to accept the Hong Kong Offer Shares applied for, or any lesser number allocated to you under the application;

(q) declare and represent that this is the only application made and the only application intended by you to be made to benefit you or the person for whose benefit you are applying;

(r) represent, warrant and undertake that (i) you understand that the Hong Kong Offer Shares have not been and will not be registered under the U.S. Securities Act; and (ii) you and any person for whose benefit you are applying for the Hong Kong Offer Shares are outside the United States (as defined in Regulation S) or are a person described in paragraph (h)(3) of Rule 902 of Regulation S;

(s) undertake and confirm that you or the person(s) for whose benefit you have made the application have not applied for or taken up, or indicated an interest for, and will not apply for or take up, or indicate an interest for, any International Offer Shares nor have participated in the International Offering;

(t) confirm that you are aware of the restrictions on the Global Offering set out in this prospectus;

(u) (if you are making the application for your own benefit) warrant that no other application has been or will be made for your benefit by giving electronic application instructions to HKSCC directly or through the application channel of the **HK eIPO White Form** service or by any one as your agent or by any other person;

(v) (if you are making the application as an agent for the benefit of another person) warrant that: (i) no other application has been or will be made by you as agent for or for the benefit of that person or by that person or by any other person as agent for that person by giving application instructions to HKSCC or the **HK eIPO White Form** Service Provider; and (ii) you have due authority to give electronic application instructions on behalf of that other person as its agent; and

(w) if the laws of any place outside Hong Kong apply to your application, agree and warrant that you have complied with all these laws and none of us nor any Relevant Person will breach any of these laws as a result of the acceptance of your offer to purchase, or any action arising from your rights and obligations under the terms and conditions contained in this prospectus.

PUBLICATION OF RESULTS

Results of Allocation

You can check whether you are successfully allocated any Hong Kong Offer Shares through:

Platform		Date/Time
Applying through the **HK eIPO White Form** service or HKSCC EIPO channel:		
Website	The designated results of allocation at **www.hkeipo.hk/IPOResult** (alternatively: **www.tricor.com.hk/ipo/result**) with a "search by ID" function. The full list of (i) wholly or partially successful applicants using the **HK eIPO White Form** service and HKSCC EIPO channel, and (ii) the number of Hong Kong Offer Shares conditionally allotted to them, among other things, will be displayed on the "Allotment Results" page at **www.hkeipo.hk/IPOResult** (alternatively: **www.tricor.com.hk/ipo/result**).	24 hours, from 11:00 p.m. on Tuesday, October 27, 2026 to 12:00 midnight on Monday, November 2, 2026 (Hong Kong time)
	The Hong Kong Stock Exchange's website at **www.hkexnews.hk** and our website at **www.dsbj.com** which will provide links to the above mentioned websites of the H Share Registrar.	No later than 11:00 p.m. on Tuesday, October 27, 2026 (Hong Kong time).
Telephone	+852 3691 8488 — the allocation results telephone enquiry line provided by the H Share Registrar	Between 9:00 a.m. and 6:00 p.m., from Wednesday, October 28, 2026 to Monday, November 2, 2026 (Hong Kong time) on a business day

For those applying through HKSCC EIPO channel, you may also check with your broker or custodian from 6:00 p.m. on Monday, October 26, 2026 (Hong Kong time).

HKSCC Participants can log into FINI and review the allotment result from 6:00 p.m. on Monday, October 26, 2026 (Hong Kong time) on a 24-hour basis and should report any discrepancies on allotments to HKSCC as soon as practicable.

Allocation Announcement

We expect to announce the results of the final Offer Price, the level of indications of interest in the International Offering, the level of applications in the Hong Kong Public Offering and the basis of allocations of Hong Kong Offer Shares on the Hong Kong Stock Exchange's website at **www.hkexnews.hk** and our website at **www.dsbj.com** by no later than 11:00 p.m. on Tuesday, October 27, 2026 (Hong Kong time).

CIRCUMSTANCES IN WHICH YOU WILL NOT BE ALLOCATED HONG KONG OFFER SHARES

You should note the following situations in which no Hong Kong Offer Shares will be allocated to you or the person(s) for whose benefit you are applying for:

1. If your application is revoked:

Your application or the application made by HKSCC Nominees on your behalf may be revoked pursuant to Section 44A(6) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

2. If we or our agents exercise discretion to reject your application:

We, the Sponsor-Overall Coordinators, the H Share Registrar and our/their respective agents and nominees have full discretion to reject or accept any application, or to accept only part of any application, without giving any reasons.

3. If the allocation of Hong Kong Offer Shares is void:

The allocation of Hong Kong Offer Shares will be void if the Hong Kong Stock Exchange does not grant permission to list our Shares either:

- within three weeks from the closing date of the application lists; or
- within a longer period of up to six weeks if the Hong Kong Stock Exchange notifies us of that longer period within three weeks of the closing date of the application lists.

4. If:

- you make multiple applications or suspected multiple applications. You may refer to the paragraph headed " — Applications for the Hong Kong Offer Shares — 5. Multiple Applications Prohibited" in this section on what constitutes multiple applications;
- your application instruction is incomplete;
- your payment (or confirmation of funds, as the case may be) is not made correctly;
- the Underwriting Agreements do not become unconditional or are terminated; or
- we or the Sponsor-Overall Coordinators believe that by accepting your application, we or they would violate applicable securities or other laws, rules or regulations.

5. If there is money settlement failure for allotted H Shares:

Based on the arrangements between HKSCC Participants and HKSCC, HKSCC Participants will be required to hold sufficient application funds on deposit with their designated bank before balloting. After balloting of Hong Kong Offer Shares, the Receiving Bank will collect the portion of these funds required to settle each HKSCC Participant's actual Hong Kong Offer Share allotment from their designated bank.

There is a risk of money settlement failure. In the extreme event of money settlement failure by a HKSCC Participant (or its designated bank), who is acting on your behalf in settling payment for your allotted shares, HKSCC will contact the defaulting HKSCC Participant and its designated bank to determine the cause of failure and request such defaulting HKSCC Participant to rectify or procure to rectify the failure.

However, if it is determined that such settlement obligation cannot be met, the affected Hong Kong Offer Shares will be reallocated to the International Offering. Hong Kong Offer Shares applied for by you through the broker or custodian may be affected to the extent of the settlement failure. In the extreme case, you will not be allocated any Hong Kong Offer Shares due to the money settlement failure by such HKSCC Participant. None of us, the Relevant Persons, the H Share Registrar and HKSCC is or will be liable if Hong Kong Offer Shares are not allocated to you due to the money settlement failure.

DESPATCH/COLLECTION OF H SHARE CERTIFICATES AND REFUND OF APPLICATION MONIES

You will receive one H Share certificate for all Hong Kong Offer Shares allocated to you under the Hong Kong Public Offering (except pursuant to applications made through the HKSCC EIPO channel where the H Share certificate will be deposited into CCASS as described below).

We will not issue: (i) temporary document of title in respect of our H Shares; or (ii) receipt for sums paid on application.

H Share certificates will only become valid evidence of title at 8:00 a.m. on Wednesday, October 28, 2026 (Hong Kong time), provided that the Global Offering has become unconditional and the right of termination described in the section headed "Underwriting" has not been exercised. Investors who trade H Shares prior to the receipt of H Share certificates or the H Share certificates becoming valid evidence of title do so entirely at their own risk.

The right is reserved to retain any H Share certificate(s) and (if applicable) any surplus application monies pending clearance of application monies.

The following sets out the relevant procedures and time:

	HK eIPO White Form service	**HKSCC EIPO channel**
Despatch/collection of H Share certificate		
For application of 1,000,000 Hong Kong Offer Shares or more	Collection in person from our H Share Registrar at Tricor Investor Services Limited, at 17/F, Far East Finance Centre, 16 Harcourt Road, Hong Kong.	H Share certificate(s) will be issued in the name of HKSCC Nominees, deposited into CCASS and credited to your designated HKSCC Participant's stock account.
	Time: from 9:00 a.m. to 1:00 p.m. on Wednesday, October 28, 2026 (Hong Kong time). If you are an individual, you must not authorize any other person to collect for you. If you are a corporate applicant, your authorized representative must bear a letter of authorization from your corporation stamped with your corporation's chop.	No action by you is required.
	Both individuals and authorized representatives must produce, at the time of collection, evidence of identity acceptable to the H Share Registrar.	
	Note: If you do not collect your H Share certificate(s) personally within the time above, it/they will be sent to the address specified in your application instructions by ordinary post at your own risk.	

	HK eIPO White Form service	HKSCC EIPO channel
For application of less than 1,000,000 Hong Kong Offer Shares	Your H Share certificate(s) will be sent to the address specified in your application instructions by ordinary post at your own risk. **Date:** Tuesday, October 27, 2026	
Refund mechanism for surplus application monies paid by you		
Date	Wednesday, October 28, 2026	Subject to the arrangement between you and your broker or custodian
Responsible party	H Share Registrar	Your broker or custodian
Application monies paid through single bank account	Any refund will be despatched to the bank account in the form of **HK eIPO White Form** e-Auto Refund payment instructions	Your broker or custodian will arrange refund to your designated bank account subject to the arrangement between you and it.
Application monies paid through multiple bank account	Refund check(s) will be dispatched to the address as specified in your application instructions by ordinary post at your own risk	

Except in the event of any Severe Weather Signals (as defined below) in force in Hong Kong in the morning of the business day before the Listing Date rendering it impossible for the relevant H Share certificates to be dispatched to HKSCC in a timely manner, the Company shall procure the H Share Registrar to arrange for delivery of the supporting documents and H Share certificates in accordance with the contingency arrangements as agreed between them. You may refer to " — Severe Weather Arrangements" in this section.

SEVERE WEATHER ARRANGEMENTS

The Opening and Closing of the Application Lists

The application lists will not open or close on Friday, October 23, 2026 if, there is (are):

- a tropical cyclone warning signal number 8 or above;
- a "black" rainstorm warning; and/or
- an "extreme conditions" announcement issued after a super typhoon ("**Extreme Conditions**"), (collectively, "**Severe Weather Signals**")

in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon on Friday, October 23, 2026.

Instead they will open between 11:45 a.m. and 12:00 noon and/or close at 12:00 noon on the next business day which does not have any of those warnings in Hong Kong in force at any time between 9:00 a.m. and 12:00 noon.

Prospective investors should be aware that a postponement of the opening/closing of the application lists may result in a delay in the Listing Date. Should there be any changes to the dates mentioned in the section headed "Expected Timetable" in this prospectus, an announcement will be made and published on the Hong Kong Stock Exchange's website at **www.hkexnews.hk** and our website at **www.dsbj.com** of the revised timetable.

If any of those warnings is hoisted on Tuesday, October 27, 2026, the H Share Registrar will make appropriate arrangements for the delivery of the H Share certificates to the CCASS Depository's service counter so that they would be available for trading on Wednesday, October 28, 2026.

If any of those warnings is hoisted on Tuesday, October 27, 2026, for application of less than 1,000,000 Hong Kong Offer Shares, the despatch of physical H Share certificate(s) will be made by ordinary post when the post office re-opens after any of those warnings is lowered or cancelled (e.g. in the afternoon of Tuesday, October 27, 2026 or on Wednesday, October 28, 2026).

If any of those warnings is hoisted on Wednesday, October 28, 2026, for application of 1,000,000 Hong Kong Offer Shares or more, physical H Share certificate(s) will be available for collection in person at the H Share Registrar's office after any of those warnings is lowered or cancelled (e.g. in the afternoon of Wednesday, October 28, 2026 or on Thursday, October 29, 2026).

Prospective investors should be aware that if they choose to receive physical H Share certificates issued in their own name, there may be a delay in receiving the H Share certificates.

ADMISSION OF OUR H SHARES INTO CCASS

If the Hong Kong Stock Exchange grants the listing of, and permission to deal in, our H Shares and we comply with the stock admission requirements of HKSCC, our H Shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the Listing Date or any other date HKSCC chooses. Settlement of transactions between Exchange Participants is required to take place in CCASS on the second settlement day after any trading day.

All activities under CCASS are subject to the General Rules of HKSCC and HKSCC Operational Procedures in effect from time to time.

All necessary arrangements have been made enabling the H Shares to be admitted into CCASS.

You should seek the advice of your broker or other professional advisor for details of the settlement arrangement as such arrangements may affect your rights and interests.

PERSONAL DATA

The following Personal Information Collection Statement applies to any personal data collected and held by us, the Relevant Persons, the H Share Registrar and the receiving bank(s) about you in the same way as it applies to personal data about applicants other than HKSCC Nominees. This personal data may include client identifier(s) and your identification information. By giving application instructions to HKSCC, you acknowledge that you have read, understood and agree to all of the terms of the Personal Information Collection Statement below.

Personal Information Collection Statement

This Personal Information Collection Statement informs applicant for, and holder of, Hong Kong Offer Shares, of the policies and practices of ours and the H Share Registrar in relation to personal data and the Personal Data (Privacy) Ordinance (Chapter 486 of the Laws of Hong Kong).

Reasons for the Collection of Your Personal Data

It is necessary for applicants and registered holders of Hong Kong Offer Shares to ensure that personal data supplied to us or our agents and the H Share Registrar is accurate and up-to-date when applying for Hong Kong Offer Shares or transferring Hong Kong Offer Shares into or out of their names or in procuring the services of the H Share Registrar.

Failure to supply the requested data or supplying inaccurate data may result in your application for the Hong Kong Offer Shares being rejected, or in the delay or the inability of us or the H Share Registrar to effect transfers or otherwise render their services. It may also prevent or delay registration or transfers of Hong Kong Offer Shares which you have successfully applied for and/or the despatch of H Share certificate(s) to which you are entitled.

It is important that applicants for and holders of Hong Kong Offer Shares inform us and the H Share Registrar immediately of any inaccuracies in the personal data supplied.

Purposes

Your personal data may be used, held, processed, and/or stored (by whatever means) for the following purposes:

- processing your application and refund check and **HK eIPO White Form** e-Auto Refund payment instruction(s), where applicable, verification of compliance with the terms and application procedures set out in this prospectus and announcing results of allocation of Hong Kong Offer Shares;
- compliance with applicable laws and regulations in Hong Kong and elsewhere;
- registering new issues or transfers into or out of the names of the holders of our H Shares including, where applicable, HKSCC Nominees;
- maintaining or updating our register of members;
- verifying identities of applicants for and holders of our H Shares and identifying any duplicate applications for our H Shares;
- facilitating Hong Kong Offer Shares balloting;
- establishing benefit entitlements of holders of our H Shares, such as dividends, rights issues, bonus issues, etc.;
- distributing communications from us and our subsidiaries;
- compiling statistical information and profiles of the holder of our H Shares;
- disclosing relevant information to facilitate claims on entitlements; and
- any other incidental or associated purposes relating to the above and/or to enable us and the H Share Registrar to discharge our or their obligations to applicants and holders of our H Shares and/or regulators and/or any other purposes to which the applicants and holders of the H Shares may from time to time agree.

Transfer of Personal Data

Personal data held by us and the H Share Registrar relating to the applicants for and holders of Hong Kong Offer Shares will be kept confidential, but we and the H Share Registrar may, to the extent necessary for achieving any of the above purposes, disclose, obtain or transfer (whether within or outside Hong Kong) the personal data to, from or with any of the following:

- our appointed agents such as financial advisers, receiving bank(s) and overseas principal share registrar;
- HKSCC or HKSCC Nominees, who will use the personal data and may transfer the personal data to the H Share Registrar, in each case for the purposes of providing its services or facilities or performing its functions in accordance with its rules or procedures and operating FINI and CCASS (including where applicants for the Hong Kong Offer Shares request a deposit into CCASS);
- any agents, contractors or third-party service providers who offer administrative, telecommunications, computer, payment or other services to us or the H Share Registrar in connection with their respective business operation;
- the Hong Kong Stock Exchange, the SFC and any other statutory regulatory or governmental bodies or otherwise as required by laws, rules or regulations including for the purpose of the Hong Kong Stock Exchange's administration of the Listing Rules and the SFC's performance of its statutory functions; and

- any persons or institutions with which the holders of Hong Kong Offer Shares have or propose to have dealings, such as their bankers, solicitors, accountants or stockbrokers, etc.

Retention of Personal Data

We and the H Share Registrar will keep the personal data of the applicants and holders of Hong Kong Offer Shares for as long as necessary to fulfill the purposes for which the personal data were collected. Personal data which is no longer required will be destroyed or dealt with in accordance with the Personal Data (Privacy) Ordinance (Chapter 486 of the Laws of Hong Kong).

Access to and Correction of Personal Data

Applicants for and holders of Hong Kong Offer Shares have the right to ascertain whether we or the H Share Registrar hold their personal data, to obtain a copy of that data, and to correct any data that is inaccurate. We and the H Share Registrar have the right to charge a reasonable fee for the processing of such requests. All requests for access to data or correction of data should be addressed to us and the H Share Registrar, at our and their registered address disclosed in the section headed "Corporate Information" in this prospectus or as notified from time to time, for the attention of the secretary, or the H Share Registrar for the attention of the privacy compliance officer.

The following is the text of a report set out on pages IA-1 to IA-2, received from the Company's reporting accountants, Confucius International CPA Limited, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this prospectus. It is prepared and addressed to the directors of the Company and to the Joint Sponsors pursuant to the requirements of HKSIR 200, Accountants' Reports on Historical Financial Information in Investment Circulars issued by the Hong Kong Institute of Certified Public Accountants.

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF SUZHOU DONGSHAN PRECISION MANUFACTURING CO., LTD. AND UBS SECURITIES HONG KONG LIMITED, HAITONG INTERNATIONAL CAPITAL LIMITED, GF CAPITAL (HONG KONG) LIMITED AND CITIC SECURITIES (HONG KONG) LIMITED

Introduction

We report on the historical financial information of Suzhou Dongshan Precision Manufacturing Co., Ltd. (the "Company") and its subsidiaries (together, the "Group") set out on pages IA-3 to IA-184, which comprises the consolidated statements of financial position of the Group and the statements of financial position of the Company as at December 31, 2023, 2024 and 2025 and June 30, 2026, the consolidated statements of profit or loss, the consolidated statements of comprehensive income, the consolidated statements of changes in equity and the consolidated statements of cash flows for each of the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2026 (the "Track Record Period") and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages IA-3 to IA-184 forms an integral part of this report, which has been prepared for inclusion in the prospectus of the Company dated October 20, 2026 (the "Prospectus") in connection with the initial listing of H shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited.

Directors' Responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting Accountants' Responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200, *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether

due to fraud or error. In making those risk assessments, the reporting accountants considers internal control relevant to the entity's preparation of Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the Company's and the Group's financial position as at December 31, 2023, 2024 and 2025 and June 30, 2026 and of the Group's financial performance and cash flows for the Track Record Period in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information.

Review of stub period comparative financial information

We have reviewed the stub period comparative financial information of the Group which comprises the consolidated statement of profit or loss, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the six months ended June 30, 2025 and other explanatory information (the "Stub Period Comparative Financial Information"). The directors of the Company are responsible for the preparation of the Stub Period Comparative Financial Information in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information. Our responsibility is to express a conclusion on the Stub Period Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Stub Period Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information.

Report on Matters under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page IA-3 have been made.

Dividends

We refer to Note 13 to the Historical Financial Information which contains information about the dividends paid by the Company in respect of the Track Record Period.

I HISTORICAL FINANCIAL INFORMATION OF THE GROUP

Preparation of Historical Financial Information

Set out below is the Historical Financial Information which forms an integral part of this accountants' report.

The consolidated financial statements of the Group for the Track Record Period, on which the Historical Financial Information is based, were audited by Confucius International CPA Limited in accordance with Hong Kong Standards on Auditing issued by HKICPA ("Underlying Financial Statements").

The Historical Financial Information is presented in Renminbi ("RMB") and all values are rounded to the nearest thousand (RMB'000) except when otherwise indicated.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. GENERAL INFORMATION

Suzhou Dongshan Precision Manufacturing Co., Ltd.(蘇州東山精密製造股份有限公司) (hereinafter referred to as the "Company"), formerly known as Suzhou Dongshan Sheet Metal Co., Ltd. (蘇州市東山鈑金有限責任公司), is a joint stock company with limited liability incorporated in the People's Republic of China (the "PRC") on December 24, 2007. With the approval of the China Securities Regulatory Commission, the Company completed its initial public offering and was listed on the Shenzhen Stock Exchange (stock code: 002384) on April 9, 2010. The registered office and principal place of business of the Company is located at No. 288 Shanfeng Road, Wuzhong Economic Development Zone, Suzhou City, Jiangsu Province, PRC. The ultimate controllers of the Company are Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen ("the ultimate controlling shareholders").

The Company and its subsidiaries (hereinafter collectively referred to as "the Group") belong to the computer, communication and other electronic equipment manufacturing industry, and are primarily engaged in research and development, manufacturing and sales of core devices for intelligent interconnection, including electronic circuits (PCBs), LED display devices, touch panels, LCMs, precision components, optical components, optical modules and automotive components, etc.

The Company's primary subsidiaries during the Track Record Period are set out in Note 17.

The Historical Financial Information are presented in Renminbi ("RMB"), which is also the functional currency of the Company, and all values are rounded to the nearest thousands (RMB'000) except when otherwise indicated.

The statutory consolidated financial statements of the Group for the years ended December 31, 2023, 2024 and 2025 prepared in accordance with the relevant accounting principles in the PRC were audited by Pan-China Certified Public Accountants LLP (天健會計師事務所(特殊普通合夥)) which was the certified public accountants registered in the PRC.

2. BASIS OF PREPARATION

The Historical Financial Information of the Group have been prepared in accordance with all applicable International Financial Reporting Standards ("IFRS Accounting Standards") issued by the International Accounting Standards Board ("IASB"). The Historical Financial Information has been prepared under the historical cost convention, as modified by the revaluation of financial assets and liabilities measured at fair value through profit or loss ("FVTPL") and financial assets measured at fair value through other comprehensive income ("FVOCI").

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Historical Financial Information are disclosed in Note 4 below.

New standards, amendments and interpretations to the existing standards that are effective during the Track Record Period have been adopted by the Group consistently throughout the years presented, unless prohibited by the relevant standard to apply retrospectively.

Other than those material accounting policies information as disclosed elsewhere in this Historical Financial Information, a summary of the other accounting policies information has been set out in Note 46 to this Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

2. BASIS OF PREPARATION (Continued)

2.1 New Standards and Amendments to Standards Not Yet Adopted

Standards and amendments to standards that have been issued but not yet effective and not been early adopted by the Group during the Track Record Period are as follows:

Standards and amendments	Effective for accounting periods beginning on or after
Amendments to IFRS 10 and IAS 28 'Sale or Contribution of Assets between an Investor and its Associate or Joint Venture'	To be determined
Amendments to IAS 28 'Fair Value Option for Investments in Associates or Joint Ventures'	January 1, 2027
IFRS18 'Presentation and Disclosure in Financial Statements'	January 1, 2027
IFRS 19 'Subsidiaries without Public Accountability: Disclosures'	January 1, 2027
IAS 21 Translation to a Hyper inflationary Presentation Currency	January 1, 2027
IFRS 20 'Regulatory Assets and Regulatory Liabilities'	January 1, 2029

Except for the impact of IFRS18 mentioned below, other new/amended standards are either not relevant to the Group or not expected to have a material impact on the Group's consolidated financial statements when they become effective.

IFRS18 Presentation and Disclosure in Financial Statements

IFRS18 "Presentation and Disclosure in Financial Statements", which sets out requirements on presentation and disclosures in financial statements, will replace IAS 1 "Presentation of Financial Statements". This new IFRS Accounting Standard, while carrying forward many of the requirements in IAS 1, introduces new requirements to present specified categories and defined subtotals in the statement of profit or loss; provide disclosures on management-defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. In addition, some IAS 1 paragraphs have been moved to IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" and IFRS 7 "Financial Instruments: Disclosures". Minor amendments to IAS 7 "Statement of Cash Flows" and IAS 33 "Earnings per Share" are also made.

IFRS18 will be effective for annual periods beginning on or after January 1, 2027, with early application permitted. The application of IFRS18 is not expected to have significant impact on the Group's financial position and performance, but may affect the presentation of the statement of profit or loss and disclosures in the future financial statements.

3. FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management seeks a balance between risk and return, minimizes the adverse impact of risk on the Group's finance performance and maximizes the interests of shareholders and other equity investors. Based on this risk management objective, the basic strategy of the Group's risk management is to identify and analyze the various risks faced by the Group, establish appropriate risk tolerance thresholds and timely and reliably supervise various risks to control them within a limited range.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.1 Market Risk

(a) Foreign Exchange Risk

Foreign exchange risk arises when future commercial transactions or recognized assets and liabilities are denominated in a currency that is not the respective functional currency of the Company and its subsidiaries. The Group manages its foreign exchange risk by performing regular reviews of the Group's net foreign exchange exposures, and adopts multiple approaches including natural hedging, or financially hedge by foreign currency financial derivatives instruments, to effectively control foreign exchange risks, and make the foreign exchange exposures under the manageable level, so as to mitigate the adverse impacts of foreign exchange fluctuations on financial expenses.

As at December 31, 2023, 2024 and 2025 and June 30, 2026, the Group's major financial assets/liabilities exposed to foreign exchange risk, representing those financial assets/liabilities denominated in United States dollar ("USD") and Hong Kong dollar ("HKD"), and included in a group entity with different functional currency:

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Financial assets denominated in:				
USD	10,111,571	9,885,967	8,658,261	9,296,434
Others	44,252	92,104	88,129	516,096

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Financial liabilities denominated in:				
USD	3,650,144	3,308,383	3,288,154	2,826,809
HKD	–	–	2,664,711	2,995,952
Others	49,754	547,286	17,940	408,264

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.1 Market Risk (Continued)

As shown in the table above, the Group is primarily exposed to changes in USD and HKD exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from USD and HKD denominated financial instruments is as below:

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
USD exchange rate -					
Increase 5%	323,071	328,879	268,505	145,442	323,481
Decrease 5%	(323,071)	(328,879)	(268,505)	(145,442)	(323,481)
HKD exchange rate -					
Increase 5%	60	34	(133,038)	82	(149,580)
Decrease 5%	(60)	(34)	133,038	(82)	149,580

Other foreign currencies of changes have no significant impact on foreign exchange risk.

(b) Interest Rate Risk

The Group's interest rate risk primarily arises from interest-bearing borrowings. Borrowings issued at floating rates expose the Group to cash flow interest rate risk and borrowings issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the proportion of borrowings issued at floating rates and fixed rates based on the market environment and maintains an appropriate combination of financial instruments through regular review and monitoring.

As at December 31, 2023, 2024 and 2025 and June 30, 2026, total borrowings of the Group which were bearing at floating rates amounted to approximately RMB1,406,782,000, RMB2,392,686,000, RMB6,237,185,000 and RMB7,178,929,000, respectively.

If interest rate had been 50 basis points higher or lower with all other variables held constant, the profit before tax would decrease/increase approximate RMB7,034,000, RMB11,963,000, RMB31,186,000 and RMB35,895,000 for the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2026, respectively.

Considering the repricing or maturity date, the fair value interest rate risk arises from borrowings and bank balances carried at fixed rates is not significant for the Group.

(c) Price Risk

The Group is mainly exposed to equity price risk arising from investments held by the Group that are classified either as FVTPL (Note 28) or FVOCI (Note 16). To manage its price risk arising from the investments, the Group diversifies its investment portfolio. The investments are mainly made for strategic purposes. Each investment is managed by the management on a case-by-case basis.

Sensitivity analysis is performed by the management to assess the exposure of the Group's financial results to equity price risk of FVTPL and FVOCI at the end of each Track Record Period. If prices of the

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.1 Market Risk (Continued)

respective instruments held by the Group had been 5%, 5%, 5% and 5% higher/lower as at December 31, 2023, 2024 and 2025 and June 30, 2026, profit before tax for the year/period would have been approximately RMB2,098,000, RMB(239,000), RMB4,494,000 and RMB30,752,000, higher/lower as a result of gains/losses on financial instruments classified as at FVTPL, other comprehensive income before tax would have been approximately RMB28,432,000, RMB29,313,000, RMB36,413,000 and RMB50,846,000, higher/lower as a result of fair value changes on financial instruments classified as at FVOCI.

The Group is primarily engaged in the PCB business, using copper and gold as its key metallic raw materials. It also operates a precision manufacturing segment that primarily uses aluminum as its major raw material input. Prices of these metals are highly volatile due to various external factors beyond the Group's control, including but not limited to: (i) availability of upstream mineral resources; (ii) global supply-demand imbalances; (iii) logistics disruptions and fluctuations in freight costs; (iv) force majeure events such as natural disasters; and (v) macroeconomic uncertainties.

Such price volatility directly leads to fluctuations in procurement costs, which in turn increases volatility in operating profit and adversely affects business stability. To manage these price risks, the Group undertakes economic hedges using derivative financial instruments to hedge price risks associated with its key raw materials. For hedging relationships that qualify for hedge accounting under applicable accounting standards, the Group applies hedge accounting to appropriately reflect the effect of hedging activities in reducing volatility in financial performance and to stabilize the procurement costs of essential raw materials.

Under its risk management strategy and objective, the Group designates cash flow hedge relationship when using commodity futures contracts hedging commodity price risk associated with the cash flows of highly probable forecast procurement transactions. The hedged items are the same with the underlying indexes in the commodity futures to lock in commodity price fluctuations.

3.2 Credit Risk

Credit risk arises from cash and cash equivalents, restricted cash and term deposits, as well as trade and notes receivables, other receivables and financial assets measured at FVOCI. The carrying amount of each class of the above financial assets represents the Group's maximum exposure to credit risk in relation to the corresponding class of financial assets.

(a) Risk Management

To manage this risk, cash and cash equivalents as well as restricted cash and term deposits are mainly placed with reputable financial institutions which are all high-credit-quality financial institutions.

To manage risk from trade and notes receivables as well as other receivables and financial assets measured at FVOCI, the Group has policies in place to ensure that credit terms are made to counterparties with an appropriate credit history and the management performs ongoing credit evaluations of the counterparties. It also has continuous monitoring procedures to ensure the collection of the receivables as scheduled and follow up action is taken to recover overdue debts, if any.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets

The Group has four types of financial assets that are subject to the expected credit loss model:

- Cash and cash equivalents, restricted cash and term deposits;
- Trade receivables;
- Notes Receivables at Amortized Cost and Notes Receivables at FVOCI, and
- Other receivables.

Credit risk of cash and cash equivalents and restricted cash and term deposits

Cash and cash equivalents and restricted cash and term deposits are mainly placed with high-credit rating financial institutions. There has been no recent history of default in relation to these financial institutions. The expected credit loss was immaterial as at December 31, 2023, 2024 and 2025 and June 30, 2026.

Credit risk of trade and notes receivables

(i) Trade receivables

The Group applies the IFRS 9 simplified approach to measure expected credit loss ("ECL") which uses a lifetime expected loss allowance for all trade receivables regardless of whether there exists a significant financing component.

To measure ECL, trade receivables have been grouped based on shared credit risk characteristics and aging.

The Group also made individual assessment on the recoverability of its trade receivables for certain customers based on historical settlement records.

The historical loss rates are calculated based on the historical payment profiles of customers and the corresponding historical incurred credit losses. The historical loss rates are adjusted to reflect the forward-looking information on macroeconomic factors as well as the credit rating analysis of respective customers and other external data which have impacts to the ability of the customers to settle the receivables. The Group has identified the Gross Domestic Product ("GDP") of the countries in which it sells its goods to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

Trade receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include the failure of a debtor to engage in a repayment plan with the Group and other indicators of severe financial difficulties.

Trade Receivables

On that basis, the loss allowance as at December 31, 2023, 2024 and 2025 and June 30, 2026 were determined as follows for trade receivables:

As at December 31, 2023, the loss allowance of individually impaired trade receivables is determined as follows:

Assess individually:

	Gross carrying amount	ECL rate	Loss allowance	Reason
	RMB'000		*RMB'000*	
Trade receivables	221,542	99.70%	220,878	Financial difficulty

As at December 31, 2024, the loss allowance of individually impaired trade receivables is determined as follows:

Assess individually:

	Gross carrying amount	ECL rate	Loss allowance	Reason
	RMB'000		*RMB'000*	
Trade receivables	58,220	98.79%	57,514	Financial difficulty

As at December 31, 2025, the loss allowance of individually impaired trade receivables is determined as follows:

Assess individually:

	Gross carrying amount	ECL rate	Loss allowance	Reason
	RMB'000		*RMB'000*	
Trade receivables	176,594	92.65%	163,612	Financial difficulty

As at June 30, 2026					
Expected loss rate	0.38%	16.01%	65.93%	100.00%	
Gross carrying amount (RMB'000)	2,965,572	16,998	182	1,241	2,983,993
Loss allowance provision (RMB'000)	11,281	2,721	120	1,241	15,363

The management of the Group determined the ECL rates for portfolio of trade receivables with reference to past-due status of such balances by estimating their default rates taking into account the historical information and forward-looking information.

As at the end of each Track Record Period, the Group assessed the historical observed default rates and the forward-looking estimates, respectively. The management of the Group reviewed the portfolio of customers contributing the trade receivables balances for the respective past-due time band throughout the Track Record Period and noted that the majority of the balances of the respective past-due time band were due from similar portfolio of customers. Furthermore, the Group incorporated two new portfolios, namely the traditional automobile portfolio and optical modules portfolio, at the end of 2025 through business

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets (Continued)

(i) Trade receivables (Continued)

combinations. The Group assessed these customers' financial condition, past settlement history, business relationship with the Group and other factors such as current market conditions and industry information, and considered that the credit risk for the same portfolio of customers remains approximately the same throughout the Track Record Period. Accordingly, the same ECL rates were adopted for each respective past-due time band of integrated business portfolio throughout Track Record Period.

The loss allowances for trade receivables reconcile to the opening loss allowances are as follows:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Opening loss allowance	990,803	480,982	297,181	297,181	409,479
Loss allowance recognized/ (reversal), net	38,586	41,233	63,858	(9,857)	(3,003)
Loss allowance written off (i)	(550,939)	(229,879)	(4,644)	(1,634)	(148,238)
Currency translation differences	2,149	4,845	(2,132)	1,611	(5,565)

Closing loss allowance	**480,982**	**297,181**	**409,479**	**287,301**	**252,673**

(i) In 2023, 2024 and 2025 and the six months ended June 30, 2026, the Group wrote off receivables from customers who had filed for bankruptcy or were in financial difficulties, upon obtaining board approval.

(ii) Notes Receivables at Amortized Cost and Notes Receivables at FVOCI

The Group measured provisions for impairment of notes receivables based on the lifetime ECL and assessed that there was no significant credit risk associated with its bank acceptance notes issued by large-sized banks as the Group did not expect that there would be any significant losses from non-performance by these reputable banks. For the commercial acceptance notes and bank acceptance notes issued by small and medium-sized banks, which are usually settled within 6 months to 1 year from the respective issuance date, the Group provided RMB17,000, RMB45,000, nil and nil as at December 31, 2023, 2024 and 2025 and June 30, 2026, respectively.

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets (Continued)

(ii) Notes Receivables at Amortized Cost and Notes Receivables at FVOCI (Continued)

Movements on the provision of ECL for notes receivables at amortized cost and notes receivables at FVOCI are as follows:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Opening loss allowance	243	17	45	45	–
Loss allowance recognized/ (reversed), net	(226)	28	(45)	45	–
Closing loss allowance	**17**	**45**	**–**	**90**	**–**

(iii) Other Receivables

Other receivables at the end of each of the periods are mainly comprised of deposits, export tax refund and others. The Group considers the probability of default upon initial recognition of the assets and whether there has been significant increase in credit risk on an ongoing basis throughout Track Record Period. To assess whether there is a significant increase in credit risk, the Group compares risk of a default occurring on the assets as of the reporting date with the risk of default as of the date of initial recognition. Especially the following indicators are incorporated:

- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant impact on the debtor's ability to meet its obligations;
- external credit rating of the counterparty;
- actual or expected significant adverse changes in the operating results of the debtor; and
- significant changes in the expected performance and behavior of the debtor, including changes in the payment status of debtor.

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 365 days past due in making a contractual payment.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets (Continued)

(iii) Other Receivables (Continued)

If the credit risk of the asset is in line with original expectations, the Group categorizes the asset as performing and recognizes 12 months expected credit losses (Stage 1). If a significant credit risk of the asset has occurred compared to original expectations or the credit is impaired, the asset is categorized as underperforming or non-performing and lifetime expected credit losses are recognized (Stages 2 and 3):

Set out below is the information about credit risk exposure on the Group's other receivables:

	Stage 1	Stage 2	Stage 3	Total
As at December 31, 2023

3.3 Liquidity Risk

The Group intends to maintain sufficient cash and cash equivalents. Due to the dynamic nature of the underlying business, the policy of the Group is to regularly monitor the Group's liquidity risk and to maintain adequate liquid assets such as cash and cash equivalents and term deposits or to retain adequate financing arrangements to meet the Group's liquidity requirements.

The tables below analyze the Group's financial liabilities that will be settled into relevant maturity groupings based on the remaining period at each balance sheet date to their contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due for the corresponding period equal their carrying balances as the impact of discounting is not significant.

The interest rate of borrowings and lease liabilities are disclosed in Note 30 and Note 20, respectively.

3.4 Capital Management

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximize shareholders' value.

The Group manages its capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Group may issue new shares, sell assets to reduce debt or raise additional funding from shareholders or banks as and when necessary. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026.

The Group monitors capital on the basis of the debt to asset ratio as at December 31, 2023, 2024 and 2025 and June 30, 2026 as follows:

	As at December 31			As at June 30
	2023	2024	2025	2026
Total assets *(RMB'000)*	43,808,753	45,573,749	60,250,538	69,167,413
Total liabilities *(RMB'000)*	25,618,396	26,687,646	38,548,699	44,618,340
Debt to asset ratio	58.48%	58.56%	63.98%	64.51%

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.5 Fair Value Estimation

(a) Determination of Fair Value and the Fair Value Hierarchy of Financial Instruments

This note provides information on how the Group determines the fair values of various financial assets and liabilities.

For financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The Group

(i) The timing of transfers is determined at the date of the event or change in circumstances that caused the transfers. During the Track Record Period, there was no transfer between Level 1 and Level 2.

(ii) The fair value of wealth management products issued by banks is determined using a market approach, with reference to the unadjusted indicative net asset values quoted by the issuing banks as at the reporting date. These indicative fair value take into account the expected investment returns of the products. No significant unobservable inputs are applied. The measurements are classified as Level 2 in the fair value hierarchy.

The fair value of derivative financial assets and liabilities, which comprise foreign currency forwards, foreign currency option and foreign exchange swap, are determined as at the reporting date. The fair value of foreign currency option is measured using option valuation models (such as the binomial tree model or the Black-Scholes model), with key valuation inputs including volatility and forward exchange rates. The fair value of foreign currency forwards and foreign exchange swap are measured using the discounted cash flow method, with the key valuation input being forward exchange rates. These fair value measurements are categorised within Level 2 of the fair value hierarchy.

3. FINANCIAL RISK MANAGEMENT (Continued)

3.5 Fair Value Estimation (Continued)

(b) Cash flow hedges

The Group's cash flow hedging instruments include specific foreign currency forward contracts and commodity futures contracts, which are designated to hedge against fluctuations in future cash flows of the hedged items. The hedged items comprise firm commitments and forecast transactions. The line items in the consolidated statements of profit or loss that include the reclassification adjustment are revenue and cost of sales respectively. Among derivative financial instruments, the hedging instruments designated by the Group as cash flow hedges are set out below:

	As at December 31, 2023			Year ended December 31, 2023	As at December 31, 2023
	Carrying amount of hedging instruments		Hedged risk		
	Derivative financial assets	Derivative financial liabilities		Effect on other comprehensive income during the current year	Accumulated effect on other comprehensive income
	RMB'000	*RMB'000*		*RMB'000*	*RMB'000*
Foreign currency forwards	7,150	33,132	Foreign currency risk	39,915	(17,554)

	As at December 31, 2024			Year ended December 31, 2024	As at December 31, 2024
	Carrying amount of hedging instruments		Hedged risk		
	Derivative financial assets	Derivative financial liabilities		Effect on other comprehensive income during the current year	Accumulated effect on other comprehensive income
	RMB'000	*RMB'000*		*RMB'000*	*RMB'000*
Foreign currency forwards	288	8,347	Foreign currency risk	13,126	(4,429)

	As at December 31, 2025			Year ended December 31, 2025	As at December 31, 2025
	Carrying amount of hedging instruments		Hedged risk		
	Derivative financial assets	Derivative financial liabilities		Effect on other comprehensive income during the current year	Accumulated effect on other comprehensive income
	RMB'000	*RMB'000*		*RMB'000*	*RMB'000*

	47,182	**22,387**		**40,974**	**36,545**

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.5 Fair Value Estimation (Continued)

(b) Cash flow hedges (Continued)

	As at June 30, 2026			Six months ended June 30, 2026	As at June 30, 2026
	Carrying amount of hedging instruments		Hedged risk		
	Derivative financial assets	Derivative financial liabilities		Effect on other comprehensive income during the current period	Accumulated effect on other comprehensive income
	RMB'000	*RMB'000*		*RMB'000*	*RMB'000*
Commodity futures contracts	334	39,093	Commodity price risk	(49,096)	(31,881)
Foreign currency forwards	16,191	94,630	Foreign currency risk	(96,172)	(76,842)
	16,525	**133,723**		**(145,268)**	**(108,723)**

The gain and loss arising from the ineffective portion of cash flow hedges during the Track Record Period was immaterial.

(c) The Group's Valuation Process

For the financial assets and financial liabilities, including level 3 fair values, the Group's finance department performs the valuations for financial reporting purpose. The finance department reports the valuation results to the management.

(d) Transfers between levels in the hierarchy

For the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025, there were no transfers into or out of Level 3 fair value measurements of the Group's financial instruments. For the six months ended June 30, 2026, certain financial assets were transferred out of level 3 of fair value hierarchy classifications mainly as a result of the conversion of unlisted securities into tradable listed securities.

(i) The Group determines the fair value as at the reporting date based on the reported net asset values.

Other than described above, there were no significant unobservable inputs that materially affect its fair values.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.5 Fair Value Estimation (Continued)

(f) Valuation Inputs and Relationships to Fair Value (Continued)

If the EV/EBITDA ratio had been 1% higher/lower, the fair values of the equity instruments at FVOCI held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately RMB737,000, RMB737,000, RMB591,000 and RMB243,000 higher/lower, respectively.

If the P/B ratio had been 1% higher/lower, the fair values of the equity instruments at FVOCI held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately nil, RMB14,000, RMB919,000 and RMB252,000 higher/lower, respectively.

If the P/S ratio had been 1% higher/lower, the fair values of the equity instruments at FVTPL held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately nil, RMB220,000, nil and nil higher/lower, respectively.

If the EV/EBITDA ratio had been 1% higher/lower, the fair values of the equity instruments at FVTPL held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately nil, nil, RMB202,000 and RMB361,000 higher/lower, respectively.

If the EV/S ratio had been 1% higher/lower, the fair values of the equity instruments at FVTPL held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately nil, nil, RMB185,000 and RMB185,000 higher, or nil, nil, RMB17,000 and RMB185,000 lower, respectively.

If the Recent Transaction Price had been 1% higher/lower, the fair values of the equity instruments at FVTPL held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately RMB803,000, RMB326,000, RMB171,000 and nil higher/lower, respectively.

If the Recent Transaction Price had been 1% higher/lower, the fair values of the equity instruments at FVOCI held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately nil, nil, RMB788,000 and RMB1,768,000 higher/lower, respectively.

If the discount rate of the Note receivable at FVOCI held by the Group had been 0.5% higher/lower, the fair values of the Note receivable at FVOCI held by the Group as at December 31, 2023, 2024 and 2025 and June 30, 2026 would have been approximately RMB519,000, RMB889,000, RMB754,000 and RMB688,000 lower, or RMB523,000, RMB897,000, RMB760,000 and RMB694,000 higher, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The Group continually evaluates the critical accounting estimates and key judgements applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable.

The critical accounting estimates and key assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are outlined below:

(a) Allowance for Expected Credit Loss of Receivables

Except for certain trade receivables from customers with specific credit risk that management adopts an individual impairment assessment approach, the Group uses a provision matrix to calculate ECLs for trade receivables. The loss allowances for receivables are based on assumptions about risk of default and expected loss rates to determine the expected loss. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation. The historical loss rates are adjusted to reflect the forward-looking information on macroeconomic factors as well as the credit rating analysis of respective customers and other external data which have impacts to the ability of the customers to settle the receivables.

The Group takes into account different macroeconomic scenarios in considering forward-looking information in Chinese mainland and abroad. The Group regularly monitors and reviews the key macroeconomic assumptions and parameters related to the calculation of expected credit losses. The Group has identified the Gross Domestic Product ("GDP") of the countries in which it sells its goods to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

(b) Estimated Net Realizable Value of Inventories

In accordance with the Group's accounting policy, the Group estimates net realizable value of inventories based on specific facts and circumstances. For different types of inventories, it requires the estimation on selling prices, costs of conversion, selling expenses and the related tax expense to calculate the net realizable amount of inventories. For inventories held for executed sales contracts, management estimates the net realizable amount based on the contracted price. For raw materials and work-in-progress, management has established a model in estimating the net realizable amount at which the inventories can be realizable in the normal course of business after considering the manufacturing cycles, production capacity and forecasts, estimated future conversion costs and selling prices. Management also takes into account the price or cost fluctuations and other related matters occurring after the end of the year which reflect conditions that existed at the end of each year.

It is reasonably possible that if there is a significant change in circumstances including the Group's business and the external environment, outcomes would be significantly affected.

(c) Property, Plant and Equipment and Intangible Assets – Estimated Useful Lives and Residual Values

The Group determines the estimated useful lives and residual values (if applicable) and consequently the related depreciation/amortization charges for its property, plant and equipment and intangible assets (excluding freehold land and goodwill). These estimates are based on the historical experience, anticipated change of technology, market condition and the actual consumptions of related assets. The depreciation/amortization charge will increase when useful lives are less than previously estimated. In addition, technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (Continued)

(c) Property, Plant and Equipment and Intangible Assets – Estimated Useful Lives and Residual Values (Continued)

Actual economic lives may differ from estimated useful lives and actual residual values may differ from estimated residual values. Periodic review could result in change in useful lives and residual values and therefore change in depreciation/amortization expense in future periods.

(d) Income Tax and Deferred Taxation

Estimation and judgement are required in determining the amount of the provision for income tax. There are transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recognized, such differences will impact on the income tax and deferred taxation provisions in the period in which such determination is made.

Deferred tax assets are recognized for unused tax losses and deductible temporary differences to the extent that it is probable that taxable profit will be available against which the losses and deductible temporary difference can be utilized. Significant estimation is required in determining the recoverability of deferred tax assets.

In the event that future tax rules and regulations or related circumstances change, adjustments to current and deferred taxation may be necessary which would impact on the Group's results or financial position.

(e) Impairment of Non-Financial Assets

The Group tests at least annually whether goodwill has suffered any impairment. Goodwill and other non-financial assets, mainly including property, plant and equipment, intangible assets, investments in associates, investments in subsidiaries, as well as right-of-use assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. The recoverable amounts is the higher of value-in-use ("VIU") calculations or fair value less costs of disposal ("FVLCD"). These calculations require the use of judgements and estimates.

Judgement is required to identify any impairment indicators existing for any of the Group's non-financial assets, to determine appropriate impairment approaches, i.e., fair value less costs of disposal or value in use, for impairment review purposes, and to select key assumptions applied in the adopted valuation models. Changing the assumptions selected by management in assessing impairment could materially affect the result of the impairment test and in turn affect the Group's financial condition and results of operations. If there is a significant adverse change in the key assumptions applied, it may be necessary to take additional impairment charge to the consolidated statements of profit or loss.

(f) Fair Value Measurement of Financial Assets and Liabilities at Level 3 Fair Value Hierarchy

The fair value of financial instruments classified as level 3 is determined using valuation techniques. The Group uses its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. For details of the valuation techniques, inputs and key assumptions used in the determination of the fair value of financial assets and liabilities at level 3 fair value hierarchy see Note 3.5.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

5. OPERATING SEGMENT INFORMATION

(a) Description of Segments and Principal Activities

Operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision maker ("CODM"). The executive directors assess the financial performance and position of the Group and make strategic decisions. The executive directors, which has been identified as being the CODM, consists of the executive director, the chief financial officer and the managers for each business unit. The CODM reviews the Group's internal reporting in order to assess performance, allocate resources, and determine the operating segment based on these reports.

As at December 31, 2023, 2024 and 2025 and June 30, 2026, the CODM have identified the following reportable segments from a product perspective:

- Electronic circuits (PCBs)
- Touch panels and LCMs
- Precision components
- Optical modules
- Others: this part of the business principally comprises the LED and scrap materials businesses, together with other activities and centrally managed items that are not separately reviewed by the CODM as individual reportable segments.

The apportionment basis is as follows:

Directly attributable items: attributed to the relevant business division.

Shared items: allocated on a reasonable and consistently applied basis reflecting the divisions' respective use of resources or the underlying activities giving rise to the items.

Centrally managed items: included in the "Others" segment where they are not separately reviewed by the CODM by business division.

In presenting segment performance, items between gross profit/(loss) and profit/(loss) before income tax are attributed as follows:

Share of net loss of investments in associates and related impairment provisions: attributed to the division to which the operations of the relevant associate relate; centrally managed associates not attributable to a specific division are included in the "Others" segment.

Net impairment losses/(reversals) on financial assets: attributed to the division whose sales or other business activities gave rise to the relevant receivables or financial assets.

Depreciation and amortisation: attributed according to the division or function using the underlying assets. Charges relating to dedicated assets are attributed directly, while charges relating to shared assets are allocated on a reasonable and consistently applied basis reflecting operational use.

Impairment of property, plant and equipment: attributed to the division in which the relevant asset or cash-generating unit is operated, consistently with the attribution basis applied to the related depreciation charge.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

5. OPERATING SEGMENT INFORMATION (Continued)

(b) Segment Information

For the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026, the CODM assess the performance of the operating segments mainly based on segment revenue and gross profit of each operating segment.

Segment information for the year ended December 31, 2023 is as follows:

	Electronic circuits (PCBs)	Touch panels and LCMs	Precision components	Others	Total
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*	*RMB'000*
Revenue from transactions with external customer	23,260,735	4,861,904	4,160,804	1,365,688	33,649,131
Other revenue	661	–	1,413	–	2,074

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

5. OPERATING SEGMENT INFORMATION (Continued)

(b) Segment Information (Continued)

Segment information for the six months ended June 30, 2026 is as follows:

	Electronic circuits (PCBs)	Touch panels and LCMs	Precision components	Optical modules	Others	Total
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*	*RMB'000*	*RMB'000*
Revenue from transactions with external customer	12,529,628	2,723,455	6,580,104	5,350,999	612,163	27,796,349
Other revenue	–	22	589	–	724	1,335
Cost of sales	(10,330,446)	(2,563,440)	(5,816,810)	(3,253,743)	(429,765)	(22,394,204)
Gross profit	2,199,182	160,037	763,883	2,097,256	183,122	5,403,480
Share of net loss of investments in associates	–	–	–	–	(3,665)	(3,665)
Net impairment (losses)/reversal on financial assets	4,418	(300)	1,992	(7,222)	(12,665)	(13,777)
Depreciation and amortisation	(986,211)	(111,453)	(330,206)	(100,511)	(76,816)	(1,605,197)
Profit/ (loss) before income tax	1,503,696	35,974	401,300	1,715,927	(168,423)	3,488,474
Income tax (expense) /credit	(187,686)	(11,651)	(97,501)	(233,276)	26,270	(503,844)
Profit/ (loss) for the period	1,316,010	24,323	303,799	1,482,651	(142,153)	2,984,630

The following table sets out the breakdown of the profit/(loss) for the year/period of the Others segment:

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Profit/(loss) for the year/period					
LED	(360,950)	(1,028,346)	(1,234,866)	(129,870)	(53,228)
Scrap materials businesses and other	(805,712)	(902,066)	(695,538)	(402,099)	(88,925)
	(1,166,662)	**(1,930,412)**	**(1,930,404)**	**(531,969)**	**(142,153)**

The loss of the Others segment mainly reflected centrally managed expenses that were not allocated by the chief operating decision maker to individual business divisions. Under the Group's apportionment policy, directly attributable items are allocated to the relevant business divisions, while shared costs are allocated based on resource usage, with unallocated central costs recorded under the Others segment. Accordingly, the Others segment incurred a significant loss during the Track Record Period.

6. REVENUE

(a) Disaggregation of revenue

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (*Unaudited*)	*RMB'000*
Revenue from contracts with customers					
- Recognized at a point in time	33,649,131	36,769,727	40,121,363	16,953,084	27,796,349
Other revenue (i)	2,074	647	3,496	2,080	1,335
	33,651,205	**36,770,374**	**40,124,859**	**16,955,164**	**27,797,684**

(i) Other revenue represents lease income.

Revenues of approximately RMB18,781 million, RMB18,858 million, RMB18,643 million, RMB7,589 million and RMB8,360 million in the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026, respectively are derived from a single external customer.

The major customers which contributed more than 10% of total revenue of the Group are listed as below:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
				(*Unaudited*)	
Customer A	55.81%	51.28%	46.47%	44.76%	30.08%

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

6. REVENUE (Continued)

(b) Geographical Information

The Company is domiciled in Chinese mainland. The amount of the Group's revenue by location is shown in the table below:

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Chinese mainland	5,649,268	6,187,309	7,459,673	3,787,324	4,669,149
Overseas	28,001,937	30,583,065	32,665,186	13,167,840	23,128,535
	33,651,205	36,770,374	40,124,859	16,955,164	27,797,684

(c) Contract Liabilities

During the Track Record Period, the additions to the contract liabilities were primarily due to cash collections in advance of fulfilling performance obligations, while the reductions to the contract liabilities were primarily due to the recognition of revenues upon fulfillment of performance obligations.

The Group

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Contract liabilities	28,983	122,562	474,661	459,685

As at January 1, 2023, the Group's contract liabilities from customers amounted to approximately RMB26,193,000.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

6. REVENUE (Continued)

(c) Contract Liabilities (Continued)

The Group (Continued)

The following table shows how much of the revenue, which was included in the contract liabilities at the beginning of the period, recognized during the Track Record Period relates to carried-forward contract liabilities:

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (*Unaudited*)	*RMB'000*
Revenue recognized that was included in the beginning balance	26,193	28,983	80,941	42,256	136,864

The Company

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Contract liabilities	11,196	18,960	24,694	29,778

(d) Transaction price allocated to remaining performance obligations

The Group

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
To be recognised as revenue within 1 year	6,943,437	6,456,637	13,584,459	29,287,007
To be recognised as revenue over 1 year	217,098	36,569	92,982	85,400
Transaction price allocated to remaining performance obligations	7,160,535	6,493,206	13,677,441	29,372,407

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

6. REVENUE (Continued)

(d) Transaction price allocated to remaining performance obligations (Continued)

The following table shows performance obligations that were unsatisfied or partially unsatisfied.

The Group

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Unsatisfied	5,836,424	3,236,921	9,912,035	25,522,045

Transaction price allocated to remaining performance obligations	7,160,535	6,493,206	13,677,441	29,372,407

(e) Accounting Policies and Significant Judgements for Revenue Recognition

The Group recognizes revenue when (or as) a performance obligation is satisfied, i.e., when control of the goods or services underlying the particular performance obligation is transferred to the customer.

If control of the goods and services transfers over time, revenue is recognized over the period of the contract by reference to the progress towards complete satisfaction of that performance obligation. Otherwise, revenue is recognized at a point in time when the customer obtains control of the goods and services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

If a customer pays consideration or the Company has a right to an amount of consideration that is unconditional, before the Company transfers goods or services to the customer, the Company presents the contract liability when the payment is made. A contract liability is the Company's obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer.

The Group generally offers assurance-type warranties to customers and such warranties are not considered a distinct performance obligation to customers. The Group accounts for the warranty in accordance with IAS 37 and the estimated warranty cost was not material for the Track Record Period (Note 33).

The credit period granted to customers by the Group is determined based on their credit risk characteristics, which is consistent with industry practice, and regardless of whether there is significant financing component.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

6. REVENUE (Continued)

(e) Accounting Policies and Significant Judgements for Revenue Recognition (Continued)

Products revenue

The Group is principally engaged in research and development, manufacturing and sales of core devices for intelligent interconnection, including electronic circuits (PCBs), precision components, touch panel models and LED display devices, optical components and optical modules and automotive components, etc.

Revenue from domestic sales of products (excluding the VMI model) is recognized at a point in time when the Group has delivered products to the location specified in the sales contract and the buyer has confirmed the acceptance of the products, and the delivery order is signed by both parties. Upon confirming the acceptance, the customer has the right to sell the products at its discretion and takes the risks of any price fluctuation and obsolescence and loss of the products.

Revenue from domestic product sales under the VMI (Vendor-Managed Inventory) model, is recognized at a point in time when the customer actually picks up and uses the goods, because it is only at this point that the customer obtains the ability to direct the use of the goods (such as the right to sell, process or otherwise dispose of the goods at its own discretion) and assumes the significant risks and rewards of ownership of the goods, including the risks of price fluctuations, obsolescence, damage or loss of the relevant goods.

Revenue from oversea sales of products, except for DDP (Delivered Duty Paid) terms, is recognized at a point in time once the products have been declared to the customs and the bill of lading has been obtained. At this point, the buyer has the right to sell the products at its discretion and takes the risks of any price fluctuation and obsolescence and loss of the products. For overseas sales of products under DDP terms, the revenue is recognized at a point in time, when the Group has delivered product to the buyer's designated warehouses and the bill of lading has been obtained. At this point, the customer has the ability to direct the use of the goods and obtain substantially all of the remaining benefits; and bears the significant risks and rewards incidental to ownership.

	3,952,199	**4,403,215**	**5,262,511**	**2,180,060**	**3,807,945**

(a) Defined contribution plans

The Group is required to make contributions for its employees in the PRC to the state-sponsored retirement plan at a certain rate based on the qualified salaries of the individual employees. The PRC government is responsible for the pension liability of the retired employees.

During the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026, no forfeited contributions were utilized by the Group to reduce its contributions for the current year/period.

(b) Defined benefit pension plan

The Group's subsidiary, GMD Group, sponsors unfunded defined benefit plans for eligible employees in France in respect of retirement indemnities. The obligations are determined in accordance with the applicable French collective bargaining agreements, mainly the metallurgy and plasturgy agreements, and are settled directly by the relevant Group entities when benefits fall due.

As the plan is unfunded, there are no plan assets and therefore no related investment strategy, asset allocation or funding policy disclosures.

The retirement indemnity obligation of GMD Group recognised at the balance sheet date is determined using the projected unit credit method in accordance with IAS 19 and has been actuarially valued by an independent external actuary.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

10. EMPLOYEE BENEFIT EXPENSES (INCLUDING DIRECTOR'S REMUNERATION) (Continued)

The net liability disclosed above is as follows:

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Present value of obligation	—	—	130,857	122,347
Less: Fair value of plan assets	—	—	—	—
Defined benefit liabilities	—	—	**130,857**	**122,347**

The net liability disclosed by subsidiaries is as follows:

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
GMD Group (i)	—	—	**130,857**	**122,347**

The actuarial assumptions used to determine the present value of defined benefit obligation are as follows:

	As at December 31			As at June 30
	2023	2024	2025	2026
Discount rate	—	—	3.60%	3.45%
Turnover rate	—	—	0.00% to 13.80%	0.00% to 13.80%
Salary growth rates	—	—	2.00%	2.00%

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

10. EMPLOYEE BENEFIT EXPENSES (INCLUDING DIRECTOR'S REMUNERATION) (Continued)

(i) GMD Group

Movements in the present value of the defined benefit obligations during the Track Record Period were as follows:

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
At the beginning of the year/period	—	—	–	—	130,857
Business combination	—	—	121,472	—	—
Current service cost	—	—	1,130	—	3,237
Losses on curtailment and settlement	—	—	6,398	—	2,049
Interest expense	—	—	682	—	2,024
Remeasurement losses/(gains)	—	—	2,085	—	(1,936)
Foreign currency translation differences	—	—	145	—	(7,409)
Payments made	—	—	(1,055)	—	(6,475)
At the end of the year/period	—	—	**130,857**	—	**122,347**

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

	Increase in assumption	Increase/(decrease) impact on defined benefit obligation			
		As at December 31			As at June 30
		2023	2024	2025	2026
		RMB'000	*RMB'000*	*RMB'000*	*RMB'000*

(ii) Mr. Wang Zhangzhong, Mr. Song Liguo and Mr. Gao Yongru resigned as independent non-executive directors of the Company on May 15, 2026, upon the expiry of their terms of office.

(iii) Mr. Wang Leigang, Mr. Poon Wing Shing Anthony and Mr. Cai Weihua were appointed as independent non-executive directors of the Company with effect from May 15, 2026.

(d) Directors' and Supervisors' Other Benefits

No termination benefits were paid to the directors and supervisors of the Company by the Group in respect of the director's services as a director and a supervisor of the Group or other services in connection with the management of the affairs of the Group during the Track Record Period.

No consideration provided to third parties for making available directors' and supervisors' services subsisted at the end of each reporting period or at any time during the Track Record Period.

There were no loans, quasi-loans or other dealings entered into in favor of directors, controlled bodies corporate by and connected entities with such directors during the Track Record Period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

10. EMPLOYEE BENEFIT EXPENSES (INCLUDING DIRECTOR'S REMUNERATION) (Continued)

(d) Directors' and Supervisors' Other Benefits (Continued)

Save as disclosed in Note 44, there were no significant transactions, arrangements and contracts in relation to the Group's business to which the Company was a party and in which a director and a supervisor of the Company had a material interest, whether directly or indirectly, subsisted during the Track Record Period.

(e) Five Highest Paid Individuals

The five individuals whose emoluments were the highest in the Group were all Directors or Supervisors for the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026.

12. INCOME TAX EXPENSE

The income tax expense of the Group during the Track Record Period are analyzed as follows:

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Current income tax on profits for the year/ period	467,197	201,639	365,773	198,135	501,448
Deferred income tax	(241,159)	181,012	(68,324)	3,800	2,396
	226,038	**382,651**	**297,449**	**201,935**	**503,844**

The Group is subject to income tax on an entity basis on profits arising in or derived from the different jurisdictions in which members of the Group are domiciled and operate.

(a) PRC Corporate Income Tax

In accordance with the relevant regulations of the Enterprise Income Tax law (the "EIT Law") of the PRC, the applicable statutory tax rate of the PRC subsidiaries is 25% unless those subject to tax exemption set out below.

During the Track Record Period, certain subsidiaries of the Group have obtained High and New Technology Enterprises certification ("HNTE") and hence they are entitled to a preferential corporate income tax rate of 15% for a valid period of 3 years.

(b) Hong Kong Profits Tax

Hong Kong profits tax has been provided for at the rate of 16.5% on the estimated assessable profits for the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026.

(c) Singapore Profits Tax

Singapore profits tax has been provided for at the rate of 17.0% on the estimated assessable profits for the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026.

One certain subsidiary in Singapore is eligible for a concessionary corporate income tax rate from January 1, 2020 to December 31, 2024.

(d) France Profits Tax

France profits tax has been provided for at the rate of 25.825% on the estimated assessable profits for the two months during the November 1, 2025 to December 31, 2025 and the six months ended June 30, 2026.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

12. INCOME TAX EXPENSE (Continued)

(e) Corporate Income Tax in Other Jurisdictions

The income tax rates of the subsidiaries from other jurisdictions, including the United States, Sweden, Malaysia, Hungary, Mexico, Mauritius, Portugal, Thailand and other countries or regions, had been calculated on the estimated assessable profit for the Track Record Period at the respective rates prevailing in the relevant jurisdictions.

(f) OECD Pillar Two Model Rules

Amendments to IAS 12 "International Tax Reform - Pillar Two Model Rules" were issued on May 23, 2023 which are effective upon issuance and require retrospective application. The amendments provide a temporary exception from deferred tax accounting for the income tax arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the Organization for Economic Cooperation and Development ("OECD").

The Group is within the scope of global minimum tax ("GMT") under the OECD Pillar Two model rules ("Pillar Two"). Subject to tax legislation enacting Pillar Two being passed in the jurisdictions where the Company and its subsidiaries operate, the Group is liable to pay a top-up tax for any deficiency between the minimum tax rate of 15% and the effective tax rate per respective jurisdiction. The Group applies the IAS 12 exception to recognition and disclosure information about deferred tax assets and liabilities relating to Pillar Two income taxes.

For those jurisdictions where the Pillar Two legislation was enacted but not effective at the reporting date, the Group has no related current tax exposure. However, certain subsidiaries of the Company are located in jurisdictions where Pillar Two legislation was effective, and the Group's assessment indicates that there is no material related current tax exposure in these jurisdictions during the Track Record Period.

The income tax on the Group's profit before income tax differs from the theoretical amount that would arise using the enacted tax rate applicable to profits of the subsidiaries as follows:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Profit before income tax	**2,191,088**	**1,467,711**	**1,690,416**	**960,492**	**3,488,474**
Calculated at the PRC taxation rate of the Company (25%)	547,772	366,928	422,604	240,123	872,118
Effect of different tax rates applicable to subsidiaries (i)	(257,701)	(121,345)	(201,637)	(106,800)	(425,867)
Non-deductible expenses for tax purposes	24,797	32,276	27,529	14,969	12,799
Unused tax losses and temporary differences not recognized as deferred tax assets (ii)	59,986	172,246	246,742	89,554	102,314

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

12. INCOME TAX EXPENSE (Continued)

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Super deduction for research and development expenses (iii)	(68,610)	(46,624)	(78,468)	(35,093)	(46,614)
Income not subject to tax	(9,544)	(11,968)	(119,594)	(3,052)	(1,730)
Previously unrecognized tax losses and used to reduce deferred tax expense	(69,456)	(11,189)	(7,691)	(3,361)	(7,173)
Adjustments for current tax of prior periods	(1,206)	2,327	7,964	5,595	(2,003)
	226,038	**382,651**	**297,449**	**201,935**	**503,844**

(i) Reconciling differences are attributable to variations between the statutory tax rates applicable to certain subsidiaries and the parent company's 25% rate.

(ii) Deferred income tax assets relating to these unused tax losses are not recognized as the management considers it is uncertain to utilize these unrecognized tax credits prior to their expiry dates mainly based on considerations of future profitability.

(iii) According to the relevant laws and regulations promulgated by the State Taxation Administration of the PRC, enterprises engaging in research and development activities are entitled to claim 200% of their research and development expenses for Track Record Period, so incurred as tax deductible expenses when determining their assessable profits for that year ("Super-deduction"). The Group has made its best estimation for the Super-deduction to be claimed for the Group's entities in ascertaining their assessable profits for the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026.

13. DIVIDENDS

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Final cash dividends in respect of the previous year, declared and paid during the year/period (i)(ii)	**187,313**	**425,319**	**118,795**	**118,795**	**–**

(i) The final dividends of RMB2.50 and RMB0.70 per 10 shares (tax inclusive) in respect of the years ended December 31, 2023 and 2024 were approved by the Annual General Meeting of the Company.

(ii) No dividends were declared for the year ended December 31, 2025 and the six months ended June 30, 2025 and 2026.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

14. EARNINGS PER SHARE

(a) Basic Earnings Per Share

The calculation of basic earnings per share (EPS) is based on the following:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
				(Unaudited)	
Profit attributable to ordinary shareholders of the Company (RMB'000)	1,964,525	1,085,641	1,386,067	758,005	2,956,899
Weighted average number of ordinary shares outstanding (thousands)	1,702,011	1,701,237	1,761,672	1,700,576	1,822,768
Basic EPS (RMB per share)	**1.15**	**0.64**	**0.79**	**0.45**	**1.62**

(b) Diluted Earnings Per Share

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares.

The calculation of diluted earnings per share is based on the following:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
				(Unaudited)	
Adjusted profit attributable to owners of the Company used in calculating diluted EPS (RMB'000)	1,964,525	1,085,641	1,386,067	758,005	2,956,899
Weighted average number of ordinary shares outstanding (thousands)	1,702,011	1,701,237	1,761,672	1,700,576	1,822,768
Adjustments for potential shares arising from share schemes (thousands)	765	142	–	–	1,087
Weighted average number of ordinary shares used in calculating diluted EPS (thousands)	1,702,776	1,701,379	1,761,672	1,700,576	1,823,855
Diluted EPS (RMB per share)	**1.15**	**0.64**	**0.79**	**0.45**	**1.62**

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

14. EARNINGS PER SHARE (Continued)

(b) Diluted Earnings Per Share (Continued)

As the Company's 2022 Share holding plan became fully vested in March 2024, there were no unvested potential ordinary shares arising from the plan during the year ended December 31, 2025 and the six months ended June 30, 2025. Accordingly, no adjustment has been made for potential shares in calculating earnings per share for year ended December 31, 2025 and the six months ended June 30, 2025.

15. INVESTMENTS IN ASSOCIATES

The amounts of investments in associates recognized in the Historical Financial Information are as follows:

The Group

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Associates	**155,407**	**155,009**	**126,566**	**121,095**

The movements of investments in associates during the Track Record Period are as follows:

	Year ended December 31			Six months ended June 30	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* *(Unaudited)*	*RMB'000*

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

18. PROPERTY, PLANT AND EQUIPMENT (Continued)

(a) Property, plant, and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives or, in the case of leasehold improvements, the shorter of lease term as follows:

Buildings	15-30years
Machinery equipment	5-20years
Other equipment	3-12years
Motor vehicles	5-10years
Leasehold improvement	Shorter of their useful lives and lease terms

See Note 46 for the other accounting policies relevant to property, plant and equipment.

(b) Depreciation of the Group's property, plant and equipment has been recognized as follows:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* *(Unaudited)*	*RMB'000*
Cost of sales	1,388,309	1,658,755	2,083,015	929,496	1,264,393
Inventories	504,522	507,965	411,548	252,374	144,897
General and administrative expenses	112,211	130,557	122,856	63,697	86,290
Research and development expenses	74,024	86,095	107,478	39,782	47,780
Selling and marketing expenses	2,336	1,899	2,572	592	1,475
	2,081,402	**2,385,271**	**2,727,469**	**1,285,941**	**1,544,835**

The Group has pledged machinery equipment with carrying amount of approximately RMB418,051,000, nil, RMB151,552,000 and nil as at December 31, 2023, 2024 and 2025 and June 30, 2026 respectively to secure bank borrowings granted to the Group.

As at December 31, 2023, 2024 and 2025 and June 30, 2026, the Group had RMB62,076,000, RMB31,717,000, RMB25,944,000 and RMB44,117,000 plants for which ownership certificate applications were pending, respectively.

(c) Impairment losses has been recognized as follows:

For the year ended December 31, 2024, the Group recognised an impairment provision for property, plant and equipment amounting to RMB394 million, primarily due to the impairment of the subsidiary Yancheng Dongshan Precision Manufacturing Co., Ltd.

There was an impairment indicator for property, plant and equipment owned by Yancheng Dongshan Precision Manufacturing Co., Ltd. as the operating losses, low market prices and negative profit margins during 2024. The Group engaged an independent valuer to perform an impairment assessment on the related assets as at December 31, 2024.

The valuer has performed an assessment of the cash-generating unit ("CGU"). The carrying amount of the CGU is compared against the recoverable amount, which is the higher of value-in-use ("VIU") and fair value less costs of disposal ("FVLCOD"). Based on the assessment, recoverable amounts is determined as the FVLCOD.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

18. PROPERTY, PLANT AND EQUIPMENT (Continued)

(c) Impairment losses has been recognized as follows: (Continued)

The recoverable amount is determined by net value of fair value less costs of disposal:

Item	Carrying amounts	Recoverable amounts	Impairment amounts	Determination of fair value and costs of disposal	Key parameters	Determination basis of key parameters
	RMB'000	*RMB'000*	*RMB'000*			
Machinery equipment	1,285,313	902,084	383,229	The fair value is determined using the market approach. Disposal costs mainly include direct costs incurred in the asset disposal.	Evaluation unit price	Refer to recent trading prices or average quotes of assets in the market that are similar to the appraised assets and make adjustment and amendment for differences.

The investment properties are stated at cost less accumulated depreciation. Depreciation is calculated using the straight-line method to write off the cost to its residual value over its estimated useful life. The estimated useful lives are as follows:

Buildings	15-30 years
Land use rights	50 years

See Note 46 for the other accounting policies relevant to investment properties.

(i) Properties held by the Group for the purpose of earning rental income, achieving capital appreciation, or both are presented as investment property. When there is a change in the use of such held properties, the Company shall reclassify the investment property to property, plant and equipment.

(b) Fair Value Disclosure

For disclosure purposes, the Company has engaged an independent valuer to assess the fair value of the investment properties. The fair value of the investment properties as at June 30, 2026 was approximately RMB145,804,000, and the fair value hierarchy is set out below:

Description	Valuation Technique	Significant unobservable input	Range of significant unobservable input
Land unit located in China	Market Approach (level 2)	Market Unit Price (RMB/sqm)	4,000 to 7,000 RMB/sqm

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

20. LEASE

20.1 The Group and the Company as the lessee

(a) Amounts Recognized in the Consolidated Statements of Financial Position

The Group

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Right-of-use assets				
Land use rights	421,663	543,663	365,806	344,555
Buildings	1,136,688	1,201,297	1,992,162	1,915,002
Machinery equipment	29,705	27,763	137,700	118,010
Motor vehicles	76	–	–	–
	1,588,132	**1,772,723**	**2,495,668**	**2,377,567**
Lease liabilities				
Current	29,698	131,842	500,891	278,598
Non-current	1,842,799	1,351,519	1,790,065	1,916,654
	1,872,497	**1,483,361**	**2,290,956**	**2,195,252**

(i) Additions to the right-of-use assets during the years ended December 31, 2023, 2024, 2025 and the six months ended June 30, 2025 and 2026 were approximately RMB593,573,000, RMB283,196,000, RMB1,087,772,000, RMB18,184,000 and RMB22,714,000, respectively.

The Company

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Right-of-use assets				
Buildings	4,566	2,609	652	21,564
Land use rights	58,364	56,830	23,231	4,037
	62,930	**59,439**	**23,883**	**25,601**
Lease liabilities				
Current	2,006	1,880	614	2,167
Non-current	2,741	861	–	2,271
	4,747	**2,741**	**614**	**4,438**

(b) The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used. The discount rate used during the years ended December 31, 2023 and 2024 remained at 1.64% to 6.00%. The discount rate used during the year ended December 31, 2025 and the six months ended June 30, 2025 and 2026 ranged from 1.64% to 9.60%.

	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Interest expense (included in finance cost)	93,255	69,674	111,289	38,641	39,597
Expense relating to short-term and low value leases not included in lease liabilities	18,684	8,045	58,365	24,215	46,707
	111,939	**77,719**	**169,654**	**62,856**	**86,304**

The total cash outflows for lease payments during the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026 were approximately RMB201,686,000, RMB652,362,000, RMB325,595,000, RMB35,621,000 and RMB165,199,000, respectively.

As a lessee, the Group leases buildings, machinery equipment, motor vehicles and land use rights. Lease contracts typically have fixed terms, ranging from 16 to 60 months for buildings, machinery equipment and motor vehicles, 50 years for land use rights. They are stated at cost less accumulated depreciation and accumulated impairment losses.

The Group has pledged machinery equipment, buildings and land use rights with carrying amount of approximately RMB1,252,668,000, RMB1,259,000,000, RMB2,209,354,000 and RMB2,104,086,000 as at December 31, 2023, 2024 and 2025 and June 30, 2026, respectively to finance lease granted to the Group.

See Note 46 for the other accounting policies relevant to lease.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

21. INTANGIBLE ASSETS (Continued)

(a) Amortization expenses have been recognized as follows:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (*Unaudited*)	*RMB'000*
General and administrative expenses	33,349	21,742	35,880	12,278	26,589
Cost of sales	27,819	40,330	52,016	22,612	38,591
Inventories	10,116	12,354	10,279	6,142	4,422
Research and development expenses	9,248	9,215	13,048	4,282	6,673
Selling and marketing expenses	90	1,067	1,299	512	444
	80,622	**84,708**	**112,522**	**45,826**	**76,719**

(b) Amortization Methods and Periods

(i) Software

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire the specific software.

(ii) Trademark right and Patent right

Separately acquired trademark right and patent right are shown at historical cost. Trademark right and patent right acquired in a business combination are recognised at fair value at the acquisition date. They have a finite useful life and are subsequently carried at cost less accumulated amortisation and impairment losses.

(iii) Customer Resources

Customer resources are initially recognized at fair value on the acquisition date and subsequently carried at cost less accumulated amortization and impairment losses.

(iv) Know-how

Know-how is recognised as an intangible asset when it is probable that the future economic benefits attributable to the asset will flow to the Group and the cost of the asset can be measured reliably. Subsequent to initial recognition, know-how is measured at cost less accumulated amortisation and accumulated impairment losses.

The Group amortizes intangible assets with a limited useful life using the straight-line method over the following periods:

Software	3 years
Trademark right and patent right	10 years
Customer resources	10 years
Know-how	3-5 years

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

21. INTANGIBLE ASSETS (Continued)

(c) Research and Development

Research expenditure is recognized as an expense as incurred. Costs incurred on development projects (relating to the design and testing of new and improved products) are recognized as intangible assets when the following criteria are met:

- It is technically feasible to complete the product so that it will be available for use;
- Management intends to complete the product and use or sell it;
- There is an ability to use or sell the product;
- It can be demonstrated how the product will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development and to use or sell the product are available; and
- The expenditure attributable to the product during its development can be reliably measured.

Other development expenditures that do not meet these criteria are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

(d) Impairment Tests for Goodwill

Goodwill is not subject to amortization and is tested for impairment annually, or more frequently if events or changes in circumstances indicate that they might be impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets.

The carrying amounts of goodwill allocated to the cash generating units or group of cash generating units ("CGU" or "CGUs") are as follows:

	Opening	**Addition**	**Impairment**	**Closing**

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

21. INTANGIBLE ASSETS (Continued)

(d) Impairment Tests for Goodwill (Continued)

Management has determined the values assigned to each of the above key assumptions as follows:

Assumption	Approach used to determine values
Revenue annual growth rates	Revenue annual growth rate is estimated over the five-year forecast period. The management of the Group used a five-year period as the projection period for the cash flow forecast, which was in line with the period length used in the corresponding strategic planning and long-term budgeting purpose.
Operating profit margin	Based on past performance and management's expectations for the future.
Perpetual annual growth rates	This is the weighted average growth rate used to extrapolate cash flows beyond the forecast period. The rates are determined after making reference to long term inflation rate of the countries in which they operate. The perpetual annual growth rates remained stable which was due to the fact that the long-term inflation rates of the relevant countries were relatively stable during the Track Record Period.
Pre-tax discount rates	Estimated by using the weighted average cost of capital ("WACC") method. The WACC was calculated by referring to public market data including risk free rate, market return, beta of comparable public companies etc. and the specific risk of the business.

(e) Impact of possible changes in key assumptions

Based on management's assessment on the recoverable amounts, the headroom of these CGUs as follows:

The Group

	As at December 31			As at June 30
	2023	**2024**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
MFLEX	7,674,174	4,396,518	7,807,868	7,622,453
Multek	195,185	246,458	282,723	537,080
Mutto Optronics	—	—	—	—
Suzhou RF	22,513	—	—	8,412
Source Photonics	—	—	386,108	4,180,273

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

21. INTANGIBLE ASSETS (Continued)

(e) Impact of possible changes in key assumptions (Continued)

The Group (Continued)

Sensitivity analysis has been performed based on the assumptions that revenue annual growth rates, operating profit margin and pre-tax discount rates have been changed. Had the estimated key assumptions during the forecast period been changed as shown below, while other parameters remain constant, the headroom of the CGUs would be as follows:

For MFLEX CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	7,594,174	4,326,518	7,647,868	7,422,453
Operating profit margin decreased by 0.5%	6,734,174	3,576,518	6,907,868	6,722,453
Pre-tax discount rate increased by 0.5%	7,034,174	3,956,518	7,207,868	7,022,453

For Multek CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	185,185	226,458	246,723	513,080
Operating profit margin decreased by 0.5%	35,185	86,458	94,723	332,080
Pre-tax discount rate increased by 0.5%	85,185	136,458	136,723	334,080

For Suzhou RF CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 0.5%	3,513	(57,830)	(84,795)	(3,588)
Operating profit margin decreased by 0.5%	3,513	(57,830)	(84,795)	(3,588)
Pre-tax discount rate increased by 0.5%	5,513	(50,830)	(104,795)	3,412

Operating profit margin decreased by 0.5%	—	—	326,108	3,980,273
Pre-tax discount rate increased by 0.5%	—	—	186,108	3,860,273

Based on the results of impairment test as at December 31, 2023, the recoverable amount of MFLEX CGU, Multek CGU and Suzhou RF CGU are significantly above the carrying amount of the Group.

Based on the results of impairment test as at December 31, 2024, the recoverable amount of MFLEX CGU and Multek CGU are significantly above the carrying amount of the Group. Management of the Group believes that any reasonably possible change in any of the key assumptions would not result in impairment.

Based on the results of impairment test as at December 31, 2025, the recoverable amount of MFLEX CGU, Multek CGU and Source Photonics CGU are significantly above the carrying amount of the Group.

Based on the results of impairment test as at June 30, 2026, the recoverable amount of MFLEX CGU, Multek CGU and Source Photonics CGU are significantly above the carrying amount of the Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

21. INTANGIBLE ASSETS (Continued)

(e) Impact of possible changes in key assumptions (Continued)

The Group (Continued)

The recoverable amounts of the CGUs would equal their carrying amounts if the key assumptions were to change as follows:

For MFLEX CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
Revenue annual growth rates	-45.98%	-31.40%	-25.25%	-24.22%
Operating profit margin	-4.10%	-2.69%	-4.34%	-4.15%
Pre-tax discount rates	10.92%	7.10%	11.35%	10.49%

For Multek CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
Revenue annual growth rates	-10.24%	-9.00%	-3.93%	-11.25%
Operating profit margin	-0.80%	-0.77%	-0.75%	-1.31%
Pre-tax discount rates	1.35%	1.25%	1.00%	1.42%

For Suzhou RF CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
Revenue annual growth rates	-0.59%	0.86%	3.63%	-0.36%
Operating profit margin	-0.59%	0.86%	3.63%	-0.36%
Pre-tax discount rates	0.65%	-1.10%	-4.84%	0.89%

For Source Photonics CGU

	As at December 31			As at June 30
	2023	2024	2025	2026
Revenue annual growth rates	—	—	-10.99%	-27.60%

Pre-tax discount rates	—	—	6.00%	9.37%

(f) Impairment Tests for Development Expenditure

Development Expenditure is not subject to amortization for certain subsidiaries and is tested for impairment annually, or more frequently if events or changes in circumstances indicate that they might be impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

21. INTANGIBLE ASSETS (Continued)

(f) Impairment Tests for Development Expenditure (Continued)

value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets.

The following table sets out the key assumptions, where the Group used five-year period as the projection period for the cash flow forecast.

	Year ended December 31, 2025	Six months ended June 30, 2026
Development Expenditure		
Revenue annual growth rates	0.00% to 16.82%	0% to 118.70%
Perpetual annual growth rates	0.00%	0.00%
Pre-tax discount rates	16.50%	18.00%

Management has determined the values assigned to each of the above key assumptions as follows:

Assumption	Approach used to determine values
Revenue annual growth rates	Revenue annual growth rate is estimated over the five-year forecast period. The management of the Group used a five-year period as the projection period for the cash flow forecast, which was in line with the period length used in the corresponding strategic planning and long-term budgeting purpose.
Perpetual annual growth rates	This is the weighted average growth rate used to extrapolate cash flows beyond the forecast period. The rates are determined after making reference to long term inflation rate of the countries in which they operate. The perpetual annual growth rates remained stable which was due to the fact that the long-term inflation rates of the relevant countries were relatively stable during the Track Record Period.
Pre-tax discount rates	Estimated by using the weighted average cost of capital ("WACC") method. The WACC was calculated by referring to public market data including risk free rate, market return, beta of comparable public companies etc. and the specific risk of the business.

21. INTANGIBLE ASSETS (Continued)

(f) Impairment Tests for Development Expenditure (Continued)

Impact of possible changes in key assumptions

Based on management's assessment on the recoverable amounts, the headroom is as follows:

	As at December 31 2025	As at June 30 2026
	RMB'000	*RMB'000*
Development Expenditure	591,039	1,006,633

The recoverable amounts would equal their carrying amounts if the key assumptions were to change as follows:

	As at December 31 2025	As at June 30 2026
Revenue annual growth rates	-57.50%	-75.70%
Pre-tax discount rates	385.27%	1,541.27%

Sensitivity analysis has been performed based on the assumptions that revenue annual growth rates and pre-tax discount rates has been changed. Had the estimated key assumptions during the forecast period been changed as shown below, while other parameters remain constant, the headroom would be as follows:

	As at December 31 2025	As at June 30 2026
	RMB'000	*RMB'000*
Average revenue annual growth rate decreased by 1%	7,000	27,800
Pre-tax discount rate increased by 1%	2,000	18,900

(i) In 2025, the Group's subsidiary, GMD Group, approved on two restructuring plans: in October 2025, GMD Group approved to close its ELY factory in Lyon, France; and in December 2025, it approved to dispose of the ESM factory. In accordance with French local labor regulations, employee compensation and length of service, as well as estimated disposal costs, the Group has recognized related restructuring provisions including employee severance payments, statutory and additional compensation, and litigation and legal service expenses.

(ii) The Group provides product quality warranty to its consumers and offers free warranties for faults and quality issues that occur within agreed years after the sale of such products. Based on historical warranty claim information and warranty experience, the Group estimates and accrues estimated

36. TREASURY SHARES (Continued)

The Group and The Company (Continued)

(i) Pursuant to the Proposal Regarding Repurchase of the Company's Shares adopted at the 6th meeting of the 6th Board of Directors held on December 28, 2023, the Company repurchased 1,588,000 shares with the trading amount of RMB25,001,000.

(ii) Pursuant to the Proposal Regarding Repurchase of the Company's Shares adopted at the 18th meeting of the 6th Board of Directors held on April 9, 2025, the Company repurchased 4,202,000 shares with the trading amount of RMB100,084,000.

(iii) In March 2026, the Company received a Confirmation of Securities Transfer Registration from China Securities Depository and Clearing Corporation Limited Shenzhen Branch, confirming that 3,049,000 shares of the Company held in the "special securities account for repurchase of Suzhou Dongshan Precision Manufacturing Co., Ltd." were transferred to "Suzhou Dongshan Precision Manufacturing Co., Ltd.- 2026 employee stock ownership plan" on March 9, 2026 by means of non-trade transfer, which resulted in a decrease in the treasury shares by RMB49,991,000.

37. SHARE INCENTIVE SCHEME

Share Option Incentive Plans

(a) Equity-settled share-based payment arrangement of the Company

The Company convened the 2022 First Extraordinary General Meeting on March 8, 2022, reviewed and approved the "Proposal on the Company's 2022 Share Holding Plan for Core Management and Technical Personnel (Draft) and its Summary" and other related proposals (《關于公司 2022 年度核心管理人員和技術人才持股計劃（草案）及其摘要的議案》) and approved the grant of 1,366,120 repurchased shares to incentive employees on October 31, 2022, with a fair value of RMB19.6 per share. The repurchased shares are held in the share holding plan until the shares are vested and exercised, upon which they will be transferred to the relevant employees.

According to the plan provisions, and subject to the satisfaction of relevant individual performance assessment conditions, the granted shares will vest in two batches, with a vesting ratio of 50% for each batch:

The first batch: vests 12 months after the date on which the last batch of underlying shares is transferred to the share holding plan as announced by the Company;

The second batch: vests 24 months after the date on which the last batch of underlying shares is transferred to the share holding plan as announced by the Company.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

37. SHARE INCENTIVE SCHEME (Continued)

(a) Equity-settled share-based payment arrangement of the Company (Continued)

The number of shares under the 2022 Restricted Share Incentive Scheme is summarized as follows:

	Year ended December 31		
	2023	**2024**	**2025**
	'000	*'000*	*'000*
At the beginning of the year	1,366	683	–
Granted	–	–	–
Exercised	(678)	(647)	–
Lapsed	(5)	(36)	–
At the end of the year	**683**	**–**	**–**

This plan does not involve an exercise price. Employees are not required to pay any consideration to vest the shares, which will be granted and vested in tranches based on the lock-up period and individual performance evaluation.

The fair value of the shares at the grant date is independently determined, with reference to the closing price of the Company's shares on the date of the shareholders' meeting (held on October 31, 2022) that approved the employee share incentive scheme.

2026 Employee Share Ownership Plan

The Company convened the 2026 First Extraordinary General Meeting on February 13, 2026, reviewed and approved the "2026 Employee Share Ownership Plan (Draft)" (《2026 年員工持股計畫（草案）》) and approved the grant of 3,048,701 repurchased shares to 150 eligible employees at a grant price of RMB39.25 per share, with a fair value of RMB77.98 per share. The repurchased shares are held in the share ownership plan until the shares are vested and exercised, upon which they will be transferred to the relevant employees.

According to the plan provisions, and subject to the satisfaction of relevant individual performance assessment conditions, the granted shares will vest in two batches, with a vesting ratio of 50% for each batch:

The first batch: vests 12 months after the date on which the last batch of underlying shares is transferred to the share ownership plan as announced by the Company;

The second batch: vests 24 months after the date on which the last batch of underlying shares is transferred to the share ownership plan as announced by the Company.

The grant price of the shares shall be calculated by reference to the average trading price of the Company's shares over the 20 trading days prior to the board meeting held on January 28, 2026 for the approval of 2026 Employee Share Ownership Plan. The fair value of the restricted shares shall be determined based on the closing price of the Company's shares on the grant date.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

37. SHARE INCENTIVE SCHEME (Continued)

(a) Equity-settled share-based payment arrangement of the Company (Continued)

The number of shares under the 2026 Employee Share Ownership Plan is summarized as follows:

	Six months ended June 30
	2026
	'000
At the beginning of the period	–
Granted	3,049
Exercised	–
Lapsed	–
At the end of the period	**3,049**

(b) Equity-settled share-based payment arrangement of Source Photonics

As at September 30, 2025, the Group acquired 97.48% equity interests in Source Photonics for a consideration of RMB4,358,976,000. Upon completion of the transactions, Source Photonics became a subsidiary of the Company.

Pursuant to the share option incentive scheme dual approved by the Board of Directors and Shareholders of Source Photonics on October 16, 2020 (the "2017 Share Plan (2020 Revisions)"), the maximum aggregate number of share options that may be issued was increased to 31,115,675 Non-Voting Ordinary Shares.

Share options were granted on the following dates:

- December 29, 2020, at an exercise price of USD2.04 per share. The fair value is USD0.29 per option;
- November 1, 2021, at an exercise price of USD2.04 per share. The fair value is USD0.21 per option;
- June 1, 2022, at an exercise price of USD2.04 per share. The fair value is USD0.25 per option;
- August 1, 2022, at an exercise price of USD1.19 per share. The fair value is USD0.48 per option.

Vesting Period: The plan specifies a vesting period of four (4) consecutive years, commencing on January 1, 2020. For share option grants made after 2020, the vesting period is the period from the grant date through the end of the 2023 performance cycle.

The term of the share options shall not exceed 10 years from the respective Dates of Grant.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

37. SHARE INCENTIVE SCHEME (Continued)

(b) Equity-settled share-based payment arrangement of Source Photonics (Continued)

Modification of share-based payment arrangements

In July 2022, Source Photonics reduced the exercise price of employee share options granted on December 29, 2020, November 1, 2021, and June 1, 2022 from USD2.04 to USD1.19 per share. The modification date of the share options was August 1, 2022.

As at December 31, 2025, the maximum number of share options under the 2017 Share Plan (2020 Revisions) has been fully granted in accordance with the scheme terms.

The number of share options under the 2017 Share Plan (2020 Revisions) is summarized as follows:

	'000
At January 1, 2025	–
Business combination	31,116
Granted	–
Forfeited	–
Repurchase of employee share options	(22,099)
At December 31, 2025 and June 30, 2026	**9,017**

The options outstanding at December 31, 2025 and June 30, 2026 represent those granted on August 1, 2022 with an exercise price of USD1.19 and a weighted-average remaining contractual life of 5.85 years and 5.35 years, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

40. CONTINGENCIES AND COMMITMENTS

40.1 Contingencies

The Group and the Company have contingent liabilities in respect of claims or other legal procedures arising in its ordinary course of business from time to time. As at December 31, 2023, 2024 and 2025 and June 30, 2026, the directors of the Company did not anticipate that any material liabilities will arise from the contingent liabilities other than those provided for in the Historical Financial Information.

40.2 Capital Commitments

The following shows the major capital commitments of the Group:

	As at December 31			As at June 30
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Property, plant and equipment commitments:

42. BUSINESS COMBINATION

(a) Summary of acquisitions

During the year ended December 31, 2023, the acquisitions of new subsidiaries are summarized as follows:

	Suzhou Display	Aranda	Total
	RMB'000 (note (i))	*RMB'000 (note (ii))*	*RMB'000*
Total consideration transferred			
Cash consideration	1,382,684	289,947	1,672,631
Less: Net fair value of identifiable assets acquired and liabilities assumed	(1,517,497)	(289,947)	(1,807,444)
Goodwill	**(134,813)**	**–**	**(134,813)**

(i) Acquisition of Suzhou Display

As at February 1, 2023, the Group acquired 100.00% equity interests of Suzhou Dongshan Display Inc. ("Suzhou Display") with the consideration of RMB1,382,684,000. Upon completion of the transactions, Suzhou Display became the subsidiary of the Company. Suzhou Display is mainly engaged in research and development, production and sales of liquid crystal display and semi-conductor products.

Negative goodwill of approximately RMB134,813,000 was recorded in the consolidated financial statements as a result of the difference between the fair value of the consideration paid and payable, and the fair value of the net assets acquired, which are the fair value of the identifiable assets acquired and liabilities assumed with reference to the valuation report prepared by Topsun Assets Evaluation & Consulting Co., Ltd, an independent qualified professional valuer not connected to the Group. The gain on bargain purchase is mainly attributable to the immediate cash realisation and the Group's capability in negotiating the terms of the Acquisition in favour of the Group with the Vendor.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

42. BUSINESS COMBINATION (Continued)

(a) Summary of acquisitions (Continued)

(ii) Acquisition of Aranda

As at February 1, 2023, the Group acquired 100.00% equity interests of Aranda through a capital injection of RMB289,947,000. Upon completion of the transactions, Aranda became the subsidiary of the Company. Aranda is mainly engaged in research and development, production and sales of welded assemblies, precision component sub-assemblies, and industrial tooling products.

(b) Financial information of acquisitions

The fair value of the identifiable assets and liabilities and cash and cash equivalent impact arising from the acquisitions of subsidiaries in the above transactions are summarized as follows. Valuation was performed by an independent valuer to determine the fair value of the identified assets.

	Suzhou Display	Aranda	Total
	RMB'000	*RMB'000*	*RMB'000*
Fair value of identifiable net assets			
Non-current assets			
Property, plant and equipment	358,540	109,411	467,951

Less: Non-controlling interests	–	–	–
Fair value of the net assets acquired	**1,517,497**	**289,947**	**1,807,444**
Cash impact			
Cash paid (i)	1,156,515	219,120	1,375,635
Less: cash and cash equivalents in the subsidiaries acquired	(503,175)	(8,682)	(511,857)
Net cash outflow on acquisitions	**653,340**	**210,438**	**863,778**

(i) As for Suzhou Display, as at December 31, 2023, the Group had paid consideration of RMB1,156,515,000. The remaining RMB226,169,000 will be paid by installment pursuant to the acquisition agreement.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

42. BUSINESS COMBINATION (Continued)

(b) Financial information of acquisitions (Continued)

(ii) As for Aranda, as at December 31, 2023, the Group had paid consideration of RMB219,120,000. The remaining RMB70,827,000 will be paid by installment pursuant to the acquisition agreement.

The amounts of revenue and profit of subsidiaries since the acquisition date were included in the consolidated statement of comprehensive income for the year ended December 31, 2023 are summarized as follows:

	Suzhou Display	Aranda	The Group (Excluding Suzhou Display& Aranda)	Total
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Revenue	2,514,130	410,622	30,726,453	33,651,205
Net profit / (losses)	129,643	(6,159)	1,841,566	1,965,050

If the acquisition had occurred on January 1, 2023, consolidated pro-forma revenue and net profit/(losses) of the Group for the year ended December 31, 2023 would have been RMB33,796,663,000 and RMB1,901,562,000 respectively.

	Suzhou Display	Aranda	The Group (Excluding Suzhou Display& Aranda)	Total
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Revenue	2,628,084	442,126	30,726,453	33,796,663
Net profit / (losses)	105,643	(43,045)	1,838,964	1,901,562

The amounts have been calculated using the subsidiaries' results and adjusting them for:

- differences in the accounting policies between the Group and the subsidiary (if any), and
- the additional amortization that would have been charged assuming the fair value adjustments to intangible assets had applied from January 1, 2023, together with the consequential tax effects.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

42. BUSINESS COMBINATION (Continued)

(c) Summary of acquisitions

During the year ended December 31, 2025, the acquisitions of new subsidiaries are summarized as follows:

	GMD Group	Source Photonics	Total
	RMB'000 (note (i))	*RMB'000 (note (ii))*	*RMB'000*
Total consideration transferred			
Cash consideration	509,852	4,358,976	4,868,828
Less: Net fair value of identifiable assets acquired and liabilities assumed	(980,550)	(1,533,882)	(2,514,432)
Goodwill	**(470,698)**	**2,825,094**	**2,354,396**

(i) Acquisition of GMD Group

As at October 31, 2025, the Group acquired 100.00% equity interests of GMD Group with the consideration of RMB509,852,000. Upon completion of the transactions, GMD Group became the subsidiary of the Company. GMD Group is mainly engaged in precision metal stamping, sheet metal fabrication, and mechanical assembly for industrial applications.

Negative goodwill of approximately RMB470,698,000 was recorded in the consolidated financial statements as a result of the difference between the fair value of the consideration paid and payable, and the fair value of the net assets acquired, which are the fair value of the identifiable assets acquired and liabilities assumed with reference to the valuation report prepared by Topsun Assets Evaluation & Consulting Co., Ltd, an independent qualified professional valuer not connected to the Group. The gain on bargain purchase is mainly attributable to the immediate cash realisation and the Group's capability in negotiating the terms of the Acquisition in favour of the Group with the Vendor.

(ii) Acquisition of Source Photonics

As at September 30, 2025, the Group acquired 97.48% equity interests of Source Photonics with the consideration of RMB4,358,976,000. Upon completion of the transactions, Source Photonics became the subsidiary of the Company. Source Photonics is mainly engaged in the R&D, production and sales of products such as optical chips, optical components and optical modules.

The goodwill arising from the acquisition of Source Photonics primarily comprises expected synergies from combining the Group's existing capabilities in PCBs and precision components with Source Photonics' expertise in optical chips, optical components and optical transceivers, particularly to serve the growing AI and data centre markets, the assembled workforce and technical know-how of Source Photonics in the design and manufacturing of optical components and customer relationships. These do not qualify for separate recognition as identifiable intangible assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

42. BUSINESS COMBINATION (Continued)

(d) Financial information of acquisitions (Continued)

	GMD Group	Source Photonics	Total
	RMB'000	*RMB'000*	*RMB'000*
Cash impact			
Cash paid (i)	509,852	3,823,053	4,332,904
Less: cash and cash equivalents in the subsidiaries acquired	(673,896)	(275,731)	(949,627)
Net cash outflow on acquisitions	**(164,044)**	**3,547,322**	**3,383,277**

(i) As for GMD Group, as at December 31, 2025, the Group had paid consideration of RMB509,852,000.

(ii) As for Source Photonics, as at December 31, 2025, the Group had paid consideration of RMB3,823,053,000. The remaining RMB 535,923,000 will be paid by installment pursuant to the acquisition agreement.

The amounts of revenue and (losses)/profit of subsidiaries since the acquisition date were included in the consolidated statement of comprehensive income for the year ended December 31, 2025 are summarized as follows:

	GMD Group	Source Photonics	The Group (Excluding GMD Group & Source Photonics)	Total
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Revenue	1,292,325	1,435,535	37,396,999	40,124,859
Net profit /(losses)	(27,086)	311,831	1,108,222	1,392,967

If the acquisition had occurred on January 1, 2025, consolidated pro-forma revenue and net profit/(losses) of the Group for the year ended December 31, 2025 would have been RMB50,251,626,000 and RMB1,035,793,000 respectively.

	GMD Group	Source Photonics	The Group (Excluding GMD Group & Source Photonics)	Total
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Revenue	7,791,577	5,063,050	37,396,999	50,251,626
Net profit / (losses)	(754,420)	787,087	1,040,966	1,073,633

The amounts have been calculated using the subsidiaries' results and adjusting them for:

- differences in the accounting policies between the group and the subsidiary (if any); and
- the additional amortization that would have been charged assuming the fair value adjustments to intangible assets had applied from January 1, 2025, together with the consequential tax effects.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

43. DISPOSAL OF SUBSIDIARIES

The transaction of disposal of subsidiaries during the Track Record Period had no significant impact on the Group's consolidated financial statements.

44. RELATED PARTY TRANSACTIONS

(a) Parent Entities

		Ownership interest			
		As at December 31			As at June 30
Name	Place of incorporation	2023	2024	2025	2026
Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen	Suzhou, Jiang Su, PRC	28.28%	28.34%	33.26%	33.26%

The ultimate controlling parties are Mr. Yuan Yonggang, Mr. Yuan Yongfeng and Mr. Yuan Fugen.

(b) Names and Relationship with Related Parties

Related parties are those parties that have the ability, directly and indirectly, to control, jointly control or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related because they are subject to common control and common joint control in the controlling shareholder's families. Members of key management and their close family member of the Group are also considered as related parties.

The directors of the Company are of the view that the following parties were significant related parties of the Group that had transactions or balances with the Group for the years ended December 31, 2023, 2024 and 2025 and the six months ended June 30, 2025 and 2026:

Name of the related parties	Relationship with the Group
Suzhou Toprun Electric Equipment Co., Ltd. (蘇州騰冉電氣設備股份有限公司)	An associate of the Group
SuZhou DongCan Optoelectronic Technology Co., Ltd. (蘇州東燦光電科技有限公司)	An associate of the Group
Shanghai Fu Shan Precision Manufacturing Co., Ltd. (上海復珊精密製造有限公司)	An associate of the Group
MULTEK INTERNATIONAL DEVELOPMENT LIMITED (超毅國際發展有限公司)	An associate of the Group
Anhui Landun Photoelectron Co., Ltd. (安徽藍盾光電子股份有限公司)	An entity controlled by the ultimate controlling shareholders
Shanghai Corkuna New Material Technologies Co., Ltd. (上海科谷納新材料科技有限公司)	An entity controlled by the ultimate controlling shareholders
Suzhou Keguna New Materials Technology Co., Ltd. (蘇州科谷納新材料科技有限公司)	An entity controlled by the ultimate controlling shareholders
Hefei Anhui Software Co., Ltd. (合肥安慧軟件有限公司)	An entity controlled by the ultimate controlling shareholders

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

44. RELATED PARTY TRANSACTIONS (Continued)

(c) Material Transactions with Related Parties

The following transactions and balances were carried out between the Group and its related parties during the Track Record Period. In the opinion of the directors of the Company, the related party transactions were carried out in the normal course of business and at terms negotiated between the Group and the respective related parties. The Group has the following transactions with related parties:

	Year ended December 31			Six months ended June 30	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* *(Unaudited)*	*RMB'000*
Purchase of goods:

	23,535	**24,078**	**24,517**	**12,645**	**14,861**

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

44. RELATED PARTY TRANSACTIONS (Continued)

(e) Key Management Compensation (Continued)

As at December 31, 2023, 2024 and 2025 and June 30, 2026, approximately RMB4,380,000, RMB4,699,000, RMB4,296,000 and RMB1,735,000 of payroll payables were included in other payables and accruals.

45. EVENTS AFTER THE REPORTING PERIOD

In July 2026, the Company repurchased 255,200 A shares for a consideration of RMB49,995,000, except for the above event, there are no other material subsequent events undertaken by or impacted on the Company or the Group subsequent to June 30, 2026 and up to the date of this report.

46. SUMMARY OF OTHER ACCOUNTING POLICIES

(1) Principles of Consolidation

The Historical Financial Information incorporates the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether or not the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and consolidated statement of comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(1) Principles of Consolidation (Continued)

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in existing subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Group and the non-controlling interests according to the Group's and the non-controlling interests' proportionate interests.

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Company.

When the Group loses control of a subsidiary, the assets and liabilities of that subsidiary and non-controlling interests (if any) are derecognized. A gain or loss is recognized in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the carrying amount of the assets (including goodwill), and liabilities of the subsidiary attributable to the owners of the Company. All amounts previously recognized in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary. The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under *IFRS 9* or, when applicable, the cost on initial recognition of an investment in an associate.

(2) Investments in Associates

An associate is an entity over which the Group has significant influence but no control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. Investments in associates are accounted for using the equity method of accounting, after initially being recognized at cost.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(2) Investments in Associates (Continued)

Under the equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates are recognized as a reduction in the carrying amount of the investment.

Where the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in these entities. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity-accounted investees have been changed where necessary to ensure consistency with the policies adopted by the group.

Changes in the Group's interests in associates

When the Group reduces its ownership interests in an associate but the Group continues to use the equity method (including situations that change of ownership interest in an associate due to capital increase of other shareholders to the associate), the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognized in other comprehensive income relating to that reduction in ownership interests if that gain or loss would have been reclassified to profit or loss on the disposal of the related assets or liabilities.

(3) Business Combinations

(i) Business Combination not Under Common Controls

The acquisition method of accounting is used to account for all business combinations (except for the business combinations under common controls), regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred
- liabilities incurred to the former owners of the acquired business
- equity interests issued by the Group
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognizes any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(3) Business Combinations (Continued)

(i) Business Combination not Under Common Controls (Continued)

Acquisition-related costs are expensed as incurred.

The excess of the consideration transferred, amount of any non-controlling interest in the acquired entity, and acquisition date fair value of any previous equity interest in the acquired entity over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognized directly in profit or loss as a bargain purchase.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions. Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value, with changes in fair value recognized in profit or loss.

(4) Separate Financial Statements

Investments in subsidiaries are accounted for at cost less impairment. Cost includes direct attributable costs of investment. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

Impairment test of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount of the investee's net assets including goodwill.

(5) Foreign Currencies

(i) Functional and Presentation Currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). Since the majority of the assets and operations of the Group are located in the PRC, the Historical Financial Information are presented in RMB, which is also the Company's functional and the Group's presentation currency.

(ii) Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss. They are deferred in equity if they relate to qualifying cash flow hedges.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(5) Foreign Currencies (Continued)

(ii) Transactions and Balances (Continued)

Foreign exchange gains and losses that relate to borrowings are presented in the consolidated statements of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the consolidated statements of profit or loss on a net basis within other gains/(losses), net.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at FVTPL are recognized in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equities classified as fair value through other comprehensive income are recognized in other comprehensive income.

(iii) Group Companies

The results and financial position of all the Group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each statement of financial position of the Group's entities are translated at the closing rate at the end of the reporting period;

- income and expenses for each statement of profit or loss of the Group's entities are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and

- all resulting exchange differences are recognized in other comprehensive income.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations are taken to other comprehensive income. When a foreign operation is partially disposed of or sold, exchange differences that were recorded in equity are reclassified to profit or loss, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

(6) Property, Plant and Equipment

The Group's accounting policy for buildings and equipment is explained in Note 18(a). Property, plant and equipment are tangible assets that are held for use in the production or supply of goods or services, or for administrative purposes, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(6) Property, Plant and Equipment (Continued)

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss.

Construction in progress mainly represents buildings under construction, which is stated at cost less any impairment losses, and is not depreciated. Cost comprises the direct costs of construction and capitalized borrowing costs on related borrowed funds during the period of construction. Construction in progress is reclassified to the appropriate category of property and equipment when completed and ready for use.

(7) Impairment of Non-Financial Assets

Goodwill, freehold land and intangible assets that have an indefinite useful life or are not yet available for use are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

(8) Investment properties

Investment property, which is property held to earn rentals and/or for capital appreciation (including property under construction for such purposes), is measured initially at cost, including transaction costs. Subsequent to initial recognition, investment property is stated at cost less subsequent accumulated depreciation and any accumulated impairment losses. Depreciation is recognised so as to write off the cost of investment property over their estimated useful lives and after taking into account of their estimated residual value, using the straight-line method.

An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognized.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(9) Intangible assets

(i) Goodwill

Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortized but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, being the operating segments.

(ii) Trademark right and patent right combination

Trademark right and Patent right are initially recognized at fair value and historical costs on the acquisition date. They have a finite useful life and subsequently carried at cost less accumulated amortization and impairment losses.

(iii) Software

Purchased software is stated at cost less any impairment losses and amortized on the straight-line basis over its estimated useful life.

(iv) Customer resources

Customer resources are recognized at fair value at the acquisition date. They have a finite useful life and are subsequently carried at cost less accumulated amortization and impairment losses.

(10) Financial Assets

(i) Classification

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those to be measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will be recorded either in profit or loss or in OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to present subsequent changes in fair value in other comprehensive income.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(10) Financial Assets (Continued)

(ii) Recognition and Derecognition

Regular way purchases and sales of financial assets are recognized on trade-date, the date on which the Group commits to purchase or sell the assets. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- Amortized cost: Assets that are held for collection of contractual cash flows, where those cash flows represent solely payments of principal and interest, are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other gains/(losses), net together with foreign exchange gains and losses. Impairment losses are presented as separate line items in the statement of profit or loss.

- FVTPL: Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognized in profit or loss and presented net within other gains/(losses), net in the period in which it arises.

- FVOCI: assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as a separate line item in the statement of profit or loss.

Equity instruments

The Group subsequently measures all equity investments at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognized in profit or loss as other income when the Group's right to receive payments is established.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(10) Financial Assets (Continued)

(iii) Measurement (Continued)

Equity instruments (Continued)

Changes in the fair value of financial assets at FVTPL are recognized in other gains/ (losses) in the statement of profit or loss as applicable.

(iv) Impairment of Financial Assets

The Group recognizes an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flow will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms. Details, please refer to credit risks in Note 3.2.

(11) Financial Liabilities

Financial liabilities are classified as financial liabilities at amortized cost and financial liabilities at FVTPL at initial recognition.

Financial liabilities of the Group mainly comprise financial liabilities at amortized cost, including trade and note payables, other payables and accruals, borrowings and customer deposit. Such financial liabilities are initially recognized at fair value, net of transaction costs incurred, and subsequently measured using the effective interest method. Financial liabilities that are due within one year (inclusive) are classified as current liabilities; those with maturities over one year but are due within one year (inclusive) as from the balance sheet date are classified as current portion of non-current liabilities. Others are classified as non-current liabilities.

A financial liability is derecognized or partly derecognized when the underlying present obligation is discharged or partly discharged. The difference between the carrying amount of the derecognized part of the financial liability and the consideration paid is recognized in profit or loss for the current period.

(12) Derivative Financial Instruments and Hedging Activities

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently measured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as either:

- hedges of the fair value of recognized assets or liabilities or a firm commitment (fair value hedges),

- hedges of a particular risk associated with the cash flows of recognized assets or liabilities or highly probable forecast transactions (cash flow hedges), or

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(12) Derivative Financial Instruments and Hedging Activities (Continued)

- hedges of a net investment in a foreign operation (net investment hedges).

A hedging relationship qualifies for hedge accounting only if all of the following criteria are met:

- the hedging relationship consists only of eligible hedging instruments and eligible hedged items.
- at the inception of the hedging relationship there is formal designation and documentation of the hedging relationship and the Group's risk management objective and strategy for undertaking the hedge.
- the hedging relationship meets all of the following hedge effectiveness requirements:

  (i) there is an economic relationship between the hedged item and the hedging instrument; and

  (ii) the effect of credit risk does not dominate the value changes that result from that economic relationship; and

  (iii) the hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item. However, that designation shall not reflect an imbalance between the weightings of the hedged item and the hedging instrument that would create hedge ineffectiveness (irrespective of whether recognized or not) that could result in an accounting outcome that would be inconsistent with the purpose of hedge accounting.

Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised directly in other comprehensive income, another portion is recognised directly in profit or loss.

If the forecast transaction being hedged is subsequently recognised as a non-financial asset or non-financial liability, or if the forecast transaction for the non-financial asset or non-financial liability results in a firm commitment to apply a fair value hedge, the amount of the cash flow hedging reserve that would otherwise have been recognised in other comprehensive income is reversed out to the amount initially recognised for that asset or liability. The remaining cash flow hedges are reversed out of the cash flow hedge reserve recognised in other comprehensive income to profit or loss in the same period in which the expected cash flows to be hedged affect profit or loss, if a purchase is expected to occur.

Derivatives that do not apply hedge accounting

Certain derivative instruments do not apply hedge accounting. Changes in the fair value of such derivative instruments are recognized immediately in profit or loss and are included in other gains/(losses), net.

Accounting policy for fair value hedges

Changes in the fair value of derivatives that are designated and qualify as hedging instruments of fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged items

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(12) Derivative Financial Instruments and Hedging Activities (Continued)

Accounting policy for fair value hedges (Continued)

that are attributable to the hedged risk. The gain or loss relating to the ineffective portion is recognized in profit or loss within other gains/(losses).

(13) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost of inventories are determined on the weighted average method. Cost comprises direct materials, direct labor and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost includes the reclassification from equity of any gains or losses on qualifying cash flow hedges relating to purchases of raw material but excludes borrowing costs. Costs of purchased inventory are determined after deducting rebates and discounts. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(14) Trade Receivables

Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, in which case they are recognized at fair value. The Group holds the trade receivables with the objective of collecting the contractual cash flows and therefore measures them subsequently at amortized cost using the effective interest method. See Note 3.2 for a description of the Group's impairment policies.

(15) Share Capital and Capital Reserve

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

(16) Trade and Other Payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of financial period which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

(17) Borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are derecognized when the obligation specified in the contract is discharged, canceled or expired. The difference between the carrying amount of a financial liability that has been extinguished or

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(17) Borrowings (Continued)

transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other income or finance costs.

Where the terms of a financial liability are renegotiated and the entity issues equity instruments to a creditor to extinguish all or part of the liability (debt for equity swap), a gain or loss is recognized in profit or loss, which is measured as the difference between the carrying amount of the financial liability and the fair value of the equity instruments issued.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Covenants that the Group is required to comply with, on or before the end of reporting period, are considered in classifying loan arrangements with covenants as current or non-current. Covenants that the Group is required to comply with after the reporting period do not affect the classification at the reporting date.

(18) Borrowing Costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other borrowing costs are expensed in the period in which they are incurred.

(19) Provisions

Provisions for legal claims, service warranties and make good obligations are recognized when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(20) Employee Benefits

(i) Short-Term Obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the statement of financial position.

(ii) Housing Funds, Medical Insurances and Other Social Insurances

Employees of the Group in the PRC are entitled to participate in various government-supervised housing funds, medical insurance and other employee social insurance plan. The Group contributes on a monthly basis to these funds based on certain percentages of the salaries of the employees, subject to certain ceiling. The Group's liability in respect of these funds is limited to the contributions payable in each year. Contributions to the housing funds, medical insurances and other social insurances are expensed as incurred.

(iii) Post-Employment Benefits

The Group classifies post-employment benefit plans as either defined contribution plans or defined benefit plans. Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions into a separate fund and will have no obligation to pay further contributions; and defined benefit plans are post-employment benefit plans other than defined contribution plans. During the reporting period, the Group's defined contribution plans mainly include basic pensions and unemployment insurance, while the defined benefit plans are certain oversea subsidiaries provide supplemental retirement benefits beyond the national regulatory insurance system.

(iv) Basic Pensions

The Group's employees participate in the basic pension plan set up and administered by local authorities of Ministry of Human Resource and Social Security. Monthly payments of premiums on the basic pensions are calculated according to prescribed bases and percentage by the relevant local authorities. When employees retire, the relevant local authorities are obliged to pay the basic pensions to them. The amounts based on the above calculations are recognized as liabilities in the accounting period in which the service has been rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets.

(21) Share-Based Payments

(i) Equity-settled share-based payment transactions

The Group operates an equity-settled share-based compensation plan, under which the entity receives services from employees as consideration for equity instruments (including shares or share options) of the Group. The fair value of the employee services received in exchange for the grant of the equity instruments is recognized as an expense. The total amount to be expensed is determined by reference to the fair value of the equity instruments granted:

- including any market performance conditions;

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(21) Share-Based Payments (Continued)

(i) Equity-settled share-based payment transactions (Continued)

- excluding the impact of any service and non-market performance vesting conditions (for example, remaining an employee of the entity over a specified time period); and
- including the impact of any non-vesting conditions.

At the end of each reporting period, the Group revises its estimates of the number of share options that are expected to vest based on the non-marketing performance and service conditions, irrespective of whether those non-vesting conditions are satisfied. It recognizes the impact of the revision to original estimates, if any, in the income statement, with a corresponding adjustment to equity.

(ii) Share-based payment transactions among group entities

The Company settling a share-based payment transaction when another entity in the Group receives the goods or services shall recognize the transaction as an equity-settled share-based payment transaction only if it is settled in the Company's own equity instruments. Otherwise, the transaction shall be recognized as a cash settled share-based payment transaction. In its separate financial statements, the Company records a debit, recognizing an increase in the investment in subsidiaries as a capital contribution from the parent and a credit to equity as no goods or services are received by the Company. The Company records a debit, recognizing the cash the employee paid when exercising the equity-settled share-based payment along with a decrease in reserves and a credit, recognizing share capital and share premium of the Company.

(iii) Modifications and Cancelations

The Group may modify the terms and conditions on which the share-based compensation plan was granted. If a modification increases the fair value of the equity instruments granted, the incremental fair value granted is included in the measurement of the amount recognized for the services received over the remainder of the vesting year. A grant of the share-based compensation plan, that is canceled or settled during the vesting year, is treated as an acceleration of vesting. The Group will immediately recognize the amount that otherwise would have been recognized for services received over the remainder of the vesting year.

(22) Dividend Distribution

Dividend distribution to the shareholders is recognized as a liability in the Historical Financial Information in the period in which the dividends are approved by the entities' shareholders or directors, where appropriate.

(23) Interest Income

Interest income from financial assets at FVTPL is included in the net fair value gains/(losses) on these assets.

Interest income on financial assets at amortized cost and financial assets at FVOCI calculated using the effective interest method is recognized in profit or loss as part of other income.

Interest income is presented as finance income where it is earned from financial assets that are held for cash management purposes.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(24) Dividend Income

Dividend income is recognized when the right to receive dividend payment is established.

(25) Earnings Per Share

Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to owners of the Company, excluding any costs of servicing equity other than ordinary shares; and
- by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year and excluding treasury shares.

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- the after-income tax effect of interest and other financing costs associated with dilutive potential ordinary shares, and
- the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares.

(26) Government Grant

Government grants relating to costs are deferred and recognized in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and they are credited to profit or loss on a straight-line basis over the expected lives of the related assets.

(27) Current and Deferred Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income, based on the applicable income tax rate for each jurisdiction, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

(i) Current Income Tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Company and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(27) Current and Deferred Income Tax (Continued)

(ii) Deferred Income Tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Historical Financial Information. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax liabilities and assets are not recognized for temporary differences between the carrying amount and tax bases of investments in foreign operations where the Company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

In assessing any uncertainty over income tax treatments, the Group considers whether it is probable that the relevant tax authority will accept the uncertain tax treatment used, or proposed to be used by individual group entities in their income tax filings. If it is probable, the current and deferred taxes are determined consistently with the tax treatment in the income tax filings. If it is not probable that the relevant taxation authority will accept an uncertain tax treatment, the effect of each uncertainty is reflected by using either the most likely amount or the expected value.

(28) Leases

(i) Definition of a Lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(28) Leases (Continued)

(i) Definition of a Lease (Continued)

For contracts entered into or modified on or after the date of initial application or arising from business combinations, the Group assesses whether a contract is or contains a lease based on the definition under IFRS 16 at inception or modification date. Such contract will not be reassessed unless the terms and conditions of the contract are subsequently changed.

(ii) The Group as a Lessee

As a practical expedient, leases with similar characteristics are accounted on a portfolio basis when the Group reasonably expects that the effects on the financial statements would not differ materially from individual leases within the portfolio.

Short-Term Leases and Leases of Low-Value Assets

The Group applies the short-term lease recognition exemption to leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies to the recognition exemption for lease of low-value assets. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

Right-of-Use Assets

The cost of right-of-use asset includes:

- the amount of the initial measurement of the lease liability;
- any lease payments made at or before the commencement date, less any lease incentives received;
- any initial direct costs incurred by the Group; and
- an estimate of costs to be incurred by the Group in dismantling and removing the underlying assets, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease.

Right-of-use assets in which the Group is reasonably certain to obtain ownership of the underlying leased assets at the end of the lease term are depreciated from commencement date to the end of the useful life. Otherwise, right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term.

The Group presents right-of-use assets as a separate line item on the consolidated statement of financial position.

Land leases are also in the scope of IFRS 16. The Group recognizes any prepaid premium for leasehold lands as right-of-use assets which are depreciated over the relevant lease terms.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(28) Leases (Continued)

(ii) The Group as a Lessee (Continued)

Right-of-Use Assets (Continued)

Refundable rental deposits paid are account under IFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments and included in the cost of right-of-use assets.

Lease Liabilities

At the commencement date of a lease, the Group recognizes and measures the lease liability at the present value of lease payments that are unpaid at that date. In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases of the Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Group under residual value guarantees;
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option;
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option; and
- lease payments to be made under reasonably certain extension options are also included in the measurement of lease liabilities.

After the commencement date, lease liabilities are adjusted by interest accretion and lease payments.

The Group presents lease liabilities as a separate line item in the consolidated statement of financial position.

(iii) The Group as a Lessor

Classification and measurement of leases

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

46. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(28) Leases (Continued)

(iii) The Group as a Lessor (Continued)

Classification and measurement of leases (Continued)

Rental income from operating leases is recognized in profit or loss on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset, and such costs are recognized as an expense on a straight-line basis over the lease term.

Refundable rental deposits received are accounted under IFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments from lessees.

III SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared by the Company or any of the companies now comprising the Group in respect of any period subsequent to June 30, 2026, and up to the date of this report.

The following is the text of a report set out on pages IB-1 to IB-2, received from the Company's reporting accountants, Confucius International CPA Limited, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this prospectus.

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF SUZHOU DONGSHAN PRECISION MANUFACTURING CO., LTD. AND UBS SECURITIES HONG KONG LIMITED, HAITONG INTERNATIONAL CAPITAL LIMITED, GF CAPITAL (HONG KONG) LIMITED AND CITIC SECURITIES (HONG KONG) LIMITED

Introduction

We report on the historical financial information of Source Photonics Holdings (Cayman) Limited ("Source Photonics") and its subsidiaries (together, the "Source Photonics Group") set out on pages IB-3 to IB-111, which comprises the consolidated statements of financial position of the Source Photonics Group and the statements of financial position of Source Photonics as at December 31, 2023, 2024 and September 30, 2025, the consolidated statements of profit or loss, the consolidated statements of comprehensive income, the consolidated statements of changes in equity and the consolidated statements of cash flows for each of the years ended December 31, 2023, 2024 and the nine months ended September 30, 2025 (the "Track Record Period") and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages IB-3 to IB-111 forms an integral part of this report, which has been prepared for inclusion in the prospectus of Suzhou Dongshan Precision Manufacturing Co., Ltd. (the "Company") dated October 20, 2026 (the "Prospectus") in connection with the initial listing of H shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited.

Directors' Responsibility for the Historical Financial Information

The directors of Source Photonics are responsible for the preparation of Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting Accountants' Responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200, *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether

due to fraud or error. In making those risk assessments, the reporting accountants considers internal control relevant to the entity's preparation of Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of Source Photonics and the Source Photonics Group's financial position as at December 31, 2023, 2024 and September 30, 2025, of the Source Photonics Group's financial performance and cash flows for the Track Record Period in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information.

Review of stub period comparative financial information

We have reviewed the stub period comparative financial information of Source Photonics Group which comprises the consolidated statement of profit or loss, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the nine months ended September 30, 2024 and other explanatory information (the "Stub Period Comparative Financial Information").

The directors of Source Photonics are responsible for the preparation of the Stub Period Comparative Financial Information in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information. Our responsibility is to express a conclusion on the Stub Period Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Stub Period Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information.

Report on Matters under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page IB-3 have been made.

Dividends

We refer to Note 13 to the Historical Financial Information which contains information about the dividends paid by the Source Photonics in respect of the Track Record Period.

I HISTORICAL FINANCIAL INFORMATION OF THE SOURCE PHOTONICS GROUP

Preparation of Historical Financial Information

Set out below is the Historical Financial Information which forms an integral part of this accountants' report.

The consolidated financial statements of the Source Photonics Group for the Track Record Period, on which the Historical Financial Information is based, were audited by Confucius International CPA Limited in accordance with Hong Kong Standards on Auditing issued by HKICPA ("Underlying Financial Statements").

The Historical Financial Information is presented in Renminbi ("RMB") and all values are rounded to the nearest thousand (RMB'000) except when otherwise indicated.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. GENERAL INFORMATION

Source Photonics Holdings (Cayman) Limited ("Source Photonics") was incorporated in the Cayman Islands on November 7, 2010 as an exempted company with limited liability. The address of Source Photonics' registered office is Offices of Maples Corporate Services Limited, PO Box 309, Ugland House, Grand Cayman, KY1-1104, Cayman Islands.

Source Photonics is an investment holding company and its subsidiaries are principally engaged in the R&D, production and sales of products such as optical chips, optical components and optical modules.

Source Photonics' subsidiaries during the Track Record Period are set out in Note 15.

The Historical Financial Information are presented in Renminbi ("RMB"), and all values are rounded to the nearest thousands (RMB'000) except when otherwise indicated.

The statutory consolidated financial statements of the Source Photonics Group for the years ended December 31, 2023, 2024 and nine months ended September 30, 2025 prepared in accordance with the relevant accounting principles in the PRC were audited by Grant Thornton (Special General Partnership) (致同會計師事務所(特殊普通合夥)) and Pan-China Certified Public Accountants LLP (天健會計師事務所(特殊普通合夥)), respectively, both of which was the certified public accountants registered in the PRC.

2. BASIS OF PREPARATION

The Historical Financial Information of the Source Photonics Group have been prepared in accordance with all applicable International Financial Reporting Standards ("IFRS Accounting Standards") issued by the International Accounting Standards Board ("IASB"). The Historical Financial Information has been prepared under the historical cost convention, as modified by the revaluation of financial assets and liabilities measured at fair value through profit or loss ("FVTPL") and financial assets measured at fair value through other comprehensive income ("FVOCI").

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Source Photonics Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Historical Financial Information are disclosed in Note 4 below.

New standards, amendments and interpretations to the existing standards that are effective during the Track Record Period have been adopted by the Source Photonics Group consistently throughout the years presented, unless prohibited by the relevant standard to apply retrospectively.

Other than those material accounting policies information as disclosed elsewhere in this Historical Financial Information, a summary of the other accounting policies information has been set out in Note 41 to this Historical Financial Information.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

2. BASIS OF PREPARATION (Continued)

2.1 New Standards and Amendments to Standards Not Yet Adopted

Standards and amendments to standards that have been issued but not yet effective and not been early adopted by the Source Photonics Group during the Track Record Period are as follows:

Standards and amendments	Effective for accounting periods beginning on or after
Amendments to IFRS 10 and IAS 28 'Sale or Contribution of Assets between an Investor and its Associate or Joint Venture'	To be determined
Amendments to IFRS 9 and IFRS 7 'Amendments to the Classification and Measurement of Financial Instruments'	January 1, 2026
Amendments to IFRS 9 and IFRS 7 'Contracts Referencing Nature-dependent Electricity'	January 1, 2026
Annual Improvements – Volume 11 IFRS accounting standards	January 1, 2026
IFRS18 'Presentation and Disclosure in Financial Statements'	January 1, 2027
IFRS 19 'Subsidiaries without Public Accountability: Disclosures'	January 1, 2027
IAS 21 Translation to a Hyper inflationary Presentation Currency	January 1, 2027

Except for the impact of IFRS18 mentioned below, other new/amended standards are either not relevant to the Source Photonics Group or not expected to have a material impact on the Source Photonics Group's consolidated financial statements when they become effective.

IFRS18 Presentation and Disclosure in Financial Statements

IFRS18 "Presentation and Disclosure in Financial Statements", which sets out requirements on presentation and disclosures in financial statements, will replace IAS 1 "Presentation of Financial Statements". This new IFRS Accounting Standard, while carrying forward many of the requirements in IAS 1, introduces new requirements to present specified categories and defined subtotals in the statement of profit or loss; provide disclosures on management-defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. In addition, some IAS 1 paragraphs have been moved to IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" and IFRS 7 "Financial Instruments: Disclosures". Minor amendments to IAS 7 "Statement of Cash Flows" and IAS 33 "Earnings per Share" are also made.

IFRS18 will be effective for annual periods beginning on or after January 1, 2027, with early application permitted. The application of IFRS18 is not expected to have significant impact on the Source Photonics Group's financial position and performance, but may affect the presentation of the statement of profit or loss and disclosures in the future financial statements.

3. FINANCIAL RISK MANAGEMENT

The Source Photonics Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The Source Photonics Group's

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

overall risk management seeks a balance between risk and return, minimizes the adverse impact of risk on the Source Photonics Group's finance performance and maximizes the interests of shareholders and other equity investors. Based on this risk management objective, the basic strategy of the Source Photonics Group's risk management is to identify and analyze the various risks faced by the Source Photonics Group, establish appropriate risk tolerance thresholds and timely and reliably supervise various risks to control them within a limited range.

3.1 Market Risk

(a) Foreign Exchange Risk

Foreign exchange risk arises when future commercial transactions or recognized assets and liabilities are denominated in a currency that is not the respective functional currency of Source Photonics and its subsidiaries. The Source Photonics Group manages its foreign exchange risk by performing regular reviews of the Source Photonics Group's net foreign exchange exposures and tries to minimize these exposures through buying and selling foreign currencies at market rate, wherever possible.

As at December 31, 2023, 2024 and September 30, 2025, the Source Photonics Group's major financial assets/liabilities exposed to foreign exchange risk, representing those financial assets/liabilities denominated in United States dollar ("USD") and included in a Source Photonics Group entity with different functional currency:

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.1 Market Risk (Continued)

(a) Foreign Exchange Risk (Continued)

As shown in the table above, the Source Photonics Group is primarily exposed to changes in USD exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from USD denominated financial instruments is as below:

	Year ended December 31		Nine months ended September 30	
	2023	2024	2024	2025
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
USD exchange rate -				
Increase 5%	(7,060)	(3,507)	(4,376)	(5,925)
Decrease 5%	7,060	3,507	4,376	5,925

Other foreign currencies of changes have no significant impact on foreign exchange risk.

(b) Interest Rate Risk

The Source Photonics Group's interest rate risk primarily arises from interest-bearing borrowings. Borrowings issued at floating rates expose the Source Photonics Group to cash flow interest rate risk and borrowings issued at fixed rates expose the Source Photonics Group to fair value interest rate risk. The Source Photonics Group determines the proportion of borrowings issued at floating rates and fixed rates based on the market environment and maintains an appropriate combination of financial instruments through regular review and monitoring.

As at December 31, 2023, 2024 and September 30, 2025, total borrowings of the Source Photonics Group which were bearing at floating rates amounted to approximately RMB 165,025,000, RMB 10,000,000 and nil, respectively.

If interest rate had been 50 basis points higher or lower with all other variables held constant, the profit before tax would decrease/increase approximately RMB 825,000, RMB 50,000 and nil for the years ended December 31, 2023, 2024 and nine months ended September 30, 2025, respectively.

Considering the repricing or maturity date, the fair value interest rate risk arises from borrowings and bank balances carried at fixed rates is not significant for the Source Photonics Group.

3.2 Credit Risk

Credit risk arises from cash and cash equivalents, restricted cash and term deposits, as well as trade and notes receivables, other receivables and financial assets measured at FVOCI. The carrying amount of each class of the above financial assets represents the Source Photonics Group's maximum exposure to credit risk in relation to the corresponding class of financial assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(a) Risk Management

To manage this risk, cash and cash equivalents as well as restricted cash and term deposits are mainly placed with reputable financial institutions which are all high-credit-quality financial institutions.

To manage risk from trade and notes receivables as well as other receivables and financial assets measured at FVOCI, the Source Photonics Group has policies in place to ensure that credit terms are made to counterparties with an appropriate credit history and the management performs ongoing credit evaluations of the counterparties. It also has continuous monitoring procedures to ensure the collection of the receivables as scheduled and follow up action is taken to recover overdue debts, if any.

(b) Impairment of Financial Assets

The Source Photonics Group has four types of financial assets that are subject to the expected credit loss model:

- Cash and cash equivalents, restricted cash and term deposits;
- Trade receivables;
- Notes Receivables at FVOCI, and
- Other receivables.

Credit risk of cash and cash equivalents and restricted cash and term deposits

Cash and cash equivalents and restricted cash and term deposits are mainly placed with high-credit rating financial institutions. There has been no recent history of default in relation to these financial institutions. The expected credit loss was immaterial as at December 31, 2023, 2024 and September 30, 2025.

Credit risk of trade receivables

(i) Trade receivables

The Source Photonics Group applies the IFRS 9 simplified approach to measure expected credit loss ("ECL") which uses a lifetime expected loss allowance for all trade receivables.

To measure ECL, trade receivables have been grouped based on shared credit risk characteristics and aging.

The Source Photonics Group also made individual assessment on the recoverability of its trade receivables for certain customers based on historical settlement records.

The historical loss rates are calculated based on the historical payment profiles of customers and the corresponding historical incurred credit losses. The historical loss rates are adjusted to reflect the forward-looking information on macroeconomic factors as well as the credit rating analysis of respective customers and other external data which have impacts to the ability of the customers to settle the receivables. The Source Photonics Group has identified the Gross Domestic Product ("GDP") of the countries in which it sells its goods to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets (Continued)

(i) Trade receivables (Continued)

Trade receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include the failure of a debtor to engage in a repayment plan with the Source Photonics Group and other indicators of severe financial difficulties.

Trade Receivables

On that basis, the loss allowance as at December 31, 2023, 2024 and September 30, 2025 were determined as follows for trade receivables:

As at December 31, 2023, the loss allowance of individually impaired trade receivables is determined as follows:

Assess individually:

	Gross carrying amount	ECL rate	Loss allowance	Reason
	RMB'000		*RMB'000*	
Trade receivables	1,367	100.00%	1,367	Financial difficulty

As at December 31, 2024, the loss allowance of individually impaired trade receivables is determined as follows:

Assess individually:

	Gross carrying amount	ECL rate	Loss allowance	Reason
	RMB'000		*RMB'000*	
Trade receivables	1,380	100.00%	1,380	Financial difficulty

As at September 30, 2025, the loss allowance of individually impaired trade receivables is determined as follows:

Assess individually:

	Gross carrying amount	ECL rate	Loss allowance	Reason
	RMB'000		*RMB'000*	
Trade receivables	1,369	100.00%	1,369	Financial difficulty

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets (Continued)

(i) Trade receivables (Continued)

As at December 31, 2023, 2024 and September 30, 2025, the loss allowance of grouped impaired trade receivables are determined as follows:

Assessed based on grouping:

	Within 1 year	1 to 2 years	Over 2 years	Total
As at December 31, 2023				
Expected loss rate	0.22%	38.55%	100.00%	
Gross carrying amount (RMB'000)	479,737	249	31	480,017
Loss allowance provision (RMB'000)	1,076	96	31	1,203
As at December 31, 2024				
Expected loss rate	0.08%	55.27%	100.00%	
Gross carrying amount (RMB'000)	873,220	3,105	–	876,325
Loss allowance provision (RMB'000)	694	1,716	–	2,410
As at September 30, 2025				
Expected loss rate	0.19%	23.68%	100.00%	
Gross carrying amount (RMB'000)	1,373,013	4,543	8	1,377,564
Loss allowance provision (RMB'000)	2,670	1,076	8	3,754

The management of the Source Photonics Group determined the ECL rates for portfolio of trade receivables with reference to past-due status of such balances by estimating their default rates taking into account the historical information and forward-looking information.

As at the end of each Track Record Period, the Source Photonics Group assessed the historical observed default rates and the forward-looking estimates, respectively. The management of the Source Photonics Group reviewed the portfolio of customers contributing the trade receivables balances for the respective past-due time band throughout the Track Record Period and noted that the majority of the balances of the respective past-due time band were due from similar portfolio of customers. Furthermore, the Source Photonics Group assessed these customers' financial condition, past settlement history, business relationship with the Source Photonics Group and other factors such as current market conditions and industry information, and considered that the credit risk for the same portfolio of customers remains approximately the same throughout the Track Record Period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets (Continued)

(i) Trade receivables (Continued)

The loss allowances for trade receivables for the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025 reconcile to the opening loss allowances are as follows:

	Year ended December 31		Nine months ended September 30	
	2023	**2024**	**2024**	**2025**
	RMB'000	*RMB'000*	*RMB'000 (unaudited)*	*RMB'000*
Opening loss allowance	1,707	2,570	2,570	3,790
Loss allowance recognized, net	845	1,272	183	1,360
Currency translation differences	18	(52)	(38)	(27)
Closing loss allowance	**2,570**	**3,790**	**2,715**	**5,123**

(ii) Notes Receivables at FVOCI

The Source Photonics Group measured provisions for impairment of notes receivables based on the lifetime ECL and assessed that there was no significant credit risk associated with its bank acceptance notes issued by large-sized banks as the Source Photonics Group did not expect that there would be any significant losses from non-performance by these reputable banks.

(iii) Other Receivables

Other receivables at the end of each of the periods are mainly comprised of deposits, export tax refund and others. The Source Photonics Group considers the probability of default upon initial recognition of the assets and whether there has been significant increase in credit risk on an ongoing basis throughout Track Record Period. To assess whether there is a significant increase in credit risk, the Source Photonics Group compares risk of a default occurring on the assets as of the reporting date with the risk of default as of the date of initial recognition. Especially the following indicators are incorporated:

- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant impact on the debtor's ability to meet its obligations;
- external credit rating of the counterparty;
- actual or expected significant adverse changes in the operating results of the debtor; and
- significant changes in the expected performance and behavior of the debtor, including changes in the payment status of debtor.

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 365 days past due in making a contractual payment.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.2 Credit Risk (Continued)

(b) Impairment of Financial Assets (Continued)

(iii) Other Receivables (Continued)

If the credit risk of the asset is in line with original expectations, the Source Photonics Group categorizes the asset as performing and recognizes 12 months expected credit losses (Stage 1). If a significant credit risk of the asset has occurred compared to original expectations or the credit is impaired, the asset is categorized as underperforming or non-performing and lifetime expected credit losses are recognized (Stages 2 and 3):

Set out below is the information about credit risk exposure on the Source Photonics Group's other receivables:

	Stage 1	**Stage 2**	**Stage 3**	**Total**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
As at December 31, 2023

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.3 Liquidity Risk

The Source Photonics Group intends to maintain sufficient cash and cash equivalents. Due to the dynamic nature of the underlying business, the policy of the Source Photonics Group is to regularly monitor the Source Photonics Group's liquidity risk and to maintain adequate liquid assets such as cash and cash equivalents and term deposits or to retain adequate financing arrangements to meet the Source Photonics Group's liquidity requirements.

The tables below analyze the Source Photonics Group's financial liabilities that will be settled into relevant maturity groupings based on the remaining period at each balance sheet date to their contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due for the corresponding period equal their carrying balances as the impact of discounting is not significant.

	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years	Total	Total carrying amount

The interest rate of borrowings and lease liabilities are disclosed in Note 27 and Note 17, respectively.

3.4 Capital Management

The primary objectives of the Source Photonics Group's capital management are to safeguard the Source Photonics Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximize shareholders' value.

The Source Photonics Group manages its capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Source Photonics Group may issue new shares, sell assets to reduce debt or raise additional funding from shareholders or banks as and when necessary. The Source Photonics Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.4 Capital Management (Continued)

The Source Photonics Group monitors capital on the basis of the debt to asset ratio as at December 31, 2023, 2024 and September 30, 2025 are as follows:

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Total assets	2,282,170	3,100,981	4,369,608
Total liabilities	4,303,775	2,117,734	2,889,147
Debt to asset ratio	188.58%	68.29%	66.12%

3.5 Fair Value Estimation

(a) Determination of Fair Value and the Fair Value Hierarchy of Financial Instruments

This note provides information on how the Source Photonics Group determines the fair values of various financial assets and liabilities.

For financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

(i) The timing of transfers is determined at the date of the event or change in circumstances that caused the transfers. During the Track Record Period, there was no transfer between Level 1 and Level 2.

(ii) The fair value of wealth management products issued by banks is determined using a market approach, with reference to the unadjusted indicative net asset values quoted by the issuing banks as at the reporting date. These indicative fair value take into account the expected investment returns of the products. No significant unobservable inputs are applied. The measurements are classified as Level 2 in the fair value hierarchy.

The fair value of derivative financial liabilities, which comprise foreign currency forwards, is determined as at the reporting date. The fair value of foreign currency forwards is measured using the discounted cash flow method, with the key valuation input being forward exchange rates. The fair value measurement are categorised within Level 2 of the fair value hierarchy.

(b) The Source Photonics Group's Valuation Process

For the financial assets and financial liabilities, including level 3 fair values, the Source Photonics Group's finance department performs the valuations for financial reporting purpose. The finance department reports the valuation results to the management.

(c) Transfers between levels in the hierarchy

For the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025, there were no transfers into or out of Level 3 fair value measurements of the Source Photonics Group's financial instruments.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

3. FINANCIAL RISK MANAGEMENT (Continued)

3.5 Fair Value Estimation (Continued)

(e) Valuation Inputs and Relationships to Fair Value (Continued)

Other than described above, there were no significant unobservable inputs that materially affect its fair values.

Sensitivity analysis is performed by the management to assess the exposure of the Source Photonics Group's financial results to fair value changes of Convertible Bond and financial assets measured at FVOCI at the end of each Track Record Period.

If the discount rate of the Note receivable at FVOCI held by Source Photonics Group had been 0.5% higher/lower, the fair values of the Note receivable at FVOCI held by the Source Photonics Group as at December 31, 2023, 2024 and September 30, 2025 would have been approximately RMB73,000, RMB23,000 and RMB7,000 lower, or RMB74,000, RMB24,000 and RMB7,000 higher respectively.

If the discount rate of the Convertible Bond at FVTPL had been 0.5% higher/lower, the fair values of the Convertible Bond at FVTPL as at December 31, 2023, 2024 and September 30, 2025 would have been approximately RMB1,705,000, RMB428,000 and RMB1,978,000 lower, or RMB 1,723,000, RMB430,000 and RMB1,998,000 higher respectively.

If the discount rate of the Financial liabilities at FVTPL had been 0.5% higher/lower, the fair values of the Preferred shares at FVTPL as at December 31, 2023, 2024 and September 30, 2025 would have been approximately RMB1,219,000, nil and nil lower or RMB6,028,000, nil and nil higher respectively.

If the volatility rate of the Financial liabilities at FVTPL had been 5% higher/lower, the fair values of the Preferred shares at FVTPL as at December 31, 2023, 2024 and September 30, 2025 would have been approximately RMB 1,791,000, nil and nil higher or RMB1,030,000, nil and nil lower respectively.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The Source Photonics Group continually evaluates the critical accounting estimates and key judgements applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable.

The critical accounting estimates and key assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are outlined below:

(a) Allowance for Expected Credit Loss of Receivables

Except for certain trade receivables from customers with specific credit risk that management adopts an individual impairment assessment approach, the Source Photonics Group uses a provision matrix to calculate ECLs for trade receivables. The loss allowances for receivables are based on assumptions about risk of default and expected loss rates to determine the expected loss. The Source Photonics Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation. The historical loss rates are adjusted to reflect the forward-looking information on macroeconomic factors as well as the credit rating analysis of respective customers and other external data which have impacts to the ability of the customers to settle the receivables.

The Source Photonics Group takes into account different macroeconomic scenarios in considering forward-looking information in Chinese mainland and abroad. The Source Photonics Group regularly

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (Continued)

(a) Allowance for Expected Credit Loss of Receivables (Continued)

monitors and reviews the key macroeconomic assumptions and parameters related to the calculation of expected credit losses. The Source Photonics Group has identified the Gross Domestic Product ("GDP") of the countries in which it sells its goods to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

(b) Estimated Net Realizable Value of Inventories

In accordance with the Source Photonics Group's accounting policy, the Source Photonics Group estimates net realizable value of inventories based on specific facts and circumstances. For different types of inventories, it requires the estimation on selling prices, costs of conversion, selling expenses and the related tax expense to calculate the net realizable amount of inventories. For inventories held for executed sales contracts, management estimates the net realizable amount based on the contracted price. For raw materials and work-in-progress, management has established a model in estimating the net realizable amount at which the inventories can be realizable in the normal course of business after considering the manufacturing cycles, production capacity and forecasts, estimated future conversion costs and selling prices. Management also takes into account the price or cost fluctuations and other related matters occurring after the end of the year which reflect conditions that existed at the end of each year.

It is reasonably possible that if there is a significant change in circumstances including the Source Photonics Group's business and the external environment, outcomes would be significantly affected.

(c) Property, Plant and Equipment and Intangible Assets – Estimated Useful Lives and Residual Values

The Source Photonics Group determines the estimated useful lives and residual values (if applicable) and consequently the related depreciation/amortization charges for its property, plant and equipment and intangible assets (excluding freehold land and goodwill). These estimates are based on the historical experience, anticipated change of technology, market condition and the actual consumptions of related assets. The depreciation/amortization charge will increase when useful lives are less than previously estimated. In addition, technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

Actual economic lives may differ from estimated useful lives and actual residual values may differ from estimated residual values. Periodic review could result in change in useful lives and residual values and therefore change in depreciation/amortization expense in future periods.

(d) Income Tax and Deferred Taxation

Estimation and judgement are required in determining the amount of the provision for income tax. There are transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recognized, such differences will impact on the income tax and deferred taxation provisions in the period in which such determination is made.

Deferred tax assets are recognized for unused tax losses and deductible temporary differences to the extent that it is probable that taxable profit will be available against which the losses and deductible temporary difference can be utilized. Significant estimation is required in determining the recoverability of deferred tax assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (Continued)

(d) Income Tax and Deferred Taxation (Continued)

In the event that future tax rules and regulations or related circumstances change, adjustments to current and deferred taxation may be necessary which would impact on the Source Photonics Group's results or financial position.

5. OPERATING SEGMENT INFORMATION

Description of Segments and Principal Activities

Operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision maker ("CODM"). The executive directors assess the financial performance and position of the Source Photonics Group and make strategic decisions. The executive directors, which has been identified as being the CODM, consists of the executive director, the chief financial officer and the managers for each business unit. The CODM reviews the Source Photonics Group's internal reporting in order to assess performance, allocate resources, and determine the operating segment based on these reports.

For management purposes, the Source Photonics Group operates as a single business unit organised by products, with one operating segment that principally engages in the provision of optical module-related products.

Unsatisfied	261,078	750,619	1,018,579
Transaction price allocated to remaining performance obligations of contracts	**261,078**	**750,619**	**1,018,579**

(e) Accounting Policies and Significant Judgements for Revenue Recognition

The Source Photonics Group recognizes revenue when (or as) a performance obligation is satisfied, i.e., when control of the goods or services underlying the particular performance obligation is transferred to the customer.

If control of the goods and services transfers over time, revenue is recognized over the period of the contract by reference to the progress towards complete satisfaction of that performance obligation. Otherwise, revenue is recognized at a point in time when the customer obtains control of the goods and services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Source Photonics Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

If a customer pays consideration or Source Photonics has a right to an amount of consideration that is unconditional, before Source Photonics transfers goods or services to the customer, Source Photonics presents the contract liability when the payment is made. A contract liability is Source Photonics' obligation to transfer goods or services to a customer for which Source Photonics has received consideration (or an amount of consideration is due) from the customer.

The Source Photonics Group generally offers assurance-type warranties to customers and such warranties are not considered a distinct performance obligation to customers. The Source Photonics Group accounts for the warranty in accordance with IAS 37 and the estimated warranty cost was not material for the Track Record Period (Note 30).

The credit period granted to customers by the Source Photonics Group is determined based on their credit risk characteristics, which is consistent with industry practice, and there is no significant financing component.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

6. REVENUE (Continued)

(e) Accounting Policies and Significant Judgements for Revenue Recognition (Continued)

Products revenue

The Source Photonics Group primarily engaged in production and sales of optical transceiver components, optical devices, modules, and chips used in data centers, optical transmission, wireless networks, and access networks.

Revenue from domestic product sales under the VMI (Vendor-Managed Inventory) model, is recognized at a point in time when the customer actually picks up and uses the goods, because it is only at this point that the customer obtains the ability to direct the use of the goods (such as the right to sell, process or otherwise dispose of the goods at its own discretion) and assumes the significant risks and rewards of ownership of the goods, including the risks of price fluctuations, obsolescence, damage or loss of the relevant goods.

Revenue from domestic product sales (excluding the VMI model) is recognized at a point in time when the Source Photonics Group has delivered the products to the location specified in the sales contract, the buyer has confirmed acceptance of the products, and both parties have signed the delivery order. Upon such acceptance, the customer gains the right to sell the products at its discretion and assumes the risks associated with the products, including price fluctuations, obsolescence, and loss.

Revenue from overseas sales of products is recognized at a point in time when control of the goods transfers to the customer. The specific point of revenue recognition for overseas sales varies based on the Incoterms agreed in the sales contract, with each term dictating the stage at which control, along with associated risks and rewards, transfer to the customer, as detailed below:

- For EXW (Ex Works) terms: revenue is recognized when the goods are made available to the customer at Source Photonics' premises. At this stage, the customer obtains unconditional access to the goods, gains the ability to direct their use (e.g., arrange transportation, resell, or process the goods at its own discretion), and assumes all significant risks and rewards of ownership—including risks of damage, loss, or price fluctuations of the goods from Source Photonics' premises onwards.

- For FOB (Free on Board), CIF (Cost, Insurance and Freight), and FCA (Free Carrier) terms: revenue is recognized at a point in time once Source Photonics has completed customs declaration formalities for export and obtained the bill of lading. This stage is deemed the transfer of control because, upon customs clearance and shipment, the customer obtains the right to take title to the goods (evidenced by documents such as the bill of lading), gains the ability to direct the subsequent transportation and disposal of the goods, and bears significant risks and rewards—including risks of loss during transit, price fluctuations, and obsolescence of the goods.

- For DAP (Delivered at Place) and DDP (Delivered Duty Paid) terms: revenue is recognized at a point in time when the customer has received and signed for the goods at the named destination specified in the contract. At this point, the customer has fully taken possession of the goods, obtained the ability to direct their use (e.g., resell, store, or process) and obtain substantially all of the remaining economic benefits from the goods, while also assuming all significant risks and rewards incidental to ownership.

12. INCOME TAX EXPENSE

The income tax expense of the Source Photonics Group during the Track Record Period are analyzed as follows:

	Year ended December 31		Nine months ended September 30	
	2023	2024	2024	2025
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Current income tax on profits for the year/period	5,519	53,042	15,846	66,786
Deferred income tax	(1,101)	29,726	18,146	18,753
	4,418	**82,768**	**33,992**	**85,539**

The Source Photonics Group is subject to income tax on an entity basis on profits arising in or derived from the different jurisdictions in which members of the Source Photonics Group are domiciled and operate.

(a) PRC Corporate Income Tax

In accordance with the relevant regulations of the Enterprise Income Tax laws (the "EIT Law") of the PRC, the applicable statutory tax rate of the PRC subsidiaries is 25% unless those subject to tax exemption set out below.

During the Track Record Period, certain subsidiaries of the Source Photonics Group have obtained High and New Technology Enterprises certification ("HNTE") and hence they are entitled to a preferential corporate income tax rate of 15% for a valid period of 3 years.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

12. INCOME TAX EXPENSE (Continued)

(b) Taiwan Corporate Income Tax

The profit tax for profit-seeking enterprises in Taiwan is calculated based on the estimated assessable profits, with an applicable tax rate of 20%.

(c) Macao Corporate Income Tax

The profit tax for profit-seeking enterprises in the Macao region is calculated based on the estimated assessable profits, with an applicable tax rate of 12%.

(d) U.S. Corporate Income Tax

The corporate income tax (with the nature of profit tax) in the United States adopts a hierarchical taxation model of federal and state levels. The federal tax rate is 21%, and the state tax rate is 8.84%. If a company incurs a loss in the current year, it only needs to pay a state tax of $800.

(e) OECD Pillar Two Model Rules

Amendments to IAS 12 "International Tax Reform - Pillar Two Model Rules" were issued on May 23, 2023 which are effective upon issuance and require retrospective application. The amendments provide a temporary exception from deferred tax accounting for the income tax arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the Organization for Economic Cooperation and Development ("OECD").

The Source Photonics Group is within the scope of global minimum tax ("GMT") under the OECD Pillar Two model rules ("Pillar Two"). Subject to tax legislation enacting Pillar Two being passed in the jurisdictions where Source Photonics and its subsidiaries operate, the Source Photonics Group is liable to pay a top-up tax for any deficiency between the minimum tax rate of 15% and the effective tax rate per respective jurisdiction. The Source Photonics Group applies the IAS 12 exception to recognition and disclosure information about deferred tax assets and liabilities relating to Pillar Two income taxes.

For those jurisdictions where the Pillar Two legislation was enacted but not effective at the reporting date, the Source Photonics Group has no related current tax exposure. However, certain subsidiaries of Source Photonics are located in jurisdictions where Pillar Two legislation was effective, and the Source Photonics Group's assessment indicates that there is no material related current tax exposure in these jurisdictions during the Track Record Period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

12. INCOME TAX EXPENSE (Continued)

The income tax on the Source Photonics Group's profit before income tax differs from the theoretical amount that would arise using the enacted tax rate applicable to profits of the subsidiaries as follows:

	Year ended December 31		Nine months ended September 30	
	2023	2024	2024	2025
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Profit/(loss) before income tax	**(85,951)**	**1,133,222**	**914,301**	**560,795**
Calculated at the PRC taxation rate of Source Photonics (25%)	(21,487)	283,306	228,575	140,199
Effect of different tax rates applicable to subsidiaries (i)	27,939	(203,847)	(186,238)	(49,278)
Non-deductible expenses for tax purposes	5,863	12,971	3,198	6,308
Unused tax losses and temporary differences not recognized as deferred tax assets (ii)	183	177	103	2,082
Super deduction for research and development expenses (iii)	(7,784)	(14,339)	(11,756)	(16,525)
Previously unrecognized tax losses and used to reduce deferred tax expense	(1,574)	(2,060)	(1,442)	-
Others	1,278	6,560	1,552	2,753
	4,418	**82,768**	**33,992**	**85,539**

(i) Reconciling differences are attributable to variations between the statutory tax rates applicable to certain subsidiaries and the parent Company's 25% rate.

(ii) Deferred income tax assets relating to these unused tax losses are not recognized as the management considers it is uncertain to utilize these unrecognized tax credits prior to their expiry dates mainly based on considerations of future profitability.

(iii) According to the relevant laws and regulations promulgated by the State Taxation Administration of the PRC, enterprises engaging in research and development activities are entitled to claim 200% of it for the remaining period, so incurred as tax deductible expenses when determining their assessable profits for that year ("Super-deduction"). The Source Photonics Group has made its best estimation for the Super-deduction to be claimed for the Source Photonics Group's entities in ascertaining their assessable profits for the years ended December 31, 2023, 2024 and nine months ended September 30, 2025. In addition, in Taiwan region of China, if research and development (R&D) projects comply with the local regulatory requirements, 15% of the applied amount can be directly offset against the current year's tax liability.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

16. PROPERTY, PLANT AND EQUIPMENT (Continued)

(a) Property, plant, and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives or, in the case of leasehold improvements, the shorter of lease term as follows:

Machinery equipment	5-12 years
Electronic equipment	5 years
Office equipment and others	5 years
Motor vehicles	5 years
Leasehold improvements	Shorter of their useful lives and lease terms

See Note 41 for the other accounting policies relevant to property, plant and equipment.

(b) Depreciation of the Source Photonics Group's property, plant and equipment has been recognized as follows:

	Year ended December 31		Nine months ended September 30	
	2023	**2024**	**2024**	**2025**
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Cost of sales	57,932	66,785	43,832	68,962
General and administrative expenses	3,073	2,705	2,395	6,874
Research and development expenses	7,375	8,667	8,070	9,671
Selling and marketing expenses	198	193	145	150
Inventories	924	1,317	1,844	2,292
	69,502	**79,667**	**56,286**	**87,949**

17. LEASE

17.1 The Source Photonics Group and Source Photonics as the lessee

(a) Amounts Recognized in the Consolidated Statements of Financial Position

The Source Photonics Group

	As at December 31		As at September 30
	2023	**2024**	**2025**
	RMB'000	*RMB'000*	*RMB'000*
Right-of-use assets			
Buildings	118,414	105,090	95,369
Land use right	105	50	13
Others	149	84	–
	118,668	**105,224**	**95,382**

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

17. LEASE (Continued)

17.1 The Source Photonics Group and Source Photonics as the lessee (Continued)

(a) Amounts Recognized in the Consolidated Statements of Financial Position (Continued)

The Source Photonics Group (Continued)

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Lease liabilities			
Current	20,391	20,722	15,651
Non-current	126,323	107,039	97,738
	146,714	**127,761**	**113,389**

(i) Additions to the right-of-use assets during the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025 were approximately RMB 198,000, RMB 3,596,000, RMB 3,659,000 and nil, respectively.

(b) The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in Source Photonics Group, the lessee's incremental borrowing rate is used. The discount rate used during the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025 were ranged from 4.50%—4.79%, 4.50%—4.79%, 4.50%—4.79% and 3.00%—4.79%, respectively.

(c) Depreciation charges of right-of-use assets have been recognized as follows:

The consolidated statements of profit or loss and the consolidated statements of cash flow contain the following amounts relating to leases:

	Year ended December 31		Nine months ended September 30	
	2023	2024	2024	2025
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Depreciation charge of right-of-use assets:				
Land use right	56	51	38	39
Buildings	15,611	14,177	11,376	11,313
Others	144	67	50	50
	15,811	**14,295**	**11,464**	**11,402**

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

17. LEASE (Continued)

17.1 The Source Photonics Group and Source Photonics as the lessee (Continued)

(c) Depreciation charges of right-of-use assets have been recognized as follows (Continued):

	Year ended December 31		Nine months ended September 30	
	2023	2024	2024	2025
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Interest expense (included in finance cost) . . .	4,836	4,821	4,073	4,472
Expense relating to short-term and low value leases not included in lease liabilities	2,356	3,632	2,602	3,510
	7,192	**8,453**	**6,675**	**7,982**

The total cash outflows for lease payments during the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025 were approximately RMB 29,592,000, RMB 30,661,000, RMB 22,742,000 and RMB 15,298,000, respectively.

As a lessee, the Source Photonics Group mainly leases buildings, office equipment and motor vehicles. Lease contracts typically have fixed terms, ranging from 3 to 5 years for office equipment, motor vehicles and 3 to 15 years for buildings. They are stated at cost less accumulated depreciation and accumulated impairment losses.

See Note 41 for the other accounting policies relevant to lease.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

18. INTANGIBLE ASSETS (Continued)

(b) Amortization Methods and Periods

(i) Software

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire the specific software.

(ii) Patent right

Separately acquired patent rights are shown at historical cost. They have limited useful lives and are subsequently carried at cost less accumulated amortization and impairment losses.

(iii) Patent technology

Patent technology is shown at historical cost. It have limited useful lives and are subsequently carried at cost less accumulated amortization and impairment losses.

The Source Photonics Group amortizes intangible assets with a limited useful life using the straight-line method over the following periods:

Software	5 years
Patent rights	10 years
Patent technology	5 years

(c) Research and Development

Research expenditure is recognized as an expense as incurred. Development Costs incurred on development projects (relating to the design and testing of new and improved products) are recognized as intangible assets when the following criteria are met:

- It is technically feasible to complete the product so that it will be available for use;
- Management intends to complete the product and use or sell it;
- There is an ability to use or sell the product;
- It can be demonstrated how the product will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development and to use or sell the product are available; and
- The expenditure attributable to the product during its development can be reliably measured.

Other development expenditures that do not meet these criteria are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

Capitalized development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

18. INTANGIBLE ASSETS (Continued)

(c) Research and Development (Continued)

The specific capitalization conditions for R&D projects are as follows: Source Photonics enters the development phase upon project approval and receipt of the EVT (Engineering Verification Test) report, which indicates that the product design scheme and key components are basically finalized and an engineering prototype has been formed. The development expenditures are then transferred to intangible assets for accounting purposes when a resolution for mass production is approved.

(d) Impairment Tests for Patent technology

For the nine months ended September 30, 2025, the Source Photonics Group recognised an impairment provision of RMB13.6 million in respect of certain patent technology. The impairment was mainly attributable to termination of relevant projects, weaker market demand, intensified competition and lower-than-expected future cash flows.

Management of Source Photonics identified indicators of impairment and engaged an independent valuer to conduct an impairment assessment on the related assets as at September 30, 2025.

The valuer performed the assessment by reference to the cash-generating unit ("CGU") to which the patent technology belonged. The carrying amount of the CGU was compared with its recoverable amount, being the higher of value-in-use ("VIU") and fair value less costs of disposal ("FVLCOD"). Based on the assessment, the recoverable amount was determined to be value-in-use.

As a result of the cessation of related product development and commercialization activities, no economic benefits are expected to be derived from the patent technology. Accordingly, the recoverable amount of the related assets was assessed as nil, and Source Photonics Group recognised a full impairment provision against their carrying amount.

(e) Impairment Tests for Development Expenditure

Development Expenditure is not subject to amortization and is tested for impairment annually, or more frequently if events or changes in circumstances indicate that they might be impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets.

The following table sets out the key assumptions, where the Source Photonics Group used five-year period as the projection period for the cash flow forecast.

	Year ended December 31		Nine months ended September 30
Development Expenditure	**2023**	**2024**	**2025**
Revenue annual growth rates	0% to 127.4%	0% to 26.5%	0% to 13.0%
Perpetual annual growth rates	0.0%	0.0%	0.0%
Pre-tax discount rates	16.4%	16.7%	16.7%

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

18. INTANGIBLE ASSETS (Continued)

(e) Impairment Tests for Development Expenditure (Continued)

Management has determined the values assigned to each of the above key assumptions as follows:

Assumption	Approach used to determine values
Revenue annual growth rates	Revenue annual growth rate is estimated over the five-year forecast period. The management of the Source Photonics Group used a five-year period as the projection period for the cash flow forecast, which was in line with the period length used in the corresponding strategic planning and long-term budgeting purpose.
Perpetual annual growth rates	This is the weighted average growth rate used to extrapolate cash flows beyond the forecast period. The rates are determined after making reference to long term inflation rate of the countries in which they operate. The perpetual annual growth rates remained stable which was due to the fact that the long-term inflation rates of the relevant countries were relatively stable during the Track Record Period.
Pre-tax discount rates	Estimated by using the weighted average cost of capital ("WACC") method. The WACC was calculated by referring to public market data including risk free rate, market return, beta of comparable public companies etc. and the specific risk of the business.

Impact of possible changes in key assumptions

Based on management's assessment on the recoverable amounts, the headroom is as follows:

	Year ended December 31		Nine months ended September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Development Expenditure	315,884	372,666	571,157

The recoverable amounts would equal their carrying amounts if the key assumptions were to change as follows:

	Year ended December 31		Nine months ended September 30
	2023	2024	2025
Revenue annual growth rates	30.50%	37.06%	42.00%
Pre-tax discount rates	94.00%	183.30%	249.00%

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

18. INTANGIBLE ASSETS (Continued)

(e) Impairment Tests for Development Expenditure (Continued)

Sensitivity analysis has been performed based on the assumptions that revenue annual growth rates and pre-tax discount rates has been changed. Had the estimated key assumptions during the forecast period been changed as shown below, while other parameters remain constant, the headroom would be as follows:

	Year ended December 31		Nine months ended September 30
	2023	**2024**	**2025**
	RMB'000	*RMB'000*	*RMB'000*
Average revenue annual growth rate decreased by 1%	442,037	510,354	565,157
Pre-tax discount rate increased by 1%	445,037	514,354	569,157

19. FINANCIAL INSTRUMENTS BY CATEGORY

20. DEFERRED TAX (Continued)

(c) Deferred Tax Assets Not Recognized

The Source Photonics Group has not recognized deferred tax assets in respect of the items below, which were not likely to generate taxable profit:

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Tax losses	28,667	15,163	17,450
Temporary differences	41,775	22,242	24,065
	70,442	**37,405**	**41,515**

The tax losses not recognized deferred tax assets can be carried forward in future years. As at December 31, 2023, 2024 and September 30, 2025, the following table shows unused tax losses based on its expected expiry date:

	As at December 31		As at September 30
	2023	2024	2025

	525,622	**844,157**	**1,248,206**

(i) The cost of inventories carried forward to the profit or loss during the year is mainly recognized as the cost of sales. For the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025, the cost of inventories carried forward to the cost of sales amounted to approximately RMB1,009,097,000, RMB2,030,603,000, RMB1,389,675,000 and RMB2,592,009,000, respectively.

(ii) Provision for inventories recorded as cost of sales during the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025 were RMB7,861,000, RMB16,618,000, RMB7,339,000 and RMB22,552,000, respectively.

(iii) The written off of provisions for inventories during the years ended December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025 were RMB16,753,000, RMB29,754,000, RMB15,498,000 and RMB31,541,000, respectively.

(iv) The impact of foreign exchange losses/(gains) as at December 31, 2023, 2024 and nine months ended September 30, 2024 and 2025 were approximately RMB(4,679,000), RMB(4,605,000), RMB(4,380,000) and RMB2,009,000, respectively.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

25. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

(a) Classification of financial assets and liabilities at fair value through profit or loss

The Source Photonics Group classifies the following financial assets and liabilities at fair value through profit or loss (FVTPL):

Financial assets and liabilities mandatorily measured at FVTPL include the following:

The Source Photonics Group

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Current assets			
Wealth management products	81,000	14,020	12,035
Non-current liabilities			
Convertible bonds (i)	–	–	422,675
	–	–	**422,675**
Current liabilities			
Convertible bonds (i)	321,304	374,483	–
Preferred shares (ii)	2,625,010	–	–
Derivative financial liabilities	75	–	–
	2,946,389	**374,483**	**–**

The Source Photonics

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Current liabilities			
Preferred shares	2,625,010	–	–

(i) Convertible Bonds

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Convertible bonds	321,304	374,483	422,675

The fair values of the convertible bonds were determined with reference to a professional valuation conducted by an independent professional valuer for the period ended September 30, 2025.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

25. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS (Continued)

(a) Classification of financial assets and liabilities at fair value through profit or loss (Continued)

(i) Convertible Bonds (Continued)

Source Photonics (Chengdu) Company Limited, a subsidiary of the Source Photonics Group, signed the Series D convertible bond loan agreement with an independent third party in November 2023, with a total principal amount of USD50 million. Source Photonics (Chengdu) Company Limited received RMB177,760,000 in December 2023 and RMB177,562,500 in April 2024.

The agreement stipulates that the holder of the convertible bond is entitled to convert this convertible bond into Source Photonics Holdings (Cayman) Limited's shares when the holder complete the overseas direct investment procedures and formally notify the Source Photonics Group of its subscription for the Series D Preferred Share. The conversion is based on the exercise price USD2.6179, but subject of adjustments for share splits or share consolidations (referring to the entire USD50 million convertible bond loan).

Source Photonics (Chengdu) Company Limited, a subsidiary of the Source Photonics Group, signed another Series D convertible bond loan agreement with an independent third party in November 2023, with a total principal amount of USD40 million. Source Photonics (Chengdu) Company Limited received RMB142,246,000 from December 2023.

The agreement stipulates that the holder of the convertible bond is entitled to convert this convertible bond into Source Photonics Holdings (Cayman) Limited's shares when the holder complete the overseas direct investment procedures and formally notify the Source Photonics Group of its subscription for the Series D Preferred Share. The conversion is based on the exercise price USD2.6179, but subject of adjustments for share splits or share consolidations (referring to the entire USD40 million convertible bond loan).

The Source Photonics Group fully repaid the convertible bond loan in 2024. During the period from the date of convertible bond loan received to December 31, 2023, and from January 1, 2024 to the end of the repayment date of the convertible bond loan, the changes in fair value was not materially different to the carrying amounts.

Source Photonics (Chengdu) Co., Ltd. ("Source Photonics Chengdu"), a wholly subsidiary of the Source Photonics Group, Suzhou Dongshan Precision Manufacturing Co., Ltd ("Dongshan Precision"), and Source Photonics jointly entered into the Convertible Bond Investment Agreement on June 30, 2025. Pursuant to the agreement, Dongshan Precision provided a RMB360 million convertible loan to Source Photonics Chengdu. As at September 30, 2025, Source Photonics Chengdu had received RMB360 million under this agreement. The agreement stipulates that the holder of the convertible bond is entitled to convert this convertible bond into shares of Source Photonics upon the holder formally notifying the Source Photonics Group of its subscription for the Preferred Shares. The conversion is based on the exercise price of USD3.0577.

Movements of convertible bond see Note 3.5 for the reconciliation of Level 3 assets and liabilities.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

25. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS (Continued)

(a) Classification of financial assets and liabilities at fair value through profit or loss (Continued)

(ii) Preferred Shares

Since the date of incorporation, Source Photonics has completed several rounds of financing through issuing Series A preferred shares, Series B preferred shares and Series C preferred shares (collectively referred to the "Preferred Shares").

The Preferred Shares are initially recognised at fair value. Source Photonics does not account for the embedded derivatives separately from the host contract and designates the entire Preferred Shares as financial liabilities at FVTPL with fair value changes recognised in "fair value changes of financial liabilities at FVTPL" in profit or loss.

Given that the Preferred Shares include early redemption option from the holder of Preferred Shares that do not meet equity instruments classification by applying IAS 32, and the redemption options are exercisable by the holders anytime, such Preferred Shares measured at FVTPL are classified as current liabilities when the holders have the options to convert within twelve months after the reporting period.

The balance of Preferred Shares measured at FVTPL as at December 31, 2023, 2024 and September 30, 2025 are set out below:

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Series A preferred shares(Note a)	1,614,786	–	–
Series B preferred shares(Note b)	446,200	–	–
Series C preferred shares(Note c)	564,024	–	–
	2,625,010	**–**	**–**

The movements and details of outstanding Preferred Shares during the track record period are set out below:

	Number of shares	Par value of shares
		USD
Series A preferred shares issued and fully paid:		
At January 1, 2023	57,449,524	5,745
Issuance of preferred shares	839,422	84
At December 31, 2023, 2024 and September 30, 2025	58,288,946	5,829
Series B preferred shares issued and fully paid:		
At January 1, 2023	19,022,469	1,902
Issuance of preferred shares	116,262	12
At December 31, 2023, 2024 and September 30, 2025	19,138,731	1,914

		105,714,886	**244,059**	**1,653,525**

Note:

Pursuant to the anti-dilution provision of share purchase agreement, the Source Photonics issued additional 14,019,080 Series A preferred shares of par value USD0.0001 to the Series A investors on January 11, 2019 to December 28, 2021.

Pursuant to the anti-dilution provision of share purchase agreement, the Source Photonics issued 839,422 Series A preferred shares, 116,262 Series B preferred shares and 3,394,669 Series C preferred shares of par value USD0.0001 to Series A, Series B and Series C investors respectively with nil consideration. The Preferred Shares issuance was completed on August 18, 2023.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

25. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS (Continued)

(a) Classification of financial assets and liabilities at fair value through profit or loss (Continued)

(ii) Preferred Shares (Continued)

Note a:

Pursuant to the share purchase agreement dated from August 20, 2018 to April 10, 2019, Series A investors agreed to subscribe for 43,430,444 Series A preferred shares of the Source Photonics with par value of USD0.0001 each (the "Series A preferred shares"). The purchase price paid by Series A investors was equivalent to approximately USD3.1208 per share (the "Series A Issue Price"), which was determined based on arms' length negotiation between the Series A investors and the Source Photonics after taking in account of various factors, including, among others, the timing of investment and business performance of the Source Photonics Group. The investment was completed and fully settled from August 20, 2018 to May 23, 2019.

Note b:

Pursuant to the share purchase agreement dated from March 31, 2020 to June 30, 2020, Series B investors agreed to subscribe for 19,022,469 Series B preferred shares of the Source Photonics with par value of USD0.0001 each (the "Series B preferred shares"). The purchase price paid by Series B investors was equivalent to approximately USD2.2342 per share (the "Series B Issue Price"), which was determined based on arms' length negotiation between the Series B investors and the Source Photonics after taking in account of various factors, including, among others, the timing of investment and business performance of the Source Photonics Group. The investment was completed and fully settled from March 31, 2020 to July 1, 2020.

Note c:

Pursuant to the share purchase agreement dated from June 16, 2021 to June 20, 2021, Series C investors agreed to subscribe for 24,892,540 Series C preferred shares of the Source Photonics with par value of USD0.0001 each (the "Series C preferred shares"). The purchase price paid by Series C investors was equivalent to approximately USD2.4102 per share (the "Series C Issue Price"), which was determined based on arms' length negotiation between the Series C investors and the Source Photonics after taking in account of various factors, including, among others, the timing of investment and business performance of the Source Photonics Group. The investment was completed and fully settled on December 28, 2021.

In overall, the key terms of the Preferred Shares are as follows:

Redemption rights

The Shareholders of the Preferred Shares may give a written notice to the Source Photonics at any time or from time to time requesting redemption of all or part of their Preferred Shares under the specific conditions provided in the Articles of Association.

The Preferred Shares may be redeemed at any time on or after the earlier of the date falling 48 months after the completion date (i.e. the closing date of the relevant specific conditions provided in the Articles of Association), if a qualified exit (i.e. a qualifying IPO or a qualifying trade sale/ merger of the Source Photonics that is approved by the majority of the major shareholders and meeting the minimum valuation threshold as defined in the Articles) has not been consummated.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

25. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS (Continued)

(a) Classification of financial assets and liabilities at fair value through profit or loss (Continued)

(ii) Preferred Shares (Continued)

The redemption price per share is equal to the deemed preference price of the relevant class plus all accrued but unpaid interest at the simple rate of 10% per annum (calculated from the issuance date until the redemption date), less any dividends paid.

Liquidation preferences

Upon the occurrence of a liquidation event means any liquidation, dissolution or winding up of the Source Photonics, the assets of the Source Photonics available for distribution to the shareholders (after satisfaction of all creditors' claims and claims that may be preferred by applicable law) (the "Liquidation Proceeds") shall be distributed in the order and priority as provided below:

Each preferred shareholder shall be entitled to receive the preference amount before the distribution of any Liquidation Proceeds can be made to the ordinary shareholders. The "preference amount" in respect of a preferred shareholder, means the aggregate amount of (i) the product of the preferred share price subject to adjustment from time to time in accordance with anti-dilution protection clause in the Articles of Association ("Deemed Preferred Share Price") of the Preferred Shares multiplied by the number of such preferred shares then held by such preferred shareholder (the "Base Amount"); and (ii) the interest accrued over the Base Amount of such preferred shareholder at the simple rate of 10% per annum (assuming a year of 365 days), calculated from the date that such preferred shares were issued to or acquired by such preferred shareholder until the date of the distribution of the Liquidation Proceeds to such preferred shareholder.

The Liquidation Proceeds legally available for distribution shall be distributed in the following order:

(a) first, ratably among the holders of the Series C preferred shares in proportion to their respective Preference Amount until all of the Preference Amount receivable by such holders are paid in full;

(b) then, ratably among the holders of the Series A preferred shares and the holders of the Series B preferred shares in proportion to their respective Preference Amount until all of the Preference Amount receivable by such holders are paid in full;

(c) then, ratably among the holders of the ordinary shares of the Source Photonics in proportion to the subscription price or the acquisition price, as applicable, that has been paid by such holder in respect of such ordinary share ("Investment Cost") of such holders in respect of their respective ordinary shares until all of such Investment Cost have been paid to such holders in full; and

(d) then, ratably among all of the shareholders in proportion to their respective shareholding percentage on a fully diluted and as converted basis.

Voting rights

Each preferred share has voting rights equivalent to the number of voting participating ordinary shares.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

25. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS (Continued)

(a) Classification of financial assets and liabilities at fair value through profit or loss (Continued)

(ii) Preferred Shares (Continued)

Dividends rights

The Shareholders of the Preferred Shares shall have pari passu rights to dividends in proportion to the number of the shares held by each of them on the date of the resolutions pursuant to which such dividends were declared.

No dividend was paid to the shareholders of Preferred Shares during the relevant periods.

(iii) The Source Photonics Group applied the discounted cash flow method to determine the underlying equity value of Source Photonics and adopted option pricing method and equity allocation model to determine the fair value of the Preferred Shares. The fair values of the preferred shares were determined with reference to a professional valuation conducted by an independent professional valuer for the year ended December 31, 2023. Key assumptions used to determine the fair value of preferred shares are as follows:

	As at December 31		As at September 30
	2023	2024	2025
Discount rate (%)	11.80	—	—
Expected volatility (%)	53.87	—	—
Risk-free interest rate (%)	2.21	—	—

Discount rate was estimated by weighted average cost of capital of each valuation date. The Source Photonics Group estimated the risk-free interest rate used in the equity allocation with reference to the yield of PRC Government Bonds at that time close to the timing as of valuation date. Volatility was estimated based on the historical share price movement of the comparable companies for the period of time close to the expected time to exercise.

On June 22, 2024, Source Photonics revised the Shareholders' agreement with its shareholders, pursuant to which all contractual parties agreed to terminate the special rights attaching to the Series A preferred shares, Series B preferred shares and Series C preferred shares.

The special rights included anti-dilution protection, liquidation preference and redemption option from the Shareholders of Preferred Shares.

Upon the termination of the special right attached to the Preferred Shares, the Shareholders of the Preferred Shares are entitled to receive the same dividends as the holders of ordinary shares. In accordance with IAS 32 as the Preferred Shares does not have a fixed maturity and is non-redeemable and payment of dividends is at the discretion of the Source Photonics, as such, the Preferred Shares is no longer met the definition of financial liabilities and should be recognised as equity.

The Source Photonics Group applied the discounted cash flow model is used in determining the underlying equity value of the Source Photonics and Black Scholes option pricing model is used in performing an equity allocation to determine the fair value of the Preferred Shares upon the termination of the special right attached to the Preferred Shares. The fair values of the Preferred Shares were determined with reference to a professional valuation conducted by an independent professional valuer.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

25. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS (Continued)

(a) Classification of financial assets and liabilities at fair value through profit or loss (Continued)

The fair value of the Preferred Shares on the date of termination of the special rights was approximately RMB1,989,251,000. The difference between the carrying amount of the Preferred Shares as amounting to approximately RMB648,126,000 is recognised in profit or loss during the year ended December 31, 2024.

Movements of preferred shares see Note 3.5 for the reconciliation of Level 3 assets and liabilities.

(b) Amounts recognised in profit or loss

During the year/period, the following gains/(losses) were recognised in profit or loss:

	Year ended December 31		Nine months ended September 30	
	2023	**2024**	**2024**	**2025**
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*
Fair value changes on financial assets at FVTPL	1,420	20	–	35
Gain on modification of terms in Preferred Shares	–	648,126	648,126	–
Fair value changes on financial liabilities at FVTPL	(70,112)	(21,032)	(15,650)	(73,691)
Gains from financial assets at FVTPL during holding period	194	610	154	84
	(68,498)	**627,724**	**632,630**	**(73,572)**

26. CASH AND CASH EQUIVALENTS, RESTRICTED CASH AND TERM DEPOSITS

(a) Cash and Cash Equivalents

The Source Photonics Group

	As at December 31		As at September 30
	2023	**2024**	**2025**
	RMB'000	*RMB'000*	*RMB'000*
Cash and bank balances	264,302	292,391	329,592
Less: restricted cash and term deposits (i)	(50,388)	(40,344)	(53,861)
Cash and cash equivalents	**213,914**	**252,047**	**275,731**

(i) As at December 31, 2023, 2024 and September 30, 2025, the Source Photonics Group's term deposits and security deposits amounting to RMB50,388,000, RMB40,344,000 and RMB53,861,000 were pledged as a guarantee for the bank acceptance notes, borrowings, derivative instruments granted to the Source Photonics Group.

	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Product warranties (i)	3,215	2,353	2,776

(i) The Source Photonics Group provides product quality warranty to its consumers and offers free warranties for faults and quality issues that occur within agreed years after the sale of such products. Based on historical warranty claim information and warranty experience, the Source Photonics Group estimates and accrues estimated liabilities for the warranties provided to its customers when selling products. As the recent warranty experience may not reflect the warranty situation of the sold products in the future, the management of the Source Photonics Group needs to use judgement to estimate this estimated liability.

33. SHARE INCENTIVE SCHEME

2017 SHARE PLAN (2020 Revisions)

Pursuant to the share option incentive scheme dual approved by the Board of Directors and Shareholders on October 16, 2020 (the "2017 Share Plan (2020 Revisions)"), which authorizes that increase the maximum aggregate number of share options that may be issued to 31,115,675 Non-Voting Ordinary Shares.

(a) The share options were granted on the following dates:

- December 29, 2020, at an exercise price of USD2.04 per share. The fair value is USD0.29 per option;
- November 1, 2021, at an exercise price of USD2.04 per share. The fair value is USD0.21 per option;
- June 1, 2022, at an exercise price of USD2.04 per share. The fair value is USD0.25 per option;
- August 1, 2022, at an exercise price of USD1.19 per share. The fair value is USD0.48 per option.

The term shall not exceed 10 years from the Date of Grant.

(b) Definitions of Key Terms in 2017 Share Plan (2020 Revisions)

The following capitalized terms define the mechanical and legal constraints of the incentive arrangement:

Vesting Period: The plan specifies a vesting period of four (4) consecutive years, commencing on January 1, 2020. For share option grants made after 2020, the vesting period is the period from the grant date through the end of the 2023 performance cycle. This period aligns with the service period required for participants to satisfy the vesting conditions.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

33. SHARE INCENTIVE SCHEME (Continued)

2017 SHARE PLAN (2020 Revisions) (Continued)

Vesting Date: For any given year's annual tranche, the later of (a) the first business day after the Board approves the Applicable EVIP Multiplier for that year, or (b) the first anniversary of the date the participant became a service provider.

Performance Conditions: The annual targets used to determine the portion of options that vest, based on Group indicators including revenue, pro forma EBITDA before bonus, net profit, operating cash flow, and other strategic targets approved by the Board.

Applicable Annual Shares: The number of shares eligible to vest for a specific year, calculated as 25% of the total share optiones multiplied by the Applicable EVIP Multiplier and a pro-rata fraction based on the number of days the participant remained a service provider during that year.

Catch-up Vesting Conditions: Specific conditions that, if satisfied, trigger the immediate vesting of the Maximum Optioned Shares for the entire four-year Vesting Period, regardless of whether the annual performance targets were previously met. These conditions include:

The Group achieved an aggregate audited net profit (prepared in accordance with PRC GAAP) of at least USD110 million during the Vesting Period, excluding specific legal fees as specified in the Plan; and

The participant maintaining status as a service provider from on or before December 31, 2020, through the 2023 Vesting Date.

Maximum Optioned Shares: The total sum of the Maximum Annual share optiones across the four-year Vesting Period, which shall in no event exceed 100% of the total options granted.

Vesting Conditions and Performance Targets

The share-based payment plan exclusively includes performance-based options. For accounting purposes, the vesting period commences on the grant date for each respective tranche. The December 2020 grant follows a four-year vesting period (25% per year); the November 2021 grant follows a three-year vesting period; and the two 2022 grants follow a two-year vesting period.

Vesting is subject to the following conditions:

Service Condition: The optionee must remain continuously employed as a service provider (including employees, directors, and consultants) for at least 12 months and must remain in service through the Vesting Date corresponding to each annual tranche.

Performance Condition: The number of options that vest annually is determined by the Applicable EVIP Multiplier approved by the Board. This multiplier is based on five key operating indicators of the Group: (A) revenue, (B) pro forma EBITDA before bonus, (C) net profit, (D) operating cash flow, and (E) other strategic targets deemed necessary by the Board.

Catch-up Vesting Provision: Notwithstanding the annual performance results, all Maximum share options for the vesting period shall become fully vested on the 2023 Vesting Date if the Catch-up Vesting Conditions are met. These conditions require:

- The aggregate audited net profit (under PRC GAAP or IFRS) of the Group during the Vesting Period reaches at least USD 110 million, excluding legal fees related to specific arbitration proceedings.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

33. SHARE INCENTIVE SCHEME (Continued)

2017 SHARE PLAN (2020 Revisions) (Continued)

- The optionee commenced service on or before December 31, 2020, and maintains that relationship until the 2023 Vesting Date.

Measurement of Shares

The Applicable Annual Shares for any given year are calculated as the product of 25% of the total Optioned Shares, the Applicable EVIP Multiplier for that year, and the fraction of days the optionee provided service during that year. The total number of shares vested shall in no event exceed 100% of the original grant.

(c) Modification of share-based payment arrangements

In July 2022, Source Photonics reduced the exercise price of employee share options granted on December 29, 2020, November 1, 2021, and June 1, 2022 from USD2.04 to USD1.19 per share. The modification date of the share options was August 1, 2022. The incremental fair value of RMB24,896,000 is recognised as an expense over the remaining vesting period commencing from the modification date. The expense for the original grant is recognised continuously as if the terms had not been modified.

The fair value of the modified options was determined using the same models and principles as described above, with the following model inputs.

	2017 SHARE PLAN (2020 REVISIONS)		
	2020/12/29	2021/11/1	2022/6/1
Expected price volatility	52.41%	52.41%	52.31%
Expected option life *(year)*	8-10 years	9-10 years	9-10 years
Risk-free interest rate	2.60%	2.59%	2.58%
Dividend yield	0%	0%	0%
Spot price of ordinary shares *(USD)*	1.17	1.17	1.17

(d) On August 18, 2023, pursuant to the third Shareholders' Meeting of 2023 and deliberated and approved the proposal titled "On the Transfer of Employee Stock Options from Venus Pearl SPV2 Co., Limited to Source Photonics Holdings (Cayman) Limited". Based on the completion of the organizational restructuring, all shareholders agreed to transfer the aforementioned multiple Employee share option plans at the VPA to Source Photonics' level. Specifically, Source Photonics shall formulate and implement the relevant employee incentive plans anew, and such plans shall be substantially the same as at the VPA level. Source Photonics separately assessed the fair value of the share options originally granted at the VPA level and the fair value of the modified share options for Source Photonics as the new entity at the modification date. The assessment results indicated that the change did not result in any change in the fair value of the share options. Therefore, the modification arising from the transfer of the share option plans did not give rise to additional share-based payment expenses, nor did it have any accounting impact related to the recognition of such expenses.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

33. SHARE INCENTIVE SCHEME (Continued)

The number of share options under the 2017 Share Plan (2020 Revisions) are summarized as follows:

	Year ended December 31				Nine months ended September 30			
	2023	Weighted average exercise price	2024	Weighted average exercise price	2024	Weighted average exercise price	2025	Weighted average exercise price
		USD		*USD*	*(Unaudited)*	*USD (Unaudited)*		*USD*
At the beginning of the year	31,342,675	1.19	31,115,675	1.19	31,115,675	1.19	31,115,675	1.19
Granted	480,000	1.19	–	1.19	–	1.19	–	1.19
Forfeited	(707,000)	1.19	–	1.19	–	1.19	–	1.19
At the end of the year/period	**31,115,675**		**31,115,675**		**31,115,675**		**31,115,675**	

The options outstanding at December 31, 2023, 2024 and at September 30, 2025 had an exercise price of USD1.19 and a weighted-average remaining contractual life of 7.8 years, 6.8 years and 6.1 years, respectively.

(e) Set out below are key assumptions of the share option incentive plans adopted during the Track Record Period:

	2017 SHARE PLAN (2020 REVISIONS)			
	2020/12/29	2021/11/1	2022/6/1	2022/8/1
Expected price volatility	50.43% to 54.79%	53.16%	52.27%	52.04% to 52.41%
Expected option life *(year)*	6-10 years	10 years	10 years	8-10 years
Risk-free interest rate	0.53%-0.94%	1.56%	2.91%	2.58% to 2.90%
Dividend yield	0%	0%	0%	0%
Spot price of ordinary shares *(USD)*	1.19	0.83	0.94	1.17

The volatility of the comparable companies for the period was close to the expected time to exercise. The risk-free interest rate was referred to the market yield of government bond with similar issuing dates and maturity dates as of the respective grant dates.

36. CONTINGENCIES AND COMMITMENTS

36.1 Contingencies

The Source Photonics Group and Source Photonics have contingent liabilities in respect of claims or other legal procedures arising in its ordinary course of business from time to time. As at December 31, 2023, 2024 and September 30, 2025, the directors of Source Photonics did not anticipate that any material liabilities will arise from the contingent liabilities other than those provided for in the Historical Financial Information.

36.2 Capital Commitments

39. RELATED PARTY TRANSACTIONS

(a) Parent Entities

		Ownership interest		
		As at December 31		As at September 30
Name	Place of incorporation	2023	2024	2025
Diamond Hill, L.P	Cayman Islands	34.99%	34.99%	34.99%

Source Photonics had no ultimate controlling shareholders for the years ended December 31, 2023, 2024 and nine months ended September 30, 2025.

(b) Names and Relationship with Related Parties

Related parties are those parties that have the ability, directly and indirectly, to control, jointly control or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related because they are subject to common control and common joint control in the controlling shareholder's families. Members of key management and their close family member of the Source Photonics Group are also considered as related parties.

The directors of Source Photonics are of the view that the following parties were significant related parties of the Source Photonics Group that had transactions or balances with the Source Photonics Group for the years ended December 31, 2023, 2024 and nine months ended September 30, 2025:

Name of the related parties	Relationship with the Source Photonics Group
VPA	Former Controlling Shareholder
Yicun Capital Co., Ltd. (一村資本有限公司)	Shareholder with Significant Influence
Shanghai Yicun Private Equity Fund Management Co., Ltd.(上海一村私募基金管理有限公司)	Subsidiary of Yicun Capital Co., Ltd.
Source Photonics Santa Clara, LLC	An entity controlled by the controlling shareholders
New Source Photonics Holdings (Cayman) Limited	An entity controlled by the controlling shareholders

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

39. RELATED PARTY TRANSACTIONS (Continued)

(c) Material Transactions with Related Parties

The following transactions and balances were carried out between the Source Photonics Group and its related parties during the Track Record Period. In the opinion of the directors of Source Photonics, the related party transactions were carried out in the normal course of business and at terms negotiated between the Source Photonics Group and the respective related parties.

The Source Photonics Group has the following transactions with related parties:

	Year ended December 31		Nine months ended September 30	
	2023	2024	2024	2025
	RMB'000	*RMB'000*	*RMB'000 (Unaudited)*	*RMB'000*

Purchase of goods:				
Shanghai Yicun Private Equity Fund Management Co., Ltd.	570	–	–	–

Fund transactions between related parties：

In August 2023, the Source Photonics Group issued convertible bonds to Yicun Capital with a total amount of USD4.99 million (equivalent to RMB36.5044 million). The bonds have an agreed annual interest rate of 5%, a share conversion period of 3 months, and a maximum term not exceeding December 28, 2023. The outstanding amount was repaid within 2023, and an interest of RMB 5.724 million was paid.

(d) Disposal of Subsidiaries

On September 30, 2025, Source Photonics disposed of Source Photonics, Inc. and Source Photonics Santa Clara, LLC to New Source Photonics Holdings (Cayman) Limited, wholly owned subsidiaries of Source Photonics, for a consideration of USD1.00 for each.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

39. RELATED PARTY TRANSACTIONS (Continued)

(e) Balance with Related Parties

All the balances with the related parties are trade in natures.

	As at December 31		As at September 30
	2023	2024	2025
	RMB'000	*RMB'000*	*RMB'000*
Trade nature			
Trade receivables

Less: credit loss allowance	–	–	(2)
	–	**–**	**2,472**

For the year ended December 31, 2023, 2024 and the nine months ended September 30, 2025, the amount of expense recognized in the year in respect of bad and doubtful debts are nil, nil and RMB2,000, respectively.

40. EVENTS AFTER THE REPORTING PERIOD

There are no material subsequent events undertaken by or impacted on the Source Photonics or the Source Photonics Group subsequent to September 30, 2025 and up to the date of this report.

41. SUMMARY OF OTHER ACCOUNTING POLICIES

(1) Principles of Consolidation

The Historical Financial Information incorporates the financial statements of Source Photonics and entities (including structured entities) controlled by Source Photonics and its subsidiaries. Control is achieved when Source Photonics:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Source Photonics Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(1) Principles of Consolidation (Continued)

When the Source Photonics Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Source Photonics Group considers all relevant facts and circumstances in assessing whether or not the Source Photonics Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Source Photonics Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Source Photonics Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Source Photonics Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when Source Photonics obtains control over the subsidiary and ceases when Source Photonics loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year/period are included in the consolidated statement of profit or loss and consolidated statement of comprehensive income from the date Source Photonics gains control until the date when Source Photonics ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of Source Photonics and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of Source Photonics and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Source Photonics Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Source Photonics Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Source Photonics Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Source Photonics Group's ownership interests in existing subsidiaries

Changes in the Source Photonics Group's ownership interests in existing subsidiaries that do not result in the Source Photonics Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Source Photonics Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Source Photonics Group and the non-controlling interests according to the Source Photonics Group's and the non-controlling interests' proportionate interests.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(1) Principles of Consolidation (Continued)

Changes in the Source Photonics Group's ownership interests in existing subsidiaries (Continued)

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of Source Photonics.

When the Source Photonics Group loses control of a subsidiary, the assets and liabilities of that subsidiary and non-controlling interests (if any) are derecognized. A gain or loss is recognized in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the carrying amount of the assets (including goodwill), and liabilities of the subsidiary attributable to the owners of Source Photonics. All amounts previously recognized in other comprehensive income in relation to that subsidiary are accounted for as if the Source Photonics Group had directly disposed of the related assets or liabilities of the subsidiary. The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under *IFRS 9* or, when applicable, the cost on initial recognition of an investment in an associate.

(2) Investments in Associates and Joint Ventures

An associate is an entity over which the Source Photonics Group has significant influence but no control or joint control. This is generally the case where the Source Photonics Group holds between 20% and 50% of the voting rights. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. Investments in associates are accounted for using the equity method of accounting, after initially being recognized at cost.

Under IFRS 11 Joint Arrangements investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement. Interests in joint ventures are accounted for using the equity method, after initially being recognized at cost in the consolidated statement of financial position.

Under the equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognize the Source Photonics Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Source Photonics Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognized as a reduction in the carrying amount of the investment.

Where the Source Photonics Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Source Photonics Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealized gains on transactions between the Source Photonics Group and its associates and joint ventures are eliminated to the extent of the Source Photonics Group's interest in these entities. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity-accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Source Photonics Group.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(2) Investments in Associates and Joint Ventures (Continued)

Changes in the Source Photonics Group's interests in associates and joint ventures

When the Source Photonics Group reduces its ownership interests in an associate or a joint venture but the Source Photonics Group continues to use the equity method (including situations that change of ownership interest in an associate or a joint venture due to capital increase of other shareholders to the associate or the joint venture), the Source Photonics Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognized in other comprehensive income relating to that reduction in ownership interests if that gain or loss would have been reclassified to profit or loss on the disposal of the related assets or liabilities.

(3) Business Combinations

(i) Business Combination not Under Common Controls

The acquisition method of accounting is used to account for all business combinations (except for the business combinations under common controls), regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred
- liabilities incurred to the former owners of the acquired business
- equity interests issued by the Source Photonics Group
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Source Photonics Group recognizes any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Acquisition-related costs are expensed as incurred.

The excess of the consideration transferred, amount of any non-controlling interest in the acquired entity, and acquisition date fair value of any previous equity interest in the acquired entity over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognized directly in profit or loss as a bargain purchase.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions. Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value, with changes in fair value recognized in profit or loss.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(4) Separate Financial Statements

Investments in subsidiaries are accounted for at cost less impairment. Cost includes direct attributable costs of investment. The results of subsidiaries are accounted for by Source Photonics on the basis of dividend received and receivable.

Impairment test of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount of the investee's net assets including goodwill.

(5) Foreign Currencies

(i) Functional and Presentation Currency

The consolidated financial statements are presented in Renminbi ("RMB"), which is different from the Source Photonics' functional currency of United States dollars ("USD"). Items included in the financial statements of each of the Source Photonics Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). Since the majority of the assets and operations of the Source Photonics Group are located in the PRC, the Historical Financial Information are presented in RMB.

(ii) Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss. They are deferred in equity if they relate to qualifying cash flow hedges.

Foreign exchange gains and losses that relate to borrowings are presented in the consolidated statements of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the consolidated statements of profit or loss on a net basis within other gains/(losses), net.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at FVTPL are recognized in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equities classified as fair value through other comprehensive income are recognized in other comprehensive income.

(iii) Source Photonics Group Companies

The results and financial position of all the Source Photonics Group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each statement of financial position of the Source Photonics Group's entities are translated at the closing rate at the end of the reporting period;

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(5) Foreign Currencies (Continued)

(iii) Source Photonics Group Companies (Continued)

- income and expenses for each statement of profit or loss of the Source Photonics Group's entities are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and

- all resulting exchange differences are recognized in other comprehensive income.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations are taken to other comprehensive income. When a foreign operation is partially disposed of or sold, exchange differences that were recorded in equity are reclassified to profit or loss, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

(6) Property, Plant and Equipment

The Source Photonics Group's accounting policy for buildings and equipment is explained in Note 16(a). Property, plant and equipment are tangible assets that are held for use in the production or supply of goods or services, or for administrative purposes, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Source Photonics Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss.

Construction in progress mainly represents buildings under construction, which is stated at cost less any impairment losses, and is not depreciated. Cost comprises the direct costs of construction and capitalized borrowing costs on related borrowed funds during the period of construction. Construction in progress is reclassified to the appropriate category of property and equipment when completed and ready for use.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(7) Impairment of Non-Financial Assets

Goodwill and intangible assets that have an indefinite useful life or are not yet available for use are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

(8) Intangible assets

(i) Goodwill

Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortized but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, being the operating segments.

(ii) Patent right and Patent technology

Patent right and Patent technology are initially recognized at fair value and historical costs on the acquisition date. They have a finite useful life and subsequently carried at cost less accumulated amortization and impairment losses.

(iii) Software

Purchased software is stated at cost less any impairment losses and amortized on the straight-line basis over its estimated useful life.

(iv) Research and Development

Research expenditure and development expenditure that do not meet the criteria for capitalisation are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(9) Financial Assets

(i) Classification

The Source Photonics Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those to be measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will be recorded either in profit or loss or in OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Source Photonics Group has made an irrevocable election at the time of initial recognition to present subsequent changes in fair value in other comprehensive income.

(ii) Recognition and Derecognition

Regular way purchases and sales of financial assets are recognized on trade-date, the date on which the Source Photonics Group commits to purchase or sell the assets. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Source Photonics Group has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

At initial recognition, the Source Photonics Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Source Photonics Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Source Photonics Group classifies its debt instruments:

- Amortized cost: Assets that are held for collection of contractual cash flows, where those cash flows represent solely payments of principal and interest, are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other gains/(losses), net together with foreign exchange gains and losses. Impairment losses are presented as separate line items in the statement of profit or loss.
- FVTPL: Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognized in profit or loss and presented net within other gains/(losses), net in the period in which it arises.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(9) Financial Assets (Continued)

(iii) Measurement (Continued)

Debt instruments (Continued)

- FVOCI: assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/ (losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as a separate line item in the statement of profit or loss.

Equity instruments

The Source Photonics Group subsequently measures all equity investments at fair value. Where the Source Photonics Group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognized in profit or loss as other income when the Source Photonics Group's right to receive payments is established.

Changes in the fair value of financial assets at FVTPL are recognized in other gains/ (losses) in the statement of profit or loss as applicable.

(iv) Impairment of Financial Assets

The Source Photonics Group recognizes an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Source Photonics Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flow will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms. Details, please refer to credit risks in Note 3.2.

(10) Financial Liabilities and Equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Source Photonics are recognized at the proceeds received, net of direct issue costs.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(10) Financial Liabilities and Equity (Continued)

Financial liabilities

Financial liabilities of the Source Photonics Group mainly comprise financial liabilities at amortized cost, including trade and notes payables, other payables and accruals, borrowings and customer deposit. Such financial liabilities are initially recognized at fair value, net of transaction costs incurred, and subsequently measured using the effective interest method.

Financial liabilities that are due within one year (inclusive) are classified as current liabilities; those with maturities over one year but are due within one year (inclusive) as from the balance sheet date are classified as current portion of non-current liabilities. Others are classified as non-current liabilities.

Financial liabilities at fair value through profit or loss

Financial liabilities are classified as at FVTPL when the financial liability is (i) contingent consideration of an acquirer in a business combination to which IFRS 3 applies, (ii) held for trading, or (iii) it is measured as at FVTPL.

A financial liability is held for trading if:

- it has been acquired principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative, except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument.

A financial liability other than a financial liability held for trading or contingent consideration of an acquirer in a business combination may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and IFRS 9 permits the entire combined contract to be designated as at FVTPL.

For financial liabilities that are measured as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognized in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. For financial liabilities that contain embedded derivatives, such as contingent consideration, the changes in fair value of the embedded derivatives are excluded in determining the amount to be presented in other comprehensive income. Changes in fair value attributable to a financial liability's credit risk that are recognized in other comprehensive income are not subsequently reclassified to profit or loss; instead, they are transferred to accumulated losses upon derecognition of the financial liability.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(10) Financial Liabilities and Equity (Continued)

Financial Liabilities at amortized cost

Financial liabilities including trade and notes payables, other payables and accruals, borrowings and customer deposit are subsequently measured at amortized cost, using the effective interest method.

Derecognition/modification of financial liabilities

The Source Photonics derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss during period incurred.

(11) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost of inventories are determined using the weighted-average cost calculated on a monthly basis. Cost comprises direct materials, direct labor and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost includes the reclassification from equity of any gains or losses on qualifying cash flow hedges relating to purchases of raw material but excludes borrowing costs. Costs of purchased inventory are determined after deducting rebates and discounts. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(12) Trade Receivables

Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, in which case they are recognized at fair value. The Source Photonics Group holds the trade receivables with the objective of collecting the contractual cash flows and therefore measures them subsequently at amortized cost using the effective interest method. See Note 3.2 for a description of the Source Photonics Group's impairment policies.

(13) Share Capital and Capital Reserve

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

(14) Trade and Other Payables

These amounts represent liabilities for goods and services provided to the Source Photonics Group prior to the end of financial period which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

(15) Borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(15) Borrowings (Continued)

costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are derecognized when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other income or finance costs.

Where the terms of a financial liability are renegotiated and the entity issues equity instruments to a creditor to extinguish all or part of the liability (debt for equity swap), a gain or loss is recognized in profit or loss, which is measured as the difference between the carrying amount of the financial liability and the fair value of the equity instruments issued.

Borrowings are classified as current liabilities unless the Source Photonics Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Covenants that the Source Photonics Group is required to comply with, on or before the end of reporting period, are considered in classifying loan arrangements with covenants as current or non-current. Covenants that the Source Photonics Group is required to comply with after the reporting period do not affect the classification at the reporting date.

(16) Borrowing Costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other borrowing costs are expensed in the period in which they are incurred.

(17) Provisions

Provisions for legal claims, service warranties and make good obligations are recognized when the Source Photonics Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(17) Provisions (Continued)

determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

(18) Employee Benefits

(i) Short-Term Obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the statement of financial position.

(ii) Housing Funds, Medical Insurances and Other Social Insurances

Employees of the Source Photonics Group in the PRC are entitled to participate in various government-supervised housing funds, medical insurance and other employee social insurance plan. The Source Photonics Group contributes on a monthly basis to these funds based on certain percentages of the salaries of the employees, subject to certain ceiling. The Source Photonics Group's liability in respect of these funds is limited to the contribution payable in each year. Contributions to the housing funds, medical insurances and other social insurances are expensed as incurred.

(iii) Post-Employment Benefits

The Source Photonics Group classifies post-employment benefit plans as either defined contribution plans or defined benefit plans. Defined contribution plans are post-employment benefit plans under which the Source Photonics Group pays fixed contributions into a separate fund and will have no obligation to pay further contributions; and defined benefit plans are post-employment benefit plans other than defined contribution plans. During the reporting period, the Source Photonics Group's defined contribution plans mainly include basic pensions and unemployment insurance, while the defined benefit plans are certain oversea subsidiaries provide supplemental retirement benefits beyond the national regulatory insurance system.

The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligations less the fair value of the plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method at the interest rate of treasury bonds with similar obligation term and currency. The charges related to supplementary retirement benefits (including current service costs, historical service costs and gains or losses on settlement) and net interest are recognized in profit or loss for the current period or included in the cost of an asset, and the changes arising from remeasurement in net liabilities or net assets of defined benefit plans are recognized in other comprehensive income.

(iv) Basic Pensions

The Source Photonics Group's employees participate in the basic pension plan set up and administered by local authorities of Ministry of Human Resource and Social Security. Monthly payments of premiums on

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(18) Employee Benefits (Continued)

(iv) Basic Pensions (Continued)

the basic pensions are calculated according to prescribed bases and percentage by the relevant local authorities. When employees retire, the relevant local authorities are obliged to pay the basic pensions to them. The amounts based on the above calculations are recognized as liabilities in the accounting period in which the service has been rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets.

(19) Share-Based Payments

(i) Equity-settled share-based payment transactions

The Source Photonics Group operates an equity-settled share-based compensation plan, under which the entity receives services from employees as consideration for equity instruments (including shares or share options) of the Source Photonics Group. The fair value of the employee services received in exchange for the grant of the equity instruments is recognized as an expense. The total amount to be expensed is determined by reference to the fair value of the equity instruments granted:

- including any market performance conditions;
- excluding the impact of any service and non-market performance vesting conditions (for example, remaining an employee of the entity over a specified time period);
- including the impact of any non-vesting conditions.

At the end of each reporting period, the Source Photonics Group revises its estimates of the number of share options that are expected to vest based on the non-marketing performance and service conditions, irrespective of whether those non-vesting conditions are satisfied. It recognizes the impact of the revision to original estimates, if any, in the income statement, with a corresponding adjustment to equity.

(ii) Share-based payment transactions among Source Photonics Group entities

Source Photonics settling a share-based payment transaction when another entity in the Source Photonics Group receives the goods or services shall recognize the transaction as an equity-settled share-based payment transaction only if it is settled in Source Photonics' own equity instruments. Otherwise, the transaction shall be recognized as a cash settled share-based payment transaction. In its separate financial statements, Source Photonics records a debit, recognizing an increase in the investment in subsidiaries as a capital contribution from the parent and a credit to equity as no goods or services are received by Source Photonics. Source Photonics records a debit, recognizing the cash the employee paid when exercising the equity-settled share-based payment along with a decrease in reserves and a credit, recognizing share capital and share premium of Source Photonics.

(iii) Modifications and Cancellations

The Source Photonics Group may modify the terms and conditions on which the share-based compensation plan was granted. If a modification increases the fair value of the equity instruments granted, the incremental fair value granted is included in the measurement of the amount recognized for the services received over the remainder of the vesting year. A grant of the share-based compensation plan, that is cancelled or settled during the vesting year, is treated as an acceleration of vesting. The Source Photonics Group will immediately recognize the amount that otherwise would have been recognized for services received over the remainder of the vesting year.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(20) Dividend Distribution

Dividend distribution to the shareholders is recognized as a liability in the Historical Financial Information in the period in which the dividends are approved by the entities' shareholders or directors, where appropriate.

(21) Interest Income

Interest income from financial assets at FVTPL is included in the net fair value gains/(losses) on these assets.

Interest income on financial assets at amortized cost and financial assets at FVOCI calculated using the effective interest method is recognized in profit or loss as part of other income.

Interest income is presented as finance income where it is earned from financial assets that are held for cash management purposes.

(22) Dividend Income

Dividend income is recognized when the right to receive dividend payment is established.

(23) Earnings Per Share

Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to owners of Source Photonics, excluding any costs of servicing equity other than ordinary shares
- by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year and excluding treasury shares.

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- the after-income tax effect of interest and other financing costs associated with dilutive potential ordinary shares, and
- the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares.

(24) Government Grant

Government grants relating to costs are deferred and recognized in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and they are credited to profit or loss on a straight-line basis over the expected lives of the related assets.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(25) Current and Deferred Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income, based on the applicable income tax rate for each jurisdiction, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

(i) Current Income Tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where Source Photonics and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Source Photonics Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

(ii) Deferred Income Tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Historical Financial Information. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax liabilities and assets are not recognized for temporary differences between the carrying amount and tax bases of investments in foreign operations where Source Photonics is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(25) Current and Deferred Income Tax (Continued)

(ii) Deferred Income Tax (Continued)

In assessing any uncertainty over income tax treatments, the Source Photonics Group considers whether it is probable that the relevant tax authority will accept the uncertain tax treatment used, or proposed to be used by individual Source Photonics Group entities in their income tax filings. If it is probable, the current and deferred taxes are determined consistently with the tax treatment in the income tax filings. If it is not probable that the relevant taxation authority will accept an uncertain tax treatment, the effect of each uncertainty is reflected by using either the most likely amount or the expected value.

(26) Leases

(i) Definition of a Lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

For contracts entered into or modified on or after the date of initial application or arising from business combinations, the Source Photonics Group assesses whether a contract is or contains a lease based on the definition under IFRS 16 at inception or modification date. Such contract will not be reassessed unless the terms and conditions of the contract are subsequently changed.

(ii) The Source Photonics Group as a Lessee

As a practical expedient, leases with similar characteristics are accounted on a portfolio basis when the Source Photonics Group reasonably expects that the effects on the financial statements would not differ materially from individual leases within the portfolio.

Short-Term Leases and Leases of Low-Value Assets

The Source Photonics Group applies the short-term lease recognition exemption to leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies to the recognition exemption for lease of low-value assets. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

Right-of-Use Assets

The cost of right-of-use asset includes:

- the amount of the initial measurement of the lease liability;
- any lease payments made at or before the commencement date, less any lease incentives received;
- any initial direct costs incurred by the Source Photonics Group; and
- an estimate of costs to be incurred by the Source Photonics Group in dismantling and removing the underlying assets, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(26) Leases (Continued)

(ii) The Source Photonics Group as a Lessee (Continued)

Right-of-Use Assets (Continued)

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease.

Right-of-use assets in which the Source Photonics Group is reasonably certain to obtain ownership of the underlying leased assets at the end of the lease term are depreciated from commencement date to the end of the useful life. Otherwise, right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term.

The Source Photonics Group presents right-of-use assets as a separate line item on the consolidated statement of financial position.

Land leases are also in the scope of IFRS 16. The Source Photonics Group recognizes any prepaid premium for leasehold lands as right-of-use assets which are depreciated over the relevant lease terms.

Refundable rental deposits paid are account under IFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments and included in the cost of right-of-use assets.

Lease Liabilities

At the commencement date of a lease, the Source Photonics Group recognizes and measures the lease liability at the present value of lease payments that are unpaid at that date. In calculating the present value of lease payments, the Source Photonics Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases of the Source Photonics Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Source Photonics Group under residual value guarantees;
- the exercise price of a purchase option if the Source Photonics Group is reasonably certain to exercise that option;

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION (Continued)

41. SUMMARY OF OTHER ACCOUNTING POLICIES (Continued)

(26) Leases (Continued)

(ii) The Source Photonics Group as a Lessee (Continued)

Lease Liabilities (Continued)

- payments of penalties for terminating the lease, if the lease term reflects the Source Photonics Group exercising that option; and

- lease payments to be made under reasonably certain extension options are also included in the measurement of lease liabilities.

After the commencement date, lease liabilities are adjusted by interest accretion and lease payments.

The Source Photonics Group presents lease liabilities as a separate line item in the consolidated statement of financial position.

(iii) The Source Photonics Group as a Lessor

Classification and measurement of leases

Leases for which the Source Photonics Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is recognized in profit or loss on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset, and such costs are recognized as an expense on a straight-line basis over the lease term.

Refundable rental deposits received are accounted under IFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments from lessees.

(27) Convertible Bonds

The Source Photonics Group has convertible bonds which are classified entirely as liabilities. Since the instrument contains an embedded derivative, it has been designated as at fair value through profit or loss on initial recognition and, as such the embedded conversion feature is not separated. All transaction costs related to financial instruments designated as at fair value through profit or loss are expensed as incurred.

The liability is subsequently carried at fair value, determined using valuation techniques. If the bonds are converted, the fair value at the time of conversion are transferred to share capital and share premium for the shares issued. If the bonds are redeemed, the difference between redemption amount and carrying value is recognised in profit or loss.

III SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared by Source Photonics or any of the companies now comprising the Source Photonics Group in respect of any period subsequent to September 30, 2025, and up to the date of this report.

The information set out in this Appendix does not form part of the Accountant's Report from Confucius International CPA Limited, Hong Kong, the reporting accountant of the Company, as set out in Appendix IA in this prospectus, and is included herein for illustrative purposes only.

The unaudited pro forma financial information should be read in conjunction with the section headed ''Financial Information'' in this prospectus and the Accountant's Report set out in Appendix IA to this prospectus.

A. UNAUDITED PRO FORMA ADJUSTED CONSOLIDATED NET TANGIBLE ASSETS

The following is the unaudited pro forma statement of adjusted consolidated net tangible assets of the Group as at June 30, 2026 (the "Unaudited Pro Forma Financial Information") which has been prepared by the Directors in accordance with Rule 4.29 of the Listing Rules to illustrate the effects of the Global Offering as if it had taken place on June 30, 2026 and based on the audited consolidated net tangible assets of the Group attributable to the owners of the Company as at June 30, 2026, assuming the Offer Size Adjustment Option and the over-allotment option is not exercised.

The Unaudited Pro Forma Financial Information is prepared for illustrative purpose only, and because of its hypothetical nature, it may not give a true picture of the consolidated net tangible assets of the Group attributable to the owners of the Company immediately after completion of the Global Offering or any future date after completion of the Global Offering.

	Audited consolidated net tangible assets of the Group attributable to owners of the Company as at June 30, 2026	**Estimated net proceeds from the Global Offering**	**Unaudited pro forma adjusted consolidated net tangible assets attributable to the owners of the Company as at June 30, 2026**	**Unaudited pro forma adjusted consolidated net tangible assets per Share as at June 30, 2026**	
	(Note 1) RMB'000	**(Note 2) RMB'000**	**RMB'000**	**(Note 3) RMB**	**(Note 4) HK$**
Based on an Offer Price of HK$93.80 per share	18,903,172	9,019,905	27,923,077	14.40	16.79

Notes:

(1) The audited consolidated net tangible assets of the Group attributable to the owners of the Company as at June 30, 2026 is extracted from the Accountant's Report set out in Appendix IA to this document, which is based on the audited consolidated net assets of the Group attributable to the owners of the Company as at June 30, 2026 of RMB24,366,785,000 with adjustments for the intangible assets of RMB5,463,613,000 attributable to the owners of the Company.

(2) The estimated net proceeds from the Global Offering are based on 113,783,200 Shares at the indicative Offer Price of HK$93.80 per share, after deduction of the underwriting fees and other related expenses payable by the Company (excluding listing expenses of RMB1,383,000 which have been accounted for in the consolidated statements of profit or loss prior to June 30, 2026) and takes no account of any Shares which may be allotted and issued by the Company pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option, any Shares that may be issued by the Company pursuant to the exercise of options or the vesting of restricted shares or other awards that have been or may be granted or any Shares which may be issued or repurchased by the Company after the Latest Practicable Date.

(3) The unaudited pro forma adjusted consolidated net tangible assets per Share is arrived at after the adjustments referred to in the preceding paragraphs and on the basis that 1,939,599,732 Shares (excluding 5,791,000 treasury shares) were in issue assuming that the Global Offering has been completed on June 30, 2026 but takes no account of any Shares which may be allotted and issued by the Company pursuant to the exercise of the Offer Size Adjustment Option and the Over-allotment Option, any Shares that may be issued by the Company pursuant to the exercise of options or the vesting of restricted shares or other awards that have been or may be granted or any Shares which may be issued or repurchased by the Company after the Latest Practicable Date.

(4) For the purpose of this unaudited pro forma adjusted consolidated net tangible assets per Share, the amounts stated in Hong Kong dollars are converted into Renminbi at the rate of RMB1.00 to HK$1.1661. No representation is made that Hong Kong dollars has been, could have been or may be converted to Renminbi, or vice versa, at that rate.

(5) No adjustment has been made to the unaudited pro forma adjusted net tangible assets of the Group to reflect any trading results or other transactions of the Group entered into subsequent to June 30, 2026. In particular, the unaudited pro forma adjusted consolidated net tangible assets of the Group attributable to owners of the Company have not been adjusted to illustrate the effect of the following: In July 2026, the Company repurchased 255,200 shares for a consideration of RMB49,995,000. The repurchase is not recorded in the financial statements of the Company for the period ended June 30, 2026 or this unaudited pro forma financial information. Had the repurchase been adjusted in the unaudited pro forma financial information, the adjusted net tangible assets of the Group would decrease by RMB49,995,000 and the adjusted net tangible assets per share would decrease by RMB0.03 (equivalent to HK$0.03).

B. REPORT ON UNAUDITED PRO FORMA FINANCIAL INFORMATION

The following is the text of a report received from Confucius International CPA Limited, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this prospectus.

INDEPENDENT REPORTING ACCOUNTANT'S ASSURANCE REPORT ON THE COMPILATION OF UNAUDITED PRO FORMA FINANCIAL INFORMATION

To the Directors of Suzhou Dongshan Precision Manufacturing Co., Ltd.

We have completed our assurance engagement to report on the compilation of unaudited pro forma financial information of Suzhou Dongshan Precision Manufacturing Co., Ltd. (the "Company") and its subsidiaries (collectively the "Group") by the directors of the Company (the "Directors") for illustrative purposes only. The unaudited pro forma financial information consists of the unaudited pro forma statement of adjusted consolidated net tangible assets of the Group as at June 30, 2026 and related notes (the "Unaudited Pro Forma Financial Information") as set out on pages *II-1 to II-2* of the Company's prospectus dated October 20, 2026, in connection with the proposed initial public offering of the H shares of the Company (the "Prospectus"). The applicable criteria on the basis of which the Directors have compiled the Unaudited Pro Forma Financial Information are described on pages *II-1 to II-2* of the Prospectus.

The Unaudited Pro Forma Financial Information has been compiled by the Directors to illustrate the impact of the proposed initial public offering on the Group's consolidated financial position as at June 30, 2026 as if the proposed initial public offering had taken place at June 30, 2026. As part of this process, information about the Group's consolidated financial position has been extracted by the Directors from the Group's audited consolidated financial statements for the six months ended June 30, 2026, on which an accountant's report has been published.

Directors' Responsibility for the Unaudited Pro Forma Financial Information

The Directors are responsible for compiling the Unaudited Pro Forma Financial Information in accordance with paragraph 4.29 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") and with reference to Accounting Guideline 7, *Preparation of Pro Forma Financial Information for Inclusion in Investment Circulars,* ("AG 7") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

Our Independence and Quality Management

We have complied with the independence and other ethical requirements of the *Code of Ethics for Professional Accountants* issued by the HKICPA, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

Our firm applies Hong Kong Standard on Quality Management (HKSQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, issued by the HKICPA, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Reporting Accountant's Responsibilities

Our responsibility is to express an opinion, as required by paragraph 4.29(7) of the Listing Rules, on the Unaudited Pro Forma Financial Information and to report our opinion to you. We do not accept any responsibility for any reports previously given by us on any financial information used in the compilation of the Unaudited Pro Forma Financial Information beyond that owed to those to whom those reports were addressed by us at the dates of their issue.

We conducted our engagement in accordance with Hong Kong Standard on Assurance Engagements 3420, *Assurance Engagements to Report on the Compilation of Pro Forma Financial Information Included in a Prospectus*, issued by the HKICPA. This standard requires that the reporting accountant plans and performs procedures to obtain reasonable assurance about whether the Directors have compiled the Unaudited Pro Forma Financial Information in accordance with paragraph 4.29 of the Listing Rules and with reference to AG 7 issued by the HKICPA.

For purposes of this engagement, we are not responsible for updating or reissuing any reports or opinions on any historical financial information used in compiling the Unaudited Pro Forma Financial Information, nor have we, in the course of this engagement, performed an audit or review of the financial information used in compiling the Unaudited Pro Forma Financial Information.

The purpose of unaudited pro forma financial information included in a prospectus is solely to illustrate the impact of a significant event or transaction on unadjusted financial information of the entity as if the event had occurred or the transaction had been undertaken at an earlier date selected for purposes of the illustration. Accordingly, we do not provide any assurance that the actual outcome of the proposed initial public offering at June 30, 2026 would have been as presented.

A reasonable assurance engagement to report on whether the unaudited pro forma financial information has been properly compiled on the basis of the applicable criteria involves performing procedures to assess whether the applicable criteria used by the Directors in the compilation of the Unaudited Pro Forma Financial Information provide a reasonable basis for presenting the significant effects directly attributable to the event or transaction, and to obtain sufficient appropriate evidence about whether:

- The related unaudited pro forma adjustments give appropriate effect to those criteria; and
- The unaudited pro forma financial information reflects the proper application of those adjustments to the unadjusted financial information.

The procedures selected depend on the reporting accountant's judgment, having regard to the reporting accountant's understanding of the nature of the Group, the event or transaction in respect of which the Unaudited Pro Forma Financial Information has been compiled, and other relevant engagement circumstances.

The engagement also involves evaluating the overall presentation of the Unaudited Pro Forma Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our work has not been carried out in accordance with auditing standards or other standards and practices generally accepted in the United States of America or auditing standards of the Public Company Accounting Oversight Board (United States) or standards and practices of any professional body in any other overseas jurisdiction and accordingly should not be relied upon as if it had been carried out in accordance with those standards and practices.

Opinion

In our opinion:

(a) the Unaudited Pro Forma Financial Information has been properly compiled by the Directors on the basis stated;

(b) such basis is consistent with the accounting policies of the Group; and

(c) the adjustments are appropriate for the purposes of the Unaudited Pro Forma Financial Information as disclosed pursuant to paragraph 4.29(1) of the Listing Rules.

Confucius International CPA Limited
Certified Public Accountants
Hong Kong,
October 20, 2026

This appendix is mainly intended to provide potential investors with an overview of the Articles of Association. As the following data is merely a summary, it does not record all data that may be material to potential investors.

ISSUANCE OF SHARE

The issuance of shares by the Company shall follow the principles of openness, fairness and impartiality. Each share of the same class shall have equal rights.

For shares of the same class issued in the same offering, the issuance conditions and price per share shall be identical; and the same price shall be paid for each share subscribed by subscribers.

INCREASE/REDUCTION AND REPURCHASE OF SHARES

According to the operation and development needs of the Company, subject to the laws and regulations, the Company may increase the share capital by the following ways upon approval by way of resolutions at the shareholders' meeting:

(I) issuance of shares to unspecified parties;

(II) issuance of shares to specified parties;

(III) distribution of bonus shares to existing shareholders;

(IV) conversion of capital reserve into share capital;

(V) other methods prescribed by laws, administrative regulations, the CSRC, and the securities regulatory rules of the place where the Company's shares are listed.

The Company may reduce its registered capital. The Company shall reduce its registered capital in accordance with the procedures stipulated in the Company Law, other relevant regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association.

The Company shall not repurchase its own shares. However, the Company may acquire its own shares in accordance with the procedures stipulated in laws, administrative regulations, other relevant regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association:

(I) reduction of the Company's registered capital;

(II) merger with another company holding shares in the Company;

(III) using the shares for employee stock ownership plan or equity incentives;

(IV) acquisition of shares held by shareholders (upon their request) who vote against any resolution proposed in any shareholders' meeting on the merger or division of the Company.

(V) using shares for the conversion of corporate bonds which are convertible into shares issued by the Company;

(VI) as necessary for maintaining the value of the Company and safeguarding the rights and interests of shareholders.

The Company may acquire its own shares through open centralized trading methods, or other methods prescribed by laws, administrative regulations, and recognized by the CSRC and other stock exchanges and securities regulatory authorities of the places where the Company's shares are listed.

When the Company acquires its own shares under circumstances specified in items (III), (V) and (VI) above, it shall do so through open centralized trading methods.

With respect to A shares, when the Company acquires its own shares under circumstances specified in items (I) and (II) above, it shall be subject to resolution by the shareholders' meeting; when the Company acquires its own shares under circumstances specified in items (III), (V) and (VI) above, it shall, in accordance with the provisions of the Articles of Association or the authorization of the shareholders' meeting, be subject to resolution by a board meeting attended by not less than two-thirds of the directors.

After the Company acquires its shares in accordance with the Articles of Association, for circumstances under item (I) above, the shares shall be cancelled within ten days from the date of acquisition; for circumstances under items (II) and (IV) above, the shares shall be transferred or cancelled within six months; for circumstances under items (III), (V) and (VI) above, the total number of the Company's own shares held by the Company shall not exceed 10% of the total issued shares of the Company, and such shares shall be transferred or cancelled within three years.

With respect to H shares, where applicable laws, regulations and the securities regulatory rules of the place where the Company's shares are listed provide otherwise regarding the aforementioned matters related to share repurchase, such provisions shall prevail. Where the Company purchases its own shares, it shall fulfill its information disclosure obligations in accordance with the Securities Law, the rules of the stock exchange where the Company's shares are listed and other securities regulatory rules.

TRANSFER OF SHARES

The Company's shares shall be transferred in accordance with law. All transfers of H shares shall be effected by instruments of transfer in writing in the usual or common form or any other form acceptable to the board of directors (including the standard transfer form or transfer form prescribed by the Hong Kong Stock Exchange from time to time); and such instruments of transfer may be executed by hand only or, if the transferor or transferee is a corporation, under seal. Where the transferor or transferee is a recognized clearing house as defined in relevant ordinances in force from time to time under the laws of Hong Kong (hereinafter referred to as the "Recognized Clearing House") or its nominee(s), instruments of transfer may be executed by hand or by machine imprinted signatures. All instruments of transfer shall be maintained at the legal address of the Company or other place designated by the board of directors from time to time.

The Company shall not accept its own shares as the subject matter of pledge rights.

Shares issued by the Company before the public offering of A shares shall not be transferred within one year from the date when the Company's A shares are listed and traded on a stock exchange.

Directors and senior management of the Company shall report to the Company their shareholdings in the Company and changes therein. During their term of office determined upon them taking office, the shares they transfer each year shall not exceed 25% of the total shares of the same class they hold in the Company, and the shares they held shall not be transferred within one year from the date of its listing. Furthermore, such individuals shall not transfer their shares within six months after leaving their positions.

Directors, senior management, and shareholders holding not less than 5% of the Company's shares who sell their shares or other equity securities of the Company within six months after purchase, or purchase again within six months after sale, shall return the gains therefrom to the Company, and the Company's board of directors shall recover such gains. However, this excludes securities companies holding not less than 5% of shares due to purchasing remaining shares after underwriting and other circumstances prescribed by applicable laws, regulations and the securities regulatory rules of the place where the Company's shares are listed.

The shares or other equity securities mentioned in the preceding paragraph held by directors, senior management, and natural person shareholders include those held by their spouses, parents, children, and through others' accounts.

Where the Company's board of directors fails to implement the above provisions, shareholders have the right to require the board of directors to implement them within 30 days. Where the Company's board of directors fails to implement them within the aforementioned period, shareholders have the right to directly file lawsuits with the people's court in their own name for the Company's benefit. Where the Company's board of directors fails to implement the above provisions, responsible directors shall bear joint and several liability in accordance with law.

After the company's shares are delisted, the company's shares will continue to be traded in the National Small and Medium-sized Enterprise Share Transfer System. The company shall not modify the provisions of the preceding paragraph.

SHAREHOLDERS AND SHAREHOLDERS' MEETING

Shareholders

The Company shall establish a register of members based on certificates provided by securities registration and settlement institutions. Shareholders shall enjoy rights and bear obligations according to the class of shares they hold; shareholders holding shares of the same class shall enjoy equal rights and bear the same obligations.

The register of members is sufficient evidence proving shareholders' shareholdings in the Company. The original H share register of members shall be maintained in Hong Kong for shareholders' inspection, but the Company may suspend the registration procedures for shareholders in accordance with applicable laws, regulations, and the securities regulatory rules of the place where the Company's shares are listed. Any shareholder registered in the register of members or any person requesting registration of their name in the register of members may apply to the Company for new share certificates if their share certificates are lost. Where a foreign shareholder of a listed foreign capital shares loses their share certificates and apply for new ones, this process may be handled in accordance with laws, securities regulatory rules, or other relevant provisions of the place where the original register of members is maintained.

The company shall sign a securities registration and service agreement with the securities registration and settlement agency, regularly inquire the information of major shareholders and the changes of their shareholding (including the pledge of equity), and keep abreast of the company's equity structure.

When the company convenes a shareholders' meeting, distributes dividends, liquidates or engages in other acts requiring the confirmation of shareholders' identity, the board of directors or the convenor of the shareholders' meeting shall determine the equity registration date, and the shareholders registered in the register after the close of the equity registration date shall be the shareholders enjoying the relevant rights and interests.

Shareholders of the Company shall enjoy the following rights:

(I) to receive dividends and other forms of benefits according to the number of shares held;

(II) to require to hold, convene, chair, attend or appoint a proxy to attend shareholders' meetings and exercise the corresponding voting rights in accordance with the laws;

(III) to supervise the operations of the Company, and to put forward suggestions or raise enquiries;

(IV) to transfer, make a gift of or pledge shares held by them according to the provisions of the laws, administrative regulations and the Articles of Association;

(V) to inspect and duplicate the Articles of Association, registers of members, the minutes of shareholders' meetings, resolutions of the Board meetings and the financial accounting reports. Shareholders who meet the requirements may inspect the Company's accounting books and certificates;

(VI) in the event of the termination or liquidation of the Company, the right to participate in the distribution of the remaining assets of the Company in proportion to the number of shares held;

(VII) with respect to shareholders who voted against any resolution adopted at the shareholders' meeting on the merger or division of the Company, the right to demand the Company to acquire the shares held by them;

(VIII) other rights stipulated in the laws, administrative regulations, departmental rules, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association.

Where the content of resolutions by the Company's shareholders' meeting or board of directors violates laws or administrative regulations, shareholders have the right to request the people's court to declare them invalid. Where the convening procedures or voting methods of shareholders' meetings or board meetings violate laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association, or the content of resolutions violates the Articles of Association, shareholders have the right to request the people's court to revoke them within 60 days from the date the resolutions are made. However, this excludes cases where the convening procedures or voting methods of shareholders' meetings or board meetings have only minor defects that do not substantially affect the resolutions.

Where directors other than audit committee members and senior management violate laws, administrative regulations or the Articles of Association in performing duties for the Company and cause losses to the Company, shareholders who individually or collectively hold 1% or more of the Company's shares for 180 consecutive days or more have the right to make written requests to the audit committee to file lawsuits with the people's court; where audit committee members violate laws, administrative regulations or the Articles of Association in performing duties for the Company and cause losses to the Company, the aforementioned shareholders may make written requests to the board of directors to file lawsuits with the people's court.

Where the audit committee or the board of directors refuses to file lawsuits after receiving the written requests from shareholders as specified in the preceding paragraph, or fails to file lawsuits within 30 days from the date of receiving the requests, or in urgent circumstances where failure to immediately file lawsuits would cause irreparable damage to the Company's interests, the shareholders specified in the preceding paragraph have the right to directly file lawsuits with the people's court in their own name for the Company's benefit.

Where directors or senior management violate laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association and harm shareholders' interests, shareholders may file lawsuits with the people's court.

The shareholders of the Company shall assume the following obligations:

(I) complying with laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association;

(II) paying share payments as per the shares subscribed for and the method of subscription;

(III) not to withdraw its share capital, except for circumstances stipulated by laws and regulations;

(IV) not to abuse the shareholders' rights to impair the interest of the Company or other shareholders; not to abuse the independent legal person status of the Company and the limited liability of shareholders to impair the interest of creditors of the Company;

(V) other obligations required to be assumed under laws, administrative regulations and the Articles of Association.

Shareholders of the Company shall be liable for making compensation for any loss suffered by the Company or other shareholders arising from their abuse of shareholders' rights in accordance with law. Shareholders of the Company who abuse the independent legal person status of the Company and the limited liability of shareholders to evade debts and seriously impair the interest of creditors of the Company shall be jointly and severally liable for the debts of the Company.

Controlling Shareholders and De Facto Controllers

The controlling shareholders and de facto controllers of the Company shall comply with the following provisions:

(I) exercise shareholders' rights in accordance with the law, not to abuse controlling interest, or exploit connected-party relationships to harm the legitimate rights and interests of the Company or other shareholders;

(II) strictly fulfil public statements and commitments made, without unauthorised changes or waivers;

(III) strictly fulfil information disclosure obligations in accordance with relevant regulations, actively cooperate with the Company in information disclosure work, and promptly inform the Company of significant events that have occurred or are planned to occur;

(IV) shall not misappropriate the Company's funds in any way;

(V) shall not coerce, instruct, or require the Company and related personnel to illegally provide guarantees;

(VI) shall not seek benefits using the Company's undisclosed significant information, shall not disclose any undisclosed significant information about the Company in any way, shall not engage in insider trading, short term trading, market manipulation, or other illegal activities;

(VII) shall not damage the legitimate rights and interests of the Company and other shareholders through unfair related party transactions, profit distribution, asset reorganization, external investments, or any other means;

(VIII) ensure the integrity of the Company's assets, personnel independence, financial independence, institutional independence, and business independence, and shall not in any way affect the Company's independence;

(IX) comply with laws, administrative regulations, provisions of the CSRC, the securities regulatory rules of the place where the Company's shares are listed and other provisions of the Articles of Association.

Where any controlling shareholder or de facto controller of the Company instructs a director or senior management officer to engage in conduct that harms the interests of the Company or shareholders, such controlling shareholder or de facto controller shall bear joint and several liabilities with that director or senior management officer.

General Provisions for Shareholders' Meetings

The shareholders' meeting of the Company shall be composed of all shareholders. The shareholders' meeting is the authority of power of the Company which shall exercise the following functions and powers in accordance with the laws:

(I) elect and replace the directors who are not representatives of the employees, and decide on matters relating to the remuneration of the directors;

(II) consider and approve the reports of the board of directors;

(III) consider and approve the Company's profit distribution plans and loss recovery plans;

(IV) resolve to increase or reduce the registered capital of the Company;

(V) resolve on the issuance of corporate bonds;

(VI) resolve on merger, division, dissolution and liquidation or change in corporate form of the Company;

(VII) amend the Articles of Association;

(VIII) resolve on the engagement or dismissal of accounting firms engaged in the audit work of the Company;

(IX) consider and approve the guarantees prescribed in Article 47 of the Articles of Association;

(X) consider matters regarding the purchase and sale of material assets by the Company within one year which reach over 30% of the latest audited total assets of the Company;

(XI) consider and approve the changes in the use of proceeds raised;

(XII) consider the equity incentive plans and employee stock ownership plans;

(XIII) consider and approve major related transactions that are required to be approved by the shareholders' meeting as stipulated by laws, regulations and normative documents;

(XIV) consider and approve proposals put forward by the board of directors, a single shareholder, or shareholders acting in aggregate who hold 1% or more of the Company's shares;

(XV) resolve on the Company's repurchase of its own shares under the circumstances specified in items (I) and (II) of Article 25 of the Articles of Association;

(XVI) consider other matters which shall be decided by the shareholders' meetings as stipulated by laws, administrative regulations, departmental rules or the Articles of Association.

The shareholders' meeting may authorise the board of directors to resolve on the issue of corporate bonds.

The following external guarantees of the Company shall be submitted to the shareholders' meeting for consideration after consideration and approval by the board of directors:

(I) guarantee with a single sum of guarantee that has exceeded 10% of the latest audited net assets of the Company;

(II) any guarantee after the total amount of external guarantees provided by the Company and its holding subsidiaries has exceeded 50% of the latest audited net assets of the Company;

(III) any guarantee provided by the Company and its subsidiaries after the total amount of external guarantees provided by them exceeds 30% of the Company's latest audited total assets;

(IV) guarantee to be provided for a party with a gearing ratio of over 70%;

(V) within any consecutive twelve-month period, the amount of guarantees exceeds 30% of the Company's latest audited total assets;

(VI) within any consecutive twelve-month period, the amount of guarantees exceeds 50% of the Company's latest audited net assets and the absolute amount exceeds RMB 50 million;

(VII) guarantees provided to the shareholders, de facto controllers and their related parties;

(VIII) other guarantee circumstances prescribed by laws, regulations, normative documents, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association.

When a guarantee is raised for consideration by the board of directors, it shall, in addition to being approved by a majority of all directors, be considered and approved by not less than two-thirds of the directors attending the board meeting. When the shareholders' meeting considers the guarantee mentioned in item (V) of the preceding paragraph, it shall be approved by not less than two-thirds of the voting rights held by the shareholders attending the meeting.

When the shareholders' meeting considers guarantee proposals for shareholders, de facto controllers, and their related parties, such shareholders or shareholders controlled by such de facto controllers shall not participate in the voting, and such voting shall be approved by not less than half of the voting rights held by other shareholders attending the shareholders' meeting.

Shareholders' meetings include annual shareholders' meetings and extraordinary shareholders' meetings. Annual shareholders' meetings are held once every year and within 6 months from the end of the preceding financial year.

The Company shall convene an extraordinary shareholders' meeting within 2 months from the date of the occurrence of any of the following circumstances:

(I) where the number of directors is less than the number stipulated in the Company Law or two-thirds of the number prescribed in the Articles of Association;

(II) where the losses of the Company that have not been made up represent one-third of its total share capital;

(III) where such meeting is requested by shareholders individually or jointly holding not less than 10% of the shares of the Company;

(IV) where such meeting is deemed necessary by the board of directors;

(V) where such meeting is proposed to be convened by the audit committee;

(VI) other circumstances specified in laws, administrative regulations, departmental rules, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association.

Convening of Shareholders' Meeting

The board of directors shall convene the shareholders' meeting on time within the stipulated period.

With the consent of more than half of all independent directors, independent directors shall be entitled to propose to the board of directors to convene an extraordinary shareholders'meeting. The board of directors shall, in accordance with the laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association, furnish a written reply stating whether it agrees or disagrees with the convening of the extraordinary shareholders' meeting within 10 days after receiving such a proposal from the independent directors. In the event that the board of directors agrees to convene an extraordinary shareholders' meeting, the notice of shareholders' meeting shall be issued within 5 days after the board of directors passes the relevant resolution. In the event that the board of directors does not agree to convene an extraordinary shareholders' meeting, it shall state the reasons and make an announcement.

The Audit Committee shall propose to the board of directors to convene an extraordinary shareholders' meeting, and such proposal shall be made in writing. The board of directors shall, in accordance with the laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association, furnish a written reply stating whether it agrees or disagrees with the convening of an extraordinary shareholders' meeting within 10 days after receiving such proposal. In the event that the board of directors agrees to convene an extraordinary shareholders' meeting, the notice of shareholders' meeting shall be issued within 5 days after the board of directors passes the relevant resolution. Any changes to the original proposal made in the notice shall be approved by the Audit Committee. In the event that the board of directors does not agree to convene an extraordinary shareholders' meeting or does not furnish any reply within 10 days after receiving such proposal, the board of directors shall be deemed as unable to perform or failure to perform its duty of convening a shareholders' meeting, in which case the Audit Committee may convene and preside over a shareholders' meeting by itself.

Shareholders individually or jointly holding not less than 10% of the shares (including preferred shares with restored voting rights) of the Company shall request the board of directors to convene an extraordinary shareholders' meeting, and such request shall be made in writing. The board of directors shall, in accordance with the laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association, furnish a written reply stating whether it agrees with the convening of the extraordinary shareholders' meeting within 10 days after receiving such request. In the event that the board of directors agrees to convene an extraordinary shareholders' meeting, the notice of shareholders' meeting shall be issued within 5 days after the board of directors passes the relevant resolution. Any changes to the original request made in the notice shall be approved by the relevant shareholders. In the event that the board of directors does not agree to convene an extraordinary shareholders' meeting or does not furnish any reply within 10 days after receiving such request, shareholders individually or jointly holding not less than 10% of the shares (including preferred shares with restored voting rights) of the Company shall propose to the Audit Committee to convene an extraordinary shareholders' meeting, and such proposal shall be submitted in writing to the Audit Committee. In the event that the Audit Committee agrees to convene an extraordinary shareholders' meeting, the notice of shareholders' meeting shall be issued within 5 days after receiving such request. Any changes to the original request made in the notice shall be approved by the relevant shareholders. Failure of the Audit Committee to issue the notice of shareholders' meeting within the prescribed time limit shall be deemed as failure of the Audit Committee to convene and preside over a shareholders' meeting, and shareholders individually or jointly holding not less than 10% of the shares (including preferred shares with restored voting rights) of the Company for not less than 90 consecutive days are entitled to convene and preside over a shareholders' meeting on their own initiatives.

Where the Audit Committee or shareholders decide(s) to convene a shareholders' meeting on their own initiative, the board of directors shall be notified in writing, and records shall be filed with the securities

regulatory authority of the place where the Company's shares are listed, in accordance with the requirements of the securities regulatory rules of such place. Before the announcement of the resolution of the shareholders' meeting, the shareholding of the shareholders convening such meeting shall not be less than 10%. The Audit Committee and the shareholders convening the meeting shall submit the relevant materials for proof to the securities regulatory authority of the place where the Company's shares are listed, in accordance with the requirements of the securities regulatory rules of such place at the time of issuance of notice of shareholders' meeting and announcement on the resolutions passed at the shareholders' meeting. For the shareholders' meeting convened by the Audit Committee or shareholders on their own initiative, the board of directors and its secretary will cooperate. The board of directors shall provide the register of members as at the date of shareholding registration.

For the shareholders' meetings convened by the Audit Committee or the shareholders on their own initiative, the necessary expenses in relation to the meetings shall be borne by the Company.

Proposals and Notices of Shareholders' Meetings

The content of the proposals shall be within the scope of the terms of reference of the shareholders' meeting, and have clear subjects and specific resolutions, and shall comply with the relevant requirements of the laws, administrative regulations, the securities regulatory rules of the places where the Company's shares are listed and the Articles of Association.

When the Company convenes a shareholders' meeting, the board of directors, the Audit Committee, as well as shareholder(s) individually or jointly holding not less than 1% of the shares of the Company, shall be entitled to put forward proposals to the Company.

Shareholder(s) individually or jointly holding not less than 1% of the shares (including preferred shares with restored voting rights) of the Company may raise provisional proposals and submit the same in writing to the convener 10 days prior to the date of the shareholders' meeting. The convener shall issue a supplemental notice of shareholders' meeting and submit such proposal to the shareholders' meeting for review within 2 days after receiving such proposal and announce the content of the provisional proposal. Unless the provisional proposal violates laws, administrative regulations, the securities regulatory rules of the places where shares of the Company are listed, or the Articles of Association, or falls outside the scope of the authority of the shareholders' meeting. If the securities regulation rules of the places where shares of the Company are listed requires the shareholders' meeting to be postponed as a result of the supplemental notice, the convening of the shareholders' meeting shall be postponed in accordance with the requirements of such securities regulation rules. The Company shall not increase the shareholding ratio of shareholders who propose provisional proposals.

Other than the circumstances referred to in the preceding paragraph, after the convener issues the notice for the shareholders' meeting, no changes shall be made to the proposals set forth in the notice of shareholders' meeting and no further proposals shall be added.

The shareholders' meeting shall not vote or resolve on proposals not set forth in the notice of shareholders' meeting or not in compliance with the requirements of the Articles of Association.

The convener shall notify each shareholder in writing (including announcement) 20 days before the annual shareholders' meeting, and the extraordinary shareholders' meeting shall notify each shareholder in writing (including announcement) 15 days before the meeting. The date of the meeting shall not be included in the calculation of the commencement period.

The notice of shareholders' meeting shall include the following:

(I) time, place and duration of the meeting;

(II) the matters and proposals submitted to the meeting for consideration. All specific details of all proposals shall be fully and completely disclosed;

(III) the notice shall state clearly that all ordinary shareholders (including preferred shareholders with restored voting rights), shareholders holding shares with special voting rights, and other shareholders are entitled to attend the shareholders' meeting or appoint proxies in writing to attend and vote at such meeting on their behalf and that such proxies need not to be a shareholder of the Company;

(IV) the date of shareholding registration for shareholders who are entitled to attend the shareholders' meeting. The interval between the registration date and the date of the meeting shall not exceed 7 business days. Once the record date is confirmed, it shall not be changed;

(V) the names and telephone numbers of the contact person for the meeting affairs;

(VI) the timing and procedures for voting online or otherwise.

After the notice of the shareholders' meeting has been given, the shareholders' meeting shall not be postponed or cancelled without justifiable reasons, and the proposals specified in the notice of the shareholders' meeting shall not be cancelled. In case of postponement or cancellation, the convener shall send a notice at least 2 trading days before the scheduled date and explain the reasons.

Conducting the Shareholders' Meeting

All shareholders in the register as at the date of shareholding registration or their proxies shall be entitled to attend the shareholders' meeting, and to exercise their voting rights at the shareholders' meeting pursuant to the relevant laws and regulations, the securities regulatory rules of the place where shares of the Company are listed and the Articles of Association.

A shareholder may attend and vote at the shareholders' meeting in person or by proxy.

Individual shareholders attending the shareholders' meeting in person shall present their identity cards or other valid identity documents or proof. In the case of attending by proxies, the proxies shall present valid identity documents and the proxy forms from the shareholders.

Where a shareholder is a legal entity, its legal representative or a proxy entrusted by such legal representative shall attend the meeting. If the meeting is attended by the legal representatives, they shall produce their identity cards and valid proof of their status as legal representatives; if the meeting is attended by proxies of such legal representatives, such proxies shall present their identity cards and the written authorization letter legally issued by the legal representative of the legal entity shareholder.

If a shareholder is a recognized clearing house (or its agent) as defined in the relevant ordinances from time to time enacted in Hong Kong or the securities regulatory rules of the place where the Company's shares are listed, such shareholder may authorize its corporate representative or one or more persons it deems appropriate to act as its representative at any shareholders' meeting or any creditors' meeting; provided that if not less than one person is authorized, the power of attorney shall specify the number and class of shares in respect of which each such person is so authorized. Any person so authorized may exercise rights on behalf of such shareholder (without producing share certificates, with notarized authorization and/or further evidence to prove their due authorization) and shall be entitled to the same statutory rights as other shareholders, including the right to speak and vote, as if such person were an individual shareholder of the Company.

If the shareholders' meeting requires directors and members of the senior management to be present at the meeting, the directors and members of the senior management shall be present and accept enquiries from shareholders.

A shareholders' meeting shall be presided over by the chairman of the board of directors. If the chairman is unable or unwilling to perform his/her duties, the vice chairman shall preside. If the vice chairman is unable or unwilling to perform his/her duties, a director nominated by a majority of the directors shall preside. A shareholders' meeting convened by the Audit Committee on its own initiative shall be presided over by the convener of the Audit Committee. If the convener of the Audit Committee is unable or unwilling to perform his/her duties, a member of the Audit Committee nominated by a majority of the members of the Audit Committee shall preside. A shareholders' meeting convened by the shareholders on their own initiative shall be presided over by the convener or a representative nominated by the convener. If the chairman of the meeting is in breach of the rules of procedure such that the shareholders' meeting cannot proceed, the shareholders' meeting may, upon the consent of a majority of the shareholders present at the meeting and entitled to vote, elect a person to act as the chairman and continue to conduct the meeting.

Voting at and Resolutions of Shareholders' Meetings

Resolutions of a shareholders' meeting include ordinary resolutions and special resolutions. Ordinary resolutions of a shareholders' meeting shall be passed by votes representing more than half of the voting rights held by shareholders attending the shareholders' meeting. Special resolutions of a shareholders' meeting shall be passed by votes representing not less than two-thirds of the voting rights held by shareholders attending the shareholders' meeting.

The following matters shall be resolved by way of ordinary resolutions at a shareholders' meeting:

(I) work reports of the board of directors;

(II) profit distribution plan and loss make-up plan formulated by the board of directors;

(III) appointment and dismissal of directors, their remuneration and payment terms;

(IV) matters other than those to be approved by special resolutions in accordance with the laws, administrative regulations, requirements under the securities regulations and rules of the places where shares of the Company are listed or the Articles of Association.

The following matters shall be resolved by way of special resolutions at a shareholders' meeting:

(I) increase or reduction of the registered capital of the Company;

(II) division, spin-off, merger, dissolution and liquidation of the Company;

(III) amendments to the Articles of Association;

(IV) purchase or disposal of material assets or provision of guarantees to others by the Company within one year, of which the amount exceeds 30% of the latest audited total assets of the Company;

(V) stock option incentive schemes;

(VI) other matters stipulated by laws, administrative regulations, securities regulatory rules of the places where the Company's shares are listed or the Articles of Association, and other matters which are considered to have a significant impact on the Company and therefore need to be passed by way of a special resolution as determined by the shareholders' meeting with an ordinary resolution.

Shareholders shall exercise their voting rights according to the number of voting shares held by them, and each share shall have one vote. Save for shares with special class rights. Where otherwise provided by the securities regulatory rules of the place where the Company's shares are listed, such rules shall prevail.

When material issues affecting the interests of the small and medium investors are considered at shareholders' meeting, the votes of the small and medium investors shall be counted separately. The separate voting results shall be disclosed publicly in a timely manner.

The shares of the Company held by the Company itself do not have voting rights, and such shares shall not be included in the total number of voting shares present at the shareholders' meeting.

If the shareholder's purchase of the voting shares of the Company violates paragraphs 1 and 2 of Article 63 of the Securities Law, voting rights of the shares in excess of the prescribed proportion shall not be exercisable within 36 months after the purchase and shall not be included in the total number of voting shares present at the shareholders' meeting.

The board of directors, independent directors and shareholders holding not less than 1% of the voting shares or the investor protection institutions established in accordance with laws, administrative regulations, or the provisions of the CSRC may publicly solicit shareholders' voting rights.

The solicitors shall make sufficient disclosure of the information such as their voting preference to the shareholders from whom the voting rights are being solicited. Solicitation of voting rights of shareholders involving compensation or disguised compensation shall be prohibited. The Company shall not impose any limitation in respect of the minimum shareholding ratio on the solicitation of voting rights except as required by law.

When a related transaction is considered at a shareholders' meeting, the related shareholders shall abstain from voting. The number of voting shares represented by such shareholder(s) shall not be included in the total number of valid votes. The resolutions of the shareholders' meeting shall fully disclose the voting results of non-related shareholders.

DIRECTORS AND BOARD OF DIRECTORS

General Provisions for Directors

The director of the Company shall be a natural person. A person may not serve as a director of the Company if any of the following circumstances applies:

(I) persons who have no or restricted capacity for civil conduct;

(II) persons who were sentenced to criminal punishment due to corruption, bribery, embezzlement of property, misappropriation of property or disrupting the socialist market economic order, or who have been deprived of political rights due to any criminal offenses, where less than five years have lapsed since the expiration of the execution period, or who were granted probation, where less than two years have lapsed since the expiration of the probationary term;

(III) persons who served as a director, factory manager or manager of a company or an enterprise that declared insolvent and liquidated and were personally liable for the insolvency of such company or enterprise, and less than three years have lapsed since the date of completion of the insolvency and liquidation of that company or enterprise;

(IV) persons who served as the legal representative of a company or an enterprise of which the business license was revoked and was ordered to close down due to violation of laws and who

was personally liable for such revocation and order, where less than three years have lapsed since the date of the revocation of the business license of that company or enterprise and was ordered to close down;

(V) persons who have a substantial amount of personal debts due and unsettled and is listed as a mala fide judgment debtor by a People's court;

(VI) persons who are penalized by CSRC to be prohibited from participating in the securities markets with a period yet to be expired;

(VII) persons who were publicly identified by a stock exchange as unsuitable for serving as a director, member of the senior management, etc., of a listed company, where the restriction period has not expired;

(VIII) other circumstances stipulated in laws, administrative regulations, departmental rules, or the securities regulatory rules of the places where the shares of the Company are listed.

Where a director is elected or appointed in violation of this Article, such election, appointment or engagement shall be invalid. Where a director develops any of the circumstances set out in this Article during his/her term of office, the Company shall remove such director from office, and he/she shall cease to perform his/her duties.

The directors shall comply with laws, administrative regulations, the securities regulatory rules of the places where the shares of the Company are listed and the Articles of Association and bear the fiduciary obligations towards the Company, and shall take measures to avoid conflicts between their own interests and the Company's interests, and shall not use their position and power to seek improper benefits. The directors shall bear the following fiduciary obligations towards the Company:

(I) not to misappropriate the property of the Company and not to misappropriate the funds of the Company;

(II) not to deposit the Company's assets or funds in an account opened in his/her own name or in the name of any other individual;

(III) not to accept any bribery or other illegal income by using his/her position and power;

(IV) not to directly or indirectly enter into any contract or perform any transaction with the Company without reporting to the board of directors or the shareholders' meeting and obtaining approval through a resolution of the board of directors or the shareholders' meeting in accordance with the provisions of the Articles of Association;

(V) not to make use of his position to procure business opportunities that should otherwise belong to the Company for himself or others, except when having reported to the board of directors or the shareholders' meeting and approved by a resolution of the shareholders' meeting, or except that the Company is unable to utilize such business opportunity according to the provisions of laws, administrative regulations, the securities regulatory rules of the places where the shares of the Company are listed or the Articles of Association;

(VI) not to engage in the same business as the Company for his own account or for the benefits of any other persons without reporting to the board of directors or the shareholders' meeting and obtaining approval through a resolution of the shareholders' meeting;

(VII) not to accept commissions from transactions between others and the Company for their own benefit;

(VIII) not to disclose confidential information of the Company without authorization;

(IX) not to abuse his connected relationship to compromise the interests of the Company;

(X) other fiduciary obligations stipulated by laws, administrative regulations, departmental rules, securities regulation rules of the places where the shares of the Company are listed and the Articles of Association.

Income generated by a director in violation of the preceding provisions shall belong to the Company; where the Company suffers losses thereto, the director shall be liable for compensation.

When close relatives of directors and members of the senior management, enterprises directly or indirectly controlled by directors, members of the senior management or their close relatives, and other related parties having other affiliations with directors or members of the senior management enter into contracts or conduct transactions with the Company, the provisions of preceding paragraph shall apply.

Directors shall abide by laws, administrative regulations, securities regulation rules of the places where the shares of the Company are listed and the Articles of Association, and shall bear the duty of diligence towards the Company, and in performing their duties, shall exercise the reasonable care normally expected of a manager for the best interests of the Company. Directors shall bear the following duty of diligence towards the Company:

(I) shall exercise the rights conferred by the Company prudently, seriously and diligently to ensure that the commercial activities of the Company comply with the national laws, administrative regulations and the requirements of various economic policies of PRC, and the commercial activities shall not go beyond the scope of the business stipulated in the business license;

(II) to treat all shareholders fairly;

(III) to maintain a timely awareness of the operation and management of the Company;

(IV) to sign written confirmation on the regular reports of the Company and to ensure the information disclosed by the Company is true, accurate and complete;

(V) to provide relevant information and materials to the Audit Committee truthfully, and shall not obstruct the exercise of powers by the Audit Committee;

(VI) other duty of diligence stipulated by laws, administrative regulations, departmental rules, securities regulation rules of the places where the shares of the Company are listed and the Articles of Association.

The Company shall establish a director departure management system to specify safeguard measures for pursuing accountability and compensation for unfulfilled public commitments and other outstanding matters. Upon the effective resignation or expiration of the term of a director, the director shall complete all handover procedures with the board of directors. The duty of loyalty owed by the director to the Company and shareholders shall not be automatically terminated upon the end of the term and shall remain valid for three years thereafter. A director's liabilities arising from the performance of duties during the term of office shall not be exempted or terminated due to departure.

Board of Directors

The Company shall have a board of directors composed of eleven directors, including one chairman, one vice chairman, one employee representative director, and four independent directors (one of whom shall be an accounting professional). The chairman and vice chairman shall be elected by a majority vote of all directors.

The board of directors shall exercise the following functions and powers:

(I) to convene shareholders' meetings and submit work reports to the shareholders' meetings;

(II) to implement resolutions of the shareholders' meetings;

(III) to determine the business plans and investment plans of the Company;

(IV) to formulate the Company's profit distribution plan and loss recovery plan;

(V) to formulate plans for the Company for increase or reduction of registered capital, issuance of bonds or other securities, and listing;

(VI) to formulate plans for major acquisitions of the Company, the acquisition of the Company's shares under the circumstances specified in items (I) and (II) of Article 25 of the Articles of Association, or the merger, division, dissolution, or change of the Company's corporate form; and to consider and approve resolutions regarding the Company's repurchase of its own shares under the circumstances specified in items (III), (V), and (VI) of Article 25 of the Articles of Association.

(VII) within the scope authorized by the shareholders' meeting, decide on matters such as the Company's external investment, acquisition and sale of assets, asset pledges, external guarantees, entrusted financial management, related transactions and external donations;

(VIII) to decide on the establishment of the Company's internal management body;

(IX) to decide on the appointment or dismissal of the Company's chief executive officer, secretary to the board of directors and other members of the senior management, and decide on the matters in relation to their remuneration, rewards and punishments; decide on the appointment or dismissal of the Company's executive president, vice president, financial controller and other members of the senior management based on the nomination of the chief executive officer, and decide on matters in relation to their remuneration, reward and punishment;

(X) to formulate the Company's basic management system;

(XI) to formulate proposed amendments to the Articles of Association;

(XII) to manage the Company's information disclosure matters;

(XIII) to make proposal to the shareholders' meeting on the engagement or change of the accounting firm performing audits for the Company;

(XIV) to listen to the work reports from the chief executive officer of the Company and review the work of the chief executive officer;

(XV) other powers conferred by laws, administrative regulations, departmental rules, securities regulation rules of the places where the shares of the Company are listed and the Articles of Association.

Matters exceeding the scope of the authority of the shareholders' meeting and the Articles of Association shall be submitted to the shareholders' meeting for consideration.

The chairman of the board of directors shall exercise the following functions and powers:

(I) Preside over the shareholders' meetings and convene and preside over the board meetings;

(II) Supervise and inspect the implementation of resolutions of the board of directors;

(III) Other powers conferred by the board of directors.

The vice-chairman of the Company shall assist the chairman of the board of directors in his work. If the chairman of the board of directors is unable to perform his duties or fails to perform his duties, the vice-chairman shall perform his duties; if the vice-chairman is unable to perform his duties or fails to perform his duties, one director jointly nominated by more than half of the directors shall perform his duties.

The board of directors shall convene at least four meetings every year, approximately once per quarter, and shall notify all directors in writing 14 days prior to the meeting.

Shareholders representing not less than one-tenth of the voting rights, and not less than one-third of the directors or the Audit Committee may propose to convene an extraordinary meeting of the board of directors. The chairman of the board of directors shall convene and preside over a board meeting within ten days after receiving the proposal.

A notice for an extraordinary board meeting shall be given by personal delivery, mail, facsimile or email, and shall be provided at least 5 days prior to the meeting. In case of urgency, such notice may be given by telephone, in which case the time requirement for the notice shall not apply, provided that the convener shall provide an explanation at the meeting.

The board meeting shall be held only when not less than half of the directors are present. Resolutions made by the board of directors must be passed by not less than half of all directors.

Resolutions of the board of directors are voted by way of poll with each director having one vote.

If any director is related to the enterprise or individual involved in the resolution at a board meeting, the said director shall promptly report to the board of directors in writing. The director with a related party relationship shall not exercise his voting rights on the said resolution for himself or on behalf of another director. Such board meeting may be held when more than half of the non-related directors attend the meeting. The resolution of such board meeting shall be passed by more than half of the non-related directors. If the number of non-related directors attending the board meeting is fewer than three, the matter shall be submitted to the shareholders' meeting for consideration. Where the laws and regulations and securities regulations and rules of the places where the Company's shares are listed have any additional limitations in respect of the participation and voting by directors in board meetings, the Company shall comply with such provisions.

Directors shall attend the board meetings in person. Where a director is unable to attend a meeting for any reason, he/she may authorize another director to attend the meeting on his/her behalf in writing. The authorization letter shall set out the name of the authorized person, the matters to be authorized, scope of authorization and valid period, which shall be signed or sealed with the chop by the director who authorizes. An independent director may not appoint a non-independent director to attend the meeting on his/her behalf. The directors who attend the meeting on behalf of another director shall exercise the rights as directors within the scope of authorization. The responsibility of the director for voting matters remains even when another director represents him/her. If a director fails to attend a board meeting and does not authorize a representative to attend on his/her behalf, he/she shall be deemed to have waived his/her voting rights at such meeting.

Independent Directors

Independent directors shall, in accordance with the provisions of laws, administrative regulations, the CSRC, securities regulations and rules of the places where the Company's shares are listed, and the

Articles of Association, diligently perform their duties, play roles in participating in decision-making, providing checks and balances and offering professional consultation within the board of directors, safeguard the interests of the Company as a whole, and protect the legitimate rights and interests of small and medium shareholders.

The Company shall establish a mechanism for special meetings composed entirely of independent directors. Where the board of directors deliberates related-party transactions and other matters, prior consent shall be obtained through such special meetings of independent directors.

The Company shall convene special meetings of independent directors on a regular or ad hoc basis. The matters listed in items (I) to (III) under the first paragraph of Article 130 and in Article 131 of the Articles of Association shall be reviewed at such special meetings of independent directors.

Special meetings of independent directors may also, as needed, study and discuss other matters of the Company.

A convenor and chairperson for a special meeting of independent directors shall be jointly elected by more than half of all independent directors. If the convenor fails or is unable to perform his or her duties, two or more independent directors may convene the meeting themselves and elect a representative to preside.

Minutes shall be prepared for special meetings of independent directors in accordance with the relevant requirements, and the opinions of independent directors shall be clearly recorded in the minutes. Independent directors shall sign to confirm the minutes.

The Company shall provide convenience and support for the convening of special meetings of independent directors.

Special Committees of the Board of Directors

The board of directors of the Company shall establish an Audit Committee, which shall exercise the powers and functions of a board of supervisors as prescribed by the Company Law, as well as those prescribed by the securities regulatory rules of the place where the Company's shares are listed. The Audit Committee shall consist of three to five non-executive directors who do not hold any senior management positions within the Company. A majority of its members shall be independent directors (including at least one independent director who is an accounting professional). None of the members shall maintain any relationship with the Company that may affect their independent and objective judgment. The convener of the Audit Committee shall be an independent director who is an accounting professional. At least one independent director must possess appropriate professional qualifications as required by the securities regulatory rules of the place where the Company's shares are listed, or possess appropriate accounting or related financial management expertise.

The board of directors of the Company shall establish the special committees such as the Strategy Committee, the Nomination Committee, the Remuneration and Appraisal Committee, which shall perform their duties in accordance with the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association and the authorization of the board of directors. Proposals made by these special committees shall be submitted to the board of directors for consideration and decision. The terms of reference of these special committees shall be formulated by the board of directors.

Independent directors shall constitute a majority in the Nomination Committee and the Remuneration and Appraisal Committee. The Nomination Committee shall include at least one director of a different gender. The Nomination Committee shall be convened by an independent director or the Chairman of the Board, while the Remuneration and Assessment Committee shall be convened by an independent director.

SENIOR MANAGEMENT MEMBERS

The Company shall have one chief executive officer, who shall be appointed or dismissed by the board of directors. The Company shall have vice presidents, who shall be appointed or dismissed by the board of directors.

The provisions in the Articles of Association in relation to the circumstances under which a person may not serve as a director and the resignation management system shall apply to the senior management members. The provisions in the Articles of Association regarding the fiduciary duties of directors and the duty of diligence of directors shall apply to the senior management members.

The chief executive officer is responsible to the board of directors and exercises the following powers:

(I) To be in charge of the Company's production, operation and management, and to organize and implement the resolutions of the board of directors and report on works to the board of directors;

(II) To organize and implement the Company's annual business plan and investment proposals;

(III) To draft plans for the establishment of the Company's internal management organizations;

(IV) To draft the fundamental management system of the Company;

(V) To formulate specific rules and regulations for the Company;

(VI) To propose to the board of directors on the appointment or dismissal of vice president, and financial controller of the Company;

(VII) To decide on the appointment or dismissal of management personnel other than those required to be appointed or dismissed by the board of directors;

(VIII) Other functions and powers conferred by the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association or the board of directors.

The chief executive officer shall attend the board meetings.

The Company shall be liable for damages caused to any third party by its senior management personnel in the course of performing their corporate duties. Where such senior management personnel are found to have acted with willful misconduct or gross negligence, they shall also be liable for compensation. If senior management personnel cause losses to the Company by violating laws, administrative regulations, departmental rules, the securities regulatory rules of the place where the Company's shares are listed, or the provisions of these Articles of Association while performing their duties, they shall be liable for compensation to the Company.

FINANCIAL AND ACCOUNTING SYSTEM, PROFIT DISTRIBUTION AND AUDIT

Financial and Accounting System

The Company shall establish its financial and accounting system in accordance with the laws, administrative regulations, securities regulations and rules of the places where the Company's shares are listed and the provisions stipulated by the relevant authorities of the PRC.

The Company shall submit and disclose its annual reports to the relevant branch office of the CSRC and the stock exchange of the place where the shares of the Company are listed within four months from the end of each fiscal year, and its interim reports to the relevant branch office of the CSRC and the stock exchange of the place where the shares of the Company are listed within two months from the end of the first half of each fiscal year.

The above annual reports and interim reports shall be prepared in accordance with relevant laws, administrative regulations, departmental rules and securities regulations and rules of the places where the Company's shares are listed.

The Company will not establish account books other than the statutory account books. The assets of the Company shall not be deposited in any personal account.

The Company is required to allocate 10% of its profits into its statutory reserve fund when distributing each year's after-tax profits. When the cumulated amount of the statutory reserve fund of the Company has reached 50% or more of its registered capital, no further allocations is required.

Where the statutory reserve fund of the Company is insufficient to make up the losses of the Company for the preceding year, profits of the current year shall be applied to make up the losses before any allocation to the statutory reserve fund in accordance with the provisions in the preceding paragraph.

Subject to a resolution of the shareholders' meeting, after allocation has been made to the Company's statutory reserve fund from its after-tax profits, the Company may also draw the discretionary reserve fund from the after-tax profits.

After making up of losses and appropriation to reserve funds, balance of the profit after tax shall be distributed to shareholders in proportion to their shareholdings, unless otherwise provided in these Articles of Association.

Where the shareholders' meeting distributes profits to shareholders in violation of the Company Law, the shareholders shall return the profits so distributed in breach of regulations to the Company; if losses are caused to the Company, the shareholders and the directors and senior management members who are responsible shall bear liability for compensation.

No profit shall be distributed in respect of the shares of the Company which are held by the Company.

The Company's common reserve shall be used to cover losses of the Company, expand the Company's production and operations, or be converted into additional registered capital of the Company.

The company's capital reserve is used to cover losses, expand production and operations, or increase the company's capital. However, the capital reserve is not used to cover losses. When the statutory provident fund is converted into capital, the retained provident fund shall not be less than 25% of the registered capital of the Company before the conversion.

The Company's board of directors must complete the distribution of dividends (or shares) within two months after the meeting of shareholders has approved the profit distribution plan, or after the board has formulated a specific plan in accordance with the conditions and caps for interim dividends for the following year approved at the annual meeting. Except under special circumstances, the Company shall pay cash dividends of no less than 10% of the distributable profits recorded in the fiscal year.

The Company's profit distribution shall balance the provision of reasonable investment returns to investors with the Company's sustainable development. The profit distribution policy shall maintain continuity and stability.

Profit distribution may be made in the form of cash, shares, or a combination of cash and shares, with cash dividends being the preferred method.

Internal Audit

The Company has implemented an internal audit system, which shall specify the leadership structure, responsibilities and authorities, staffing, funding safeguards, utilization of audit results, and accountability mechanisms for internal audit work.

The internal audit system of the Company shall be implemented upon approval by the board of directors and shall be disclosed externally.

The internal audit department of the Company shall supervise and inspect the Company's business activities, risk management, internal controls and financial information.

Appointment of Accounting Firm

The Company shall appoint such accounting firm which has complied with the Securities Law and securities regulations and rules of the places where the Company's shares are listed for carrying out the audit for the accounting statements, net asset verification and other relevant consultancy services. The term of appointment is one year and can be re-appointed.

The appointment and removal of accounting firm by the Company shall be subject to the approval of the shareholders' meeting. The board of directors may not appoint accounting firm before the approval of the shareholders' meeting.

The Company guarantees that it shall provide the appointed accounting firm with true and complete accounting vouchers, accounting books, financial and accounting reports and other accounting information, and that it engages without any refusal, withholding, and misrepresentation.

The audit fees of an accounting firm shall be determined at the shareholders' meeting.

If the Company removes or no longer re-appoints the accounting firm, it shall notify such accounting firm 10 days in advance. When shareholders vote for the removal of such accounting firm, such accounting firm shall be entitled to state its opinions at the shareholders' meeting.

If any accounting firm offers to resign, it shall explain to the shareholders' meeting whether the Company has engaged in any misconduct.

MERGER, SPIN-OFF, CAPITAL INCREASE AND REDUCTION, DISSOLUTION AND LIQUIDATION

Merger, Spin-off, Capital Increase and Reduction

Corporate merger may take the form of merger by absorption or by establishment. Merger by absorption refers to a company absorbing another company, in which the company being absorbed shall be dissolved. Merger by establishment refers to the establishment of a new company by merging two or more companies, whereby the merging parties shall be dissolved.

Where the consideration for a merger does not exceed 10% of the Company's net assets, it may be approved without a resolution of the shareholders' meeting, except as otherwise provided in the Articles of Association. If the Company proceeds with a merger without a resolution of the shareholders' meeting in accordance with the preceding paragraph, it shall be approved by a resolution of the board of directors.

In the event of any merger involving the Company, the Company shall enter into a merger agreement with other parties involved and prepare a balance sheet and a list of assets. The Company shall notify its creditors within 10 days after the adoption of the relevant resolution and publish announcements in the newspapers designated by the Company or on the National Enterprise Credit Information Publicity System within 30 days. The creditors may request the Company to discharge its obligations or offer appropriate security within 30 days after receiving such notice, or if they fail to receive such notice, within 45 days after the publication of such announcement.

In the event of any merger involving the Company, the surviving company or the newly established company shall assume all claims and debts of the parties involved in such merger.

In the event of any spin-off of the Company, its assets shall be divided accordingly. In the event of any spin-off of the Company, the Company shall prepare a balance sheet and a list of assets, notify its creditors within 10 days from the date of the resolution of spin-off and publish announcements in the newspapers designated by the Company or on the National Enterprise Credit Information Publicity System within 30 days.

Unless otherwise agreed by the Company and its creditors in writing prior to such spin-off with respect to the discharge of obligations, the company spun off from the Company shall be jointly and severally liable for the obligations of the Company prior to such spin-off.

The Company shall prepare a balance sheet and a list of assets on the reduction of its registered capital. The Company shall notify its creditors within 10 days after the adoption of the relevant resolution on the reduction of the registered capital at the shareholders' meeting and publish announcements in the newspapers designated by the Company or on the National Enterprise Credit Information Publicity System within 30 days. The creditors may request the Company to discharge its obligations or offer appropriate security within 30 days after receiving such notice, or if they fail to receive such notice, within 45 days after the publication of such announcement.

Where the Company reduces its registered capital, it shall reduce the capital contributions or shares held by shareholders proportionately according to their shareholding, except as otherwise provided by law, securities regulations and rules of the places where the Company's shares are listed or the Articles of Association.

When the Company issues new shares to increase its registered capital, shareholders shall not have pre-emptive rights, except as otherwise provided in the Articles of Association or if a resolution is passed at the shareholders' meeting granting shareholders such pre-emptive rights.

Where the merger or spin-off of the Company results in a change in its registered particulars, such change shall be registered with the company registry according to law. Where the Company is dissolved, it shall cancel its registration according to law. Where a new company is established, its establishment shall be registered according to law. Any increase or reduction of the registered capital of the Company shall be registered with the company registry according to law.

Dissolution and Liquidation

The Company shall be dissolved for the following reasons:

(I) Expiry of term of business stipulated in the Articles of Association or occurrence of any other trigger for dissolution stipulated in the Articles of Association;

(II) The shareholders' meeting adopts a resolution to dissolve;

(III) The Company needs to be dissolved for the purpose of merger or division;

(IV) The business license is revoked, or the Company is ordered to close or be eliminated according to applicable law;

(V) Where the Company encounters significant difficulties in business and management, continuous survival may be significantly detrimental to the interests of the shareholders, and the difficulties may not be overcome through other means, shareholders who hold not less than 10% of voting rights of the Company's shareholders may request the people's court to dissolve the Company.

If dissolution causes stipulated in the preceding paragraph occur, the Company shall publicize the dissolution causes through the National Enterprise Credit Information Publicity System within ten days.

Under the circumstance set out in item (I) above and assets have not yet been distributed to the shareholders, the Company may continue its operation by amending the Articles of Association or resolution of the shareholders' meeting. Any amendment to the Articles of Association or resolution of the shareholders' meeting pursuant to the foregoing provision shall be subject to approval of two thirds or more of the votes held by the shareholders present at the shareholders' meeting.

Where the Company is dissolved under the circumstances set out in items (I), (II), (IV) and (V) above, it shall be liquidated. The directors shall be the liquidation obligors of the Company and the liquidation committee shall be established within 15 days from the date of the event leading to liquidation. The personnel of the liquidation committee shall consist of directors, except where otherwise provided in the Articles of Association or otherwise selected by the resolution at the shareholders' meeting. If a liquidation obligor fails to promptly perform his/her liquidation obligations, causing losses to the Company or creditors, such obligor shall be liable for compensation.

Within 10 days of the establishment of the liquidation committee, the creditors shall be notified and an announcement shall be published in the newspapers designated by the Company or on the National Enterprise Credit Information Publicity System within 60 days. The creditors shall declare their claims to the liquidation committee within 30 days of the date on which the notice is received or 45 days of the date of announcement if the notice is not received.

Creditors who declare claims shall state relevant issues related to the claims and provide proofs. The liquidation committee shall carry out registration of the claims.

During the period for declaration of claims, the liquidation committee shall not make any repayment to the creditors.

After the liquidation committee has examined and taken possession of the assets of the Company and prepared a balance sheet and a list of assets, it shall formulate a liquidation proposal and submit it to the shareholders' meeting or the people's court for confirmation.

The remaining assets of the Company after paying the costs of liquidation, the employees' salaries, social insurance contributions and legal compensation, taxes and debts of the Company shall be distributed to the shareholders in proportion to their respective shareholding.

During the period of liquidation, the Company shall not engage in any business activity except for those relating to the liquidation. Before liquidation as specified in the preceding paragraphs, the assets of the Company shall not be distributed to shareholders.

In the event the liquidation committee finds that, after taking stock of the Company's property and preparing the balance sheet and list of property, that the assets are insufficient to pay the debts, it shall apply to the people's court for bankruptcy liquidation according to the law.

AMENDMENTS TO THE ARTICLES OF ASSOCIATION

Under any of the following circumstances, the Company shall amend the Articles of Association:

(I) Following the revision of the Company Law or relevant laws and administrative regulations or securities regulations and rules of the places where the Company's shares are listed, the matters stipulated in the Articles of Association contradict the provisions of the revised laws and administrative regulations or securities regulations and rules of the places where the Company's shares are listed;

(II) There is any change to the Company's particulars which result in inconsistency with the matters set out in the Articles of Association;

(III) A shareholders' meeting has decided on making amendments to the Articles of Association.

If the amendment to the Articles of Association adopted by resolution of the shareholders' meeting is subject to the approval of the competent authority, it shall be reported to the competent authority for approval; if it involves matters of company registration, the registration of the changes shall be made in accordance with the law.

The board of directors shall amend the Articles of Association in accordance with the resolutions of the shareholders' meeting and the comments of the competent authorities on any amendment hereto.

Any amendment to the Articles of Association shall be subject to announcement if so required by the laws and regulations.

FURTHER INFORMATION ABOUT THE GROUP

Incorporation

The Company was established as a limited liability company under the laws of the PRC on October 28, 1998 and was converted into a joint stock company with limited liability on December 24, 2007.

The Company has established a principal place of business in Hong Kong at Room 1919, 19/F, Lee Garden One, 33 Hysan Avenue, Causeway Bay, Hong Kong. The Company was registered as a non-Hong Kong company in Hong Kong under Part 16 of the Companies Ordinance (Chapter 622 of the Laws of Hong Kong) and the Companies (Non-Hong Kong Companies) Regulation (Chapter 622J of the Laws of Hong Kong) on November 11, 2025, with Mr. TSANG Chun Ho appointed as the Hong Kong authorized representative of the Company for acceptance of the service of process and any notices required to be served on the Company in Hong Kong.

As the Company was incorporated in the PRC, its operations are subject to the relevant laws and regulations of the PRC. A summary of the relevant aspects of laws and regulations of the PRC and the Articles of Association is set out in "Regulatory Overview" and "Appendix III – Summary of the Articles of Association" in this prospectus, respectively.

Changes in the Share Capital of the Company

On June 27, 2025, the total issued share capital of the Company increased from RMB1,705,913,710 comprising 1,705,913,710 A Shares to RMB1,831,607,532 comprising 1,831,607,532 A Shares upon the placement on June 27, 2025.

Save as disclosed above, there has been no alteration in the share capital of the Company within two years immediately preceding the date of this prospectus.

Resolutions of the Shareholders

At the extraordinary general meeting of the Shareholders held on November 3, 2025, the following resolutions, among other things, were duly passed:

(i) the issue by the Company of the H Shares with a nominal value of RMB1.00 each and such H Shares be listed on the Stock Exchange;

(ii) the number of the H Shares to be issued shall be no more than 10% of the total issued share capital of the Company as enlarged by the Global Offering, and the grant of the Over-allotment Option in respect of no more than 15% of the number of the H Shares issued pursuant to the Global Offering;

(iii) authorization of the Board or its authorized individuals to handle all matters relating to, among other things, the Global Offering, the issue and listing of the H Shares on the Stock Exchange; and

(iv) subject to the completion of the Global Offering, the conditional adoption of the revised Articles of Association, which shall become effective on the Listing Date, and the authorization to the Board to amend the Articles of Association in accordance with the requirements of the relevant laws and regulations and the Listing Rules.

Subsidiaries of the Company

A summary of the corporate information and the particulars of the Company's primary subsidiaries are set out in Note 17 to the Accountant's Report as set out in Appendix IA.

- On November 3, 2024, the registered capital of Multek Industries increased from US $113,100,000 to US$125,989,000. On September 18, 2025, the registered capital of Multek Industries increased from US$125,989,000 to US$144,989,000.
- On November 28, 2024, the registered capital of Yancheng Dongchuang Precision Manufacturing Co., Ltd. (鹽城东創精密制造有限公司) increased from RMB300,000,000 to RMB500,000,000.
- On June 26, 2025, the registered capital of MFLEX Yancheng increased from US$234,990,000 to US$254,990,000. On February 25, 2026, the registered capital of MFLEX Yancheng increased from US$254,990,000 to US$264,990,000.
- On February 2, 2026, the registered capital of Multek China increased from US$63,800,000 to US$230,800,000.
- On June 8, 2026, the registered capital of MFLEX Thailand increased from THB3,500,000,000 to THB5,000,000,000.

Save as disclosed above, there has been no alteration in the share capital of the major subsidiaries of the Company within two years immediately preceding the date of this prospectus.

FURTHER INFORMATION ABOUT THE BUSINESS

Summary of Material Contracts

The Group has entered into the following contracts (not being contracts entered into in the ordinary course of business) within the two years immediately preceding the date of this prospectus that are or may be material:

(a) the Hong Kong Underwriting Agreement.

(b) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Aurora SF, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 150,000,000.

(c) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, HK Yonglian Investment Development Co., Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited, CLSA Limited and The Hongkong and Shanghai Banking Corporation Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 87,999,000.

(d) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, JPMorgan Asset Management (Asia Pacific) Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 75,000,000.

(e) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Alibaba Investment Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 45,000,000.

(f) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, CPE Bodhi Investment Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 38,000,000.

(g) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, LMR Multi-Strategy Master Fund Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 30,000,000.

(h) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Foresight Global Superior Choice SPC — Global Superior Choice Fund 1 SP, Foresight Global Superior Choice SPC — Vision Fund 1 SP, Foresight Global Superior Choice SPC — Vision Fund 3 SP, Foresight Global Superior Choice SPC — Horizon Fund 1 SP, Foresight Global Superior Choice SPC — Horizon Next Fund SP, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 30,000,000.

(i) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Montage Hong Kong Holdings Company Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 25,000,000.

(j) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Orient Asset Management (Hong Kong) Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 20,000,000.

(k) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Spring River Greater China Fund, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 20,000,000.

(l) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Jane Street Singapore Pte. Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 20,000,000.

(m) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Nexchip Semiconductor Hong Kong Corporation Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 19,000,000.

(n) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Pinpoint Asset Management Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

(o) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, FS.COM HK LIMITED, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

(p) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Tianhong Asset Management Co., Ltd., UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

(q) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, New China Asset Management (Hong Kong) Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

(r) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Ghisallo Fund Master Ltd, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

(s) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, Jump Trading Pacific Pte. Ltd., UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

(t) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, V-Capital International Holding Co., Limited, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

(u) a cornerstone investment agreement dated October 16, 2026 entered into among the Company, LUO Zhongli, UBS Securities Hong Kong Limited, Haitong International Capital Limited, GF Capital (Hong Kong) Limited, CITIC Securities (Hong Kong) Limited, UBS AG Hong Kong Branch, Haitong International Securities Company Limited, GF Securities (Hong Kong) Brokerage Limited and CLSA Limited, with respect to a subscription of H Shares at the Offer Price in the aggregate amount of the Hong Kong dollar equivalent of US dollar 15,000,000.

Patents

As of the Latest Practicable Date, the Group had registered the following patents which are material to its business:

No.	Patent Name	Type	Patent Holder	Jurisdiction of Registration	Patent Number	Expiry Date (yyyy-mm-dd)
1	ONCELL Liquid Crystal Display Control Circuit and ONCELL Liquid Crystal Display Control Module (一種ONCELL液晶顯示控製電路及ONCELL液晶顯示控製模組)	Invention	The Company	The PRC	ZL201810498999.5	2038-05-22
2	Method for Improving Blind Hole Air Bubble Defects in Full-Lamination of Touchscreen Displays for Mobile Phones (一種改善盲孔類手機觸控顯示屏全貼合盲孔氣泡不良方法)	Invention	The Company	The PRC	ZL202111600132.4	2041-12-23
3	Display Panel IC Packaging Structure for Thermal Stress Resistance (一種顯示面板 IC封裝防溫衝應力結構)	Utility	The Company	The PRC	ZL202023006364.0	2030-12-14
4	Novel Polariser and Full-Screen Display (新型的偏光片及全面顯示屏)	Utility	The Company	The PRC	ZL201920239003.9	2029-02-25

No.	Patent Name	Type	Patent Holder	Jurisdiction of Registration	Patent Number	Expiry Date (yyyy-mm-dd)
5	An Ultra-Thin Flexible Touch Screen and Its Preparation Method (一種超薄柔性觸摸屏及其製備方法)	Invention	Mutto Optronics	The PRC	ZL202210327203.6	2042-03-29
6	Touchscreen Sensor Integrating FPC Flexible Circuit, Touchscreen and Method for Preparing the Same (集成FPC柔性線路的觸摸屏sensor、觸摸屏及其製備方法)	Invention	Mutto Optronics	The PRC	ZL202210298769.0	2042-03-23
7	A Touchscreen Display Without Etched Patterns and Its Manufacturing Method (一種無蝕刻紋的觸控顯示屏及其製造方法)	Invention	Mutto Optronics	The PRC	ZL202110987884.4	2041-08-25
8	A Metal Mesh Touch Display Screen and Its Manufacturing Method (一種金屬網格觸控顯示屏及其製作方法)	Invention	Mutto Optronics	The PRC	ZL202110896228.3	2041-08-04
9	Pre-curved Laminating Method for Curved Touch Screens (曲面觸摸屏的預彎曲貼合方法)	Invention	Mutto Optronics	The PRC	ZL201510144940.2	2035-03-30
10	Capacitive Touch Screen and Method for Preparing the Same (一種電容式觸摸屏及其製備方法)	Invention	Suzhou Display	The PRC	ZL201810787388.2	2038-07-17
11	Method for Detecting Copper Thickness in Holes on Flexible Printed Circuits (柔性線路板上孔銅厚度的檢測方法)	Invention	MFLEX Yancheng	The PRC	ZL202210799003.0	2042-07-05
12	Method for Fabricating Fine Outer Layer Circuits on Flexible Printed Circuits (一種柔性線路板外層細線路的製作方法)	Invention	MFLEX Yancheng	The PRC	ZL202210141512.4	2042-02-15
13	An SMT Production Line (一種SMT生產線)	Invention	MFLEX Yancheng	The PRC	ZL202210350046.0	2042-04-01

No.	Patent Name	Type	Patent Holder	Jurisdiction of Registration	Patent Number	Expiry Date (yyyy-mm-dd)
14	Repeatedly Retractable Flexible Printed Circuit Board and Method of Manufacturing the Same (可重複伸縮的柔性線路板及其製作方法)	Invention	MFLEX Yancheng	The PRC	ZL202310411595.9	2043-04-17
15	An Automatic Electrical Testing Device (一種自動電測設備)	Invention	MFLEX Yancheng	The PRC	ZL202210207390.4	2042-03-03
16	Flexible Printed Circuit Board with Gold Finger Pull Tab and Method of Manufacturing the Same (具有金手指拉環的柔板及其製作方法)	Invention	MFLEX Yancheng	The PRC	ZL202210505963.1	2042-05-09
17	Method, System, Apparatus and Storage Medium for Compensating Etched Circuits on Flexible Printed Circuits (柔性線路板蝕刻線路補償方法、系統、裝置及存儲介質)	Invention	MFLEX Suzhou, MFLEX Yancheng	The PRC	ZL202410941006.2	2044-07-14
18	Method, System, Apparatus and Storage Medium for Anomaly Detection in Flexible Printed Circuit Board Production Lines (柔板產線異常檢測方法、系統、裝置和存儲介質)	Invention	MFLEX Suzhou, MFLEX Yancheng	The PRC	ZL202410532832.1	2044-04-29

DISCLOSURE OF INTERESTS

Disclosure of Interests of Directors and Chief Executive of the Company

Immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised), the interests and/or short positions (as applicable) of the Directors and the chief executive of the Company in the Shares, underlying Shares and debentures of the Company and any interests and/or short positions (as applicable) in shares, underlying shares or debentures of any of the associated corporations of the Company (within the meaning of Part XV of the SFO) which (1) will have to be notified to the Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests and/or short positions (as applicable) which they are taken or deemed to have under such provisions of the SFO), (2) will be required, pursuant to Section 352 of the SFO, to be entered in the register referred to therein or (3) will be required, pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers as set out in Appendix C3 to the Listing Rules, to be notified to the Company and the Stock Exchange, in each case once the H Shares are listed on the Stock Exchange, will be as follows:

(i) Interests in the Company

Name of Director or chief executive	Nature of interest	Number and description of Shares or underlying Shares held	Shareholding in A Shares upon completion of the Global Offering[(1)]	Shareholding in total issued share capital upon completion of the Global Offering[(1)]
Mr. Yuan Yonggang[(2)]	Beneficial interest	302,781,254 A Shares	16.53%	15.56%
Mr. Yuan Yongfeng[(2)]	Beneficial interest	247,526,917 A Shares	13.51%	12.72%
Mr. Shan Jianbin	Beneficial interest	553,700 A Shares	0.03%	0.03%
Mr. Wang Xu	Beneficial interest	560,000 A Shares	0.03%	0.03%
Ms. Mao Xiaoyan	Beneficial interest	391,600 A Shares	0.02%	0.02%
Mr. Ma Liqiang	Beneficial interest	3,000 A Shares	0.0002%	0.0002%

Notes:

(1) The calculation is based on the total number of 1,945,390,732 Shares in issue immediately following the completion of the Global Offering (assuming the Offer Size Adjustment Option and the Over-allotment Option are not exercised).

(2) As of the Latest Practicable Date, Mr. Yuan Yonggang pledged 104,828,000 A Shares and Mr. Yuan Yongfeng pledged 46,583,800 A Shares to certain PRC securities companies regulated by the CSRC. For details, see "Substantial Shareholders — Share Pledges by Mr. Yuan Yonggang and Mr. Yuan Yongfeng."

(ii) Interests in the associated corporations of the Company

So far as the Directors are aware, immediately following the completion of the Global Offering, no Directors or the chief executive will, directly or indirectly, be interested in the Shares, underlying Shares and debentures of the Company or the shares, underlying shares or debentures of any of the associated corporations of the Company.

Disclosure of Interests of Substantial Shareholders

(i) Interests in the Company

Save as disclosed in "Substantial Shareholders" in this prospectus and "– Disclosure of Interests of Directors and Chief Executive of the Company – (i) Interests in the Company" in this section, the Directors are not aware of any person who will have an interest or a short position in the Shares or underlying Shares of the Company which would fall to be disclosed to the Company under the provisions of Divisions 2 and 3 of Part XV of the SFO.

(ii) Interests in other member of the Group

Member of the Group	Name of substantial shareholder	Approximate percentage of the issued voting shares held by the substantial shareholder
Suzhou Jebson Intelligent Technology Co., Ltd. (蘇州捷佈森智能科技有限公司)	Zhu Wenbing (朱文兵)	49.00%
Suzhou Dongdai Electronic Technology Co., Ltd. (蘇州東岱電子科技有限公司)	Qian Baolong (錢寶龍)	30.33%
	Chen Limin (陳利民)	18.67%
Shenzhen Qin Tao Dongchuang Investment Partnership (Limited Partnership) (深圳市勤道東創投資合夥企業（有限合夥）)	Pingxiang Qin Tao Xin Equity Investment Fund Center (Limited Partnership) (萍鄉市勤道鑫控股權投資基金中心（有限合夥）)	20.77%
Source Jiangsu	Zhuhai Hengqin Anshi Information Consulting Partnership (Limited Partnership) (珠海橫琴安實信息諮詢合伙企業(有限合夥))	10.00%
Chengdu Antong Semiconductor Co., Ltd. (成都安瞳半導體有限公司)	Kunshan Qi Village Investment Center (L.P) (昆山啟村投資中心(有限合夥))	13.20%

Save as disclosed above, the Directors are not aware of any person who will be, directly or indirectly, interested in 10% or more of the issued voting shares of any other member of the Group.

FURTHER INFORMATION ABOUT THE DIRECTORS

Particulars of the Service Contracts

Each of the Directors has entered into a service contract with the Company. The principal particulars of these service contracts comprise (a) the term of the service; (b) termination provisions; and (c) dispute resolution provision. The service contracts may be renewed in accordance with the Articles of Association and the applicable laws, rules and regulations from time to time.

Save as disclosed above, none of the Directors has or is proposed to have entered into any service contract with any member of the Group (excluding contracts expiring or determinable by any member of the Group within one year without payment of compensation other than statutory compensation).

Remuneration of Directors

For details of the remuneration of Directors, see "Directors and Senior Management – Remuneration" and Note 10 in "Appendix IA – Accountants' Report of the Group."

Agency Fees or Commissions Received

The Underwriters will receive an underwriting commission in connection with the Underwriting Agreements, as detailed in "Underwriting – Commission and Expenses." Save in connection with the Underwriting Agreements, no commissions, discounts, brokerages or other special terms have been granted by the Group to any person (including the Directors, promoters and experts referred to in "– Other Information – Qualifications and Consents of Experts" below) in connection with the issue or sale of any capital or security of the Company or any member of the Group within the two years immediately preceding the date of this prospectus.

Within the two years immediately preceding the date of this prospectus, no commission has been paid or is payable for subscription, agreeing to subscribe, procuring subscription or agreeing to procure subscription for any share in or debentures of the Company.

Personal Guarantees

The Directors have not provided personal guarantees in favor of lenders in connection with banking facilities granted to the Group.

Disclaimers

(a) None of the Directors nor any of the experts referred to in "– Other Information – Qualifications and Consents of Experts" below has any direct or indirect interest in the promotion of, or in any assets which have been, within the two years immediately preceding the date of this prospectus, acquired or disposed of by, or leased to, any member of the Group, or are proposed to be acquired or disposed of by, or leased to, any member of the Group.

(b) Save in connection with the Underwriting Agreements, none of the Directors nor any of the experts referred to in "– Other Information – Qualifications and Consents of Experts" below, is materially interested in any contract or arrangement subsisting at the date of this prospectus which is significant in relation to the business of the Group.

(c) No cash, securities or other benefit has been paid, allotted or given within the two years preceding the date of this prospectus to any promoter of the Company nor is any such cash, securities or benefit intended to be paid, allotted or given on the basis of the Global Offering or related transactions as mentioned.

EMPLOYEE STOCK OWNERSHIP PLANS

2021 Employee Stock Ownership Plan

The following is a summary of the principal terms of the 2021 Employee Stock Ownership Plan. As of the Latest Practicable Date, 119 participants actually subscribed for units representing 21,914,118 Shares of the Company. There is no outstanding Share under the 2021 Employee Stock Ownership Plan as of the

Latest Practicable Date. The terms of the 2021 Employee Stock Ownership Plan are not subject to the provisions of Chapter 17 of the Listing Rules as they do not involve any grant or subscription of Shares after the Listing.

(i) Purpose

The purpose of the 2021 Employee Stock Ownership Plan is to establish and improve the mechanism for sharing benefits between employees and stakeholders. The 2021 Employee Stock Ownership Plan is implemented to effectively align the interests of the Shareholders, the Company and the employees, and to ensure all parties to jointly focus on the Company's long-term development. The 2021 Employee Stock Ownership Plan aims to further improve corporate governance structure of the Company and to strengthen employee cohesion and enhance the Company's competitiveness, ensuring its sustained and stable growth.

(ii) Administration

The 2021 Employee Stock Ownership Plan is subject to the approval of the Shareholders' meeting, the administration of the Board and the supervision of the independent Directors of the Company.

(iii) Participants

The participants of the 2021 Employee Stock Ownership Plan include eligible (1) Directors (excluding independent Directors), supervisors and senior management of the Company; and (2) intermediate to senior management at director level or above and core personnels of the Company and its wholly-owned subsidiaries, who subscribes Shares of the Company under the plan.

Each eligible participant of 2021 Employee Stock Ownership Plan is entitled to the membership of the plan's holder's meeting ("**2021 Holder's Meeting**"), which is the supreme authority body of 2021 Employee Stock Ownership Plan.

The management committee of 2021 Employee Stock Ownership Plan ("**2021 Management Committee**") is in charge of routine supervision and management of the plan. The 2021 Management Committee shall consist of three members elected by the 2021 Holder's Meeting, who shall bear fiduciary duties to participants.

(iv) Source of funds

The source of funds for the employees to participate in the 2021 Employee Stock Ownership Plan include their lawful compensations, self-raised funds and other sources permitted by laws and regulations. The company does not provide financial assistance to employees or guarantee loans for them.

The funds to be raised under the 2021 Employee Stock Ownership Plan shall not exceed RMB250 million in total, divided into "units" for subscription and each unit is equal to RMB1.00.

(v) Lock-up Period and Duration Period

The 2021 Employee Stock Ownership Plan is subject to a 12-month lock-up period ("**2021 Lock-up Period**"), which commences upon the Company announces the registration and transferral of last subscription of Shares under the plan to the asset management plan corresponding to the 2021 Employee Stock Ownership Plan. During the Lock-up Period, no shares under the plan may be sold.

The duration period of the 2021 Employee Stock Ownership Plan ("**2021 Duration Period**") lasts for 24 months, commencing from the date on which the plan is adopted by the Shareholder's meeting. 2021 Employee Stock Ownership Plan terminates when the 2021 Duration Period ends, or on an earlier

date, provided the Lock-up Period expires and all funds under the 2021 Employee Stock Ownership Plan is cash; or on a later date, subject to the 2021 Management Committee, 2021 Holder's Meeting and the Board's unanimous approval. Within the 2021 Duration Period, participants may not withdraw from the plan or use their subscribed shares for mortgage, pledge, guarantee or repayment of debt. Nor shall such shares subscribed by the participants under the 2021 Employee Stock Ownership Plan be transferred to a third party without consent of the 2021 Management Committee.

(vi) Dividend

Within the 2021 Duration Period, idle cash under the 2021 Employee Stock Ownership Plan may be distributed by the 2021 Management Committee under the authorization of 2021 Holder's Meeting after deducting relevant expenses.

Pursuant to the 2021 Employee Stock Ownership Plan, liquidation procedure shall conclude within 20 days from the expiry of 2021 Duration Period, and the 2021 Management Committee shall distribute the remaining funds under such plan on a *pro rata* basis to each participant after deducting expenses such as management fees and custodial fees.

2022 Employee Stock Ownership Plan

The following is a summary of the principal terms of the 2022 Employee Stock Ownership Plan. As of the Latest Practicable Date, 366 participants actually subscribed for units representing 4,847,178 Shares of the Company. There is no outstanding Share under the 2022 Employee Stock Ownership Plan as of the Latest Practicable Date. The terms of the 2022 Employee Stock Ownership Plan are not subject to the provisions of Chapter 17 of the Listing Rules as they do not involve any grant or subscription of Shares after the Listing.

(i) Purpose

The purpose of the 2022 Employee Stock Ownership Plan is to establish and improve the mechanism for sharing benefits between employees and stakeholders. The 2022 Employee Stock Ownership Plan is implemented to effectively align the interests of the Shareholders, the Company and the employees, and to ensure all parties to jointly focus on the Company's long-term development. The 2022 Employee Stock Ownership Plan aims to further improve corporate governance structure of the Company and to strengthen employee cohesion and enhance the Company's competitiveness, ensuring its sustained and stable growth.

(ii) Administration

The 2022 Employee Stock Ownership Plan is subject to the approval of the Shareholders' meeting, the administration of the Board and the supervision of the independent Directors of the Company.

(iii) Participants

The participants of the 2022 Employee Stock Ownership Plan primarily include core management personnels and technical backbone specialists of the Company's new energy vehicle business division, who subscribes Shares of the Company under the plan. Directors, supervisors and senior management of the Company do not participate in the plan.

Each eligible participant of 2022 Employee Stock Ownership Plan is entitled to the membership of the plan's holder's meeting ("**2022 Holder's Meeting**"), which is the supreme authority body of 2022 Employee Stock Ownership Plan.

The management committee of 2022 Employee Stock Ownership Plan ("**2022 Management Committee**") is in charge of routine supervision and management of the plan. The 2022 Management Committee shall consist of five members elected by the 2022 Holder's Meeting, who shall bear fiduciary duties to participants.

(iv) Source of funds

The source of funds for the employees to participate in the 2022 Employee Stock Ownership Plan include their lawful compensations, self-raised funds and other sources permitted by laws and regulations. The company does not provide financial assistance to employees or guarantee loans for them.

The funds to be raised under the 2022 Employee Stock Ownership Plan shall not exceed RMB100 million in total, divided into "units" for subscription and each unit is equal to RMB1.00.

(v) Lock-up Period and Duration Period

The 2022 Employee Stock Ownership Plan is subject to a 12-month lock-up period ("**2022 Lock-up Period**"), which commences upon the Company announces the registration and transferral of last subscription of Shares under the plan to the asset management plan corresponding to the 2022 Employee Stock Ownership Plan. During the Lock-up Period, no shares under the plan may be sold.

The duration period of the 2022 Employee Stock Ownership Plan ("**2022 Duration Period**") lasts for 24 months, commencing from the same day as the Lock-up Period, provided that the plan is adopted by the Shareholder's meeting. 2022 Employee Stock Ownership Plan terminates when the 2022 Duration Period ends, or on an earlier date, provided the Lock-up Period expires and all assets under the 2022 Employee Stock Ownership Plan are liquidated into monetary assets; or on a later date, subject to the 2022 Management Committee, 2022 Holder's Meeting and the Board's unanimous approval. Within the 2022 Duration Period, participants may not withdraw from the plan or use their subscribed shares for mortgage, pledge, guarantee or repayment of debt. Nor shall such shares subscribed by the participants under the 2022 Employee Stock Ownership Plan be transferred to a third party without consent of the 2022 Management Committee.

(vi) Dividend

Within the 2022 Duration Period, idle cash under the 2022 Employee Stock Ownership Plan may be distributed by the 2022 Management Committee under the authorization of 2022 Holder's Meeting after deducting relevant expenses.

Pursuant to the 2022 Employee Stock Ownership Plan, liquidation procedure shall conclude within 20 days from the expiry of 2022 Duration Period, and the 2022 Management Committee shall distribute the remaining funds under such plan on a *pro rata* basis to each participant after deducting expenses such as management fees and custodial fees.

2026 Employee Stock Ownership Plan

The following is a summary of the principal terms of the 2026 Employee Stock Ownership Plan. As of the Latest Practicable Date, 150 participants actually subscribed for units representing 3,048,701 Shares of the Company. There is no outstanding Share under the 2026 Employee Stock Ownership Plan as of the Latest Practicable Date. The terms of the 2026 Employee Stock Ownership Plan are not subject to the provisions of Chapter 17 of the Listing Rules as they do not involve any grant or subscription of Shares after the Listing.

(i) Purpose

The purpose of the 2026 Employee Stock Ownership Plan is to establish and improve the mechanism for sharing benefits between employees and stakeholders. The 2026 Employee Stock Ownership Plan is implemented to effectively align the interests of the Shareholders, the Company and the employees, and to ensure all parties to jointly focus on the Company's long-term development. The 2026 Employee Stock Ownership Plan aims to further improve corporate governance structure of the Company and to strengthen employee cohesion and enhance the Company's competitiveness, ensuring its sustained and stable growth.

(ii) Administration

The 2026 Employee Stock Ownership Plan is subject to the approval of the Shareholders' meeting, the administration of the Board and the supervision of the independent Directors of the Company.

(iii) Participants

The participants of the 2026 Employee Stock Ownership Plan include eligible core technology and business personnels of the Company and its subsidiaries, who subscribes Shares of the Company under the plan. Directors and members of senior management are not eligible to participate in the 2026 Employee Stock Ownership Plan.

Each eligible participant of the 2026 Employee Stock Ownership Plan is entitled to the membership of the plan's holder's meeting ("**2026 Holder's Meeting**"), which is the supreme authority body of the 2026 Employee Stock Ownership Plan.

The management committee of the 2026 Employee Stock Ownership Plan (the "**2026 Management Committee**") is in charge of routine supervision and management of the plan. The 2026 Management Committee shall consist of five members elected by the 2026 Holder's Meeting, who shall bear fiduciary duties to participants.

(iv) Source of funds

The source of funds for the employees to participate in the 2026 Employee Stock Ownership Plan include their lawful compensations, self-raised funds and other sources permitted by laws and regulations. The company does not provide financial assistance to employees or guarantee loans for them. The funds to be raised under the 2026 Employee Stock Ownership Plan shall not exceed RMB119,661,500 in total, divided into "units" for subscription and each unit is equal to RMB1.00.

(v) Performance requirements to the Grantees

(vi) Lock-up Period and Duration Period

The 2026 Employee Stock Ownership Plan is subject to a 12-month lock-up period ("**2026 Lock-up Period**"), which commences upon the Company announces the registration and transferral of last subscription of Shares under the plan to the asset management plan corresponding to the 2026 Employee Stock Ownership Plan. During the Lock-up Period, no shares under the plan may be sold.

Vesting Date	Tranche
The date on which 12 months have elapsed from the date of Company's announcement of the registration and transferral of last subscription of Shares under the plan to the asset management plan corresponding to the 2026 Employee Stock Ownership Plan	50%
The date on which 24 months have elapsed from the date of Company's announcement of the registration and transferral of last subscription of Shares under the plan to the asset management plan corresponding to the 2026 Employee Stock Ownership Plan	50%

The duration period of the 2026 Employee Stock Ownership Plan ("**2026 Duration Period**") is 36 months, commencing from the date on which the plan is adopted by the Shareholder's meeting. 2026

Employee Stock Ownership Plan terminates when the 2026 Duration Period ends, or on an earlier date, provided the 2026 Lock-up Period expires and all assets under the 2026 Employee Stock Ownership Plan are liquidated into monetary assets; or on a later date, subject to the 2026 Management Committee and the Board's unanimous approval. Within the 2026 Duration Period, participants may not withdraw from the plan or use their subscribed shares for mortgage, pledge, guarantee or repayment of debt. Nor shall such shares subscribed by the participants under the 2026 Employee Stock Ownership Plan be transferred to a third party without consent of the 2026 Management Committee.

(vii) Dividend

Within the 2026 Duration Period, 2026 Management Committee will be in position to sell shares held by 2026 Employee Stock Ownership Plan on condition that the 2026 Lock-up Period expires.

Pursuant to the 2026 Employee Stock Ownership Plan, liquidation procedure shall conclude within 20 days from the expiry of the 2026 Duration Period, and the 2026 Management Committee shall distribute the remaining funds under such plan on a *pro rata* basis to each participant after deducting expenses such as management fees and custodial fees.

2022 RESTRICTED SHARE INCENTIVE PLAN

The following is a summary of the principal terms of the 2022 Restricted Share Incentive Plan. As of the Latest Practicable Date, the Company actually granted 1,366,120 restricted Shares to 308 participants. There is no outstanding restricted Share under the 2022 Restricted Share Incentive Plan as of the Latest Practicable Date. The terms of the 2022 Restricted Share Incentive Plan are not subject to the provisions of Chapter 17 of the Listing Rules as they do not involve any grant of restricted Shares by the Company after the Listing.

Purpose

The purpose of the 2022 Restricted Share Incentive Plan is to establish an appraisal and incentive system which is innovative, scientific, fair, reasonable, executable and durable in the mid to long run. The 2022 Restricted Share Incentive Plan is implemented to enhance employees' satisfaction and loyalty to our Company, which guarantees the achievement of the Company's strategic targets.

Administration

The 2022 Restricted Share Incentive Plan is subject to the approval of the Shareholders' meeting, the administration of the Board and the supervision of the board of supervisors and independent Directors of the Company.

Participants

The participants of the 2022 Restricted Share Incentive Plan include core management personnels and technology experts of the Company and its subsidiaries. The scope of participants of the 2022 Restricted Share Incentive Plan excludes Directors, supervisors, senior management, Shareholders who hold more than 5% of the Shares or *de facto* controllers of the Company.

Source and maximum number of restricted Shares

The underlying Shares of the 2022 Restricted Share Incentive Plan are the A Shares repurchased by the Company and the maximum number of restricted Shares that can be granted under the 2022 Restricted Share Incentive Plan is 1,366,120 Shares.

Lock-up Period, Duration Period and vesting of restricted Shares

The 2022 Restricted Share Incentive Plan is subject to a 12-month lock-up period ("**Lock-up Period**"), which commences upon the transferral of Shares to the 2022 Restricted Share Incentive Plan concludes. During the Lock-up Period, no shares under the plan may be sold.

The duration period of the 2022 Restricted Share Incentive Plan ("**Duration Period**") lasts for 36 months, commencing from the same day as the Lock-up Period, provided that the plan is adopted by the Shareholder's meeting.

The vesting period for the restricted Shares commences from the date on which all Shares have been transferred to the 2022 Restricted Share Incentive Plan. The restricted Shares will be vested in tranches of 50% and 50% in each of the two vesting periods that occurs after 12-month anniversary and 24-month anniversary from the commencement of Lock-up period, respectively.
